Explorations in South-West Africa

Excerpt from Explorations in South-West Africa: Being an Account of a Journey in the Years 1861 and 1862 From Walvisch Bay, on the Western Coast, to Lake Ngami and the Victoria Falls This work was written by my Son during a journey from Walvisch Bay, on the west coast of Africa, to the Victoria Falls of the Zambesi River, in company with Mr. J. Chapman, a former friend of the author's, who had spent many years in travelling and was well acquainted with the country and the language of the natives. In 1858 Mr. Baines was appointed artist to the Zambesi expedition under Dr. Livingstone, and accompanied his party to Tete, the principal town in the Portuguese territory, on the eastern coast of Africa; but leaving that expedition in 1861, he returned to Cape Town. On recovering from a severe illness, which was attended with fever and loss of sight for several weeks, he resolved to explore the interior himself, and if possible to cross the continent from the west coast to the Zambesi on the east. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at www.forgottenbooks.com This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.

Explorations in South-West Africa

This collection of essays documents the growth of African history as a discipline at the University of Basel since 2001. It thus pays tribute to fourteen years of research and teaching by Patrick Harries at the Department of History and the Centre for African Studies Basel. The Festschrift covers a broad range of topics from mine labour to missionary endeavour and the production of knowledge, reflecting some of his core research interests. The contributions engage with Patrick Harries' oeuvre with reference to the authors' own scholarship or vice-versa. Some directly address his publications while others take his teaching, correspondence, remarks or intellectual life more broadly as a point of reference. They all pay tribute to a brilliant and inspiring scholar, a great teacher and a kind person.

Explorations in South-West Africa

David Livingstone (1813-73) was a Scottish missionary and medical doctor who explored much of the interior of Africa. In a remarkable journey in 1853-56, he became the first European to cross the African continent. Starting on the Zambezi River, he traveled north and west across Angola to reach the Atlantic at Luanda. On his return journey he followed the Zambezi to its mouth on the Indian Ocean in present-day Mozambique. Livingstone's most famous expedition was in 1866-73, when he explored central Africa in an attempt to find the source of the Nile. Not heard from for years, he was believed lost. Both the Royal Geographical Society and the sensationalist New York Herald organized expeditions to find him. Henry M. Stanley (1841-1904), a British-born reporter who was to become a noted explorer in his own right, led the Herald's expedition. On November 10, 1871, Stanley found Livingstone in the town of Ujiji, on the shores of Lake Tanganyika, in present-day Tanzania. News of the discovery caused a worldwide sensation. This book, which appeared in Chicago in 1872, was part of the effort by publishers to capitalize on the demand from the public for information about Livingstone and Stanley and about Africa in general.

Explorations in South-West Africa. Being an Account of a Journey in ... 1861 and 1862 from Walvisch Bay, on the Western Coast, to Lake Ngami and the Victoria Falls. [With a Preface by M. A. Baines, and Maps and Plates.] - Scholar's Choice Edition

This book was originally published in 1966. This detailed study of the history of South West Africa up to the date of Maharero's death in 1890 was originally published in German and appeared in an English version for the first time in 1938 when it was recognised as the first standard work on the subject. The author's extensive ethnological and linguistic studies made him especially well equipped to give a detailed account of the country and its people, and of the customs and languages of the different tribes. A considerable part of the book deals with the gradual colonization of the country by European pioneers

whose various adventures are recorded in a mass of 'old notes, letters, reports and diaries'; and the historical side is supplemented by an ethological account of the native tribes. This is a scholarly work which, with its regard for folklore and tribal tradition as well as for the facts of history, must recommend itself to all lovers of South West Africa.

Explorations in South-West Africa. Being an account of a journey in ... 1861 and 1862 from Walvisch Bay, on the western coast, to Lake Ngami and the Victoria Falls. [With a preface by M. A. Baines, and maps and plates.].

This study examines and explains how British explorers visualized the African interior in the latter part of the nineteenth century, providing the first sustained analysis of the process by which this visual material was transformed into the illustrations in popular travel books. At that time, central Africa was, effectively, a blank canvas for Europeans, unknown and devoid of visual representations. While previous works have concentrated on exploring the stereotyped nature of printed imagery of Africa, this study examines the actual production process of images and the books in which they were published in order to demonstrate how, why, and by whom the images were manipulated. Thus, the main focus of the work is not on the aesthetic value of pictures, but in the activities, interaction, and situations that gave birth to them in both Africa and Europe.

LAKE NGAMI OR EXPLORATIONS & D

The author of this epic of early exploration, Capt. James Alexander, was the soldier-explorer who led an 1836 expedition, sponsored by the Government and the Royal Geographical Society, into the interior of South West Africa (today's Namibia). Travelling by ox-wagons, his route lay north from Cape Town, across the Orange River into the interior and, running dangerously short of water, out at Walfisch Bay - a 4,000-mile trek through unexplored desert wilderness. His book is a compendium of early exploration, including observations of flora and fauna, and the native peoples in the area they travelled through. He also amassed a large collection of zoological and scientific specimens. This is a rare book of consuming interest to fans of African exploration.

Explorations and Discoveries During Four Years' Wanderings in the Wilds of South Western Africa

For a British Empire that stretched across much of the globe at the start of the nineteenth century, the interiors of Africa and Australia remained intriguing mysteries. The challenge of opening these continents to imperial influence fell to a proto-professional coterie of determined explorers. They sought knowledge, adventure, and fame, but often experienced confusion, fear, and failure. *The Last Blank Spaces* follows the arc of these explorations, from idea to practice, from intention to outcome, from myth to reality. Those who conducted the hundreds of expeditions that probed Africa and Australia in the nineteenth century adopted a mode of scientific investigation that had been developed by previous generations of seaborne explorers. They likened the two continents to oceans, empty spaces that could be made truly knowable only by mapping, measuring, observing, and preserving. They found, however, that their survival and success depended less on this system of universal knowledge than it did on the local knowledge possessed by native peoples. While explorers sought to advance the interests of Britain and its emigrant communities, Dane Kennedy discovers a more complex outcome: expeditions that failed ignominiously, explorers whose loyalties proved ambivalent or divided, and, above all, local states and peoples who diverted expeditions to serve their own purposes. The collisions, and occasional convergences, between British and indigenous values, interests, and modes of knowing the world are brought to the fore in this fresh and engaging study.

Lake Ngami, Or, Explorations and Discoveries During Four Years' Wanderings in the Wilds of South Western Africa

This text gives biographical accounts of the leading plant collectors and their activities in Southern Africa from the days of the East India Company until modern times.

Livingstone and the Exploration of Central Africa

Excerpt from *South-West Africa* "Of making many books there is no end," said the Preacher, but strange to say, there is not a single book in the English language that deals with South-West. Africa of modern days. Many references to the country are found in the older books of South African travel and exploration, and some good works have been written in later times by German authors; but, unfortunately,

the German publications are not available for the average reader. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at www.forgottenbooks.com This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.

Explorations in African History

Livingstone And The Exploration Of Central Africa. Many of the earliest books, particularly those dating back to the 1900s and before, are now extremely scarce and increasingly expensive. We are republishing these classic works in affordable, high quality, modern editions, using the original text and artwork.

Explorations in Africa

First Published in 1992. This book is about space of a colony and how it was produced. It began as a study of the literature of the German colony of South-West Africa between the years 1884 and 1915. The author's aim is to demonstrate the active role which literature had played in structuring the experience of the colony. If it could be shown that literature not only describes, but also helps to structure the forms of experience, then it would follow that it also plays an important role in structuring the experience of colonization, and hence the form of the colony itself. From the outset, therefore, the study was concerned with a number of issues centering around colonization, representation, experience, and social form, where spatiality is the concept which allows us to understand how these various aspects of colonialism interrelate.

