The law is full of stories, ranging from the competing narratives presented at trials to the Olympian historical narratives set forth in Supreme Court opinions. How those stories are told and listened to makes a crucial difference to those whose lives are reworked in legal storytelling. The public at large has increasingly been drawn to law as an area where vivid human stories are played out with distinctively high stakes. And scholars in several fields have recently come to recognize that law's stories need to be studied critically. This notable volume--inspired by a symposium held at Yale Law School--brings together an exceptional group of well-known figures in law and literary studies to take a probing look at how and why stories are told in the law and how they are constructed and made effective. Why is it that some stories--confessions, victim impact statements--can be excluded from decisionmakers' hearing? How do judges claim the authority by which they impose certain stories on reality? Law's Stories opens new perspectives on the law, as narrative exchange, performance, explanation. It provides a compelling encounter of law and literature, seen as two wary but necessary interlocutors. Contributors J. M. Balkin Peter Brooks Harlon L. Dalton Alan M. Dershowitz Daniel A. Farber Robert A. Ferguson Paul Gewirtz John Hollander Anthony Kronman Pierre N. Leval Sanford Levinson Catharine MacKinnon Janet Malcolm Martha Minow David N. Rosen Elaine Scarry Louis Michael Seidman Suzanna Sherry Reva B. Siegel Robert Weisberg.

Rhetoric and The Rule of Law

Is legal reasoning rationally persuasive, working within a discernible structure and using recognisable kinds of arguments? Does it belong to rhetoric in this sense, or to the domain of the merely 'rhetorical' in an adversative sense? Is there any reasonable certainty about legal outcomes in dispute-situations? If not, what becomes of the Rule of Law? Neil MacCormick's book tackles these questions in establishing an overall theory of legal reasoning which shows the essential part 'legal syllogism' plays in reasoning aimed at the application of law, while acknowledging that simple deductive reasoning, though always necessary, is very rarely sufficient to justify a decision. There are always problems of relevancy, classification or interpretation in relation to both facts and law. In justifying conclusions about such problems, reasoning has to be universalistic and yet fully sensitive to the particulars of specific cases. How is this possible? Is legal justification at this level consequentialist in character or principled and right-based? Both normative coherence and narrative coherence have a part to play in justification, and in accounting for the validity of arguments by analogy. Looking at such long-discussed subjects as precedent and analogy and the interpretative character of the reasoning involved, Neil MacCormick expands upon his celebrated Legal Reasoning and Legal Theory (OUP 1978 and 1994) and restates his 'institutional theory of law'.

Law's Stories

The law is full of stories, ranging from the competing narratives presented at trials to the Olympian historical narratives set forth in Supreme Court opinions. How those stories are told and listened to makes a crucial difference to those whose lives are reworked in legal storytelling. The public at large has increasingly been drawn to law as an area where vivid human stories are played out with distinctively high stakes. And scholars in several fields have recently come to recognize that law's stories need to be studied critically. Minding the Law

In this remarkable collaboration, one of the nation's leading civil rights lawyers joins forces with one of the world's foremost cultural psychologists to put American constitutional law into an American cultural context. By close readings of key Supreme Court opinions, they show how storytelling tactics and deeply rooted mythic structures shape the Court's decisions about race, family law, and the death

penalty. *Minding the Law* explores crucial psychological processes involved in the work of lawyers and judges: deciding whether particular cases fit within a legal rule ("categorizing"), telling stories to justify one's claims or undercut those of an adversary ("narrative"), and tailoring one's language to be persuasive without appearing partisan ("rhetorics"). Because these processes are not unique to the law, courts' decisions cannot rest solely upon legal logic but must also depend vitally upon the underlying culture's storehouse of familiar tales of heroes and villains. But a culture's stock of stories is not changeless. Amsterdam and Bruner argue that culture itself is a dialectic constantly in progress, a conflict between the established canon and newly imagined "possible worlds." They illustrate the swings of this dialectic by a masterly analysis of the Supreme Court's race-discrimination decisions during the past century. A passionate plea for heightened consciousness about the way law is practiced and made, *Minding the Law* will be welcomed by a new generation concerned with renewing law's commitment to a humane justice.

