Life of a Star

Find out about the life cycle of stars from their fiery beginning to their spectacular end.

Bridges: Life of a Star

Set during the Nazi occupation of Prague, *Life with a Star* records the day-to-day life of Josef Roubicek, an ex-bank clerk, who discovers that the prosaic world he has always inhabited is suddenly off-limits to him because he is a Jew. "One of the most powerful works to emerge from the Holocaust; it is a fierce and necessary work of art".--The New York Times.

Life with a Star

Explains how stars are born, how they evolve and their ultimate fates, for a broad general audience.

The Life and Death of Stars

When Donald Justice wrote in "On a Picture by Burchfield" that "art keeps long hours," he might have been describing his own life. Although he early on struggled to find a balance between his life and art, the latter became a way of experiencing his life more deeply. He found meaning in human experience by applying traditional religious language to his artistic vocation. Central to his work was the translation of the language of devotion to a learned American vernacular. Art not only provided him with a wealth of intrinsically worthwhile experiences but also granted rich and nuanced ways of experiencing, understanding, and being in the world. For Donald Justice--recipient of some of poetry's highest laurels, including the Pulitzer Prize, the Bollingen Prize, and the Lannan Literary Award for Poetry--art was a way of life. Because Jerry Harp was Justice's student, his personal knowledge of his subject--combined with his deep understanding of Justice's oeuvre--works to remarkable advantage in *For Us, What Music?* Harp reads with keen intelligence, placing each poem within the precise historical moment it was written and locating it in the context of the literary tradition within which Justice worked. Throughout the text runs the narrative of Justice's life, tying together the poems and informing Harp's

interpretation of them. For *Us, What Music?* grants readers a remarkable understanding of one of America's greatest poets.

The Life of a Star

*Includes pictures *Includes a bibliography for further reading When people look up into the night sky, the stars seem fixed and immutable, as unchanging as the darkness of space itself, but the truth is that stars are born, live and die in a never-ending cycle of creation and annihilation. These cycles stretch over such vast spans of time that, to short-lived humans, they seem to last forever. No one knows just how many stars there are, but their number is almost beyond comprehension. When people look up into the night sky, they can see further than they might guess: up to 19 quadrillion miles, the distance to Deneb in Cygnus, a star that is visible from most inhabited parts of Earth. In total, around five thousand stars are visible to the naked eye, though only around two thousand are visible at any one time from a particular place on Earth. All the visible stars are bigger and brighter than the Sun. Of course, there are many more known stars than those that can be seen with the naked eye. Astronomers estimate that in the Milky Way, there may be more than three hundred billion stars, and every other galaxy may have a similar number of stars. How many galaxies are there in the Universe? Again, no one is certain, but most astronomers agree that there must be many billions. Stars begin as vast clouds of dust and gas within galaxies and are known as nebulae. Due to Newton's Law of Global Attraction, the densest areas in these nebulae pull in matter from the surrounding space. The more mass they gain, the more mass they attract. Over time, this accumulation can lead to the creation of a star. From that moment on, an eternal battle begins: gravity tends to contract the star while its growing inner pressure tends to expand it. Nebulae are stellar nurseries, the places where stars are created and an essential part of the life cycle of the Universe. Stars do not last forever. Over time they gradually lose energy and finally die. This process of the creation of new stars and the gradual death of existing stars is part of a vast, cosmic process of recycling that continues all the time. However, that raises the question of how the very first stars were formed and that in turn leads to questions about the origin of the Universe itself. However, the life cycle of stars also has a direct relationship to life here on Earth. Singer Joni Mitchell famously included the line "we are stardust" in her hit song "Woodstock." Surprisingly, it seems that she was absolutely right. In the beginning, the Universe comprised hydrogen, small quantities of helium, minuscule amounts of lithium and almost nothing else. Stars are the engines that provide the raw material from which life itself as well as stellar bodies are created. Each star is like a factory that uses nuclear fusion to convert hydrogen into helium and that in turn is used to create carbon, nitrogen, oxygen and many other elements. When a star dies, it ejects its outer layers, throwing these elements off as cosmic dust. The gravity of planets attracts and captures this dust which settles on the surface, introducing new elements. It is estimated that more than forty thousand tons of cosmic dust arrives on Earth every year and this process has continued as long as there has been a planet Earth. Some of the tiny pieces of dust (most are smaller than one-hundredth the width of a human hair) are very old indeed. Scientists have found what they call "original stardust" on meteorites and asteroids. Many of these have been drifting in space since before the Sun was created. The elements in this dust are the fundamental building-blocks of life and every living organism on Earth is created from elements that were originally produced in long-dead stars. It seems that humans and everything else on the planet really did begin as stardust.

The Life Cycles of Stars

Stellar evolution - the birth, development and death of stars - is central to our current understanding of astronomy, but surprisingly the majority of amateur astronomers lack a full understanding of the physics of stars. Current books on the market tend to be highly theoretical and off-putting, in *Observer's Guide to Stellar Evolution*, Mike Inglis brings this subject to life in a unique way. By combining a step-by-step introduction with suggestions for practical observations of stars at different stages in their evolution, amateur astronomers regardless of their current level of knowledge, will find this book fascinating and informative. -Accessible to every amateur astronomer, regardless of background knowledge. -Step-by-step introduction to the theory of stellar evolution. -Includes many examples of

stars at different stages in their evolution, that the reader can observe for him/herself. -Mathematics is made accessible by being presented in 'boxes' that readers can skip over if they prefer!

