Dual Tableaux: Foundations, Methodology, Case Studies

This book presents logical foundations of dual tableaux together with a number of their applications both to logics traditionally dealt with in mathematics and philosophy (such as modal, intuitionistic, relevant, and many-valued logics) and to various applied theories of computational logic (such as temporal reasoning, spatial reasoning, fuzzy-set-based reasoning, rough-set-based reasoning, order-of-magnitude reasoning, reasoning about programs, threshold logics, logics of conditional decisions). The distinguishing feature of most of these applications is that the corresponding dual tableaux are built in a relational language which provides useful means of presentation of the theories. In this way modularity of dual tableaux is ensured. We do not need to develop and implement each dual tableau from scratch, we should only extend the relational core common to many theories with the rules specific for a particular theory.

Ewa OrBowska on Relational Methods in Logic and Computer Science

This book is a tribute to Professor Ewa OrBowska, a Polish logician who was celebrating the 60th year of her scientific career in 2017. It offers a collection of contributed papers by different authors and covers the most important areas of her research. Prof. OrBowska made significant contributions to many fields of logic, such as proof theory, algebraic methods in logic and knowledge representation, and her work has been published in 3 monographs and over 100 articles in internationally acclaimed journals and conference proceedings. The book also includes Prof. OrBowska's autobiography, bibliography and a dialogue between her and the editors of the volume, as well as contributors' biographical notes, and is suitable for scholars and students of logic who are interested in understanding more about Prof. OrBowska's work.

Information Processing and Management of Uncertainty

These three volumes (CCIS 442, 443, 444) constitute the proceedings of the 15th International Conference on Information Processing and Management of Uncertainty in Knowledge-Based Systems, IPMU 2014, held in Montpellier, France, July 15-19, 2014. The 180 revised full papers presented together with five invited talks were carefully reviewed and selected from numerous submissions. The papers are organized in topical sections on uncertainty and imprecision on the web of data; decision support and uncertainty management in agri-environment; fuzzy implications; clustering; fuzzy measures and integrals; non-classical logics; data analysis; real-world applications; aggregation; probabilistic networks; recommendation systems and social networks; fuzzy systems; fuzzy logic in boolean framework; management of uncertainty in social networks; from different to same, from imitation to analogy; soft computing and sensory analysis; database systems; fuzzy set theory; measurement and sensory information; aggregation; formal methods for vagueness and uncertainty in a many-valued realm; graduality; preferences; uncertainty management in machine learning; philosophy and history of soft computing; soft computing and sensory analysis; similarity analysis; fuzzy logic, formal concept analysis and rough set; intelligent databases and information systems; theory of evidence; aggregation

functions; big data - the role of fuzzy methods; imprecise probabilities: from foundations to applications; multinomial logistic regression on Markov chains for crop rotation modelling; intelligent measurement and control for nonlinear systems.

Algebraic Techniques and Their Use in Describing and Processing Uncertainty

This book discusses heuristic methods – methods lacking a solid theoretical justification – which are ubiquitous in numerous application areas, and explains techniques that can make heuristic methods more reliable. Focusing on algebraic techniques, i.e., those that use only a few specific features of a situation, it describes various state-of-the-art applications, ranging from fuzzy methods for dealing with imprecision to general optimization methods and quantum-based methods for analyzing economic phenomena. The book also includes recent results from leading researchers, which could (and hopefully will) provide the basis for future applications. As such, it is a valuable resource for mathematicians interested in potential applications of their algebraic results and ideas, as well as for application specialists wanting to discover how algebraic techniques can help in their domains.

Logics in Artificial Intelligence

This book constitutes the refereed proceedings of the 13th European Conference on Logics in Artificial Intelligence, held in Toulouse, France, in September 2012. The book includes 3 invited talks, 36 regular papers, and 5 system descriptions, selected from 107 submissions. The papers cover various aspects of theory and methods of logic for artificial intelligence.

Hybrid Artificial Intelligent Systems

The two LNAI volumes 7208 and 7209 constitute the proceedings of the 7th International Conference on Hybrid Artificial Intelligent Systems, HAIS 2012, held in Salamanca, Spain, in March 2012. The 118 papers published in these proceedings were carefully reviewed and selected from 293 submissions. They are organized in topical sessions on agents and multi agents systems, HAIS applications, cluster analysis, data mining and knowledge discovery, evolutionary computation, learning algorithms, systems, man, and cybernetics by HAIS workshop, methods of classifier fusion, HAIS for computer security (HAISFCS), data mining: data preparation and analysis, hybrid artificial intelligence systems in management of production systems, hybrid artificial intelligent systems for ordinal regression, hybrid metaheuristics for combinatorial optimization and modelling complex systems, hybrid computational intelligence and lattice computing for image and signal processing and nonstationary models of pattern recognition and classifier combinations.