Narrative of an Explorer in Tropical South Africa

This study examines and explains how British explorers visualized the African interior in the latter part of the nineteenth century, providing the first sustained analysis of the process by which this visual material was transformed into the illustrations in popular travel books. At that time, central Africa was, effectively, a blank canvas for Europeans, unknown and devoid of visual representations. While previous works have concentrated on exploring the stereotyped nature of printed imagery of Africa, this study examines the actual production process of images and the books in which they were published in order to demonstrate how, why, and by whom the images were manipulated. Thus, the main focus of the work is not on the aesthetic value of pictures, but in the activities, interaction, and situations that gave birth to them in both Africa and Europe.

South West Africa in Early Times

Containing more than 600 entries, this valuable resource presents all aspects of travel writing. There are entries on places and routes (Afghanistan, Black Sea, Egypt, Gobi Desert, Hawaii, Himalayas, Italy, Northwest Passage, Samarkand, Silk Route, Timbuktu), writers (Isabella Bird, Ibn Battuta, Bruce Chatwin, Gustave Flaubert, Mary Kingsley, Walter Raleigh, Wilfrid Thesiger), methods of transport and types of journey (balloon, camel, grand tour, hunting and big game expeditions, pilgrimage, space travel and exploration), genres (buccaneer narratives, guidebooks, New World chronicles, postcards), companies and societies (East India Company, Royal Geographical Society, Society of Dilettanti), and issues and themes (censorship, exile, orientalism, and tourism). For a full list of entries and contributors, a generous selection of sample entries, and more, visit the Literature of Travel and Exploration: An Encyclopedia website.

Explorations and Discoveries During Four Years' Wanderings in the Wilds of South Western Africa

The 18th century witnessed a new interest in African animals. Research was undertaken at the Cape of Good Hope by explorers whose books, manuscripts and drawings concerning mammals and birds are listed and discussed within this text.; This text gives details on four collections of 300 mammal and bird drawings connected with Levaillant's research. Many examples are illustrated. The zoological contents of the material left by these seven explorers are analyzed for all mammals and birds emphasizing the history, taxonomy, nomenclature and zoogeography.

Visualizing Africa in Nineteenth-Century British Travel Accounts

He also amassed a large collection of zoological and scientific specimens. This is a rare book of consuming interest to fans of African exploration.

Botanical Exploration Southern Africa

In the 1860s, as America waged civil war, several thousand African Americans sought greater freedom by emigrating to the fledgling nation of Liberia. While some argued that the new black republic represented disposal rather than emancipation, a few intrepid men set out to explore their African home. African-American Exploration in West Africa collects the travel diaries of James L. Sims, George L. Seymour, and Benjamin J. K. Anderson, who explored the territory that is now Liberia and Guinea between 1858 and 1874. These remarkable diaries reveal the wealth and beauty of Africa in striking descriptions of its geography, people, flora, and fauna. The dangers of the journeys surface, too -- Seymour was attacked and later died of his wounds, and his companion, Levin Ash, was captured and sold into slavery again. Challenging the notion that there were no black explorers in Africa, these diaries provide unique perspectives on 19th-century Liberian life and life in the interior of the continent before it was radically changed by European colonialism.

South-West Africa

Geochemical Exploration 1974

Livingstone and the Exploration of Central Africa

When a burning sun dips low enough on the horizon to touch the brown-black earth, that is when South Africa is at its very best – a blazing expanse of broad landscapes of sea and veld, dusty savannah and equally dusty pavements. It is a vast country, extending from pristine coastal plain to rugged mountain passes across wide stretches of semi desert and forest, hills and valleys. Even travelling South Africans are unprepared for the sheer scale and enormous diversity of this grand landscape. Every day, everywhere, there are new sights to behold and new experiences to share – a graceful old Cape Dutch homestead set against lush vineyards, blue-purple mountains, the demure smile of a Zulu bride, a bird on a wire. It is the sun, the sand, the textures, the colours and the sounds that conjure up the spirit of South Africa. This volume is a fine tribute to the country, its people and its land-, sea- and

cityscapes. This is the face of the nation – the essence of South Africa. Sean Fraser graduated from Rhodes University with a degree in Journalism and Media Studies. He is the author of a number of coffee-table, reference, travel and guide books on the people and places of southern Africa, including the best-selling *Seven Days in Cape Town*, *Picturesque South Africa*, *Cape Town A-Z* and *Gauteng A-Z*, all published by Random House Struik. He lives in Cape Town with his wife and two sons.

Colonial Space

A concise report, based on direct observation of the economic and social conditions, politics and geography of south west Africa, together with notes on the history, legal status and future prospects of this territory.--Cover.

Visualizing Africa in Nineteenth-Century British Travel Accounts

Prepared by the US Bureau of Mines with the purpose of providing the latest available data and information on mining and mineral resources in Namibia, this is a well-informed and useful reference work. The study covers regional geology, the history of exploitation, mining policies and legislation, production (including detailed tables on production and reserves 1970-1981) as well as water resources, energy supply, labour and transport. It argues that uranium has the greatest potential for long-term growth, and that elsewhere a pattern of diminishing ore reserves in the metals and to a lesser extent diamonds suggests a declining resource base. Shortages of water supplies, lack of artisans and skilled labour and "the unresolved international dispute" are identified as constraints to future growth in Namibia's mining industry. There is a chapter outlining the main features of mining legislation, and a lengthy, mainly technical bibliography listing close to 200 items. As a technical and economic survey relying heavily on information provided by the mining companies themselves, the study has considerable value. As a guide to the political economy of Namibia, it is, however, quite misleading. The UN Decree No. 1 of 1974 is not mentioned at all, while two decades of worker organization, liberation struggle and harsh colonial repression are dismissed in the assertion that "differences among worker languages and interests have inhibited the formation of a uniform political party or union". The study is notably weak on labour and social conditions, wages and labour legislation. For up-to-date information along the same lines, see Bureau of Mines Minerals Yearbook, vol. III: Area Reports: International, which contains a chapter on the mineral industry of Namibia. (Eriksen/Moorsom 1989).

Literature of Travel and Exploration: R to Z, index

The Zoological Exploration of Southern Africa 1650-1790

Explorations in Chicano Psychology

Chicano Psychology, Second Edition consists of five parts, separating a total of 19 chapters, beginning with a brief overview of the history of psychology, first in Spain, and then in pre-Columbian Mexico. This overview is followed by a few summary statements of the transportation of psychology from Spain to Mexico, and the eventual development of psychology as an academic discipline in modern Mexico. This edition tackles the developments within Chicano psychology. Subsequent chapters focus on foundations for a Chicano psychology, sociocultural variability, psychological disorder among Chicanos, and social psychology. Last three chapters examine bilingualism from the standpoint of several issues involving Chicanos. This book will be of interest to both scientist and student working in the areas of cross-cultural psychology, race relations, psychological anthropology, Chicano studies, and bilingual education.

Chicano Psychology

How can psychology contribute to our understanding of Hispanics in the United States? Edited by Amado M. Padilla, *Hispanic Psychology* offers students, researchers, and practitioners the most contemporary and complete view of psychological writings available today. The topics tackled by a team of social scientists include adaptation to a new culture in the United States, the role of the family in acculturation, ethnic identification for Hispanics, health and mental health service and research needs of Hispanics, and changing gender roles in Hispanic culture. This volume examines such complex subjects as Chicano male gang members, homeless female AIDS victims, and educational resiliency of students with authority and perceptivity. This book brings together diverse psychological issues

that will spark an interest in anyone wishing to have a current perspective on the fastest growing ethnic group in the United States. "Libraries serving graduate students in the areas of psychology, education, child development, or Latino studies should find this book helpful." --Choice "The growing presence and relevance of ethnic and cultural issues in many mental health disciplines has a cogent demonstration in this handsome volume. The strength of this volume is in its well-conceived and realized research studies. Indeed, the "new scholarship" of conceptual models, measurement instruments, and interpretive approaches, drawing heavily on the social context in which Hispanics live, gives this book a prominent place among its peers. This volume will become a landmark in the task of defining the realities and the fate of Hispanics in the United States of the twenty-first century." --Renato D. Alacrón in Transcultural Psychiatric Research Review

Explorations in Chicano Psychology

Mexican-Americans now constitute two thirds of what has become the largest and fastest-growing minority group in the United States, Hispanics. They have distinct cultural patterns and values that those who seek to serve them competently as clinicians and educators, and those who attempt to study them, need to understand. This is the first comprehensive overview of the psychology of the Chicana/o experience since 1984. Solidly grounded in the latest theory and research, much of which is relevant to other Latina/o groups as well, *The Handbook of Chicana/o Psychology and Mental Health* is an indispensable source of up-to-date information and guidance for mental health and education professionals, their trainees and students; and for social and behavioral scientists interested in the impact of cultural differences in multicultural settings.