Reflections on a Voyage Appendix: Analysis of Nouns and Verbs in the *Prigg*, *Pitts*, and *Brown* Opinions Notes Table of Cases Index

Reviews of this book: Amsterdam, a distinguished Supreme Court litigator, wanted to do more than share the fruits of his practical experience. He also wanted to...get students to think about thinking like a lawyer...To decode what he calls "law-think," he enlisted the aid of the venerable cognitive psychologist Jerome Bruner...[and] the collaboration has resulted in [this] unusual book. --James Ryerson, *Lingua Franca*

Reviews of this book: It is hard to imagine a better time for the publication of *Minding the Law*, a brilliant dissection of the court's work by two eminent scholars, law professor Anthony G. Amsterdam and cultural anthropologist Jerome Bruner...Issue by issue, case by case, Amsterdam and Bruner make mincemeat of the court's handling of the most important constitutional issue of the modern era: how to eradicate the American legacy of race discrimination, especially against blacks. --Edward Lazarus, *Los Angeles Times Book Review*

Reviews of this book: This book is a gem...[Its thesis] is easily stated but remarkably unrecognized among a shockingly large number of lawyers and law professors: law is a storytelling enterprise thoroughly entrenched in culture....Whereas critical legal theorists have talked among themselves for the past two decades, Amsterdam and Bruner seek to engage all of us in a dialogue. For that, they should be applauded. --Daniel R. Williams, *New York Law Journal*

Reviews of this book: In *Minding the Law*, Anthony Amsterdam and Jerome Bruner show us how the Supreme Court creates the magic of inevitability. They are angry at what they see. Their book is premised on the conviction that many of the choices made in Supreme Court opinions 'lack any justification in the text'...Their method is to analyze the text of opinions and to show how the conclusions reached do not always follow from the logic of the argument. They also show how the Court casts its rhetoric like a spell, mesmerizing its audience, and making the highly contingent shine with the light of inevitability. --Mitchell Goodman, *News and Observer* (Raleigh, North Carolina)

Reviews of this book: What do controversial Supreme Court decisions and classic age-old tales of adultery, villainy, and combat have in common? Everything--at least in the eyes of [Amsterdam and Bruner]. In this substantial study, which is equal parts dense and entertaining, the authors use theoretical discussions of literary technique and myths to expose what they see as the secret intentions of Supreme Court opinions...Studying how lawyers and judges employ the various literary devices at their disposal and noting the similarities between legal thinking and classic tactics of storytelling and persuasion, they believe, can have 'astonishing consciousness-retrieving effects'...The agile minds of Amsterdam and Bruner, clearly storehouses of knowledge on a range of subjects, allow an approach that might sound far-fetched occasionally but pays dividends in the form of gained perspective--and amusement. --Elisabeth Lasch-Quinn, *Washington Times*

Reviews of this book: Stories and the way judges-intentionally or not-categorize and spin them, are as responsible for legal rulings as logic and precedent, Mr. Amsterdam and Mr. Bruner said. Their novel attempt to reach into the psyche of...members of the Supreme Court is part of a growing interest in a long-neglected and cryptic subject: the psychology of judicial decision-making. --Patricia Cohen, *New York Times*

Most law professors teach by the 'case method,' or say they do. In this fascinating book, Anthony Amsterdam--a lawyer--and Jerome Bruner--a psychologist--expose how limited most case 'analysis' really is, as they show how much can be learned through the close reading of the phrases, sentences, and paragraphs that constitute an opinion (or other pieces of legal writing). Reading this book will undoubtedly make one a better lawyer, and teacher of lawyers. But the book's value and interest goes far beyond the legal profession, as it analyzes the way that rhetoric--in law, politics, and beyond--creates pictures and convictions in the minds of readers and listeners. --Sanford Levinson, author of *Constitutional Faith*

Tony Amsterdam, the leader in the legal campaign against the death

penalty, and Jerome Bruner, who has struggled for equal justice in education for forty years, have written a guide to demystifying legal reasoning. With clarity, wit, and immense learning, they reveal the semantic tricks lawyers and judges sometimes use--consciously and unconsciously--to justify the results they want to reach. --Jack Greenberg, Professor of Law, Columbia Law School