Sequents and Trees

This textbook offers a detailed introduction to the methodology and applications of sequent calculi in propositional logic. Unlike other texts concerned with proof theory, emphasis is placed on illustrating how to use sequent calculi to prove a wide range of metatheoretical results. The presentation is elementary and self-contained, with all technical details both formally stated and also informally explained. Numerous proofs are worked through to demonstrate methods of proving important results, such as the cut-elimination theorem, completeness, decidability, and interpolation. Other proofs are presented with portions left as exercises for readers, allowing them to practice techniques of sequent calculus. After a brief introduction to classical propositional logic, the text explores three variants of sequent calculus and their features and applications. The remaining chapters then show how sequent calculi can be extended, modified, and applied to non-classical logics, including modal, intuitionistic, substructural, and many-valued logics. *Sequents and Trees* is suitable for graduate and advanced undergraduate students in logic taking courses on proof theory and its application to non-classical logics. It will also be of interest to researchers in computer science and philosophers.

Automated Deduction - CADE 28

This open access book constitutes the proceeding of the 28th International Conference on Automated Deduction, CADE 28, held virtually in July 2021. The 29 full papers and 7 system descriptions presented together with 2 invited papers were carefully reviewed and selected from 76 submissions. CADE is the major forum for the presentation of research in all aspects of automated deduction, including foundations, applications, implementations, and practical experience. The papers are organized in the

following topics: Logical foundations; theory and principles; implementation and application; ATP and AI; and system descriptions.

Deductive Systems in Traditional and Modern Logic

The book provides a contemporary view on different aspects of the deductive systems in various types of logics including term logics, propositional logics, logics of refutation, non-Fregean logics, higher order logics and arithmetic.

Relations and Kleene Algebra in Computer Science

The book constitutes the joint refereed proceedings of the 11th International Conference on Relational Methods in Computer Science, RelMiCS 2009, and the 6th International Conference on Applications of Kleene Algebras, AKA 2009, held in Doha, Qatar in November 2009. The 22 revised full papers presented together with 2 invited papers were carefully reviewed and selected from numerous submissions. The papers describe the calculus of relations and similar algebraic formalisms as methodological and conceptual tools with special focus on formal methods for software engineering, logics of programs and links to neighbouring disciplines. Their scope comprises relation relation algebras and Kleene algebras, related formalisms such as process algebras, fixed point calculi, idempotent semirings, quantales, allegories, dynamic algebras, cylindric algebras and their applications in areas such as verification, analysis and development of programs and algorithms relational formal methods such as B or Z, tabular methods, algebraic approaches to logics of programs, modal and dynamic logics, interval and temporal logics, algebraic semantics of programming languages, graph theory and combinatorial optimization, games, automata and language theory, mechanised and automated reasoning, decision procedures, spatio-temporal reasoning, knowledge acquisition, preference and scaling methods or information systems.

Ewa OrBowska on Relational Methods in Logic and Computer Science

Good drawing forms the basis of all art - and is art in its own right. This book takes an in-depth look at drawing, exploring the many varieties of line and mark possibilities in different media, and comparing different styles. Questions such as 'What is drawing and what are its purposes?' and 'Can anyone do it?' will be answered, and those who have barely put pencil to paper will be guided gently through the basics. Drawing is not just for beginners, it will inspire those who already have experience to go further and explore more advanced techniques. From start to finish, every reader will be shown how to hone their observational skills to achieve convincing and satisfying results.

The Musical Herald

Recent years have been blessed with an abundance of logical systems, arising from a multitude of applications. A logic can be characterised in many different ways. Traditionally, a logic is presented via the following three components: 1. an intuitive non-formal motivation, perhaps tie it in to some application area 2. a semantical interpretation 3. a proof theoretical formulation. There are several types of proof theoretical methodologies, Hilbert style, Gentzen style, goal directed style, labelled deductive system style, and so on. The tableau methodology, invented in the 1950s by Beth and Hintikka and later perfected by Smullyan and Fitting, is today one of the most popular, since it appears to bring together the proof-theoretical and the semantical approaches to the pre of a logical system and is also very intuitive. In many universities it is sentation the style first taught to students. Recently interest in tableaux has become more widespread and a community crystallised around the subject. An annual

tableaux conference is being held and proceedings are published. The present volume is a Handbook a/Tableaux pre sending to the community a wide coverage of tableaux systems for a variety of logics. It is written by active members of the community and brings the reader up to frontline research. It will be of interest to any formal logician from any area.

Foundations of Integer Programming

This product is a complete reference to both classical material and advanced topics that are otherwise scattered in sometimes hard-to-find papers. A major effort in writing the book was made to highlight the intuitions behind the theoretical development.

Mathematical Reviews

Bridging the fields of conservation, art history, and museum curating, this volume contains the principal papers from an international symposium titled "Historical Painting Techniques, Materials, and Studio Practice" at the University of Leiden in Amsterdam, Netherlands, from June 26 to 29, 1995. The symposium—designed for art historians, conservators, conservation scientists, and museum curators worldwide—was organized by the Department of Art History at the University of Leiden and the Art History Department of the Central Research Laboratory for Objects of Art and Science in Amsterdam. Twenty-five contributors representing museums and conservation institutions throughout the world provide recent research on historical painting techniques, including wall painting and polychrome sculpture. Topics cover the latest art historical research and scientific analyses of original techniques and materials, as well as historical sources, such as medieval treatises and descriptions of painting techniques in historical literature. Chapters include the painting methods of Rembrandt and Vermeer, Dutch 17th-century landscape painting, wall paintings in English churches, Chinese paintings on paper and canvas, and Tibetan thangkas. Color plates and black-and-white photographs illustrate works from the Middle Ages to the 20th century.

