Handwriting Exercise Book

HANDWRITING EXERCISE BOOK With Red and Blue Lines Give your child a head start with their penmanship skills; this handwriting exercise book is aimed at helping children learn how to write letters and numbers, with improved legibility. * 4mm wide blue-lined & 16mm red-lined aimed to help place ascending and descending letters * 8.5 x 11 inch (216mm x 279mm) size * 40 pages * 90 gsm white paper * Color printing * Durable glossy finish cover * Suitable for pencil or pen writing Perfect gift for kids/children, teens, primary/elementary school boys and girls Grab a copy into your shopping cart Now!

Red and Blue Line Notebook

Excellent Handwriting Sets Path For A Bright Future. For a kid it is very important to grab where the starting point of a letter is and where he/she has to end it. That is why this book offered a colored interior and differs from books containing black and white lines/dotted lines. The book has enough space between two blue lines and red lines within one block and space between blocks itself so that a child can easily differentiate and make his capital and small letter writing in organized way. Please see the Look Inside option or the front cover. Also, to know how to write between red and blue lines for a kid, we have given a little sample reference - asking Name, Grade and Subject in the introductory page. Specifications: Colored Interior With Pure White Pages Space To Write Date On Each Page Premium & Glossy Cover Spacious Sheets 10 Blocks Of 4 Red And Blue Lines On Each Page, 1100 Lines To Write Go Up Right And Click 'Add To Cart'!

Genetic Algorithms in Applications

Genetic Algorithms (GAs) are one of several techniques in the family of Evolutionary Algorithms - algorithms that search for solutions to optimization problems by "evolving" better and better solutions. Genetic Algorithms have been applied in science, engineering, business and social sciences. This book consists of 16 chapters organized into five sections. The first section deals with some applications in automatic control, the second section contains several applications in scheduling of resources, and the third section introduces some applications in electrical and electronics engineering. The next section illustrates some examples of character recognition and multi-criteria classification, and the last one deals with trading systems. These evolutionary techniques may be useful to engineers and scientists in various fields of specialization, who need some optimization techniques in their work and who may be using Genetic Algorithms in their applications for the first time. These applications may be useful to many other people who are getting familiar with the subject of Genetic Algorithms.

A critical mapping of the multiplicities of Finnish artist and technology pioneer Erkki Kurenniemi—composer of electronic music, experimental filmmaker, inventor, collector, futurologist. Over the past forty years, Finnish artist and technology pioneer Erkki Kurenniemi (b. 1941) has been a composer of electronic music, experimental filmmaker, computer animator, roboticist, inventor, and futurologist. Kurenniemi is a hybrid—a scientist-humanist-artist. Relatively unknown outside Nordic countries until his 2012 Documenta 13 exhibition, "In 2048," Kurenniemi may at last be achieving international recognition. This book offers an excavation, a critical mapping, and an elaboration of Kurenniemi's multiplicities. The contributors describe Kurenniemi's enthusiastic, and rather obsessive, recording of everyday life and how this archiving was part of his process; his exploratory artistic practice, with productive failure an inherent part of his method; his relationship to scientific and technological developments in media culture; and his work in electronic and digital music, including his development of automated composition systems and his "video-organ," DIMI-O. A "Visual Archive," a section of interviews with the artist, and a selection of his original writings (translated and published for the first time) further document Kurenniemi's achievements. But the book is not just about one artist in his time; it is about emerging media arts, interfaces, and archival fever in creative practices, read through the lens of Kurenniemi.
