Ulrich & Canale's Nursing Care Planning Guides E-Book

Written by the author of the best-selling texts on nursing diagnosis and care plans, *Understanding the Nursing Process* is the first book to tutor students on the nursing process, concept mapping, and care planning all in one text. It guides students systematically through each step, focusing sharply on fundamental need-to-know concepts and using easy-to-understand case studies and learning activities. To teach care planning, the text presents selected nursing diagnoses and collaborative problems that are appropriate for beginning students and grouped from simple to complex. An Instructor's Resource CD-ROM shows how to use the book in a clinical nursing course. Online Tutoring powered by Smarthinking--Free online tutoring, powered by Smarthinking, gives students access to expert nursing and allied health science educators whose mission, like yours, is to achieve success. Students can access live tutoring support, critiques of written work, and other valuable tools.

Nursing Care Plans and Documentation

Designed to help students learn how to create nursing care plans and effectively document care, this practical book focuses on the nursing plans that are most important, ensuring that students learn what they need to know and that they can find the information they need easily without being distracted by irrelevant information. Packed with easy-to-understand information and focused on helping students develop critical reasoning skills, this respected text presents the most likely nursing diagnoses and collaborative problems with step-by-step guidance on nursing actions and rationales for interventions. More than 85 nursing care plans translate theory into clinical practice. This exciting revision includes special risk consideration icons called "Clinical Alert" (derived from the most recent IOM report) that integrate patient-specific considerations into each care plan. Other enhancements include a streamlined format for easier use; new care plans for maternity, pediatric, and mental health nursing.

Understanding the Nursing Process

Doenges, a clinical specialist, Moorhouse, a nurse consultant, and Geissler, a contract practitioner nurse consultant, all working out of Colorado Springs, Colorado, designed this text for both the practicing nurse and nursing student as a reference tool to use in acute care, community and homecare settings. Following introductory chapters on current issues in healthcare and care plan construction, the book is organized by body systems, presenting plans of care including information to assist the nurse in providing holistic care. The enclosed CD-ROM includes sample care plans for 172 disorders which can be customized to fit specific patient needs. Annotation copyrighted by Book News, Inc., Portland, OR

Nursing Care Plans

73 conceptual nursing care plans are based on Giddens concepts. Logical format for conceptual nursing care plans includes a definition of the concept, clinical problems, common causes, manifestations, outcomes, interventions, related concepts, and related clinical problems. Guidance for prioritized care planning organizes interventions in an assess-intervene-teach format, to help identify the most important priority interventions for patients. Use of standardized nursing language conveys concepts and clinical problems in easily understandable language that is commonly used in clinical settings, organizing care plans around terminology recognized by the American Nurses Association and easily understood by other healthcare professionals. UNIQUE! Wide-ranging approach covers concepts that are not addressed in other texts, such as health disparities, risk in pregnancy, impaired immunity, substance use, sensory deficits, continuity of care, and the dying process. Introduction opens the book by explaining the components of a conceptual nursing care plan and how to use the book to create patient-centered nursing care plans. Conceptual Care Map Creator on the Evolve website helps document care planning projects and clinical assignments. Expert authors Mariann Harding and Debra Hagler are nursing thought leaders and editors of the bestselling Lewis's Medical Surgical Nursing: Assessment and Management of Clinical Problems.

Nursing Care Plans

This unique, spiral-bound handbook is compact, portable, and written with busy home health nurses in mind! Organized by body system, it offers instant advice on assessment and care planning for the disorders home health nurses are likely to encounter. Providing assessment guides for all body systems, the home environment, and the client's psychological status, it includes full care plans for over 50 illnesses and conditions most commonly encountered in the home. Each plan lists nursing diagnoses, short- and long-term expected outcomes, nursing interventions, and client/caregiver interventions. Care plans are organized by body systems to allow for quick retrieval of information. Both short-term and long-term outcomes are included in the care plans to aid evaluation of the care provided. Detailed assessment guidelines are provided for all body systems to facilitate complete and comprehensive client examinations. Guidelines for environmental and safety assessments aid in the appraisal and improvement of clients' living conditions. Client and caregiver interventions are outlined in the care plans to promote active client participation in self-care. The convenient pocket size makes transportation and use convenient to home health nurses. Appendices on documentation guidelines, laboratory values, medication administration, home care resources, and standard precautions provide quick access to useful home care information. Related OASIS items are identified in the assessment section, and ICD-9 diagnostic codes in the care plans section assist with proper home care documentation. Visit frequency and duration schedules are suggested within each care plan to assist nurses in evaluating and planning care. NANDA nursing diagnoses are consistent with the latest 2001-2002 nomenclature. An increase in suggested therapy referrals within the care plans and in a new appendix helps nurses identify indicators for specialized services. A fully updated Resources Appendix includes websites for easy access to home health service information.