Explorations in Cross-cultural Psychology

This pioneering reader is a collection of fundamental writings on the influence of culture and ethnicity on human social behavior. An overview of current psychological knowledge about African Americans, Asian Americans, American Indians, and Hispanics/Latinos in the United States, *Readings in Ethnic Psychology* addresses basic concepts in the field--race, ethnic identity, acculturation and biculturalism. In addition, psychosocial conditions such as risk behaviors, adaptive health behaviors, psychological distress, and culturally appropriate interventions are also explored.

Hispanic Psychology

Mexican-Americans now constitute two thirds of what has become the largest and fastest-growing minority group in the United States, Hispanics. They have distinct cultural patterns and values that those who seek to serve them competently as clinicians and educators, and those who attempt to study them, need to understand. This is the first comprehensive overview of the psychology of the Chicana/o experience since 1984. Solidly grounded in the latest theory and research, much of which is relevant to other Latina/o groups as well, *The Handbook of Chicana/o Psychology and Mental Health* is an indispensable source of up-to-date information and guidance for mental health and education professionals, their trainees and students; and for social and behavioral scientists interested in the impact of cultural differences in multicultural settings.

The Handbook of Chicana/o Psychology and Mental Health

The field of health psychology has grown dramatically in the last decade, with exciting new developments in the study of how psychological and psychosocial processes contribute to risk for and disease sequelae for a variety of medical problems. In addition, the quality and effectiveness of many of our treatments, and health promotion and disease prevention efforts, have been significantly enhanced by the contributions of health psychologists (Taylor, 1995). Unfortunately, however, much of the theorizing in health psychology and the empirical research that derives from it continue to reflect the mainstream bias of psychology and medicine, both of which have a primary focus on white, heterosexual, middle-class American men. This bias pervades our thinking despite the demographic heterogeneity of American society (U. S. Bureau of the Census, 1992) and the substantial body of epidemiologic evidence that indicates significant group differences in health status, burden of morbidity and mortality, life expectancy, quality of life, and the risk and protective factors that contribute to these differences in health outcomes (National Center for Health Statistics, 1994; Myers, Kagawa-Singer, Kumanyika, Lex, & McKidder, 1995). There is also substantial evidence that many of the health promotion and disease prevention efforts that have proven effective with more affluent, educated whites, on whom they were developed, may not yield comparable results when used with populations that differ by eth

nicity, social class, gender, or sexual orientation (Cochran & Mays, 1991; Castro, Coe, Gutierrez, & Saenz, this volume; Chesney & Nealey, this volume).

Readings in Ethnic Psychology

This comprehensive handbook, the first in its field, brings together 106 different contributors. The 38 interrelated but at the same time independent chapters discuss key areas including conceptual frameworks; empirically grounded constructs; intervention strategies and tactics; social systems; designs, assessment, and analysis; cross-cutting professional issues; and contemporary intersections with related fields such as violence prevention and HIV/AIDS.

The Handbook of Chicana/o Psychology and Mental Health

A major three-volume bibliography, including an additional supplement, of an annotated listing of American Studies monographs published between 1900 and 1988.

Handbook of Diversity Issues in Health Psychology

This dictionary is an up-to-date volume that contains numerous references to relevant concepts and terms in the field of multicultural psychology. Professor Lena Hall has collected, studied, and analyzed a multitude of terms in her eleven years of teaching multicultural psychology, and she has gathered them together in this handy, accessible reference book.

Chicanos

This book introduces the study of ethnic women and contributes to our understanding of the relationships among gender, race/ethnicity, and social class. The social scientific study of gender has grown exponentially for more than two decades. Until recently, however, little attention has been paid to the diversity among women. The social scientific literature on ethnicity has experienced a revival in the same decades, yet women have frequently been overlooked or misrepresented in that literature. When ethnic women do appear they are typically depicted as selfless wives and mothers or passive victims. These twenty original essays challenge myths and stereotypes. The authors--social scientists, social service professionals, and other scholars--explore a broad range of racial/ethnic and social class circumstances. Communities represented include the Hmong in Wisconsin, Cuban Jews in Florida, and Samoans in Hawaii. Patterns of immigration and social mobility, communal institutions, and maintenance of ethnic traditions are among the topics which reflect the multiple status reality of ethnic women.

Handbook of Community Psychology

"This second edition of the Handbook of Multicultural Counseling marks an important turning point. It brings together the voices of some pioneers who have paved the way, and introduces us to new voices, who, while influenced by the pioneers, have taken different paths. Because the multicultural community is well represented in content and scholarship in this second addition, the reader can be assured that the view points represented in this book speak to the core issues of the field. I am excited about this Handbook because the authors answer the question that is often heard at many a conference: Where is the research to support multicultural counseling? I am equally excited about this Handbook because it breaks new ground by using as its anchor, oral histories, which demonstrates that for many of us multicultural counseling is not simply a research agenda, but a life long journey, that cannot always be measured. The underlying theme of social justice only reinforces our commitment to this journey. Drs. Ponterotto, Casas, Suzuki, and Alexander have once again helped shape the multicultural conversation. To those who have often said, "Where is the research," look not further."
--From the foreword by Donald B. Pope-Davis, Ph.D., Professor, University of Notre Dame
The Second Edition of the Handbook of Multicultural Counseling presents a completely reconceived work building on the strengths of the first, reflecting the developments that continue to expand the profession of multicultural counseling. Eighty-five scholars in the field offer their perspectives, providing breadth and depth, as well as new visions for the discipline. This edition has been expanded to include more coverage of: Historical perspectives on the field Professional and ethical issues Counseling role in fighting oppression Psychological measurement theories Research design Gender issues and higher education issues
The Handbook of Multicultural Counseling, Second Edition, is a critical resource for counselors, counseling students, and other mental health professionals who are seeking to improve their competence in treating a culturally diverse clientele.

American Studies

First published in 1990. Routledge is an imprint of Taylor & Francis, an informa company.

Dictionary of Multicultural Psychology

A thoughtful text integrating strengths, assets, and capacity-building themes with contemporary issues in rural social work practice. Now in its second edition, *Rural Social Work* is a collection of contributed readings from social work scholars, students, and practitioners presenting a framework for resource building based on the strengths, assets, and capacities of people, a tool essential for working with rural communities. This guide considers methods for social workers to participate in the work of sustaining rural communities. Each chapter features a reading integrating the themes of capacity-building and rural social work; discussion questions that facilitate critical thinking around the chapter; and suggested activities and assignments. *Rural Social Work, Second Edition* explores: Important practice issues in rural communities, including the challenges of working with stigmatized populations such as gay, lesbian, bisexual, and transgendered people, the homeless, and people living with HIV/AIDS. Practice models that hold special promise for rural social workers, including evidence-based practice and community partnership models. Newer research tools such as asset mapping, social network analysis, concept mapping, and Geographic Information Systems (GIS). Exploring how social workers can integrate the tremendous resources that exist in rural communities into their practice, *Rural Social Work, Second Edition* provides a solid introduction to the complex, challenging, and rewarding work of building and sustaining rural communities.

