Plunkett's E-Commerce & Internet Business Almanac

In distributed, open systems like cyberspace, where the behavior of autonomous agents is uncertain and can affect other agents' welfare, trust management is used to allow agents to determine what to expect about the behavior of other agents. The role of trust management is to maximize trust between the parties and thereby provide a basis for cooperation to develop. Bringing together expertise from technology-oriented sciences, law, philosophy, and social sciences, Managing Trust in Cyberspace addresses fundamental issues underpinning computational trust models and covers trust management processes for dynamic open systems and applications in a tutorial style that aids in understanding. Topics include trust in autonomic and self-organized networks, cloud computing, embedded computing, multi-agent systems, digital rights management, security and quality issues in trusting e-government service delivery, and context-aware e-commerce applications. The book also presents a walk-through of

online identity management and examines using trust and argumentation in recommender systems. It concludes with a comprehensive survey of anti-forensics for network security and a review of password security and protection. Researchers and practitioners in fields such as distributed computing, Internet technologies, networked systems, information systems, human computer interaction, human behavior modeling, and intelligent informatics especially benefit from a discussion of future trust management research directions including pervasive and ubiquitous computing, wireless ad-hoc and sensor networks, cloud computing, social networks, e-services, P2P networks, near-field communications (NFC), electronic knowledge management, and nano-communication networks.

This easy and fun read points out the pitfalls that are sure to derail your partnership and provides practical how-to instructions for building a successful, mutually rewarding and profitable business alliance.

Plunkett's Infotech Industry Almanac 2006: The Only Complete Guide to the Technologies and Companies Changing the Way the World Thinks, Works and Shar

A varied and fascinating look at sin, confession and pardon in Judaism. Through a series of lively introductions and commentaries, almost forty contributors—men and women, scholars, rabbis, theologians and poets, representing all Jewish denominations—examine the history of confession in Judaism, its roots in the Bible, its evolution in rabbinic and modern thought, and the very nature of confession for men and women today. Featuring the traditional prayers—provided in the original Hebrew and a new and annotated translation—this third volume in the *Prayers of Awe* series explores the relevance of confession today in what is bound to be the most up-to-date, comprehensive and insightful reconsideration of sin and confession in Judaism.

Managing Trust in Cyberspace

The growing complexity of today's interconnected systems has not only increased the need for improved information security, but also helped to move information from the IT backroom to the executive boardroom as a strategic asset. And, just like the tip of an iceberg is all you see until you run into it, the risks to your information are mostly invi

Cloud Enterprise Architecture examines enterprise architecture (EA) in the context of the surging popularity of Cloud computing. It explains the different kinds of desired transformations the architectural blocks of EA undergo in light of this strategically significant convergence. Chapters cover each of the contributing architectures of EA-business, information, application, integration, security, and technology-illustrating the current and impending implications of the Cloud on each. Discussing the implications of the Cloud paradigm on EA, the book details the perceptible and positive changes that will affect EA design, governance, strategy, management, and sustenance. The author ties these topics together with chapters on Cloud integration and composition architecture. He also examines the Enterprise Cloud, Federated Clouds, and the vision to establish the InterCloud. Laying out a comprehensive strategy for planning and executing Cloud-inspired transformations, the book: Explains how the Cloud changes and affects enterprise architecture design, governance, strategy, management, and sustenance Presents helpful information on next-generation Cloud computing Describes additional architectural types such as enterprise-scale integration, security, management, and governance architectures This book is an ideal resource for enterprise architects, Cloud evangelists and enthusiasts, and Cloud application and service architects. Cloud center administrators, Cloud business executives, managers, and analysts will also find the book helpful and inspirational while formulating appropriate mechanisms and schemes for sound modernization and migration of traditional applications to Cloud infrastructures and platforms.

No More Cold Calling(TM)

Cold calling is one of the most awkward -- and unsuccessful -- ways to obtain clients in business. Now Joanne S. Black shares her proven 5-step Referral Selling system, so no businessperson ever has to make a cold call again. In this unique and practical guide, Black offers a tutorial on how to differentiate your business from your competitors, make favorable impressions on current clients so they'll refer their acquaintances, and set a "hook" that will leave them wanting more. NO MORE COLD CALLING provides selling scripts, presentation techniques, troubleshooting advice, and a host of helpful insights to increase any sales force's productivity.

Construction Safety

A close-to-ideal blend of suburb and city, speedy construction of towers of Babylon, the sparkling proportion of glass and steel buildings' facade at night showcase the wisdom of humans. They also witness the footsteps, sweats and tears of architects and engineers. Unfortunately, these signatures of human civilizations are swathed in towering figures of construction accidents. Fretting about these on sites, different countries adopt different measures on sites. This book firstly sketches the construction accidents on sites, followed by a review on safety measures in some of the developing countries such as Bermuda, Egypt, Kuwait and China; as well as developed countries, for example, the United States, France and Singapore. It also highlights the enormous compensation costs with the courts' experiences in the United Kingdom and Hong Kong.