Handbook of Tableau Methods

This operations research text incorporates a wealth of state-of-the-art, user-friendly software and more coverage of modern operations research topics. This edition features the latest developments in operations research.

Foundations of Databases

Foundations of Epidemiology is an open access, introductory epidemiology text intended for students and practitioners in public or allied health fields. It covers epidemiologic thinking, causality, incidence and prevalence, public health surveillance, epidemiologic study designs and why we care about which one is used, measures of association, random error and bias, confounding and effect modification, and screening. Concepts are illustrated with numerous examples drawn from contemporary and historical public health issues.

The Art Interchange

This is a collection of new investigations and discoveries on the history of a great tradition, the Lvov-Warsaw School of logic and mathematics, by the best specialists from all over the world. The papers range from historical considerations to new philosophical, logical and mathematical developments of this impressive School, including applications to Computer Science, Mathematics, Metalogic, Scientific and Analytic Philosophy, Theory of Models and Linguistics.

Index to Theses with Abstracts Accepted for Higher Degrees by the Universities of Great Britain and Ireland and the Council for National Academic Awards

An examination of instances, experiences, and spaces of early modern privacy. It opens new avenues to understanding the structures and dynamics that shape early modern societies through examination of a wide array of sources, discourses, practices, and spatial programmes.

Household Words

An illustrated exploration of fandom that combines academic essays with artist pages and experimental texts. *Fandom as Methodology* examines fandom as a set of practices for approaching and writing about art. The collection includes experimental texts, autobiography, fiction, and new academic perspectives on fandom in and as art. Key to the idea of “fandom as methodology” is a focus on the potential for fandom in art to create oppositional spaces, communities, and practices, particularly from queer perspectives, but also through transnational, feminist and artist-of-color fandoms. The book provides a range of examples of artists and writers working in this vein, as well as academic essays that explore the ways in which fandom can be theorized as a methodology for art practice and art history. *Fandom as Methodology* proposes that many artists and art writers already draw on affective strategies found in fandom. With the current focus in many areas of art history, art writing, and performance studies around affective engagement with artworks and imaginative potentials, fandom is a key methodology that has yet to be explored. Interwoven into the academic essays are lavishly designed artist pages in which artists offer an introduction to their use of fandom as methodology. Contributors Taylor J. Acosta, Catherine Grant, Dominic Johnson, Kate Random Love, Maud Lavin, Owen G. Parry, Alice Butler, SooJin Lee, Jenny Lin, Judy Batalion, Ika Willis. Artists featured in the artist pages Jeremy Deller, Ego Ahaïwe Sowinski, Anna Bunting-Branch, Maria Fusco, Cathy Lomax, Kamau Amu Patton, Holly Pester, Dawn Mellor, Michelle Williams Gamaker, The Women of Colour Index Reading Group, Liv Wynter, Zhiyuan Yang

Historical Painting Techniques, Materials, and Studio Practice

This new edition of the innovative and widely acclaimed *Theatre Histories: An Introduction* offers overviews of theatre and drama in many world cultures and periods together with case studies demonstrating the methods and interpretive approaches used by today's theatre historians. Completely revised and renewed in color, enhancements and new material include: a full-color text design with added timelines to each opening section a wealth of new color illustrations to help convey the vitality of performances described new case studies on African, Asian, and Western subjects a new chapter on modernism, and updated and expanded chapters and part introductions fuller definitions of terms and concepts throughout in a new glossary a re-designed support website offering links to new audio-visual resources, expanded bibliographies, approaches to teaching theatre and performance history, discussion questions relating to case studies and an online glossary.

Outlook

This guide provides practical guidance for managers of portfolios and those working in portfolio offices as well as those filling portfolio management roles outside a formal PfMO role. It will be applicable across industry sectors. It describes both the Portfolio Definition Cycle (identifying the right, prioritised, portfolio of programmes and projects) and the Portfolio Delivery Cycle (making sure the portfolio delivers to its strategic objectives).

The Philosopher's Index

Drawing Futures brings together international designers and artists for speculations in contemporary drawing for art and architecture. Despite numerous developments in technological manufacture and computational design that provide new grounds for designers, the act of drawing still plays a central role as a vehicle for speculation. There is a rich and long history of drawing tied to innovations in technology as well as to revolutions in our philosophical understanding of the world. In reflection of a society now underpinned by computational networks and interfaces allowing hitherto unprecedented views of the world, the changing status of the drawing and its representation as a political act demands a platform for reflection and innovation. *Drawing Futures* will present a compendium of projects, writings and interviews that critically reassess the act of drawing and where its future may lie. *Drawing Futures* focuses on the discussion of how the field of drawing may expand synchronously alongside technological and computational developments. The book coincides with an international conference of the same name, taking place at The Bartlett School of Architecture, UCL, in November 2016. Bringing together practitioners from many creative fields, the book discusses how drawing is changing in relation to new technologies for the production and dissemination of ideas.

