

William Harvey 1578 1657

[#William Harvey](#) [#blood circulation](#) [#circulatory system](#) [#physiologist](#) [#17th century medicine](#)

William Harvey, a prominent English physician and anatomist (1578-1657), is celebrated for his groundbreaking contributions to medicine, most notably his comprehensive and accurate description of the systemic circulation and the properties of blood being pumped to the brain and body by the heart. His pivotal work, *De Motu Cordis*, fundamentally revolutionized understanding of the human circulatory system and established the modern foundation for physiology and cardiovascular science.

Interesting William Harvey Facts

William Harvey, was born in Folkestone, England, ...

William Harvey entered King's School in 1585.

He transferred to Gonville and Caius College in 1593.

In 1597 he earned his BA from Caius College.

In 1599 he began to study medicine at the University of Padua in Italy.

Harvey earned his Doctor of Medicine from the University of Padua on April 25, 1602.

In 1604 he joined the College of Physicians.

On October 14, 1609 he was promoted to Physician in Charge at St Bartholomew's Hospital.

He accepted the position of Lumleian lecturer in 1615.

He would give lectures on anatomy throughout England for a period of seven years.

In April 1616 he started the lecture series and his notes

In 1628 he published *De Motu Cordis* (On the Motion of the Heart and Blood)

The book was published in Frankfurt, Germany because Harvey knew

Harvey's theories of blood circulation drew considerable criticism in the

Harvey was skeptical of allegations of witchcraft and in

From 1630 to 1632 he travelled Europe with the Duke of Lennox.

In 1642 he was made Doctor of Physic and in 1645 became Warden of Merton

Harvey made observations important to the future of embryology.

He died in 1657 of an apparent stroke.