Ethnic Women

The first three years of life play a crucial role in setting the stage for later adjustment and success. For children with disabilities, children at risk, and even for healthy infants and toddlers born into well-functioning families, support and early intervention can foster optimal growth and development. This concise and readable guide presents a developmentally sound framework for strengths-based intervention with parents and young children. The volume is filled with practical suggestions for building positive family relationships, cultivating parental knowledge and understanding of child development, and enhancing family support systems. Also featured is an extensive annotated bibliography that describes a wealth of additional resources for professionals and parents. Grounded in research and informed by wisdom from the field, this book provides essential knowledge and skills for professionals and students across a range of health care, social service, and educational disciplines.

Handbook of Multicultural Counseling

While insights sometimes are slow in coming, they often seem obvious when they finally arrive. This handbook is an outcome of the insight that the topics of social support and the family are very closely linked. Obvious as this might seem, the fact remains that the literatures dealing with social support and the family have been deceptively separate and distinct. For example, work on social support began in the 1970s with the accumulation of evidence that social ties and social integration play important roles in health and personal adjustment. Even though family members are often the key social supporters of individuals, relatively little research of social support was targeted on family interactions as a path to specifying supporter processes. It is now recognized that one of the most important features of the family is its role in providing the individual with a source of support and acceptance. Fortunately, in recent years, the distinctness and separateness of the fields of social support and the family have blurred. This handbook provides the first collation and integration of social support and family research. This integration calls for specifying processes (such as the cognitions associated with poor support availability and unrewarding family constellations) and factors (such as cultural differences in family life and support provision) that are pertinent to integration.

Advances in Personality Assessment

Chicana feminisms are living theory deriving value and purpose by affecting social change. Advocating for and demonstrating the importance of an intersectional, multidisciplinary, activist understanding of Chicanas, *Intersectional Chicana Feminisms* provides a much-needed overview of the key theories, thinkers, and activists that have contributed to Chicana feminist thought. Aída Hurtado, a leading Chicana feminist and scholar, traces the origins of Chicanas' efforts to bring attention to the effects of gender in Chicana and Chicano studies. Highlighting the innovative and pathbreaking methodologies developed within the field of Chicana feminisms—such as testimonio, *conocimiento*, and *autohistoria*—this book offers an accessible introduction to Chicana theory, methodology, art, and activism.

Hurtado also looks at the newest developments in the field and the future of Chicana feminisms. The book includes short biographies of key Chicana feminists, additional suggested readings, and exercises with each chapter to extend opportunities for engagement in classroom and workshop settings.

Rural Social Work

At the time *Women's Work and Chicano Families: Cannery Workers of the Santa Clara Valley* was published, little research had been done on the relationship between the wage labor and household labor of Mexican American women. Drawing on revisionist social theories relating to Chicano family structure as well as on feminist theory, Patricia Zavella paints a compelling picture of the Chicano women who worked in northern California's fruit and vegetable canneries. Her book combines social history, shop floor ethnography, and in-depth interviews to explore the links between Chicano family life and gender inequality in the labor market.

Infants, Toddlers, and Families

A A A The product of 13 curriculum projects that involved several hundred educators nationwide, this volume provides faculty and administrators with a guide to multicultural curricular change-especially with respect to women. While womenA represent over halfA of the college students on campus, they are still represented only minimally in the allegedly "mainstream" curriculum. Women of color are far less visible in the curriculum than white women. A A A Both the process and the results of a Ford Foundation funded project are presented here in a format that allows browsing and promotes reading straight through. The volume is divided into three major sections, the first of which highlights the actual process of faculty transformation and administrative support essential to curricular changes as it occurred on two of the participating campuses, U.C.L.A. and George Washington University. Extensive multidisciplinary faculty development syllabi are provided. A A A Section Two conatins 37 transformed undergraduate course syllabi for courses in sociology, American history and literature, and more, with brief essays describing professors' encounters with teaching the new texts. Section Three is an invaluable interdisciplinary guide to teaching about Puerto Rican women, prepared by a team of scholars at SUNY, Albany. It provided information about Puerto Rican women inside and outside Puerto Rico, as well as teaching strategies for integrating such information into the traditional curriculum. A A A This volume shows that essential educational change-to meet the diversity of U.S. students-may be somewhat slower than one would wish, and more difficult, but it is complex, challenging, and intellectually exciting.

Handbook of Social Support and the Family

Hispanics are the fastest growing minority in the United States and are filling an increasingly significant portion of the work force. However, despite theses facts, little or no research has been conducted to date to address this issue. Until now. The first in its field, *Hispanics in the Workplace* presents a comprehensive exploration of Hispanic employment factors, problems at work, and work in the government and private sectors. Contributors include notable researchers who uncover such specific topics as entry into employment, work force characteristics, recruiting and selection, training and development, special problems of women, job satisfaction, stress management, the work ethic, stereotyping, and language barriers. They address various opportunities and problems of Hispanics as they relate to the military, civilians in the military, the private sector, and entrepreneurs. If you are a professional, academic, or student of management, organizational studies, sociology, human resources, and/or ethnic studies, who wants to stay on the cutting edge of the field, then this pathbreaker is for you

Intersectional Chicana Feminisms

This text is based on over 10 years research with 500 men from different classes, backgrounds, races and ethnic groups. It constructs a theory of masculinity by exploring masculine expectancies, how men form their gender identities and how those identities influence their behaviour.

Women's Work and Chicano Families

Exposes graduate students, faculty, and social workers to a variety of cultural values and perspectives so that they can effectively counsel couples and families of all different kinds. Readers will learn how to use clients' religious history, family values, rituals, and community in attaining positive treatment outcomes. Advocates placing value on diversity in families, supporting ethnic differences, and recognizing

the strength and resiliency of modern day families. Also offers insight on the treatment of interracial couples, domestic violence from various perspectives, Native American family circle, and the realities of racism in the worker-client relationship. Paper edition (unseen), \$19.95. Annotation copyrighted by Book News, Inc., Portland, OR

Women of Color and the Multicultural Curriculum

This highly practical book presents current developments in play therapy, including innovative applications for particular problems and populations. Contributors first discuss the latest ideas and techniques emerging from object relations, experiential, dynamic, and narrative perspectives. Next, research evaluating the effectiveness of play interventions is reviewed in detail. The book's third and largest section demonstrates creative approaches for helping children deal with a variety of adverse circumstances: homelessness, family problems, sexual abuse, social aggression, natural disasters, and more. Throughout, rich case illustrations enhance the book's utility for clinicians.

Hispanics in the Workplace

Men do not often come for counseling because they are having difficulties with being a father, but many of the presenting problems and reasons for seeking help can be related to the roles and responsibilities of fathering. The dramatic shift in societal expectations of being a father can often leave men confused as they navigate conflicting views, demands, and responsibilities. Counseling Fathers is designed to bridge the gap between fathers and professional helpers. This book provides the mental health practitioners with a guide for working with fathers in therapy, whether the issues of fathering are at the center of the discussions or in the background. The organization of the book speaks to the variety of today's fathers and the issues that they face. Part I provides an historical overview of the fathering movement, a strength-based approach to working with fathers, and an assessment paradigm using gender role conflict theory. Part II takes a cross-cultural approach, with a series of chapters that look at counseling with Latino, Asian, Black, and Caucasian fathers. Part III looks at specific populations of fathers, including first time fathers, teen fathers, stay-at-home fathers, gay fathers, and older fathers. Counseling Fathers provides the most up-to-date and comprehensive resource for family and individual practitioners who work with men who father.

