National Geographic Readers: Wildfires

Learn all about wildfires—how they happen, why they're important, and when they're dangerous—in this fascinating level 3 reader. It's sure to ignite your interest, with color photographs, interesting facts, and more.

Wildfires

Learn all about wildfires-how they happen, why they're important, and when they're dangerous-in this fascinating Level 3 reader. It's sure to ignite your interest, with color photographs, interesting facts, and more.

Wildfires

Learn all about wildfires--how they happen, why they're important, and when they're dangerous.

Wildfires

In this book, young readers will learn about the ecological impacts of wildfires, the ins and outs of fire science including tactics for prevention and containment, cutting-edge technology used to track wildfires and predict fire behavior, and about the impressive skill, survival tactics, and bravery required to control a wildfire.

Wildfires

Read along with National Geographic! The events of September 11, 2001, changed the world forever. With compelling photographs and sensitive, age-appropriate text, this Level 3 reader recounts the shocking attacks at the World Trade Center, the Pentagon, and in Pennsylvania, explains who was behind the attacks, and celebrates the spirit of hope that emerged through the inspiring story of rescue and recovery and the heroes who raced to save lives. National Geographic Readers' combination of expert-vetted text and fascinating images, along with an engaging approach to reading, has proved to be a winning formula with kids, parents, and educators. Level 3 text provides accessible, yet wide-ranging information for fluent readers. Each reader includes text written by an experienced, skilled children's books author, a photo glossary, and interactive features in which kids get to reinforce what they've learned in the book.

Extreme Wildfire

Shows how firefighters put out forest fires and discusses the importance of fire safety

Wildfires

In just a few seconds, a spark can turn a forest into a rapidly spreading inferno of intense heat and suffocating smoke. Firefighters try to control the wildfire—a battle that might last for months. Water can be used to fight wildfires, but too much water can cause deadly floods. Floods reduce land to swamp and sweep away houses and bridges. In their wake, they leave food shortages, contaminated drinking water, and diseases like cholera and typhus. Follow the scorched trail of the worst wildfires ever, learn what causes flash floods, and discover the technology that helps predict these devastating disasters.

National Geographic Readers: September 11 (Level 3)

The author was embedded with one of the busiest wildfire crews in the United States Reveals wildfires through the experiences of the people who go face-to-face with them Focuses on challenges faced in Western states. Every year wildfires ravage forests, destroy communities, and devastate human lives, with only the bravery of dedicated firefighters creating a barrier against even greater destruction. Throughout the 2016 wildfire season, journalist Heather Hansen witnessed firsthand the heroics of the Station 8 crew in Boulder, Colorado. She tells that story here, layered with the added context of the history, science, landscape, and human behavior that, year-by-year, increases the severity, frequency, and costs of conflagrations in the West. She examines the changes in both mindset and activity around wildfires and tracks the movement from wildfire as something useful, to something feared, to something necessary but roundly dreaded. Wildfire shares the drama, hardships, and experiences of the firefighters who try, sometimes in vain, to prevent destruction when a spark flares out of control. Hansen tells the rich and frightening stories of the firefighters themselves and the challenges they face: a safety system struggling to keep up with fire seasons that are lengthening, fires that are becoming more extreme, and agencies that are struggling to cover the bills.

Windows on Literacy Fluent Plus (Science: Earth/Space): Forest Fires

Coal and Peat Fires: A Global Perspective, Volumes 1–4, presents a fascinating collection of research about prehistoric and historic coal and peat fires. Magnificent illustrations of fires and research findings from countries around the world are featured—a totally new contribution to science. This third of four volumes in the collection, Coal Fires – Case Studies, examines in detail specific coal fires chronicled in a number of locations around the world including Brazil, the Czech Republic, Germany, Malawi, Poland, Russia, Spain, Tajikistan, the United States, Venezuela, and others. Authored by world-renowned experts in coal and peat fires Global in scope—countries from around the world are represented Includes beautiful color illustrations, lively presentations, important research data, and informative videos

Wildfires

WINNER of the BAILLIE GIFFORD PRIZE FOR NON-FICTION ***AN INTERNATIONAL BEST-SELLER*** 'Astounding on every page. John Vaillant is one of the great poetic chroniclers of the natural world' David Wallace-Wells 'No book feels timelier than John Vaillant's Fire Weather . . . an adrenaline-soaked nightmare that is impossible to put down' Cal Flyn, The Times A gripping account of this century's most intense urban fire, and a panoramic exploration of the rapidly changing relationship