Current Literature

Identifying, measuring and improving social impact is a significant challenge for corporate and private foundations, charities, NGOs and corporations. How best to balance possible social and environmental benefits (and costs) against one another? How does one bring clarity to multiple possibilities and opportunities? Based on years of work and new field studies from around the globe, the authors have written a book for managers that is grounded in the best academic and managerial research. It is a practical guide that describes the steps needed for identifying, measuring and improving social impact. This approach is useful in maximizing the impact of different types of investments, including grants and donations, impact investments, and commercial investments. With numerous examples of actual organizational approaches, research into more than fifty organizations, and extensive practical guidance and best practices, *Measuring and Improving Social Impacts* fills a critical gap.

Foundations of Epidemiology

This volume strives to establish a new agenda for methodologies in the social sciences, summarizing the most important research strategies developed in the social sciences since the early globalization and transnationalization studies of the 1980s and 1990s - namely, the cosmopolitan approach, the transnational lens, the scalar approach, and global and multi-sited ethnography. The contributions go beyond the early criticisms of methodological nationalism, providing insights into new strategies and illustrating how scholars apply these research strategies in different fields such as migration research and social anthropology. Analyzing the advantages and lacunae of new research strategies helps both to outline general methodological directions and to provide helpful guides for empirical analysis.

Media and Society

Media and Society: A Critical Perspective is a lively, illustrated introduction to the role that the mass media play in our lives, our society, and American culture. Featuring updated examples and expanded material on media theories, ideology, and new technology, the third edition helps students understand their relationship with the media they encounter daily.

Media and Society

Media and Society is an established textbook, popular worldwide for its insightful and accessible essays from leading international academics on the most pertinent issues in the media field today. With this updated edition, David Hesmondhalgh joins James Curran and a team of leading international scholars to speak to current issues relating to media and gender, media and democracy, sociology of news, the global internet, the political impact of the media, popular culture, the effects of digitisation on media industries, media and emotion, and other vital topics. The media are in a state of ferment, and are undergoing far-reaching change. The sixth edition tries to make sense of the media's transformation, and its wider implications. Purely descriptive accounts date fast, so the emphasis has been on identifying the central issues and problems arising from media change, and on evaluating its wider consequences. What is judged to be the staple elements of the field has evolved over time, as well as becoming more international in orientation. Yet the overriding aim of the book - to be useful to students - has remained constant. This text is an essential resource for all media, communication and film studies students who want to broaden their knowledge and understanding of how the media operates and affects society across the globe.

Media and Society

The fifth edition of this highly-respected collection of media and communication essays contains insightful analyses from leading international academics in the field on a wide range of key topics ranging from new media to film studies.

Social Media and Society

"This text engages students in the social media phenomenon, exploring how fundamental changes in mass media influence every level of societal communication. With the explosion of social media and big data, students must become conscious of media's positive and negative influences on their lives"--

Mass Media and Society

This widely used study has become the leading international textbook on the media. Written by distinguished academics from around the world, the book provides an invaluable guided tour through three key areas of debate: DT theories of media and society DT the study of media organizations DT debates about culture, ideology and democracy. This fourth edition has been fully updated and contains 13 new chapters on key topics, ranging from post-feminism to war journalism as entertainment. Above all, it offers a number of alternative views on the changing role of the media in the era of globalization, new communication technology, the war on terror, the advance of women and increasing economic inequality.

Communication as Culture

Carey's seminal work joins central issues in the field and redefines them. It will force the reader to think in new and fruitful ways about such dichotomies as transmissions vs. ritual, administrative vs. critical, positivist vs. marxist, and cultural vs. power-orientated approaches to communications study. An historically inspired treatment of major figures and theories, required reading for the sophisticated scholar' - George Gerbner, University of Pennsylvania ...offers a mural of thought with a rich background, highlighted by such thoughts as communication being the 'maintenance of society in time'. - Cast/Communication Booknotes These essays encompass much more than a critique of an academic discipline. Carey's lively thought, lucid style, and profound scholarship propel the reader through a wide and varied intellectual landscape, particularly as these issues have affected Modern American thought. As entertaining as it is enlightening, Communication as Culture is certain to become a classic in its field.

Media, Society, World

Media are fundamental to our sense of living in a social world. Since the beginning of modernity, media have transformed the scale on which we act as social beings. And now in the era of digital media, media themselves are being transformed as platforms, content, and producers multiply. Yet the implications of social theory for understanding media and of media for rethinking social theory have been neglected; never before has it been more important to understand those implications. This book takes on this challenge. Drawing on Couldry's fifteen years of work on media and social theory, this book explores how questions of power and ritual, capital and social order, and the conduct of political struggle, professional competition, and everyday life, are all transformed by today's complex combinations of traditional and 'new' media. In the concluding chapters Couldry develops a framework for global comparative research into media and for thinking collectively about the ethics and justice of our lives with media. The result is a book that is both a major intervention in the field and required reading for all students of media and sociology.