Life of a Star

Why write a book about the stars? Of what use is their study? This book covers this ground with a number of anecdotes arising from the author's almost 60 years' experience as a research scientist who has worked with some of the largest telescopes in the world. The text exposes much of what is glossed over in the canned information that the public get and holds nothing back with respect to uncertainties within the subject. People want answers, want somehow to be reassured that someone out there has a handle on things. This book details the basis for our knowledge of the universe, warts and all, and offers important insights as to where the science is going.

Observer's Guide to Stellar Evolution

Every atom of our bodies has been part of a star. Our very own star, the Sun, is crucial to the development and sustainability of life on Earth. This Very Short Introduction presents a modern, authoritative examination of how stars live, producing all the chemical elements beyond helium, and how they die, sometimes spectacularly, to end as remnants such as black holes. Andrew King shows how understanding the stars is key to understanding the galaxies they inhabit, and thus the history of our entire Universe, as well as the existence of planets like our own. King presents a fascinating exploration of the science of stars, from the mechanisms that allow stars to form and the processes that allow them to shine, as well as the results of their inevitable death. ABOUT THE SERIES: The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area. These pocket-sized books are the perfect way to get ahead in a new subject quickly. Our expert authors combine facts, analysis, perspective, new ideas, and enthusiasm to make interesting and challenging topics highly readable.

The Evolution of Stars

In *The Secret Life of Stars*, award-winning astronomer Lisa Harvey-Smith takes us on a cosmic journey to meet some of the weirdest, most extreme, and enigmatic stars in the universe. We all know the Sun, the powerhouse of our solar system, but what about Luyten's Flare, the Rosino-Zwicky Object, or Chantal's variable star? For those whose curiosity takes them far beyond Earth's atmosphere, *The Secret Life of Stars* offers a personal and readily understood introduction to some of the Galaxy's most remarkable stars. Written by award-winning astronomer Lisa Harvey-Smith, each chapter explains various different and unusual stars and their amazing characteristics and attributes, from pulsars, blue stragglers, and white dwarfs, to cannibal stars and explosive supernovae. With beautiful chapter illustrations by Eirian Chapman, this book brings to life the remarkable personalities of these stars, reminding readers what a diverse and unpredictable universe we live in and how fortunate we are to live around a stable star, our Sun.

Stars: A Very Short Introduction

Julius Schlesinger, aspiring SS officer, has received orders to remove from the roof of Prague's concert hall the statue of the Jewish composer Felix Mendelssohn. But which of the figures adorning the roof is the Jew? Remembering his course on racial science, Schlesinger instructs his men to pull down the statue with the biggest nose. Only as the statue they have carefully chosen begins to topple does he recognize that it is not Mendelssohn; it is Richard Wagner. Thus begins a story of disarming simplicity that traces the transformation of ordinary lives in Nazi-occupied Prague. Death abetted by the petty malevolence of Nazi functionaries wins all the battles but ultimately loses the war, defeated by the fragile flowering of courage and defiance.

The Secret Life of Stars

Growing up in the inner city of Chicago is not easy for Star Renee Jones, but neither is dodging the traps her family keep setting for her. Drugs tear the Jones family apart and leaves Star in need of her mother, Diamonds love, but Diamond is also in search of love and finds it in the worst places. As Star grows older and experiences a grievous amount of heartbreak and disappointment, she eventually faces a bitter reality- her survival and success depend solely on the strength of her hustle. Star is determined

not to follow in the vicious,destructive cycle she constantly encounters, yet her own actions will prove if she can end the madness or continue in the cause of her own moral genocide.

Living with the Stars tells the fascinating story of what truly makes the human body. The body that is with us all our lives is always changing. We are quite literally not who we were years, weeks, or even days ago: our cells die and are replaced by new ones at an astonishing pace. The entire body continually rebuilds itself, time and again, using the food and water that flow through us as fuel and as construction material. What persists over time is not fixed but merely a pattern in flux. We rebuild using elements captured from our surroundings, and are thereby connected to animals and plants around us, and to the bacteria within us that help digest them, and to geological processes such as continental drift and volcanism here on Earth. We are also intimately linked to the Sun's nuclear furnace and to the solar wind, to collisions with asteroids and to the cycles of the birth of stars and their deaths in cataclysmic supernovae, and ultimately to the beginning of the universe. Our bodies are made of the burned out embers of stars that were released into the galaxy in massive explosions billions of years ago, mixed with atoms that formed only recently as ultrafast rays slammed into Earth's atmosphere. All of that is not just remote history but part of us now: our human body is inseparable from nature all around us and intertwined with the history of the universe.