Storytelling for Lawyers

Good lawyers have an ability to tell stories. Whether they are arguing a murder case or a complex financial securities case, they can capably explain a chain of events to judges and juries so that they understand them. The best lawyers are also able to construct narratives that have an emotional impact on their intended audiences. But what is a narrative, and how can lawyers go about constructing one? How does one transform a cold presentation of facts into a seamless story that clearly and compellingly takes readers not only from point A to point B, but to points C, D, E, F, and G as well? In *Storytelling for Lawyers*, Phil Meyer explains how. He begins with a pragmatic theory of the narrative foundations of litigation practice and then applies it to a range of practical illustrative examples: briefs, judicial opinions and oral arguments. Intended for legal practitioners, teachers, law students, and even interdisciplinary academics, the book offers a basic yet comprehensive explanation of the central role of narrative in litigation. The book also offers a narrative tool kit that supplements the analytical skills traditionally emphasized in law school as well as practical tips for practicing attorneys that will help them craft their own legal stories.

Narrative and Metaphor in the Law

It has long been recognized that court trials, both criminal and civil, in the common law system, operate around pairs of competing narratives told by opposing advocates. In recent years, however, it has increasingly been argued that narrative flows in many directions and through every form of legal theory and practice. Interest in the part played by metaphor in the law, including metaphors for the law, and for many standard concepts in legal practice, has also been strong, though research under the metaphor banner has been much more fragmentary. In this book, for the first time, a distinguished group of legal scholars, collaborating with specialists from cognitive theory, journalism, rhetoric, social psychology, criminology, and legal activism, explore how narrative and metaphor are both vital to the legal process. Together, they examine topics including concepts of law, legal persuasion, human rights law, gender in the law, innovations in legal thinking, legal activism, creative work around the law, and public debate around crime and punishment.

Constitutional Law as Fiction

Why do some people call the police to quiet a barking dog in the middle of the night, while others accept devastating loss or actions without complaint? Sociologists Patricia Ewick and Susan Silbey examine more than 400 case studies to explore the various ways the law is perceived and utilized, or not, by a broad spectrum of citizens.

The Common Place of Law

DIVAn interdisciplinary critique of the relationship between words and the law /div

The Rhetoric of Law

Casuistic or case law in the Pentateuch deals with real human affairs; each case law entails a compressed story that can encourage reader engagement with seemingly "dry" legal text. This book is the first to present an interpretive method integrating biblical law, jurisprudence, and literary theory, reflecting the current "law and literature" school within legal studies. It identifies the narrative elements that exist in the laws of the Pentateuch, exposes the narrative techniques employed by the authors, and discovers the poetics of biblical law, thus revealing new or previously unconsidered aspects of the relationship between law and narrative in the Bible.

Reading Law as Narrative

The law has traditionally been regarded as a set of rules and institutions. In this thoughtful series of essays, James Boyd White urges a fresh view of the law as an essentially literary, rhetorical, and ethical activity. Defining and elaborating his conception, he artfully bridges the fields of jurisprudence, literature, philosophy, history, and political science. The result, a new approach that may change the

way we perceive the legal process, will engage not only lawyers and law students but anyone interested in the relationship between ethics, persuasion, and community. White's essays, though bound by a common perspective, are thematically varied. Each of these pieces makes eloquent and insightful reading. Taken as a whole, they establish, by triangulation, a position from which they all proceed: a view of poetry, law, and rhetoric as essentially synonymous. Only when we perceive the links between these processes, White stresses, can we begin to unite the concerns of truth, beauty, and justice in a single field of action and expression.