Messages Men Hear

A collection of readings relevant to the development of an intercultural psychology which takes into account the different circumstances, needs, values, constructions of reality, and worldviews and belief systems that significantly shape the experience and behavior of cultural groups. The 34 papers and introductory essay are arranged in four parts: the politics of difference; development, adaption, and the acquisition of culture; self and other in cultural context; and diagnostic assessment, treatment, and cultural bias. Annotation copyrighted by Book News, Inc., Portland, OR

Cross-cultural Practice with Couples and Families

Though the Filipino American population has increased numerically in many areas of the United States, especially since the influx of professional immigrants in the wake of the 1965 Immigration Act, their impact on schools and related educational institutions has rarely been documented and examined. The Other Students: Filipino Americans, Education, and Power is the first book of its kind to focus specifically on Filipino Americans in education. Through a collection of historical and contemporary perspectives, we fill a profound gap in the scholarship as we analyze the emerging presence of Filipino Americans both as subjects and objects of study in education research and practice. We highlight the argument that one cannot adequately and appropriately understand the complex histories, cultures, and contemporary conditions faced by Filipino Americans in education unless one grapples with the specificities of their colonial pasts and presents, their unique migration and immigration patterns, their differing racialization and processes of identity formations, the connections between diaspora and community belonging, and the various perspectives offered by ethnic group-centered analysis to multicultural projects. The historical, methodological, and theoretical approaches in this anthology will be of interest to scholars, researchers, and students in disciplines which include Education, Ethnic Studies, Asian American and Pacific Islander Studies, Anthropology, Sociology, Political Science, Urban Studies, Public Policy, and Public Health.

Contemporary Play Therapy

This text utilizes a three stage approach to classroom behaviour management to assist teachers to avoid behaviour problems, manage those that cannot be avoided and resolve those that cannot be managed.

Counseling Fathers

Since Karl Rahner posited the importance of the nature of the human as the starting point for theological reflection, the field of Christian anthropology has been one where very basic questions - and much creative theologizing - have been focused. For example, liberation theologians have had much to say about the presumptions inherent in classical definitions of human being and have pointed up the vital idea of social location as an integral part of human experience. Theological anthropology has come to be of vital interest to Christian feminists as well. As in other disciplines, the study of what is human tends to either ignore gender or to favor one as normative. In the quest to understand the totality of human experience it is necessary to view it from 'lived' experience. At the same time and deeply embedded in the Christian tradition is the recognition that human beings come from God, are going to God, and dwell in the embrace of God. 'In the Embrace of God' provides a well-organized, clearly focused volume of original essays by North American feminist theologians encompassing the major areas of theological anthropology. In addressing the meaning of creation and end-time, fall and redemption, sin and grace, pain and suffering, sexuality and ecology, these contributors offer fresh insights and helpful new ways to approach the rich complexities of human experience.

The Culture and Psychology Reader

Recovering the U.S. Hispanic Literary Project is a national project to locate, identify, preserve and make accessible the literary contributions of U.S. Hispanics from colonial times through 1960 in what today comprises the fifty states of the United States.

NIDA Research Monograph

The globalization of marketing has brought about an interesting paradox: as the discipline becomes more global, the need to understand cultural differences becomes all the more crucial. This is the challenge in an increasingly international marketplace and a problem that the world's most powerful businesses must solve. From this challenge has grown the exciting discipline of ethnic marketing, which seeks to understand the considerable opportunities and challenges presented by cultural and ethnic diversity in the marketplace. To date, scholarship in the area has been lively but disparate. This volume brings together cutting-edge research on ethnic marketing from thought leaders across the world. Each chapter covers a key theme, reflecting the increasing diversity of the latest research, including models of culture change, parenting and socialization, responses to web and advertising, role of space and social innovation in ethnic marketing, ethnic consumer decision making, religiosity, differing attitudes to materialism, acculturation, targeting and ethical and public policy issues. The result is a solid framework and a comprehensive reference point for consumer researchers, students, and practitioners.

Drug Abuse Among Minority Youth

This volume includes the full proceedings from the 1996 Multicultural Marketing Conference presented by the Academy of Marketing Science (AMS) and Old Dominion University in Virginia Beach, Virginia. The focus of the conference and the enclosed papers is on marketing to various ethnic groups in both a US and global context. It presents papers on various multicultural issues across the entire spectrum of marketing activities and functions including marketing management, marketing strategy and consumer behavior. Founded in 1971, the Academy of Marketing Science is an international organization dedicated to promoting timely explorations of phenomena related to the science of marketing in theory, research, and practice. Among its services to members and the community at large, the Academy offers conferences, congresses and symposia that attract delegates from around the world. Presentations from these events are published in this Proceedings series, which offers a comprehensive archive of volumes reflecting the evolution of the field. Volumes deliver cutting-edge research and insights, complimenting the Academy's flagship journals, the Journal of the Academy of Marketing Science (JAMS) and AMS Review. Volumes are edited by leading scholars and practitioners across a wide range of subject areas in marketing science.

The 'Other' Students

In detailed historical analyses of Mexican immigration, economic class struggle, intermarriage, urbanization and industrialization, regional differences, and discrimination and prejudice, *La Familia* demonstrates how such social and economic factors have contributed to the contemporary diversity of the Mexican-American family. By comparing their family experience with those of European immigrants, he discloses important dimensions of Mexican-American ethnicity.

The Challenge of Participatory Research

Dubbed the "decade of the Hispanic," the 1980s was instead a period of retrenchment for Chicanas/os as they continued to confront many of the problems and issues of earlier years in the face of a more conservative political environment. Following a substantial increase in activism in the early 1990s, Chicana/o scholars are now prepared to take stock of the Chicano Movement's accomplishments and shortcomings—and the challenges it yet faces—on the eve of a new millennium. *Chicanas/Chicanos at the Crossroads* is a state-of-the-art assessment of the most significant developments in the conditions, fortunes, and experiences of Chicanas/os since the late seventies, with an emphasis on the years after 1980, which have thus far received little scholarly attention. Ten essays by leading Chicana and Chicano scholars on economic, social, educational, and political trends in Chicana/o life examine such issues as the rapid population growth of Chicanas/os and other Latinos; the ascendancy of Reaganomics and the turn to the right of American politics; the rise of anti-immigrant sentiment; the launching of new initiatives by the Mexican government toward the Chicano community; and the emergence of a new generation of political activists. The authors have been drawn from a broad array of disciplines, ranging from economics to women's studies, in order to offer a multidisciplinary perspective on Chicana/o developments in the contemporary era. The inclusion of authors from different regions of the United States and from divergent backgrounds enhances the broad perspective of the volume. The editors offer this anthology with the intent of providing timely and useful insights and stimulating reflection and scholarship on a diverse and complex population. A testament to three decades of intense social struggle, *Chicanas/Chicanos at the Crossroads* is ample evidence that the legacy of the Movimiento is alive and well. Contents Part One: Demographic and Economic Trends Among Chicanas/os 1. Demographic Trends in the Chicano Population: Policy Implications for the Twenty First Century, Susan Gonzalez-Baker 2. Mexican Immigration in the 1980s and Beyond: Implications for Chicanos/as, Leo R. Chavez and Rebecca Martinez 3. Chicanas/os in the Economy: Issues and Challenges Since 1970, Refugio Rochin and Adela de la Torre Part Two: Chicano Politics: Trajectories and Consequences 4. The Chicano Movement: Its Legacy for Politics and Policy, John A. Garcia 5. Chicano Organizational Politics and Strategies in the Era of Retrenchment, Isidro D. Ortiz 6. Return to Aztlan: Mexican Policy Design Toward Chicanos, María Rosa Garcia-Acevedo Part Three: Chicana/o Educational Struggles: Dimensions, Accomplishments and Challenges 7. Actors Not Victims: Chicanos in the Struggle for Educational Equality, Guadalupe San Miguel 8. Juncture in the Road: Chicano Studies Since El Plan de Santa Barbara, Ignacio Garcia Part Four: Gender Feminism and Chicanas/os: Developments and Perspectives 9. Gender and Its Discontinuities in Male/Female Domestic Relations: Mexicans in Cross Cultural Context, Adelaida R. Del Castillo 10. With Quill and Torch: A Chicana Perspective on the American Women's Movement and Feminist Theories, Beatriz Pesquera and Denise A. Segura

Classroom Behavior Management for Diverse and Inclusive Schools

This book explores the impact of globalization on self and identity from multidisciplinary perspectives. Chapters cover a variety of topics including the impact of cultural inertia on intergroup relations, global consumer identity, radicalization, evolving national identities, young people's negotiations of different cultural identities, the emergence of all inclusive global identities, and the impact of global citizenship education on global identity. This collection will be of value to scholars and students from across the social sciences.