Life of a Star

In Lives of Stars: From Supernovas to Black Holes, students will learn all about the stars that make up the universe and make observations about the Sun, Moon, and stars to describe patterns that can be predicted. Filled with fun facts, young learners will love exploring the scientific information and drawing conclusions about life now and in the future. The Inside Outer Space series takes readers on an intergalactic journey that unravels the mysteries of the universe. Each 24-page book informs readers in grades K–3 on the Sun, Earth, planets, and stars, while also igniting imaginations about the unknown. Stunning photographs and diagrams engage readers, while text-based questions aid in reading comprehension

Living with the Stars

Cecilia Payne-Gaposchkin was the revolutionary scientific thinker who discovered what stars are made of. But her name is hard to find alongside those of Hubble, Herschel, and other great astronomers. Donovan Moore tells the story of Payne's life of determination against all the obstacles a patriarchal society erected against her.

Lives of Stars

Kirk Hammond was a man alone. He had been chosen to ride in the first manned satellite to go out around the Moon and back to Earth. But when the satellite failed to orbit properly, it went on past the Moon into the vastness of outer space, and a whole world watched helplessly as he was borne toward an unthinkable lonely death. Yet destiny decreed that Kirk Hammond should suffer, not death but a pseudo-death. And he awoke from it to find that a hundred centuries had passed and that the space age which had begun in the 20th Century had now grown into a vast galactic civilization that had carried the sons of Earth to countless stars and worlds. But, unexpectedly, the conquest of space had changed Man himself, and the human race had become not one but several species. Hammond was plunged into the climactic struggle between the new races. And in his quest with a desperate band for the mysterious Star of Life that was the key to the struggle, in his relations with the strange and beautiful Thayn Marden who was not a human woman, in his odyssey through the mighty suns and earthly worlds of the galaxy, a man of the 20th Century found himself facing the dangers of the great space age which he himself helped pioneer.

What Stars Are Made Of

Starting from Newton's times this follow-up to the author's Springer book "Our Place in the Universe - Understanding Fundamental Astronomy from Ancient Discoveries" addresses the question of "our place in the Universe" from astronomical, physical, chemical, biological, philosophical and social perspectives. Using the history of astronomy to illustrate the process of discovery, the emphasis is on the description of the process of how we learned and on the exploration of the impacts of discoveries

rather than on the presentation of facts. Thus readers are informed of the influence of science on a broad scale. Unlike the traditional way of teaching science, in this book, the author begins by describing the observations and then discusses various attempts to find answers (including unsuccessful ones). The goal is to help students develop a better appreciation of the scientific process and learn from this process to tackle real-life problems.

The Star of Life

As the twentieth century closed, Fred Adams and Greg Laughlin captured the attention of the world by identifying the five ages of time. In *The Five Ages of the Universe*, Adams and Laughlin demonstrate that we can now understand the complete life story of the cosmos from beginning to end. Adams and Laughlin have been hailed as the creators of the definitive long-term projection of the evolution of the universe. Their achievement is awesome in its scale and profound in its scientific breadth. But *The Five Ages of the Universe* is more than a handbook of the physical processes that guided our past and will shape our future; it is a truly epic story. Without leaving earth, here is a fantastic voyage to the physics of eternity. It is the only biography of the universe you will ever need.

Our Place in the Universe - II

How are the nuclear power plants we call "stars" formed? Where do they get their energy and how do they die--and what does this suggest about the future of the universe? One of the most popular books written on astrophysics, *100 Billion Suns* provides an exhilarating and authoritative life history of the stars.

100 Billion Suns

"In science fiction there is only a handful of books that stretch the mind—and this is one of them."—Arthur C. Clarke In a moving story of sacrifice and triumph, human scientists establish a relationship with intelligent lifeforms—the cheela—living on Dragon's Egg, a neutron star where one Earth hour is equivalent to hundreds of their years. The cheela culturally evolve from savagery to the discovery of science, and for a brief time, men are their diligent teachers. Praise for *Dragon's Egg* "Bob Forward writes in the tradition of Hal Clement's *Mission of Gravity* and carries it a giant step (how else?) forward."—Isaac Asimov "Dragon's Egg is superb. I couldn't have written it; it required too much real physics."—Larry Niven "This is one for the real science-fiction fan."—Frank Herbert "Robert L. Forward tells a good story and asks a profound question. If we run into a race of creatures who live a hundred years while we live an hour, what can they say to us or we to them?"—Freeman J. Dyson "Forward has impeccable scientific credentials, and . . . big, original, speculative ideas."—The Washington Post

Larger Than Life

A human narrator from England is transported out of his body via unexplained means. He realizes he is able to explore space and other planets. After exploring a civilization on another planet in our galaxy at a level of development similar to our own that existed millions of years ago thousands of light years from Earth (the "Other Earth") in some detail, his mind merges with that of one of its inhabitants, and as they travel together, they are joined by still more minds or group-minds. This snowballing process is paralleled by the expansion of the book's scale, describing more and more planets in less and less detail. The disembodied travelers encounter many ideas that are interesting from both science-fictional and philosophical points of view. *Star Maker* tackles philosophical themes such as the essence of life, of birth, decay and death, and the relationship between creation and creator. A pervading theme is that of progressive unity within and between different civilizations.