Heracles' Bow

"Sarat and Kearns . . . have edited a truly marvelous work on the impact of the law on daily life and vice versa. . . . the essays are all exemplary, thought-provoking works worthy of a long, contemplative read by scholars, lawyers, and judges alike." --Choice "The subject of law in everyday life is timely in theory and in practice. The essays collected here are stimulating for the very different ways in which they reconfigure the meanings of 'the law' as cultural practice, and 'the everyday' as a cultural domain in which the state expresses a range of interests and engagements. Readers looking for an introduction to this topic will come away from the book with a clear sense of the varied voices and modes of inquiry now involved in sociolegal studies, and what distinguishes them. More experienced readers will appreciate the book's meticulous reconsideration of the instrumentalities, agencies, and constructedness of law." --Carol Greenhouse, Indiana University Contributors include David Engel, Hendrik Hartog, Thomas R. Kearns, David Kennedy, Catharine MacKinnon, George Marcus, Austin Sarat, and Patricia Williams. Austin Sarat is William Nelson Cromwell Professor of Jurisprudence and Political Science, and Chair of the Department of Law, Jurisprudence, and Social Thought, Amherst College. Thomas R. Kearns is William H. Hastie Professor of Philosophy and Professor of Law, Jurisprudence, and Social Thought, Amherst College.

Law in Everyday Life

Conversation and argument concerning laws and legal situations take place throughout society and at all levels, yet the language of these conversations differs greatly from that of the courtroom. This insightful book considers the gap between everyday discussion about law and the artificial, technical language developed by lawyers, judges and other legal specialists. In doing so, it explores the intriguing possibilities for future synthesis, a problem often neglected by legal theory.

Legal Conversation as Signifier

In *Rules versus Relationships*, John M. Conley and William M. O'Barr examine the experiences of litigants seeking redress of everyday difficulties through the small claims courts of the American legal system. The authors find two major and contrasting ways in which litigants formulate and express their problems in terms of specific rule violations and seek concrete legal remedies that would mend soured relationships and respond to their personal and social needs.

Rules Versus Relationships

Calum M. Carmichael here challenges commonly accepted views respecting the derivation of the biblical laws recorded in Deuteronomy and the Decalogue, presenting compelling evidence that literary traditions, rather than social imperatives, dictated the form taken by the laws. Carmichael confronts and discusses such problematic and important issues as the sequence in which apparently unrelated laws appear. Why, he then asks, are some laws general in scope, while others are extremely specific? Acknowledging the literary sophistication of the biblical compilers, Carmichael accounts for their attribution of the Deuteronomic laws to Moses, and of the Decalogue to Yahweh. He asserts that, in order to preserve the prophetic impact of their material, the compilers closely studied existing biblical narrative, and selected laws which maintained the appropriate historical context. Using this perspective, Carmichael is able to detect strong logical continuity in both the structure and the content of the Decalogue and the Deuteronomic laws. An original and distinguished contribution to the study of biblical law, *Law and Narrative in the Bible* will interest legal historians and Biblical scholars alike.

Law and Narrative in the Bible

'Women's Lives, Men's Laws' collects papers by MacKinnon from 1980 to the present, in which she discusses the deep gender bias of American law and the changes to legislation on sexual harassment, rape and battering, to which she has contributed.

Women's Lives, Men's Laws

This detailed analysis offers new perspectives on rhetoric and law from distinguished scholars.

Rhetorical Processes and Legal Judgments

White extends his theory of law as constitutive rhetoric, asking how one may criticize the legal culture and the texts within it. "A fascinating study of the language of the law. . . . This book is to be highly recommended: certainly, for those who find the time to read it, it will broaden the mind, and give lawyers a new insight into their role."—New Law Journal

The Legal Imagination

With the permission of a North Carolina court, more than 150 hours of courtroom speech were recorded for this study. These tapes provided a rich archive for a variety of different types of inquiry, including the ethnography of courtroom speech and social psychological experiments focused on effects of different modes of presenting information in courts of law. Four sets of linguistic variables and related experimental studies have constituted a major portion of the research: (1) "powerful" versus "powerless" speech; (2) hypercorrect versus formal speech; (3) narrative versus fragmented testimony, and (4) simultaneous speech by witnesses and lawyers. All four sets of studies focus on the central question of importance of form over content of testimony.