between humanity and fire's fierce energy. In May 2016, Fort McMurray, Alberta, the hub of Canada's oil industry, was overrun by wildfire. The multi-billion-dollar disaster turned entire neighbourhoods into firebombs and drove 90,000 people from their homes in a single afternoon. Through the story of this apocalyptic conflagration, John Vaillant explores the past and the future of our ever-hotter, more flammable world. For hundreds of millennia, fire has been a partner in our evolution, shaping culture and civilization. Yet in our age of intensifying climate change, we are seeing its destructive power unleashed in ways never before witnessed by human beings. With masterly prose and cinematic style, Vaillant delves into the intertwined histories of the oil industry and climate science, the unprecedented devastation wrought by modern wildfires, and the lives forever changed by these disasters. Fire Weather is urgent reading for our new century of fire. 'A towering achievement; an immense work of research, reflection and imagination' Robert Macfarlane 'It reads like a thriller . . . I could not put it down' Andrea Wulf, author of *The Invention of Nature*

Extreme Fires and Floods

Describes everything about forest fires--how they start, how they are fought, how they are prevented, and why they are sometimes good for the forest.

Fire Weather is urgent reading for our new century of fire.

Fire Weather

Australia is a land of extremes, with floods and bushfires a harsh reality of life. These two extreme weather events have significant impact on both the natural landscapes and communities that are exposed to them. In this book, students will investigate occurrences of bushfire and flood in Australia, the results of such extreme weather and ways in which we can prevent or mitigate their occurrence.

Devouring Flames

Weather-related tragedies have fascinated humans throughout time. For those who loved *The Perfect Storm* and *Krakatoa*, the millions who log onto daily weather forecasting sites and check weather apps, and people who can't get enough front-page headlines of global natural disasters. Earthquakes, hurricanes, tornados, floods, forest fires, blizzards, and thunderstorms: National Geographic explores the deadliest of these disasters throughout history and arms you with ways to protect yourself from chaos and destruction. From the 1906 earthquake that flattened San Francisco and the morbid 1889 flash flood that wiped out the entire town of Johnstown, Pennsylvania, to the Superstorm of 1993 that blanketed Florida in snow and the more recent East Coast and Gulf Coast ravages of hurricanes Katrina

and Sandy, the destructive force and human tragedy both fascinates and horrifies. In addition to these gripping stories, NGS provides practical tips for surviving at home and weathering the lethal strength of these events if caught outside.

Coal and Peat Fires: A Global Perspective

A wildfire rages in a forest, lighting up the tall pines with bright orange flames. As the wind whips the fire, it burns 60 acres (24 hectares)—about the size of 45 football fields—every minute! The giant wildfire is much too large for firefighters to extinguish with water hoses. This is a job for specially trained wildfire firefighters called hotshots. Dramatic, true stories will keep readers turning the pages as they learn firsthand how these tough, brave firefighters use their strength, quick thinking, and expert skills to battle deadly blazes. In addition, readers will go behind the scenes to learn how hotshots train for their job so that they are ready to spring into action at a moment's notice.

Fire Weather

Perfect for reluctant readers who are curious about the destructive power of planet Earth, or who are researching a science paper. The Natural Disasters series explains how and why natural disasters occur, and how to stay safe if the reader should experience one.

Australian Geographic Geography: Floods and Bushfire

Many accounts of climate change depict disasters striking faraway places: melting ice caps, fearsome hurricanes, all-consuming fires. How can seeing the consequences of human impacts up close help us grasp how global warming affects us and our neighbors? This book is a travelogue that spotlights what a changing climate looks like on the local level—for wherever local happens to be. Michael M. Gunter, Jr. takes readers around the United States to bear witness to the many faces of the climate crisis. He argues that conscientious travel broadens understanding of climate change and makes its dangers concrete and immediate. Vivid vignettes explore the consequences for people and communities: sea level rise in Virginia, floods sweeping inland in Tennessee, Maine lobsters migrating away from American territorial waters, and imperiled ecosystems in national parks, from Alaskan permafrost to the Florida Keys. But Gunter finds inspiring initiatives to mitigate and adapt to these threats, including wind turbines in a tiny Texas town, green building construction in Kansas, and walkable urbanism in Portland, Oregon. These projects are already making a difference—and they underscore the importance of local action. Drawing on interviews with government officials, industry leaders, and alternative energy activists, *Climate Travels* emphasizes direct personal experience and the centrality of environmental justice. Showing how travel can help bring the reality of climate change home, it offers readers a hopeful message about how to take action on the local level themselves.

Severe Weather

"Pitilessly compelling, the sort of saga devoured in one horrified sitting."—National Geographic Adventure The Thirtymile Fire in the North Cascade Range near the Canadian border of Washington began as a simple mop-up operation; in a few hours, a series of catastrophic errors led to the entrapment and deaths of four members of the fire crew—two teenage girls and two young men. Each had brought order and meaning to their lives by joining the firefighting world. Then the very flames they pursued turned on them, extinguishing their lives. Weaving together the astonishing stories told by the fire's witnesses and, later, the victims' family members and the response to the official reports, John N. Maclean creates a riveting account of the deadly Thirtymile Fire and the controversy and recriminations that raged in its aftermath.