Based on author Herbie J Pilato's exclusive interviews with Elizabeth Montgomery prior to her death in 1995, *Twitch Upon a Star* includes insider material and commentary from several individuals associated with her remarkable life and career before, during, and after *Bewitched*, including her classic feature films *The Court Martial of Billy Mitchell* (1955), *Who's Been Sleeping In My Bed?* (1963), and *Johnny Cool* (1963). Two of Montgomery's many popular TV movies, *A Case of Rape* (which remains one of the highest-rated TV-movies of all time) and *The Legend of Lizzie Borden* (which will soon be remade as a feature film), were groundbreaking and remain classics. But *Twitch Upon a Star* also goes behind the scenes to explore Montgomery's political activism, including her early advocacy for AIDS sufferers and the peace movement; her support for all minorities, including the gay community and the disabled; and her controversial participation as narrator of the 1988 feature film documentary *Cover-Up* and its 1991 Oscar-winning sequel, *The Panama Deception* (both of which chronicled the Iran/Contra scandal of the 1980s). The book also explores Montgomery's tumultuous relationships with her father, screen legend Robert Montgomery (she was a liberal; he was a staunch conservative), and her four husbands (including actor Gig Young, who later died in a murder/suicide). Through it all—and to family and friends such as fellow performers Ronny Cox, Sally Kemp, and Florence Henderson—she was just Lizzie: down-to-earth and unaffected, just like Samantha, the "witch-with-a-twitch" Stephens, her most famous role.

'I would rather have been a pianist than anything,' Sybil Thorndike said late in her life, but posterity would never know her as anything other than a majestic actress of stage and screen, whether alongside Marilyn Monroe and Laurence Olivier, or, most famously, as Bernard Shaw's Saint Joan. In this authorized biography, written with unique access to the Thorndike family archive and using hundreds of her unpublished letters, Jonathan Croall has written an engaging, sympathetic, yet critical account of one of the most remarkable women of the twentieth century. As a young actress, Thorndike spent three years traveling around America, playing over a hundred Shakespearean parts.

"Five, six, seven, eight!" Defines the life of actress, dancer, choreographer, and director Miriam Nelson. Miriam's life reads like a 1930's musical. While still in her twenties, she appeared in six Broadway shows. On the day she moved to Los Angeles, Miriam ran into old friend Billy Daniels from New York who took her to lunch at Paramount. During lunch, Miriam ran into another New York friend, Paramount president Buddy de Sylva, who hired her on the spot for *Lady in the Dark* starring Ginger Rogers. Miriam has been dancing with the stars ever since! Nelson has tapped and chasséd with countless stars, including Julie Andrews, Ingrid Bergman, Doris Day, Judy Garland, Bette Davis, Bing Crosby, Gene Kelly, John Travolta and Billy Bob Thornton. Miriam was there for the opening day at Disneyland - Walt Disney hired her to choreograph dance numbers around the Park, including the famous Golden Horseshoe Revue. Miriam's career spans both the famous and infamous eras of stage, screen, and television. Encouraged by friends and family to recall her special "behind the scenes" moments, Miriam sorted through memories, scrapbooks and mountains of photographs to enable readers to share the excitement and anticipation, the joy and the sorrow that chronicled her extraordinary life. Fortunately, for those who love to dance and those who love to watch dance, Miriam Nelson remains an exciting part of the professional American dance scene. Living with the Stars

States of Matter is a six-volume set that covers many significant aspects of physical science, including atoms, the structure and properties of matter, the nature of nuclear and chemical reactions, the behavior of matter in motion, and how energy and matter interact within the universe. Designed to complement science curricula, the books present the key concepts, terms, and technologies used by scientists and engineers in dealing with matter in its more common states here on Earth (namely gaseous, liquid, solid) and matter in its more extreme states, such as plasma and Bose-Einstein condensates. Although solids, liquids, and gases may be the three most common states in which matter can be found on Earth, there are numerous other states of matter in existence throughout the observable universe. Extreme States of Matter discusses many of these states, including plasma, which humans have learned to artificially produce for use in television sets, and black holes, dark matter, and dark energy, which remain baffling to even the most skilled scientists. The book discusses the big bang and how it shaped the universe and also provides a history of humans' understanding of matter, which has grown exponentially since the observations of the ancient Greeks. The volume also includes information on antimatter Bose-Einstein condensate characteristics of stars nanotechnology Newton, Sir Isaac radioactivity thinking matter wormholes The book contains 80 color photographs and four-color line illustrations, sidebars, the Periodic Table, a chronology, a glossary, a detailed list of print and Internet

resources, and an index. States of Matter is essential for high school students, teachers, and general readers who wish to learn about the discovery and use of matter and all its intriguing properties. Book jacket.

My Life Dancing With The Stars

Throughout the four hundred thousand years that humanity has been collecting fossils, sea urchin fossils, or echinoids, have continually been among the most prized, from the Paleolithic era, when they decorated flint axes, to today, when paleobiologists study them for clues to the earth's history. In *The Star-Crossed Stone*, Kenneth J. McNamara, an expert on fossil echinoids, takes readers on an incredible fossil hunt, with stops in history, paleontology, folklore, mythology, art, religion, and much more. Beginning with prehistoric times, when urchin fossils were used as jewelry, McNamara reveals how the fossil crept into the religious and cultural lives of societies around the world—the roots of the familiar five-pointed star, for example, can be traced to the pattern found on urchins. But McNamara's vision is even broader than that: using our knowledge of early habits of fossil collecting, he explores the evolution of the human mind itself, drawing striking conclusions about humanity's earliest appreciation of beauty and the first stirrings of artistic expression. Along the way, the fossil becomes a nexus through which we meet brilliant eccentrics and visionary archaeologists and develop new insights into topics as seemingly disparate as hieroglyphics, Beowulf, and even church organs. An idiosyncratic celebration of science, nature, and human ingenuity, *The Star-Crossed Stone* is as charming and unforgettable as the fossil at its heart.