Linguistic Evidence

The emergence of an interdisciplinary study of law and literature is one of the most exciting theoretical developments taking place in North America and Britain. In *Law and Literature: Possibilities and Perspectives* Ian Ward explores the educative ambitions of the law and literature movement, and its already established critical, ethical and political potential. He reveals the law in literature, and the literature of law, in key areas of literature, from Shakespeare to Beatrix Potter to Umberto Eco, and from feminist literature to children's literature to the modern novel, drawing out the interaction between rape law and *The Handmaid's Tale*, and the psychology of English property law and *The Tale of Peter Rabbit*. This original book defines the developing state of law and literature studies, and demonstrates how the theory of law and literature can illuminate the literary text.

Law and Literature

The Mediterranean and its hinterlands were the scene of intensive and transformative contact between cultures in the Middle Ages. From the seventh to the seventeenth century, the three civilizations into which the region came to be divided geographically – the Islamic Khalifate, the Byzantine Empire, and the Latin West – were busily redefining themselves vis-à-vis one another. Interspersed throughout the region were communities of minorities, such as Christians in Muslim lands, Muslims in Christian lands, heterodoxical sects, pagans, and, of course, Jews. One of the most potent vectors of interaction and influence between these communities in the medieval world was inter-religious conversion: the process whereby groups or individuals formally embraced a new religion. The chapters of this book explore this dynamic: what did it mean to convert to Christianity in seventh-century Ireland? What did it mean to embrace Islam in tenth-century Egypt? Are the two phenomena comparable on a social, cultural, and legal level? The chapters of the book also ask what we are able to learn from our sources, which, at times, provide a very culturally-charged and specific conversion rhetoric. Taken as a whole, the compositions in this volume set out to argue that inter-religious conversion was a process that was recognizable and comparable throughout its geographical and chronological purview.

Contesting Inter-Religious Conversion in the Medieval World

Cheryl Nixon's book is the first to connect the eighteenth-century fictional orphan and factual orphan, emphasizing the legal concepts of estate, blood, and body. Examining novels by authors such as Eliza Haywood, Tobias Smollett, and Elizabeth Inchbald, and referencing never-before analyzed case records, Nixon reconstructs the narratives of real orphans in the British parliamentary, equity, and common law courts and compares them to the narratives of fictional orphans. The orphan's uncertain

economic, familial, and bodily status creates opportunities to "plot" his or her future according to new ideologies of the social individual. Nixon demonstrates that the orphan encourages both fact and fiction to re-imagine structures of estate (property and inheritance), blood (familial origins and marriage), and body (gender and class mobility). Whereas studies of the orphan typically emphasize the poor urban foundling, Nixon focuses on the orphaned heir or heiress and his or her need to be situated in a domestic space. Arguing that the eighteenth century constructs the "valued" orphan, Nixon shows how the wealthy orphan became associated with new understandings of the individual. New archival research encompassing print and manuscript records from Parliament, Chancery, Exchequer, and King's Bench demonstrate the law's interest in the propertied orphan. The novel uses this figure to question the formulaic structures of narrative sub-genres such as the picaresque and romance and ultimately encourage the hybridization of such plots. As Nixon traces the orphan's contribution to the developing novel and developing ideology of the individual, she shows how the orphan creates factual and fictional understandings of class, family, and gender.

The Orphan in Eighteenth-Century Law and Literature

AIDS and the Sexuality of Law investigates the role that HIV/AIDS has played in the legal construction of sexuality. AIDS and its metaphors have been judicially enlisted to patrol the boundaries of heterosexuality, producing flawed understandings of HIV/AIDS and sexuality. The proliferation of this flawed knowledge through judicial discourse has had a profound impact on the way sexuality is understood. Even more fundamentally, closer analysis exposes the ironic processes of the law whereby material reality, ignorance, and belief interact to replace unknowns with 'social facts.' The book concludes optimistically, arguing that there is political value in uncertainty.

AIDS and the Sexuality of Law

This volume examines the construct of interpersonal in specific legal genres and according to the type of interaction. The aim is to achieve an expansion of the concept of interpersonal, which might comprise ideational and textual issues like narrative disclosure, typography, rhetorical variation, or Plain English, among others.