Hotshots

Photographs and text introduce different kinds of volcanoes, where they are located, how and why they erupt, and other interesting data about volcanoes.

Forest Fires

MainSails gives your students the inside knowledge on how language works, how to analyse it and how to apply it to a variety of situations. Each title features: a stimulating magazine-style format and innovative teaching elements; unique Think Tank elements encouraging interaction with the text; investigations of literacy devices that are essential for effective writing; specific modelling of text

types, including fantasy, mystery, reports, explanation and narratives. MainSails is ideal for: developing students' oral reading and comprehension skills; Guided Reading and Reciprocal Reading; supporting students as they develop their own writing style; explicitly teaching comprehension skills including summarising, sequencing, understanding inferences and understanding cause and effect.

Climate Travels

Kids will burst with excitement as they learn all about the science and wonder of volcanoes in this National Geographic Kids Reader. Includes 100 fun facts for quick and quirky information on all kinds of volcanoes, all around the world--and even some that are out of this world!

The Thirtymile Fire

In the tradition of *Young Men and Fire* and *Fire on the Mountain*, Stuart Palley's memoir *Into the Inferno* documents eight years of devastating wildfire in California, showing how fire can transform a landscape as well as a soul ... For nearly a decade, Palley has been on the frontline of fire. He has witnessed homeowners on the worst day of their lives. He's seen puddles of aluminum where cars were once parked. He's watched as 150-foot walls of flame cascaded down mountainsides and crashed into the Pacific Ocean. And he's captured, time and again, the tireless commitment of firefighters as they work to save lives and homes, in terrain where fire always seems to have the upper hand. In this memoir, Palley recalls how he went from learning to be safe on the fireline to a fire-savvy documentarian of wildfire and climate change. He covers some of California's largest, most destructive, and deadliest fires between 2012 and 2020, lugging his gear from the Wine Country Fire Siege to the Thomas Fire and ultimately to the Woolsey Fire in Malibu. And he shows how, in a relatively short span of time, fire season in California has grown into a perpetual crisis, requiring billions of dollars and thousands of firefighters each year. Ultimately, the experiences, the voices, the science shared in the memoir form an urgent call for climate action. *Into the Inferno* stands alongside Palley's photography to show just what kind of environmental tragedy we can expect if we do nothing.

Volcanoes

#1 NATIONAL BESTSELLER WINNER OF THE BAILLIE GIFFORD PRIZE FOR NONFICTION • FINALIST FOR THE HILARY WESTON WRITERS' TRUST PRIZE FOR NONFICTION • FINALIST FOR THE NATIONAL BOOK AWARD IN NONFICTION • ONE OF THE NEW YORK TIMES' TOP TEN BOOKS OF THE YEAR • A stunning account of the colossal wildfire at Fort McMurray, and a panoramic exploration of the rapidly changing relationship between fire and humankind from the award-winning, best-selling author of *The Tiger* and *The Golden Spruce*. Named a Best Book of the Year by The Guardian • TIME • The Globe and Mail • The New Yorker • Financial Times • CBC • Smithsonian • Air Mail Weekly • Slate • NPR • Toronto Star • The Washington Post • The Times • Orion Magazine In May 2016, Fort McMurray, the hub of Canada's petroleum industry and America's biggest foreign supplier, was overrun by wildfire. The multi-billion-dollar disaster melted vehicles, turned entire neighborhoods into firebombs, and drove 88,000 people from their homes in a single afternoon. Through the lens of this apocalyptic conflagration—the wildfire equivalent of Hurricane Katrina—John Vaillant warns that this was not a unique event but a shocking preview of what we must prepare for in a hotter, more flammable world. For hundreds of millennia, fire has been a partner in our evolution, shaping culture, civilization, and, very likely, our brains. Fire has enabled us to cook our food, defend and heat our homes, and power the machines that drive our titanic economy. Yet this volatile energy source has always threatened to elude our control, and in our new age of intensifying climate change, we are seeing its destructive power unleashed in previously unimaginable ways. With masterly prose and a cinematic eye, Vaillant takes us on a riveting journey through the intertwined histories of North America's oil industry and the birth of climate science, to the unprecedented devastation wrought by modern forest fires, and into lives forever changed by these disasters. John Vaillant's urgent work is a book for—and from—our new century of fire, which has only just begun.

Fires in the Wild

Describes the rescue efforts involved in saving the lives of animals affected by fires, including pets, farm animals, and wild creatures.

Erupt!