The Hour of the Star

Karachi Vice

Karachi. Pakistan's largest city is a sprawling metropolis of 20 million people. It is a place of political turbulence in which those who have power wield it with brutal and partisan force, a place in which it pays to have friends in the right places and to avoid making deadly enemies. It is a society where lavish wealth and absolute poverty live side by side, and where the lines between idealism and corruption can quickly blur. It takes an insider to know where is safe, who to trust, and what makes Karachi tick, and in this powerful debut, Samira Shackle explores the city of her mother's birth in the company of a handful of Karachiites. Among them is Safdar the ambulance driver, who knows the city's streets and shortcuts intimately and will stop at nothing to help his fellow citizens. There is Parveen, the activist whose outspoken views on injustice corruption repeatedly lead her towards danger. And there is Zille, the hardened journalist whose commitment to getting the best scoops puts him at increasing risk. As their individual experiences unfold, so Shackle tells the bigger story of Karachi over the past decade: a period in which the Taliban arrive in Pakistan, adding to the daily perils for its residents and pushing their city into the international spotlight. Writing with intimate local knowledge and a global perspective, Shackle paints a nuanced and vivid portrait of one of the most complex, most compelling cities in the world.

The Accidental Masterpiece

"Vice Patrol: Cops, Courts, and the Struggle over Urban Gay Life chronicles how local police and criminal justice systems intruded on gay individuals, criminalizing, profiling, surveilling, and prosecuting them from the 1930's through the 1960's. Anna Lvovsky details the progression of enforcement strategies through the targeting of gay-friendly bars by liquor boards, enticement of sexual overtures by plainclothes police decoys, and surveilling of public bathrooms via peepholes and two-way mirrors to catch someone "in the act." Lvovsky shows how the use of tactics indistinguishable from entrapment to criminalize homosexual men in public and private spaces produced charges brought forward and disputed by attorneys and evidence that had to stand before judges, who at times intervened against punitive policies. In Vice Patrol the author demonstrates how developments in the psychological, medical, and sociological handling of homosexuality filtered into police stations, courthouses, and the wider culture"--

This is a story that spans from 1955 to sometime about 2045. It is a four-part story of a family originating from Cape Coast and Dowyaaniyili in the Northern Region, the story of a northern prince Dowbia Zangina that marries a German/Fante screen idol called Mercedes Huntman who loves him dearly and agree to move with him to the Dowyaaniyili, where he becomes chief after the death of his father. A military government throws him into Nsawam Medium Prison for allegedly collaborating with his journalist friend Ernest Dzigbordi to overthrow the military junta, and regains his freedom when a democratically elected government takes over. Their Granddaughter Raabia Sedzro goes into politics and becomes the first woman president of her country. She is a successful president and all her good works are cut short when she is assassinated in 2031. The story of President Lankwei Addison takes the reader into campaign travels to the hinterland of Ghana, including some factual events in the governments of Presidents Rawlings, Kufuor, and Atta Mills. Part Four of the story is drum narrations of historical occurrences not told in the first three parts. As recorded by a media guru Dowbia Yousif, the grandson of Mercedes Huntman.

Plutarch's Lives of Cæsar, Brutus, and Antony

Frederick E. Brenk, Plutarch, Religious Thinker and Biographer: “The Religious Spirit of Plutarch of Chaironeia” and “The Life of Mark Antony” includes the updated and revised version of two seminal articles on Plutarch’s Lives and Moralia by F. E. Brenk originally published in ANRW.

Plutarch's Lives

“Plutarch regularly shows that great leaders transcend their own purely material interests and petty, personal vanities. Noble ideals actually do matter, in government as in life.” —Michael Dirda, Washington Post Pompey, Caesar, Cicero, Brutus, Antony: the names still resonate across thousands of years. Major figures in the civil wars that brutally ended the Roman republic, their lives pose a question that haunts us still: how to safeguard a republic from the flaws of its leaders. This reader’s edition of Plutarch delivers a fresh translation of notable clarity, explanatory notes, and ample historical context in the Preface and Introduction.

Lives of Caesar, Brutus, and Antony

These nine biographies illuminate the careers, personalities and military campaigns of some of Rome’s greatest statesmen, whose lives span the earliest days of the Republic to the establishment of the Empire. Selected from Plutarch’s Roman Lives, they include prominent figures who achieved fame for their pivotal roles in Roman history, such as soldierly Marcellus, eloquent Cato and cautious Fabius. Here too are vivid portraits of ambitious, hot-tempered Coriolanus; objective, principled Brutus and open-hearted Mark Anthony, who would later be brought to life by Shakespeare. In recounting the lives of these great leaders, Plutarch also explores the problems of statecraft and power and illustrates the Roman people’s genius for political compromise, which led to their mastery of the ancient world.