African-American Exploration in West Africa

In the 1860s, as America waged civil war, several thousand African Americans sought greater freedom by emigrating to the fledgling nation of Liberia. While some argued that the new black republic represented disposal rather than emancipation, a few intrepid men set out to explore their African home. *African-American Exploration in West Africa* collects the travel diaries of James L. Sims, George L. Seymour, and Benjamin J. K. Anderson, who explored the territory that is now Liberia and Guinea between 1858 and 1874. These remarkable diaries reveal the wealth and beauty of Africa in striking descriptions of its geography, people, flora, and fauna. The dangers of the journeys surface, too -- Seymour was attacked and later died of his wounds, and his companion, Levin Ash, was captured and sold into slavery again. Challenging the notion that there were no black explorers in Africa, these diaries provide unique perspectives on 19th-century Liberian life and life in the interior of the continent before it was radically changed by European colonialism.

The Ties that Bind

This book presents an interpretation and analysis of the phenomenon of ambivalence so persistent in the Afro-American consciousness of Africa. Today a wide range of black opinion has accepted Pan-Africanism and Africa and many are consciously making an effective attempt to create more links with Africa. The right of blacks to be culturally independent is now accepted, at least verbally, without question. But this was not always the case. The present study is offered as an exploration in the field of social identity as it affects people in diaspora. The identity of every people is shaped in their environment, it is a legacy of historical forces.

African Americans and Africa

An introduction to the complex relationship between African Americans and the African continent What is an "African American" and how does this identity relate to the African continent? Rising immigration levels, globalization, and the United States' first African American president have all sparked new dialogue around the question. This book provides an introduction to the relationship between African Americans and Africa from the era of slavery to the present, mapping several overlapping diasporas. The diversity of African American identities through relationships with region, ethnicity, slavery, and immigration are all examined to investigate questions fundamental to the study of African American history and culture.

The Explorers

Africans, African Americans and Afro-Caribbeans also known as West Indians, and how they relate to each other are the focus of this study. Tensions which exist between a significant number of Africans and Afro-Caribbeans in Britain - between Jamaicans and Nigerians and others - is one of the subjects addressed in the book. The author also looks at how members of these groups cooperate in a number of areas but concedes that even in the absence of overt - or covert - hostility between them there is indifference towards each other in many cases. There are many other subjects covered in the book

about these communities including the impact of African independence on the civil rights movement in the United States. The author has focused on Britain and the United States. Both countries have large numbers of African and Afro-Caribbean (West Indian) immigrants.

Relations Between Africans, African Americans and Afro-Caribbeans

W. E. B. Du Bois was a public intellectual, sociologist, and activist on behalf of the African American community. He profoundly shaped black political culture in the United States through his founding role in the NAACP, as well as internationally through the Pan-African movement. Du Bois's sociological and historical research on African-American communities and culture broke ground in many areas, including the history of the post-Civil War Reconstruction period. Du Bois was also a prolific author of novels, autobiographical accounts, innumerable editorials and journalistic pieces, and several works of history. Written in very accessible prose, these two booklets, originally published in 1930, allowed W. E. B. Du Bois to reach a wide audience with an interest in Africa. What is so incredible about the two Africa booklets is their lasting relevance and value to the study of Africa today. Coupling Du Bois's breadth of scholarship with his passion for the subjects, the analyses in these booklets are integral to the study of Africa. Many of his arguments foreshadowed the issues and debates regarding Africa in the twentieth century. Expertly synthesized in an introduction by Emmanuel Akyeampong, this edition of the two Africa booklets is essential for anyone interested in African history.

Africa, Its Geography, People and Products and Africa-Its Place in Modern History (The Oxford W. E. B. Du Bois)

"The reader sees and feels the villages of Africa as "Kojo-Achampong" learns tribal customs, drinks palm wine and masters the art of designing jewelry. Above all, a spirit and sense of loyalty, pride and independence of the people permeate this moving account. This book is a must read for African-Americans and others seeking a deeper awareness of their roots."--BOOK JACKET.

Return of the African-American

The authors provide valuable information specific for African travel and tracing African genealogy using traditional methods, the Internet and DNA technology.

A History of Ideas

Examines the presence of Africans in America from 1526, when the slaves of a Spanish expedition rebelled and settled among local Native Americans.

Roots Recovered!

African history as world history: Africa and the Roman Empire -- Africa and the rise of Islam -- The mighty kingdoms of Ghana, Mali, and Songhay -- The Atlantic slave trade: Slavery and resistance in South America and the Caribbean -- Slavery and resistance in the United States -- African Americans in the twentieth century.

Liberia

John Brown Russwurm and African American Settlement in West Africa examines Russwurm's intellectual accomplishments and significant contributions to the black civil rights movement in America from 1826 - 1829, and more significantly explores the essential characteristics that distinguished his thoughts and endeavours from other black leaders in America, Liberia and Maryland in Liberia. Not surprisingly, the most controversial of Russwurm's ideas was his unwavering support of the American Colonization Society (ACS) and the Maryland State Colonization Society (MSCS), two organizations that most civil rights activists found racist and pro-slavery. Beyan probes the social and intellectual sources, underlying motives and the legacies of Russwurm's thoughts and endeavours, all in an attempt to dissect why Russwurm acted and made the choices that he did.

From Africa to America

African-American Migration will look at experiences of children through slavery, emancipation, post-War Caribbean migration to the UK, and current migration to USA / Europe from Africa.

African-American Interest in Africa and Interaction with West Africa

In a book that is at once a vividly detailed memoir and a richly researched work of scholarship, the son of an African-American mother and a Congolese father uses his fascinating personal background as a lens through which to view three centuries of shared history between Africans and African-Americans.

African People in World History

Investigates the American Colonization Society organized in 1817 with a goal of migrating free African Americans to a colony they established in West Africa.

African American Settlements in West Africa

Accepting the basic premise that Africa is the ancestral homeland of black Americans raises questions as to how much, if any, of African cultural heritage remains within that community. Some claim that the severity of the plantation system and the acculturation process of the slaves could not have left any Africanism in the New World, while others argue that African cultural heritage can still be seen today in many aspects of American life and thought. This volume revisits the debate, examining the ways in which this alleged cultural heritage manifests itself.

Migration from Africa

In 1957 Ghana became one of the first sub-Saharan African nations to gain independence from colonial rule. Over the next decade, hundreds of African Americans—including Martin Luther King Jr., George Padmore, Malcolm X, Maya Angelou, Richard Wright, Pauli Murray, and Muhammad Ali—visited or settled in Ghana. Kevin K. Gaines explains what attracted these Americans to Ghana and how their new community was shaped by the convergence of the Cold War, the rise of the U.S. civil rights movement, and the decolonization of Africa. Kwame Nkrumah, Ghana's president, posed a direct challenge to U.S. hegemony by promoting a vision of African liberation, continental unity, and West Indian federation. Although the number of African American expatriates in Ghana was small, in espousing a transnational American citizenship defined by solidarities with African peoples, these activists along with their allies in the United States waged a fundamental, if largely forgotten, struggle over the meaning and content of the cornerstone of American citizenship—the right to vote—conferred on African Americans by civil rights reform legislation.

Kinship

Meriwether explores the dynamic nature of Africa's role in African American lives from the middle 1930s to the early 1960s, during the confluence of the liberation struggles in Africa and the civil rights movement in the United States.

The African Colonization Movement, 1816-1865

This book is the first comprehensive survey of the African-American experience. It draws on recent research to present black history in a clear and direct manner, within a broad social, cultural, and political framework. Life in sixteenth-century Africa, slavery, the antislavery movement, The Civil War, emancipation, and reconstruction. For anyone who is interested in an in-depth exploration of African-American history as it relates to U.S. history.