Media and Society

How do media platforms organise social life? How do media empower or disempower our identities? How do we understand the impact of algorithms? How are media audiences produced and managed? Media & Society introduces the role of the media in social, cultural, political and economic life, unpacking the increasing entanglement of digital media technology with our everyday lives. It explores the relationship between meaning and power in an age of participatory culture, social media and digital platforms. An age where we both create and consume content, and where we both give and gain attention – translating our social lives into huge flows of data. Associate Professor Nicholas Carah shows how a critical approach to power helps us not only to understand the role media play in shaping the social, but also how we can become critically informed media citizens ourselves, able to participate and be heard in meaningful ways. Media & Society expertly introduces all the key concepts and ideas you need to know, and then puts theory into practice by tying them to contemporary case studies. From using Ghostery to track how your personal data is being collected, to exploring misinformation on social media via Youtube, to the reality of internships and freelancing in today's digital media industry. It is essential reading for students of media, communication and cultural studies.

Media and Society

Examines the role of the media in contemporary society and analyses representations of the world found in photographs, advertisements, film, television and language. Presents theoretical approaches derived from media and cultural studies, including structuralist, Marxist, feminist and Jungian perspectives.

Media Effects and Society

Media Effects and Society provides an in-depth look at media effects and offers a theoretical foundation for understanding mass media's impact on individuals and society. Working from the assumption that media effects are common and are underestimated, author Elizabeth M. Perse identifies dominant areas of media effects and provides a synthesis of those areas of research. She focuses on the theoretical explanations for media effects, offering explanations of how media effects occur so readers can understand how to mitigate harmful effects and enhance positive ones. This text provides comprehensive coverage of the range of media effects, including news diffusion, learning from the mass media, socialization of children and adolescents, influences on public opinion and voting, and violent and sexually explicit media content. It also presents a variety of theoretical approaches to understanding media effects, including psychological and content-based theories. In addition, it demonstrates how theories can guide future research into the effects of newer mass communication technologies. Written for those who study and conduct research in media effects, Media Effects and Society presents a thorough and accessible discussion of media effects theory. As such, it is appropriate for advanced courses on media effects, media theory, and media and society.

Media/Society

"The best text to help students understand the often-complicated, ever-changing relationship between media and society." —Seong-Jae Min, Pace University Providing a framework for understanding the relationship between media and society, this updated Sixth Edition of Media/Society helps students develop the skills they need to critically evaluate both conventional wisdom and their own assumptions about the social role of the media. The book retains its acclaimed sociological framework but now includes additional discussions of new research and up-to-date coverage of today's rapidly changing media landscape. Now featuring streamlined content and a more engaging narrative, this edition offers expanded discussions of the "new media" world, including digitization, the internet, the spread of mobile media devices, the role of user-generated content, the potential social impact of new media on society, and new media's effect on traditional media outlets. Media & Society

Media and Society explores the media's influence in our world, providing a comprehensive introduction to the main concepts and theories used in media studies. The fourth edition of this book continues to provide an accessible and student-friendly analysis of the relationship between media and society.

Digital Media and Society

What does it mean to live in a digital society? Does social media empower political activism? How do we form and express our identity in a digital age? Do algorithms and search engine results have a social role? How have software and hardware transformed how we interact with each other? In the early 21st century, digital media and the social have become irreversibly intertwined. In this cutting-edge introduction, Simon Lindgren explores what it means to live in a digital society. With succinct explanations of the key concepts, debates and theories you need to know, this is a must-have resource for students exploring digital media, social media, media and society, data and society, and the internet. "An engaging story of the meaning digital media have in societies. The writing is relatable, with diverse and comprehensive references to theories. Above all, this is a fun book on what a contemporary digital society looks like!" - Professor Zizi Papacharissi, University of Illinois at Chicago Simon Lindgren is Professor of Sociology at Umeå University in Sweden. He is also the director of DIGSUM, an interdisciplinary academic research centre studying the social dimensions of digital technology.

Media and Society

A critical introduction to meaning and power in an age of participatory culture, social media and digital platforms. Helps students to understand the central role media play in the social world, and how they can become informed media citizens themselves.

Media, Society, World

Media are fundamental to our sense of living in a social world. Since the beginning of modernity, media have transformed the scale on which we act as social beings. And now in the era of digital media, media themselves are being transformed as platforms, content, and producers multiply. - Yet the implications of social theory for understanding media and of media for rethinking social theory have been neglected; never before has it been more important to understand those implications. This book takes on this challenge. - Drawing on Couldry's fifteen years of work on media and social theory, this book explores how questions of power and ritual, capital and social order, and the conduct of political struggle, professional competition, and everyday life, are all transformed by today's complex combinations of traditional and 'new' media. In the concluding chapters Couldry develops a framework for global comparative research into media and for thinking collectively about the ethics and justice of our lives with media.