Plutarch's Lives

This volume approaches Plutarch’s intellectual and professional activity, and the way he managed to cover such an impressive range of areas and interests, which make of his work an inexhaustible source of information on the ancient world.

Plutarch's Lives

Cicero composed his incendiary Philippics only a few months after Rome was rocked by the brutal assassination of Julius Caesar. In the tumultuous aftermath of Caesar’s death, Cicero and Mark Antony found themselves on opposing sides of an increasingly bitter and dangerous battle for control. Philippic 2 was a weapon in that war. Conceived as Cicero’s response to a verbal attack from Antony in the Senate, Philippic 2 is a rhetorical firework that ranges from abusive references to Antony’s supposedly sordid sex life to a sustained critique of what Cicero saw as Antony’s tyrannical ambitions. Vituperatively brilliant and politically committed, it is both a carefully crafted literary artefact and an explosive example of crisis rhetoric. It ultimately led to Cicero’s own gruesome death. This course book offers a portion of the original Latin text, vocabulary aids, study questions, and an extensive commentary. Designed to stretch and stimulate readers, Ingo Gildenhard’s volume will be of particular interest to students of Latin studying for A-Level or on undergraduate courses. It extends beyond detailed linguistic analysis to encourage critical engagement with Cicero, his oratory, the politics of late-republican Rome, and the transhistorical import of Cicero’s politics of verbal (and physical) violence.

How to Be a Good Wife and Mother

She faced years of abuse after arriving in Canada as a teenage bride in a hastily arranged marriage, but nothing could stop Samra Zafar from pursuing her dreams At 15, Samra Zafar had big dreams for herself. She was going to go to university, and forge her own path. Then with almost no warning, those dreams were pulled away from her when she was suddenly married to a stranger at 17 and had to leave behind her family in Pakistan to move to Canada. Her new husband and his family promised that the marriage and the move would be a fulfillment of her dream, not a betrayal of it. But as the walls of their home slowly became a prison, Samra realized the promises were empty ones. In the years that followed she suffered her husband's emotional and physical abuse that left her feeling isolated, humiliated and assaulted. Desperate to get out, and refusing to give up, she hatched an escape plan for herself and her two daughters. Somehow she found the strength to not only build a new future, but to walk away from her past, ignoring the pleas of her family and risking cultural isolation by divorcing her husband. But that end was only the beginning for Samra. Through her academic and career achievements, she has gone on to become a mentor and public speaker, connecting with people around the world from isolated women in situations similar to her own, to young schoolgirls in Kenya who never allowed themselves to dream to men making the decisions to save for their daughters' educations instead of their dowries. A Good Wife tell her harrowing and inspiring story, following her from a young girl with big dreams, through finding strength in the face of oppression and then finally battling through to empowerment.

The Physical Life of Woman

"This book walks each of us through the reality checks we need in order to have the marriage we want!" —Shaunti Feldhahn, social researcher and best-selling author of *For Women Only* In today's workplace, women are often rewarded for having type A personalities: driven, demanding, ambitious, and strong. Yet when it comes to their marriages, those same traits can backfire. After all, no one goes into marriage hoping for a promotion. What is a wife to do? April Cassidy knows this struggle firsthand. She thought she was a great Christian wife and begged God to make her passive husband into a more loving, involved, godly leader. Instead, God opened her eyes to changes that she needed to make, such as laying down her desire for control and offering genuine, unconditional respect—not just love—to her husband. Cassidy's conclusions may be as startling to readers as they were to her, but *The Peaceful Wife* shares how she and many others have learned to reorient their lives to biblical commands—resulting in healthier, happier marriages. In the end, you'll find *The Peaceful Wife* a powerful path to God's design for women to live in full submission to Christ as Lord.

Wife Life: Securing Your Future

Wife of the Life of the Party is the memoir of the late Lita Grey Chaplin (1908-1995), the only one of Chaplin's wives to have written an account of life with Chaplin. Her memoir is an extraordinary Hollywood story of someone who was there from the very beginning. Born Lillita Louise MacMurray in Hollywood, she began her career at twelve with the Charlie Chaplin Film Company, when Chaplin selected her to appear with him as the flirting angel in *The Kid*. When she was fifteen, Chaplin signed her as the leading lady in *The Gold Rush* and changed her name to Lita Grey. She was forced to leave the production when, at the age of sixteen, she became pregnant with Chaplin's child. She married Chaplin in Empalme, Mexico in November 1924. The Chaplins stayed together for two years. Lita bore Chaplin two sons: Charles Chaplin, Jr. and Sydney Chaplin. In November 1926, after Lita discovered that Chaplin was having an affair with Merna Kennedy (Lita's best friend, whom she had persuaded Chaplin to hire as the leading lady in *The Circus*), Lita left Chaplin and filed for divorce. It was one of

the first divorce cases to receive a public airing. The divorce complaint ran a staggering 42 pages and fed scandal with its revelations about the private life of Charles Chaplin. Lita's divorce settlement of \$825,000 was the largest in American history at the time. Lita authorized the publication of another biography, *My Life with Chaplin*, in 1966. The book was mainly the creation of her co-author, Morton Cooper, who re-wrote her manuscript. Lita was never happy with the many inaccuracies and distortions of that book. *Wife of the Life of the Party* is not to be seen as a supplement to her early book, but rather Lita's own version of her life, told for the first time.