The African Presence in Black America

For more than half a century before World War II, black South Africans and “American Negroes”—a group that included African Americans and black West Indians—established close institutional and personal relationships that laid the necessary groundwork for the successful South African and American antiapartheid movements. Though African Americans suffered under Jim Crow racial discrimination, oppressed Africans saw African Americans as free people who had risen from slavery to success and were role models and potential liberators. Many African Americans, regarded initially by the South African government as “honorary whites” exempt from segregation, also saw their activities in South Africa as a divinely ordained mission to establish “Africa for Africans,” liberated from European empires. The Jamaican-born Marcus Garvey's Universal Negro Improvement Association, the largest black-led movement with two million members and supporters in forty-three countries at its height in the early 1920s, was the most anticipated source of liberation. Though these liberation prophecies

went unfulfilled, black South Africans continued to view African Americans as inspirational models and as critical partners in the global antiapartheid struggle. *The Americans Are Coming!* is a rare case study that places African history and American history in a global context and centers Africa in African Diaspora studies.

American Africans in Ghana

The history of Liberia and the United States are closely tied together, but few people have taken the necessary steps to understand the complicated relationship between the two countries. *Liberia: America's Footprint in Africa* traces the history of an African nation whose fate is closely tied to an uprising of slaves that began on the island that is now Haiti. The violence there caused people in the United States to wonder about the future of slavery and blacks in their own nation. In this detailed history written by a Liberian educator, you'll discover: - how the American Colonization Society played a critical role in the creation of Liberia; - how courageous blacks living in the United States persevered in seeking freedom; - how Liberia is culturally, socially, and politically connected to the United States. Discover the rich history of two nations and why Liberia remains relevant today. Enriched with interviews of scholars, Liberian community elders and detailed research, *Liberia: America's Footprint in Africa* is a step-by-step account of an overlooked country.

Proudly We Can be Africans

An examination of the trans-oceanic migration of West Indians from the Caribbean to Sierra Leone in the decades following the abolition of slavery in the British colonies in 1807. The West Indians who immigrated to Sierra Leone during this period came to occupy many positions in the colonial government of the colony, and, in time, they were an important (although not always well-liked) minority. The book looks at the historical development of this group, how they helped establish the colony of Sierra Leone, and the reasons for their influence and power.

The African-American Odyssey: To 1877

An exploration of the political and social experiences of African Americans in transition from enslaved to citizen. *Claiming Freedom* is a noteworthy and dynamic analysis of the transition African Americans experienced as they emerged from Civil War slavery, struggled through emancipation, and then forged on to become landowners during the Reconstruction and post-Reconstruction period in the Georgia lowcountry. Karen Cook Bell's work is a bold study of the political and social strife of these individuals as they strived for and claimed freedom during the nineteenth century. Bell begins by examining the meaning of freedom through the delineation of acts of self-emancipation prior to the Civil War. Consistent with the autonomy that they experienced as slaves, the emancipated African Americans from the rice region understood citizenship and rights in economic terms and sought them not simply as individuals for the sake of individualism, but as a community for the sake of a shared destiny. Bell also examines the role of women and gender issues, topics she believes are understudied but essential to understanding all facets of the emancipation experience. It is well established that women were intricately involved in rice production, a culture steeped in African traditions, but the influence that culture had on their autonomy within the community has yet to be determined. A former archivist at the National Archives and Records Administration, Bell has wielded her expertise in correlating federal, state, and local records to expand the story of the all-black town of 1898 Burroughs, Georgia, into one that holds true for all the American South. By humanizing the African American experience, Bell demonstrates how men and women leveraged their community networks with resources that enabled them to purchase land and establish a social, political, and economic foundation in the rural and urban post-war era.

The Americans Are Coming!

First published in 1997. Routledge is an imprint of Taylor & Francis, an informa company.

Africana Studies

Americans from Africa seeks to convey varying perspectives on the "Black Experience" in the United States and its controversial history. This volume, *Slavery and Its Aftermath*, deals with four major issues: the extent of African influences on the lives of those enslaved and brought to America, beginning with an essay on "Africanisms in Everyday Life" by Melville J. Herskovits; the impact of slavery on personality

and social structure, sometimes called "The Elkins Debate;" similarities and differences in life for African Americans in the South and in the North; and matters of community, class, and family, including the full text of the "Moynihan Report" and several pointed critiques. In addition to the commentaries by and on the works of Herskovits, Elkins, and Daniel Patrick Moynihan, other contributors to Volume I include Kenneth B. Clark, Mina Caulfield Davis, E. Franklin Edwards, Eugene Genovese, Ulf Hannerz, Charles S. Johnson, Leroi Jones, and Charles Keil. The second volume, *Old Memories, New Moods*, contains essays on the roots of black protest; the background and character of the Civil Rights Movement; interpretations of the impact and significance of Black Power, and varied views on changing self-images of being African American.

Liberia

Providing an excellent example of why folk artists can be appreciated as carriers of knowledge, even if they are unaware of it, this book could change the ways we understand and appreciate American folk arts. Connecting a sharecropper from Georgia in the Southern United States to a protector and healer in Touba, Senegal, West Africa, the holy city of Mouridism, and the final resting place of its founder, Shaikh Ahmadou Bamba Mbàcke, it makes an interesting link while examining the cultural aspects of two very different and yet similar paths of life. Historians and art historians alike will find this investigation of African American art and folk culture both interesting and insightful. Not only does this book trace the characteristics of art through the African Diaspora, but it also traces Islam through those same diasporic transportations of colonial exploration and slavery.

Dark Continent

Learn about the most important milestones in Black history in *The Black History Book*. Part of the fascinating Big Ideas series, this book tackles tricky topics and themes in a simple and easy to follow format. Learn about Black History in this overview guide to the subject, great for novices looking to find out more and experts wishing to refresh their knowledge alike! *The Black History Book* brings a fresh and vibrant take on the topic through eye-catching graphics and diagrams to immerse yourself in. This captivating book will broaden your understanding of Black History, with:

- Covers the most important milestones in Black and African history
- Packed with facts, charts, timelines and graphs to help explain core concepts
- A visual approach to big subjects with striking illustrations and graphics throughout
- Easy to follow text makes topics accessible for people at any level of understanding

The Black History Book is a captivating introduction to the key milestones in Black History, culture, and society across the globe – from the ancient world to the present, aimed at adults with an interest in the subject and students wanting to gain more of an overview. Explore the rich history of the peoples of Africa and the African diaspora, and the struggles and triumphs of Black communities around the world, all through engaging text and bold graphics. Your Black History Questions, Simply Explained Which were the most powerful African empires? Who were the pioneers of jazz? What sparked the Black Lives Matter movement? If you thought it was difficult to learn about the legacy of African-American history, *The Black History Book* presents crucial information in an easy to follow layout. Learn about the earliest human migrations to modern Black communities, stories of the early kingdoms of Ancient Egypt and Nubia; the powerful medieval and early modern empires; and the struggle against colonization. This book also explores Black history beyond the African continent, like the Atlantic slave trade and slave resistance settlements; the Harlem Renaissance and Jazz Age; the Windrush migration; civil rights and Black feminist movements. The Big Ideas Series With millions of copies sold worldwide, *The Black History Book* is part of the award-winning Big Ideas series from DK. The series uses striking graphics along with engaging writing, making big topics easy to understand.