It takes just three simple ingredients to create a flaming wildfire that spreads across the land and impacts life hundreds of miles away! This fascinating title uses leveled text and vivid photos to introduce readers to powerful wildfires. Special features offer readers even more about these natural disasters. They include a map, a formation graphic, a famous wildfire profile, and more!

Into the Inferno

Do you know many animals that live in the forest? When there is a fire, they have to leave their homes and hurry out of the forest. Who do you think goes in to help the animals? What happens? Reading Level 6/F&P Level D

Fire Weather

Being a smokejumper is a fierce job filled with wildfire control and jumping from helicopters! Only the best and bravest can do this job. This title is at a Level 2 and is written specifically for emerging readers. Aligned to Common Core standards & correlated to state standards. Dash! is an imprint of Abdo Zoom, a division of ABDO.

Saving Animals from Fires

Meet some brave, amazing animals and the caring people who come to their rescue. Filled with engaging photos, fast facts, and fascinating sidebars, readers won't want to put this book down. National Geographic Kids Chapter books pick up where the best-selling National Geographic Readers series leaves off, offering young animal lovers who are ready for short chapters lively, exciting, full-color true stories--just right to carry in backpacks, share with your friends, and read under the covers at night.

Wildfires

Are these strange animals the stuff of nightmares or aliens from outer space? Turns out, they're real undersea animals! Find out how deep sea creatures use bizarre and fascinating adaptations to survive in their harsh environments in this Level 3 Reader.

Forest Fire

An introduction to hurricanes including how and why they form.

Smokejumpers

Baby Bear does not like pollen, which sticks to his fur and makes him sneeze, but insects and other animals tell him how important pollen is, even for him. Includes an activity and facts about allergies, flowers, and pollinators.

Hoot, Hoot, Hooray!

One morning in Miami Beach, an unexpected guest showed up in a luxury condominium complex's parking garage: an octopus. The image quickly went viral. But the octopus—and the combination of infrastructure quirks and climate impacts that left it stranded—is more than a funny meme. It's a potent symbol of the disruptions that a changing climate has already brought to our doorsteps and the ways we will have to adjust. Rob Verchick examines how we can manage the risks that we can no longer avoid, laying out our options as we face climate breakdown. Although reducing carbon dioxide emissions is essential, we need to adapt to address the damage we have already caused. Verchick explores what resilience looks like on the ground, from early humans on the savannas to today's shop owners and city planners. He takes the reader on a journey into the field: paddling through Louisiana's bayous, hiking in one of the last refuges of Joshua trees in the Mojave Desert, and diving off Key Largo with citizen scientists working to restore coral reefs. The book emphasizes disadvantaged communities, which bear the brunt of environmental risk, arguing that building climate resilience is a necessary step toward justice. Engaging and accessible for nonexpert concerned citizens, *The Octopus in the Parking Garage* empowers readers to face the climate crisis and shows what we can do to adapt and thrive.

Alien Ocean Animals (L3) (National Geographic Readers)

A raging wildfire can be a major disaster, costing lives and destroying homes. But fires in nature can help as well as harm, clearing forests of dead trees and allowing young plants to grow. Breathtaking

photos highlight this surprising look at fire's part in maintaining the balance of nature. This nonfiction picture book is an excellent choice to share during homeschooling, in particular for children ages 6 to 8. It's a fun way to learn to read and as a supplement for activity books for children. This updated edition includes: • Author's note • Stunning full-color photographs • Glossary • Index • Websites and additional reading sources • Series thumbnails on back cover Supports the Common Core Learning Standards, Next Generation Science Standards, and the Science, Technology, Engineering, and Math (STEM) standards

7 reasons NOT to move to New Zealand - 7 reasons NOT to move to New Zealand by Kiwiamericans 129,249 views 5 months ago 14 minutes, 38 seconds - In this video, I overview the 7 reasons you should NOT move to **New Zealand**.. It was time for an honest video as to what I think and ...
Introduction to the topic of reasons not to move to New Zealand.
Emphasis on the importance of highlighting both positive and negative aspects.
Reason 1: New Zealand's remote location and its impact on travel expenses and feeling isolated.
Reason 2: The unpredictable weather in New Zealand, which includes frequent changes and rainy winters.
Reason 3: The high cost of living in New Zealand, covering housing, fuel, and rising food prices.
Reason 4: Limited variety in shopping and product choices, especially in clothing and footwear.
Reason 5: Expensive mobile data and internet services, with a lack of unlimited data plans.
Reason 6: Challenges for small businesses due to a small population and conservative consumer mindset.
Reason 7: The small-town feel of New Zealand, even in larger cities, which may not suit those seeking a wide range of activities.
Conclusion and encouraging viewers to ask questions or seek additional resources.