Mrs. Memoir

Dream of living on a remote Scottish island? *ISLAND WIFE* tells one woman's true life story from 19-year-old bride to mother of five, running a family hotel a recording studio and a whale watching business. By turns unflinching, moving and very funny, this is a memoir of a 40 year marriage and a woman's extraordinary life. 'A hugely entertaining story of family travails and triumphs' KIRSTY WARK 'A sensitive, brave and honest look at a life lived in the wake of others' needs' DAILY MAIL Judy, at 19, met her future husband, who whisked her off into an adventure, a marriage of over forty years, and a life on a remote Hebridean island. Along the way she bears five children, learns how to run a rocky hill farm, a hotel, a recording studio and the first whale watching business in the UK - all the while inventively making fraying ends meet. When her children start to leave home, things fall apart and there is sadness and joy in how she puts things back together. Funny and tender, this is a book of endless horizons and a breath of fresh air. It is also the story of a creative woman coming out from under and finding her true self.

Wife of the Life of the Party

As a young girl, Karen Miller lived a quiet life in Australia. She never imagined when she grew up, she'd be lured into a polygamous marriage, spend her spare time dumpster diving to feed her kids, and fighting to escape her increasingly demented husband. How was she lured into such a lifestyle? What was day to day life like in the polygamous community? What eventually drove Miller to seek a new way of life? *My Life As a Sister Wife: What You Don't Know Can Hurt You* is the gripping, true-life story of Miller's life, beginning with her traumatic childhood and ending with her eventual freedom from a polygamous cult in Utah.

The Good Wife Strikes Back

Description of book on Kindle and Paperback Amazon If you are, have been or desire to be the wife of a minister; this book is for you! (side note: don't feel disqualified by the title, it is for the faith filled believer also)The Pastors Wife has a unique role in the church. She wears many hats and is the silent server however if you ask a new PW what her role is she is likely to reply by saying 'I'm not to sure' or by saying 'I'm not really PW material'. She certainly doesn't view herself as an indispensable part of her husband's ministry and that is one of the things this book aims to do. This book was birthed out of the Coronavirus Pandemic. Initially inspired by six Pastor's wives faithfully writing and posting devotions on a WhatsApp group throughout the season of lockdown; the project was extended to many other PW's including missionary and evangelist wives. Included in this book are devotionals and testimonies that are raw, insightful, unusual, deep, heart-breaking, witty, inspiring, uplifting, encouraging, and convicting, but I can assure you, all will leave you with hope and vision. This book contains: 1.Five devotions per week 2.One 'Study/sermon notes' day per week (an opportunity for the reader to do their own personal study, or to take notes in services)3.One 'Testimony' day per week 4.One day in every month has been dedicated to a 'Historical Woman' who made her mark on the world for the sake of the gospel5.One day in every month has been dedicated to the 'Names of God'. 6.List of recommended books at the back of the book 7.Bible in one/two year reading plan. This has been custom made from the book and the references appear on every page for ease. The reader has the option of reading the bible in one

or two years. There are many aims for this book but the ultimate aim is to cause the reader to fall in love with Jesus and his word more than ever before. Pastor Wayman Mitchel once said 'You can have as much of Jesus as you want' the question to you is 'Are you having the lions share'? The answer to the ministry is not more money, possessions, people, education, bigger car or church building etc... the answer is always Jesus. How is your relationship with God? Is there an area in your life that you are lacking? Do you depend on him? Now is the time to equip yourself with the Word of God and together with these women's personal accounts you will soon come to realise that you are not alone. Prioritise your relationship with God, feel his ministering presence and rest assured that He is with you every day of the year.

Happy Wife - Happy Life

Was it because she was the weak link as many have wrongly assumed? Not at all. The exact answer is simple. Being the master of craftiness, the devil knew that the woman was the life of the man; that she was created to complete the man. He knew she was the POWERHOUSE of the man, created to be the pillar of support and sustenance for him. He knew that once the pillar collapses, the building crumbles. Most importantly, the devil knew that the material with which the woman was created was

LOADED with all that the man needed to have a meaningful, blissful and successful life, while fulfilling God's purpose for him. Therefore, to destroy the man and indeed humanity as a whole, he needed to get the woman.- You as the wife will know what you are made up of and your excellent worth.- Every married man (the husband) will undoubtedly understand how to tap into hidden treasures in his wife to accelerate his destiny. - You will be able to remove barriers hindering intimacy between husband and wife.- You will understand that God does no longer gives wife.- You will know how to treat your wife as God intended it.