Interpersonal in Legal Genres

This arrestingly novel work develops a normative synthesis of medical humanities, virtue ethics, medical ethics, health law and human rights. It presents an ambitious, complex and coherent argument for the reconceptualisation of the doctor-patient relationship and its regulation utilising approaches often thought of as being separate, if not opposed (virtue-based ethics and universal human rights). The case is argued gracefully, with moderation, but also with respect for opposing positions. The book's analysis of the foundational professional virtue of therapeutic loyalty is an original departure from the traditional discourse of "patient autonomy," and the ethical and legal "duties" of the medical practitioner. The central argument is not merely presented, as bookends, in the introduction and conclusion. It is cogently represented in each chapter and section and measured against the material considered. A remarkable feature is the use of aptly selected "canonical" literature to inform the argument. These references run from Hesse's "The Glass Bead Game" in the abstract, to Joyce's "Ulysses" in the conclusion. They include excerpts from and discussion about Bergman, Borges, Boswell, Tolstoy, de Beauvoir, Chekhov, Dostoevsky, Samuel Johnson, Aristotle, Orwell, Osler, Chaucer, Schweitzer, Shakespeare, Thorwalds, Kafka and William Carlos Williams. Such references are used not merely as an artistic and decorative leitmotif, but become a critical, narrative element and another complex and rich layer to this work. The breadth and quality of the references are testimony to the author's clear understanding of the modern law and literature movement. This work provides the basis of a medical school course. As many medical educators as possible should also be encouraged to read this work for the insights it will give them into using their own personal life narratives and those of their patients to inform their decision-making process. This thesis will also be of value to the judiciary, whose members are often called upon to make normatively difficult judgments about medical care and medical rules. The human rights material leads to a hopeful view of an international movement toward a universal synthesis between medical ethics and human rights in all doctor-patient relationships.

Pilgrims in Medicine: Conscience, Legalism and Human Rights

Long term resident migrants to the UK still face significant barriers to citizenship. Dr Prabhat captures the experiences of those who successfully become British citizens through stories of belonging,

citizenship, and the law. The book illuminates the gap between policy and practice in gaining British citizenship.

Britishness, Belonging and Citizenship

Is it “just words” when a lawyer cross-examines a rape victim in the hopes of getting her to admit an interest in her attacker? Is it “just words” when the Supreme Court hands down a decision or when business people draw up a contract? In tackling the question of how an abstract entity exerts concrete power, *Just Words* focuses on what has become the central issue in law and language research: what language reveals about the nature of legal power. John M. Conley, William M. O'Barr, and Robin Conley Riner show how the microdynamics of the legal process and the largest questions of justice can be fruitfully explored through the field of linguistics. Each chapter covers a language-based approach to a different area of the law, from the cross-examinations of victims and witnesses to the inequities of divorce mediation. Combining analysis of common legal events with a broad range of scholarship on language and law, *Just Words* seeks the reality of power in the everyday practice and application of the law. As the only study of its type, the book is the definitive treatment of the topic and will be welcomed by students and specialists alike. This third edition brings this essential text up to date with new chapters on nonverbal, or “multimodal,” communication in legal settings and law, language, and race.

Just Words

Athenians performed democracy daily in their law courts. Without lawyers or judges, private citizens, acting as accusers and defendants, argued their own cases directly to juries composed typically of 201 to 501 jurors, who voted on a verdict without deliberation. This legal system strengthened and perpetuated democracy as Athenians understood it, for it emphasized the ideological equality of all (male) citizens and the hierarchy that placed them above women, children, and slaves. This study uses Athenian court speeches to trace the consequences for both disputants and society of individuals' decisions to turn their quarrels into legal cases. Steven Johnstone describes the rhetorical strategies that prosecutors and defendants used to persuade juries and shows how these strategies reveal both the problems and the possibilities of language in the Athenian courts. He argues that Athenian “law” had no objective existence outside the courts and was, therefore, itself inherently rhetorical. This daring new interpretation advances an understanding of Athenian democracy that is not narrowly political, but rather links power to the practices of a particular institution.

