International Financial Statement Analysis Workbook

Not Rocket Science! A company's financial statements simply document the movement of cash and goods and services into and out of the enterprise. That is all financial statements are about. It is no more complicated. Everything else is details. Don't sweat the details. This 48-page, full color picture book provides an overview understanding of financial statements with no gobbledygook and confusing jargon. All necessary numeric structure is explained and all essential vocabulary is defined. No prior accounting knowledge required. Understanding financial reporting does not have to be difficult. You have learned all the math required to master financial statements by the end of the fourth grade--mostly addition and subtraction. However, you will need to learn and use specialized accounting vocabulary, which can be confusing. You will also need to understand the structure and appreciate the purpose of the three major numeric statements that describe a company's financial condition. Each paints a different, essential picture--the "three-legged stool" of company reporting. The Income Statement shows the manufacturing (or service offerings) and selling actions of the company that result in profit or loss during a period of time (called the "period"). The Income Statement gives a very important perspective on the company's performance -- its profitability. The Cash Flow Statement details the movements of cash into and out of the company for the period. You need money to make money. Running out of cash is bad. Duh. The Balance Sheet records at the end of a period, what the company owns and what it owes, including the owners' stake called shareholders' equity. Financial statements are simply summaries and structured presentations of the various events (business transactions) that affect a company's financial performance. Business transactions are anything that transfers money to or from the company, or transfers goods and services. Transactions can also record future financial obligations that the company may assume, or also rights that the company is granted from others. If you can follow a recipe or apply for a loan, you can learn accounting. The basics are not difficult. This book will not train you to be an accountant but it should give you the confidence to be able to look at a set of financial statements and make sense of them.

THE KNOWLEDGE AND TOOLS EVERY PROFESSIONAL NEEDS, TO MAKE BETTER FINANCIAL AND BUSINESS DECISIONS. Why this book is different to other finance books: • Quick and easy to use • Spotlights "what you need to know" • Requires no prior finance knowledge • Practical and real-world focus • Written by practitioners No knowledge required The book is purposefully designed to be quick and easy to use with no previous knowledge required to comprehend the concepts. We "tell you what you need to know" to quickly "get up to speed" in core finance concepts. A key feature of this book is that you do not have read it from cover to cover to make sense of finance. Each chapter is written as a "standalone" topic. This enables you to dip in and dip out of chapters. Further, we have taken otherwise complex topics and broken them down into key concepts that are explained in concise, easy to read sections. Practitioners not academics Whilst not an academic book, it is also not a "simplistic" book. It is a practical book because it has been written by practitioners. We include throughout this book our first-hand personal experiences gained from working in businesses across many industries and sectors, rather than replicating knowledge from academia. In addition, the authors have spent countless hours instructing, teaching and training thousands of professionals from disciplines including marketing, sales, production, administration, HR and legal. Focused on business application The overwhelming majority of finance books available are better suited to trainee accountants because they take an academic approach to finance. Whilst necessary for accountants, they immerse the reader in the "detail". The Finance Book is written for non-finance people like you. It is aimed at those who work or aspire to work in business. It will help professionals in business or thinking about a career in business including board directors, business managers, MBA students, graduates and undergraduates. Your journey To make the book easy to read, we have used a consistent format across chapters. Within each chapter there are multiple cross references (and links) to other relevant chapters as they occur. This will enable you to review chapters and make connections relevant to you. Allow your curiosity to determine your path through the book. THE KNOWLEDGE AND TOOLS EVERY PROFESSIONAL NEEDS, TO MAKE BETTER DECISIONS FOR THEIR BUSINESS