Life of Pi

NOW ON BROADWAY The international bestseller and modern classic of adventure, survival, and the power of storytelling is now an award-winning play. After the sinking of a cargo ship, a solitary lifeboat remains bobbing on the wild blue Pacific. The only survivors from the wreck are a sixteen-year-old boy named Pi, a hyena, a wounded zebra, an orangutan—and a 450-pound Royal Bengal tiger. Soon the tiger has dispatched all but Pi Patel, whose fear, knowledge, and cunning allow him to coexist with the tiger, Richard Parker, for 227 days while lost at sea. When they finally reach the coast of Mexico, Richard Parker flees to the jungle, never to be seen again. The Japanese authorities who interrogate Pi refuse to believe his story and press him to tell them "the truth." After hours of coercion, Pi tells a second story, a story much less fantastical, much more conventional—but is it more true? Life of Pi is at once a realistic, rousing adventure and a meta-tale of survival that explores the redemptive power of storytelling and the transformative nature of fiction. It's a story, as one character puts it, to make you believe in God.

The Melody

From the Man Booker shortlisted author of *Harvest*. Alfred Busi, famed in his town for his music and songs, is mourning the recent death of his wife and quietly living out his days in the large villa he has always called home. Then one night Busi is attacked by a creature he disturbs as it raids the contents of his larder. Busi is convinced that what assaulted him was no animal, but a child, 'innocent and wild', and his words fan the flames of old rumour – of an ancient race of people living in the bosk surrounding the town – and new controversy: the town's paupers, the feral wastrels at its edges, must be dealt with. Once and for all. Lyrical and warm, intimate and epic, *The Melody* by Jim Crace tracks the few days that will see Busi and the town he loves altered irrevocably. This is a story about grief and ageing, about reputation and the loss of it, about love and music and the peculiar way myth seeps into real life. And it is a political novel too – a rallying cry to protect those we persecute. 'The Melody takes its place among his finest [novels] . . . an ecological fable for modern times' Guardian

Tide

From Cnut to D-Day: the history and science of the unceasing tide explored for the first time. Half of the world's population lives in coastal regions lapped by tidal waters. Yet how little most of us know about the tide. Our ability to predict and understand the tide depends on centuries of science, from the observations of Aristotle and the theories of Newton to today's supercomputer calculations. This story is punctuated here by notable tidal episodes in history, from Caesar's thwarted invasion of Britain to the catastrophic flooding of Venice, and interwoven with a rich folklore that continues to inspire art and literature today. With Aldersey-Williams as our guide to the most feared and celebrated tidal features on the planet, from the original maelstrøm in Scandinavia to the world's highest tides in Nova Scotia to the crumbling coast of East Anglia, the importance of the tide, and the way it has shaped - and will continue to shape - our civilization, becomes startlingly clear.

The Necessary Angel

Max Jackson, a New Zealander living and lecturing in Paris, has a complicated arrangement with his estranged French wife, Louise. In love with his younger Sorbonne colleague Sylvie, he finds himself entangled with Helen, a troubled young English student. When a Cezanne painting goes missing from Louise's apartment, the boundaries he has struggled to maintain threaten to collapse. Life of Pi

Following on from the short book *Fifty Shades of Nagging*, this is the republished title originally released as *Life of Pie*, but renamed to *Fifty Shades of Nagging 2*. With over 150 pages, still a short book but packed with more funny anecdotes and contra opinion from what one partner will perceive as 'nagging'

from the other. This sequel takes the reader through a journey of life, hence the original title "Life of Pie" whereby the different ages of a woman are discussed. From daughters that nag daddy from an early age, teenagers, little women, middle age and to silver surf nagging from mothers and elderly couples. To compensate for the non intentional misogynistic view from a man, there is plenty of counter argument included throughout the book, culminating in a chapter on the clear inadequacies of the male of the species, a "Life of Bragging" While the title change is primarily to boost awareness the content is the same as "Life of Pie," which is still available as an eBook download on the original ISBN's.

Pie (Scholastic Gold)

Few twentieth-century writers on architecture and design have enjoyed the renown of Reyner Banham. Born and trained in England and a U.S. resident starting in 1976, Banham wrote incisively about American and European buildings and culture. Now readers can enjoy a chronological cross-section of essays, polemics, and reviews drawn from more than three decades of Banham's writings. The volume, which includes discussions of Italian Futurism, Adolf Loos, Paul Scheerbart, and the Bauhaus as well as explorations of contemporary architecture by Frank Gehry, James Stirling, and Norman Foster, conveys the full range of Banham's belief in industrial and technological development as the motor of architectural evolution. Banham's interests and passions ranged from architecture and the culture of pop art to urban and industrial design. In brilliant analyses of automobile styling, mobile homes, science fiction films, and the American predilection for gadgets, he anticipated many of the preoccupations of contemporary cultural studies. Los Angeles, the city that Banham commemorated in a book and a film, receives extensive attention in essays on the Santa Monica Pier, the Getty Museum, Forest Lawn cemetery, and the ubiquitous freeway system. Eminently readable, provocative, and entertaining, this book is certain to consolidate Banham's reputation among architects and students of contemporary culture. For those acquainted with his writing, it offers welcome surprises as well as familiar delights. For those encountering Banham for the first time, it comprises the perfect introduction.

The Making of Life of Pi

"I think this book is kind of malleable. I've never really wanted to put it away and be done with it forever -- the second I first 'finished' it, I wanted to dig back in and change everything around. So I'm looking forward to getting back into the text, and straightening and focusing and deleting. Most of all, I'm thrilled that Vintage will be letting me include all the cool chase scenes, previously censored." -- Dave Eggers