Disputes and Democracy

A review and analysis of existing scholarship on the different national traditions and on the various modes and subjects of law and humanities.

Law and the Humanities

John Copeland Nagle shows how our reliance on environmental law affects the natural environment through an examination of five diverse places in the American landscape: Alaska's Adak Island; the Susquehanna River; Colton in California's Inland Empire; Theodore Roosevelt National Park in the badlands of North Dakota; and Alamogordo in New Mexico. Nagle asks why some places are preserved by the law while others are not, and he finds that environmental laws often have unexpected results while other laws have surprising effects on the environment. Nagle argues that sound environmental policy requires better coordination among the many laws, regulations, and social norms that determine the values and uses of our scarce lands and waters.

Law's Environment

In *Narrating the Law* Barry Scott Wimpfheimer creates a new theoretical framework for considering the relationship between law and narrative and models a new method for studying talmudic law in particular. Works of law, including the Talmud, are animated by a desire to create clear usable precedent. This animating impulse toward clarity is generally absent in narratives, the form of which is better able to capture the subtleties of lived life. Wimpfheimer proposes to make these different forms compatible by constructing a narrative-based law that considers law as one of several “languages,” along with politics, ethics, psychology, and others that together compose culture. A narrative-based law is capable of recognizing the limitations of theoretical statutes and the degree to which other cultural languages interact with legal discourse, complicating any attempts to actualize a hypothetical set of rules. This

way of considering law strongly resists the divide in traditional Jewish learning between legal literature (Halakhah) and nonlegal literature (Aggadah) by suggesting the possibility of a discourse broad enough to capture both. Narrating the Law activates this mode of reading by looking at the Talmud's legal stories, a set of texts that sits uncomfortably on the divide between Halakhah and Aggadah. After noticing that such stories invite an expansive definition of law that includes other cultural voices, Narrating the Law also mines the stories for the rich descriptions of rabbinic culture that they encapsulate.

Narrating the Law

'In this excellent and provocative book, Matthew Ricketson lays bare the challenges of modern storytelling. I have found myself thinking about it every day, long after I put it down.' - William Powers, author of *Hamlet's BlackBerry* 'An essential guide for the true storyteller.' - Chloe Hooper, award-winning author of fiction and non-fiction It's etched into our neurological pathways; we can't live without it. Telling true stories is one of the things that makes us human, and a strong narrative has the power to profoundly change the way we think. Truman Capote's groundbreaking *In Cold Blood* set the tone. Narrative non-fiction now appears in print and online journalism as well as in books. Capote's work is also a classic case study of the thorny issues arising in telling true stories: how to maintain editorial independence while becoming close to your subject; how far to take the narrative when reporting on real events; whether an 'omniscient narrative voice' is appropriate for non-fiction; and what kind of relationship to create with the reader. The stakes are high: true stories deal with real people, often at turning points in their lives. Matthew Ricketson uncovers the techniques of some of the best international practitioners from America, Australia and Britain, and shows how to produce authentic, vibrant and memorable writing.

Telling True Stories

The sacrificial instructions and purity laws in Leviticus have often been seen as later or secondary additions to an originally sparse Priestly narrative. In this volume, Liane M. Feldman argues that the ritual and narrative elements of the Pentateuchal Priestly source are mutually dependent, and that the internal logic and structure of the Priestly narrative makes sense only when they are read together. Bringing together insights from the fields of ritual theory and narratology, the author argues that the ritual materials in Leviticus should be understood and analyzed as literature. At the core of her study is the assertion that these sacrificial instructions and purity laws form the backbone of the Priestly story world, and that when these materials are read within their broader narrative context, the Priestly narrative is first and foremost a story about the origins and purpose of sacrifice.