Media, Culture and Society

'In his beautifully balanced, clear and broad-ranging account of a fast-changing field, Paul Hodkinson has successfully brought together myriad perspectives with which to critically analyse today's media culture and media society' - Sonia Livingstone, Professor of Media & communication, LSE Clearly organized, systematic and combining a critical survey of the field with a finely judged assessment of cutting edge developments, this book provides a 'must have' contribution to media and communication studies. The text is organized into three distinctive parts, which fall neatly into research and teaching requirements: Elements of the Media (which covers media technologies, the organization of the media industry, media content and media users); Media, Power and Control (which addresses questions of the media and manipulation, the construction of news, public service broadcasting, censorship, commercialization); and Media, Identity and Culture (which covers issues of the media and ethnicity, gender, subcultures, audiences and fans). The book is notable for: • Logical and coherent organization • Clarity of expression • Use of relevant examples • Fair minded criticism • Zestful powers of analysis It has all of the qualities to be adopted as core introductory text in the large and buoyant field of media and communication studies.

Culture, Society and the Media

This book discusses two related themes concerning the role and processes of mass communication in society. The first deals with questions regarding the power of the media: how should it be defined? how is it wielded and by whom? are previous approaches and answers to such questions adequate? The second theme revolves around the divisions between the liberal pluralist and Marxist approaches to the analysis of the nature of the media. These divisions have, in recent years, been fundamental to the debate concerning the understanding of the role of mass communication, and the examination of

them in this book will challenge the reader to look more closely at a number of assumptions that have long been taken for granted.

Media and Society

Media and Society is an established textbook, popular worldwide for its insightful and accessible essays from leading international academics on the most pertinent issues in the media field today. With this updated edition, David Hesmondhalgh joins James Curran and a team of leading international scholars to speak to current issues relating to media and gender, media and democracy, sociology of news, the global internet, the political impact of the media, popular culture, the effects of digitisation on media industries, media and emotion, and other vital topics. The media are in a state of ferment, and are undergoing far-reaching change. The sixth edition tries to make sense of the media's transformation, and its wider implications. Purely descriptive accounts date fast, so the emphasis has been on identifying the central issues and problems arising from media change, and on evaluating its wider consequences. What is judged to be the staple elements of the field has evolved over time, as well as becoming more international in orientation. Yet the overriding aim of the book - to be useful to students - has remained constant. This text is an essential resource for all media, communication and film studies students who want to broaden their knowledge and understanding of how the media operates and affects society across the globe.

Media and Power

Media and Power addresses three key questions about the relationship between media and society. *How much power do the media have? *Who really controls the media? *What is the relationship between media and power in society? In this major new book, James Curran reviews the different answers which have been given, before advancing original interpretations in a series of ground-breaking essays. This book also provides a guided tour of the major debates in media studies. What part did the media play in the making of modern society? How did 'new media' change society in the past? Will radical media research recover from its mid-life crisis? Is public service television the dying product of the nation in an age of globalization? Media and Power provides both a clear introduction to media research and an innovative analysis of media power.

Media for Society

New Media and Society

A sociological approach to understanding new media's impact on society We use cell phones, computers, and tablets to access the Internet, read the news, watch television, chat with our friends, make our appointments, and post on social networking sites. New media provide the backdrop for most of our encounters. We swim in a technological world yet we rarely think about how new media potentially change the ways in which we interact with one another or shape how we live our lives. In New Media and Society, Deana Rohlinger provides a sociological approach to understanding how new media shape our interactions, our experiences, and our institutions. Using case studies and in-class exercises, Rohlinger explores how new media alter everything from our relationships with friends and family to our experiences in the workplace. Each chapter takes up a different topic – our sense of self and our relationships, education, religion, law, work, and politics – and assesses how new media alter our worlds as well as our expectations and experiences in institutional settings. Instead of arguing that these changes are “good” or “bad” for American society, the book uses sociological theory to challenge readers to think about the consequences of these changes, which typically have both positive and negative aspects. New Media and Society begins with a brief explanation of new media and social institutions, highlighting how sociologists understand complex, changing relationships. After outlining the influence of new media on our identities and relationships, it discusses the effects new media have on how we think about education, practice our religions, understand police surveillance, conceptualize work, and participate in politics. Each chapter includes key sociological concepts, engaging activities that illustrate the ideas covered in the chapter, as well as links, films, and references to additional online material.

Media Effects and Society

Grounded in theoretical principle, *Media Effects and Society* help students make the connection between mass media and the impact it has on society as a whole. The text also explores how the relationship individuals have with media is created, therefore helping them alleviate its harmful effects and enhance the positive ones. The range of media effects addressed herein includes news diffusion, learning from the mass media, socialization of children and adolescents, influences on public opinion and voting, and violent and sexually explicit media content. The text examines relevant research done in these areas and discusses it in a thorough and accessible manner. It also presents a variety of theoretical approaches to understanding media effects, including psychological and content-based theories. In addition, it demonstrates how theories can guide future research into the effects of newer mass communication technologies. The second edition includes a new chapter on effects of entertainment, as well as text boxes with examples for each chapter, discussion of new technology effects integrated throughout the chapters, expanded pedagogy, and updates to the theory and research in the text. These features enhance the already in-depth analysis *Media Effects and Society* provides.