West Indians in West Africa, 1808-1880

One of the most famous early white explorers of central West Africa, the American Paul du Chaillu won fame for confirming the existence of the gorilla-and for his accurate and breathtaking descriptions of the life, customs and behavior of Africans in the pre-colonial era. This book was written after the author's last expedition into the African interior when Du Chaillu set out with the intention of reaching the Nile River. After over a year of travel, the expedition failed and he was forced back after being wounded by a poison arrow during an attack by a hostile interior tribe. The high adventure of Du Chaillu's expedition-and brutally frank descriptions of his encounters with the natives-are just part of what makes this work a compelling read. It also contains vivid and uncensored descriptions of native African culture, cannibalism, tribal warfare, witchdoctors, superstition, and technology. His astute observations were

used by Oxford University professor John R. Baker in a section on African cognitive ability in his classic work *Race*. His description of African slavery in particular, is highly relevant, as it shows that the biggest traders in slaves were the Africans themselves, despite all efforts by the British Royal Navy to halt the practice. "Happily the Slave Trade will never flourish as it did in times past, and it may be said now to be almost entirely done away with. In the country of my late exploration, the only people who continue the traffic in slaves are negro agents, from the two Portuguese islands St. Thomas and Prince's, who purchase people for their masters, who are also negroes. They cross to and from the mainland in small canoes, and thus avoid the cruisers." He also addresses the claimed existence of advanced African kingdoms in West Africa prior to the advent of the European Age of Exploration: "The reader who has followed me through the volume of my former exploration and the present book, will have been able to gather an idea of the general character and disposition of the negro of this part of Africa, as he now stands. I have made researches to ascertain if his race had formerly left remains, showing that he had once attained a tolerably high state of civilisation; my researches have proved vain, I have found no vestige whatever of ancient civilisation. Other travellers in different parts of Africa have not been more successful than I have." He also addresses pre-colonial African technology: "I think everything tends to show that the negro is of great antiquity, and has always remained stationary. The working of iron, considering the very primitive way they work it, and how easy it is to find the ore, must have been known to them from the remotest time, and to them the age of stone and bronze must have been unknown." He also opines unfavorably on Africa's future: "As to his future capabilities, I think extreme views have prevailed among us. Some hold the opinion that the negro will never rise higher than he is; others think that he is capable of reaching the highest state of civilization. For my own part, I do not agree with either of these opinions. "I believe that the negro may become a more useful member of mankind than he is at present, that he may be raised to a higher standard; but that, if left to himself, he will soon fall back into barbarism, for we have no example to the contrary. In his own country the efforts of the missionaries for hundreds of years have had no effect; the missionary goes away and the people relapse into barbarism. Though a people may be taught the arts and sciences known by more gifted nations, unless they have the power of progression in themselves, they must inevitably relapse in the course of time into their former state." This new edition has been completely reset and contains all original 23 illustrations and maps.

Claiming Freedom

Far too many Americans, of all races, are unaware of the pivotal role that people of African descent have played in shaping the US and the world. Even less is known about the role of African peoples in the history of all humankind. *Becoming American: The African-American Journey* will open their eyes--and enlighten even the already knowledgeable. It features two side-by-side chronological timelines that uniquely contrast the major events and personalities in both African-American and Global/African Diasporan history--spanning from 4 million BCE to Barack Obama's momentous presidential campaign. In addition, a carefully-chosen collection of key political, historical, cultural and literary texts, quotes, speeches, and songs document the impact of the black presence in American and world history.

Dismantling Black Manhood

Although the Civil War marked an end to slavery in the United States, it would take another fifty years to establish the country's civil rights movement. Dr. W.E.B. Du Bois was among the first generation of African-American scholars to spearhead this movement towards equality. As cofounder of the NAACP, he sought to initiate equality through social change, and as a talented writer, he created books and essays that provide a revealing glimpse into the black experience of the times. In *The Gift of Black Folk*, Du Bois recounts the history of African Americans and their many unsung contributions to American society. He chronicles their role in the early exploration of America, their part in developing the country's agricultural industry, their courage on the battlefields, and their creative genius in virtually every aspect of American culture. He also highlights the contributions of black women, proposing that their freedom could lead to freedom for all women. *The Gift of Black Folk* provides a powerful picture of the many struggles that paved the way for freedom and equality in our nation.

Americans from Africa

"This guide lists the numerous examples of government documents, manuscripts, books, photographs, recordings and films in the collections of the Library of Congress which examine African-American

life. Works by and about African-Americans on the topics of slavery, music, art, literature, the military, sports, civil rights and other pertinent subjects are discussed"--

J.B. Murray and the Scripts and Spirit Forms of Africa

W. E. B. Du Bois was a public intellectual, sociologist, and activist on behalf of the African American community. He profoundly shaped black political culture in the United States through his founding role in the NAACP, as well as internationally through the Pan-African movement. Du Bois's sociological and historical research on African-American communities and culture broke ground in many areas, including the history of the post-Civil War Reconstruction period. Du Bois was also a prolific author of novels, autobiographical accounts, innumerable editorials and journalistic pieces, and several works of history. In *Black Folk Then and Now*, W. E. B. Du Bois embarks on a mission to correct the omissions, misinterpretations, and deliberate lies he detected in previous depictions of black history. An exemplary revisionist exploration of history and sociology, this essay reflects Du Bois's lifelong mission to bring to light the truths of Black history and expose the African peoples' noble heritage. W. E. B. Du Bois writes extensively about the color line, which he believed at the time of publication to be the defining problem of the twentieth century. In 1946, following the Holocaust, Du Bois revised his arguments, reshaping them into the narrative we find in *The World and Africa*. With a series introduction by editor Henry Louis Gates, Jr., and an introduction by Wilson Moses, this edition is essential for anyone interested in African American history.

Black Mother

This volume closely examines the movement to resettle black Americans in Africa, an effort led by the American Colonization Society during the nineteenth century and a heavily debated part of American history. Some believe it was inspired by antislavery principles, but others think it was a proslavery reaction against the presence of free Black people in society. Moving beyond this simplistic debate, contributors link the movement to other historical developments of the time, revealing a complex web of different schemes, ideologies, and activities behind the relocation of African Americans to Liberia. They explain what colonization, emigration, immigration, abolition, and emancipation meant within nuanced nineteenth-century contexts, looking through many lenses to more accurately reflect the past. Magness | Brandon Mills | Robert Murray | Sebastian N. Page | Daniel Preston | Beverly Tomek | Andrew N. Wegmann | Ben Wright | Nicholas P. Wood A volume in the series *Southern Dissent*, edited by Stanley Harrold and Randall M. Miller

The Black History Book

Penguin announces a prestigious new series under presiding editor Arthur Schlesinger, Jr. Many works of history deal with the journeys of blacks in bondage from Africa to the United States along the "middle passage," but there is also a rich and little examined history of African Americans traveling in the opposite direction. In *Middle Passages*, award-winning historian James T. Campbell vividly recounts more than two centuries of African American journeys to Africa, including the experiences of such extraordinary figures as Langston Hughes, W.E.B. DuBois, Richard Wright, Malcolm X, and Maya Angelou. A truly groundbreaking work, *Middle Passages* offers a unique perspective on African Americans' ever-evolving relationship with their ancestral homeland, as well as their complex, often painful relationship with the United States.

A Journey to Ashango-Land, and Further Penetration Into Equatorial Africa

"This is an enthralling work that will be essential reading for years to come. You finish it understanding how integral a part blacks were of the making of the West and, indeed, America." — David Nicholson, *Washington Post* A landmark history of African Americans in the West, *In Search of the Racial Frontier* rescues the collective American consciousness from thinking solely of European pioneers when considering the exploration, settling, and conquest of the territory west of the Mississippi. From its surprising discussions of groups of African American wholly absorbed into Native American culture to illustrating how the largely forgotten role of blacks in the West helped contribute to everything from the Brown vs. Board of Education desegregation ruling to the rise of the Black Panther Party, Quintard Taylor fills a major void in American history and reminds us that the African American experience is unlimited by region or social status. "[Rich] in scope and scholarly detail — it will certainly stand as the definitive work on the subject for some time to come." — James A. Miller, *Boston Globe* "[B]y far the

most complete general history of blacks in the West." — Scott L. Malcolmson, Newsday "An absorbing chronicle." — Publisher's Weekly "Those looking for a solid overview of the African-American presence in our region would do well to let Quintard Taylor be their guide." — John C. Walter, Seattle Times