The Story of Sacrifice

The Routledge Companion to Narrative Theory brings together top scholars in the field to explore the significance of narrative to pressing social, cultural, and theoretical issues. How does narrative both inform and limit the way we think today? From conspiracy theories and social media movements to racial politics and climate change future scenarios, the reach is broad. This volume is distinctive for addressing the complicated relations between the interdisciplinary narrative turn in the academy and the contemporary boom of instrumental storytelling in the public sphere. The scholars collected here explore new theories of causality, experientiality, and fictionality; challenge normative modes of storytelling; and offer polemical accounts of narrative fiction, nonfiction, and video games. Drawing upon the latest research in areas from cognitive sciences to complexity theory, the volume provides an accessible entry point for those new to the myriad applications of narrative theory and a point of departure for new scholarship.

The Routledge Companion to Narrative Theory

This book presents a new framework for understanding the relationship between biblical narrative and rabbinic law. Drawing on legal theory and models of rabbinic exegesis, Jane L. Kanarek argues for the centrality of biblical narrative in the formation of rabbinic law. Through close readings of selected Talmudic and midrashic texts, Kanarek demonstrates that rabbinic legal readings of narrative scripture are best understood through the framework of a referential exegetical web. She shows that law should be viewed as both prescriptive of normative behavior and as a meaning-making enterprise. By explicating the hermeneutical processes through which biblical narratives become resources for legal norms, this book transforms our understanding of the relationship of law and narrative as well as the ways in which scripture becomes a rabbinic document that conveys legal authority and meaning.

Biblical Narrative and the Formation of Rabbinic Law

After its heyday in the 1970s and 1980s, many wondered whether the law and literature movement would retain vitality. This collection of essays, featuring twenty-two prominent scholars from literature departments as well as law schools, showcases the vibrancy of recent work in the field while highlighting its many new directions. *New Directions in Law and Literature* furnishes an overview of where the field has been, its recent past, and its potential futures. Some of the essays examine the methodological choices that have affected the field; among these are concern for globalization, the integration of approaches from history and political theory, the application of new theoretical models from affect studies and queer theory, and expansion beyond text to performance and the image. Others grapple with particular intersections between law and literature, whether in copyright law, competing visions of alternatives to marriage, or the role of ornament in the law's construction of racialized bodies. The volume is designed to be a course book that is accessible to undergraduates and law students as well as relevant to academics with an interest in law and the humanities. The essays are simultaneously intended to be introductory and addressed to experts in law and literature. More than any other existing book in the field, *New Directions* furnishes a guide to the most exciting new work in law and literature while also situating that work within more established debates and conversations.

New Directions in Law and Literature

In this innovative book, the authors persuasively argue that the First Amendment to the Constitution has risen in the late twentieth century, like an ill-guided individual with knife in hand, to murder a long-standing tradition of fine and meaningful discourse in the United States. What has died is the essential kind of political discourse which promotes democracy; informs citizens; enlivens debate; and carries reason, method, and purpose. Instead, we are bombarded with the cacophony of advertisement, the luridity of pornography, and the pointlessness of prime time. With satirical spirit and wit—yet to a very serious purpose—the narrative of this lively study calls upon many of the very “tricks” it criticizes. The text is augmented by amusing tales, poetry, tv zaps, eyebites, and boxes of aphorisms resonating between high and low culture, between Plato and Geraldo and Madonna and Mahler to make its points, the discussion reveals how discourse in contemporary America has lost its integrity and its soul.

The Death Of Discourse

Major innovations have occurred in the study of biblical law in recent decades. The legal material of the Pentateuch has received new interest with detailed studies of specific biblical passages. The comparison of biblical practice to ancient Near Eastern customs has received a new impetus with the concentration on texts from actual ancient legal transactions. The *Oxford Handbook of Biblical Law* provides a state of the art analysis of the major questions, principles, and texts pertinent to biblical law. The thirty-three chapters, written by an international team of experts, deal with the concepts, significant texts, institutions, and procedures of biblical law; the intersection of law with religion, socio-economic circumstances, and politics; and the reinterpretation of biblical law in the emerging Jewish and Christian communities. The volume is intended to introduce non-specialists to the field as well as to stimulate new thinking among scholars working in biblical law.

The Oxford Handbook of Biblical Law

A book about the ways in which humans have been bound affectively to the material world in and over time; how they have made, commissioned, and used objects to facilitate their emotional lives; how they felt about their things; and the ways certain things from the past continue to make people feel today.