Media and Society in the Twentieth Century

Focusing mainly on the development of newspapers, film, radio, television, and the Internet in the United States and Western Europe, *Media and Society in the Twentieth Century* fills a critical need for students and scholars by offering a historical introduction to the mass media in our time. Provides an up-to-date, readable, and informative survey of the history of mass media in the twentieth century. Offers a historical and comparative perspective to emphasize the importance of contemporary media and to explain why particular media systems exist. Focuses on the development of newspapers, film, radio, and television for purposes of entertainment, information, and persuasion. Explores recent media developments, including the Internet and globalization, from a historical perspective.

Media, Sports, and Society

Media, Sports and Society provides a foundation for research on the communication of sports. The volume is framed by a seminal article outlining the parameters of the communication of sports and pointing to major issues that need to be addressed in the relationship between sports and media. Contributors examine the theoretical, cultural and historical issues, the production of media sports programming, its content and its audience. Individual chapters include a discussion of the spectacle of media sports, a comparison of Super Bowl Football and World Cup Soccer, a consideration of the spectators' enjoyment of sports violence, the rhetoric of winning and the American dream, and a fascinating examination of gender harmony and sports in

Media and Society

In this large-scale, postindustrial society, the mass media has become deeply embedded into the lifestyles of everyday citizens. People are lured by television ratings, celebrity-sponsored products, and high-profile crimes and scandals, all finding their way into living rooms across America by satellites, cable wires, and modems. This book examines the real, imagined, and potential effects of the mass media on individuals and society. The book explores the processes through which the mass media is enabled and constrained by such factors as technology, law, industry structure, and occupational careers, accounting for the vast changes that have developed in recent years. This book is divided into two parts. Part I defines mass communication and locates its role in social life. Part II considers the factors which influence media content, providing insight into how the industry operates. Sociologists, Communication and Mass Media specialists, film, music, and pop culture critics, and enthusiasts of these fields.

Media Life

'Media Life' is a primer on how we may think of our lives as lived in - rather than with - media. The book uses the way media functions today as a prism to understand key issues in contemporary society, where reality is open source, identities are always under construction, and private life is lived in public forever more.

Media Sociology

David Barrat gives a clear account of how and why sociologists have studied the media. He looks at the arguments about the effects of different media on their audiences, and the impact of new technologies such as satellite and cable TV.

Media, Culture and Society

In his beautifully balanced, clear and broad-ranging account of a fast-changing field, Paul Hodkinson has successfully brought together myriad perspectives with which to critically analyse today's media culture and media society. 2– Sonia Livingstone, Professor of Media & Communication, LSE Paul Hodkinson's bestseller is back, once again exploring the concepts and complexities of the media in an accessible, balanced and engaging style. Additions to the Second Edition include: A new chapter on advertising and sponsorship Extensive revision and updating throughout all chapters New material on technologies, censorship, online news, fan cultures and representations of poverty Greater emphasis on and examples of digital, interactive and mobile media throughout Fully reworked chapter on media, community and difference Up-to-date examples covering everything from social media, contemporary advertising, news events and mobile technologies, to representations of class, ethnicity and gender. Combining a critical survey of the field with a finely judged assessment of cutting-edge developments, this Second Edition cements its reputation as the must-have text for any undergraduate student studying media, culture and society.

Journalism and Society

"Every serious student of journalism should read this book... Denis McQuail has succeeded in producing a work of scholarship that shows what journalists do and what they should do." - Stephen Coleman, University of Leeds "For a half century we have spoken earnestly of journalism's responsibility to society instead of to business and government. Now this concept is given sophistication unmatched, by the best scholar of media theory of his generation." - Clifford Christians, University of Illinois "The grand old man of communication theory presents an overarching social theory of journalism that goes beyond the usual Anglo-American focus." - Jo Bardoel, University of Amsterdam (ASCoR) and Nijmegen "This book deals with the eternal question of how journalism is linked to society... I cannot think of a better staple food for students of journalism at all levels." - Kaarle Nordenstreng, University of Tampere This is a major new statement on the role of journalism in democracy from one of media and communication's leading thinkers. Denis McQuail leads the reader through a systematic exploration of how and why journalism and society have become so inextricably entwined and - as importantly - what this relationship should be like. It is a strong re-statement of the fundamental values that journalism aspires to. Written for students, this book: Makes the theory accessible and relevant Teaches the importance of journalism to power and politics Explores the status and future of journalism as a profession Outlines the impact and consequences of the digital Reveals journalism as it is, but also as it should be Takes each chapter further with guided reading list and free online journal articles. This textbook is the perfect answer to the how and why of journalism. It is crucial reading for any student of media studies, communication studies and journalism.

Culture, Society and the Media

Examines the power of the media and the divisions between the liberal pluralist and the Marxist approaches to the analysis of the nature of the media.

Media/Society - International Student Edition

Media/Society: Industries, Images, and Audiences provides a framework to help students understand the relationship between media and society and helps students develop skills for critically evaluating both conventional wisdom and one's own assumptions about the social role of the media. The Seventh Edition retains its basic sociological framework, but also includes additional discussions of new studies and up-to-date material about a rapidly changing media landscape. This edition significantly expands on discussions of the "new media" world, including digitization, the Internet, and the spread of mobile media devices, and the role of user-generated content, the potential social impact of "new" media on society, and "new" media's effect on traditional media outlets. The new edition includes updated research, the latest industry data, and current examples from popular media, which will help to illustrate enduring themes in the sociology of media.

Mass Media & Society

This is a discussion of the relationships between mass media and society. Topics examined include: talk radio and community; the growth of the corporate newspaper; media violence and audience behaviour; and race, ethnicity and the mass media.

Sport, Media and Society

Sport is an integral component of today's media, from prime-time television to interactive websites. This book is a theoretical and methodological guide to analysing sport in its diverse mediated forms. Students of media sport are taken through techniques of analysis for film, TV, newspapers, magazines, advertisements, spaces such as stadia and museums, and the internet. The ambiguous and shifting cultural politics of sport are explored through original, researched case studies, drawn from across the UK, USA and beyond. The book encourages students to engage critically with their own experience of media sport and to develop an independent approach to analysis. As such, it will be an essential purchase for all students of media and sports studies students.

The SAGE International Encyclopedia of Mass Media and Society

The SAGE International Encyclopedia of Mass Media and Society discusses media around the world in their varied forms—newspapers, magazines, radio, television, film, books, music, websites, social media, mobile media—and describes the role of each in both mirroring and shaping society. This encyclopedia provides a thorough overview of media within social and cultural contexts, exploring the development of the mediated communication industry, mediated communication regulations, and societal interactions and effects. This reference work will look at issues such as free expression and government regulation of media; how people choose what media to watch, listen to, and read; and how the influence of those who control media organizations may be changing as new media empower previously unheard voices. The role of media in society will be explored from international, multidisciplinary perspectives via approximately 700 articles drawing on research from communication and media studies, sociology, anthropology, social psychology, politics, and business.

Media and Society

This is the media and society text that critical scholars have been waiting for². - Professor Mark Andrejevic, Pomona College This book unpacks the role of the media in social, cultural and political contexts and encourages you to reflect on the power relationships that are formed as a result. Structured around the three cornerstones of media studies; production, content and participation, this is an ideal introduction to your studies in media, culture and society. The book: Evaluates recent developments in media production, industries and platforms brought about the emergence of interactive media technologies. Examines the shifting relationship between media production and consumption instigated by the rise of social and mobile media, recasting consumption as 'participation'. Explores the construction of texts and meanings via media representations, consumer culture and popular culture, as well as the relationship between politics and public relations. Assesses the debates around the creative and cultural labour involved in meaning-making. Includes a companion website featuring exercise and

discussion questions, links to relevant blogs and web material, lists of further reading and free access to key journal articles.

The Mediatization of Culture and Society

Mediatization has emerged as a key concept to reconsider old, yet fundamental questions about the role and influence of media in culture and society. In particular the theory of mediatization has proved fruitful for the analysis of how media spread to, become intertwined with, and influence other social institutions and cultural phenomena like politics, play and religion. This book presents a major contribution to the theoretical understanding of the mediatization of culture and society. This is supplemented by in-depth studies of: The mediatization of politics: From party press to opinion industry; The mediatization of religion: From the faith of the church to the enchantment of the media; The mediatization of play: From bricks to bytes; The mediatization of habitus: The social character of a new individualism. Mediatization represents a new social condition in which the media have emerged as an important institution in society at the same time as they have become integrated into the very fabric of social and cultural life. Making use of a broad conception of the media as technologies, institutions and aesthetic forms, Stig Hjarvard considers how characteristics of both old and new media come to influence human interaction, social institutions and cultural imaginations.

Media and Society

Examining the role of the media in contemporary society, this text presents theoretical approaches and includes many examples, definitions, issues, questions and explanations to aid students' understanding.

Media and Society

"... Focuses on issues of gender, race, identity, and the family, exploring these through photographs, advertisements, film, television, and language. It considers how the media can be understood both in terms of its place in society generally and in terms of its relationship to our individual psyches"--Back cover.

All Media Are Social

From TV to smartphone apps to movies to newspapers, mass media are nearly omnipresent in contemporary life and act as a powerful social institution. In this introduction to media sociology, Lindner and Barnard encourage readers to think critically about the power of big media companies, state-media relations, new developments in journalism, representations of race, class, gender, and sexuality in media, and what social media may or may not be doing to our brains, among other topics. Each chapter explores pressing questions about media by carefully excavating the results of classic and contemporary social scientific studies. The authors bring these findings to life with anecdotes and examples ripped from headlines and social media newsfeeds. By synthesizing research on new media and traditional media, entertainment media and news, quantitative and qualitative studies, *All Media Are Social* offers a succinct and accessibly-written analysis of both enduring patterns and some of the newest developments in mass media. With strong emphases on theory and methods, Lindner and Barnard provide students and general readers alike with the tools to better understand the ever-changing media landscape.
