Edgar Wallace - The Just Men of Cordova

Richard Horatio Edgar Wallace was born on the 1st April 1875 in Greenwich, London. Leaving school at 12 because of truancy, by the age of fifteen he had experience; selling newspapers, as a worker in a rubber factory, as a shoe shop assistant, as a milk delivery boy and as a ship's cook. By 1894 he was engaged but broke it off to join the Infantry being posted to South Africa. He also changed his name to Edgar Wallace which he took from Lew Wallace, the author of Ben-Hur. In Cape Town in 1898 he met Rudyard Kipling and was inspired to begin writing. His first collection of ballads, *The Mission that Failed!* was enough of a success that in 1899 he paid his way out of the armed forces in order to turn to writing full time. By 1904 he had completed his first thriller, *The Four Just Men*. Since nobody would publish it he resorted to setting up his own publishing company which he called Tallis Press. In 1911 his Congolese stories were published in a collection called *Sanders of the River*, which became a bestseller. He also started his own racing papers, *Bibury's* and *R. E. Walton's Weekly*, eventually buying his own racehorses and losing thousands gambling. A life of exceptionally high income was also mirrored with exceptionally large spending and debts. Wallace now began to take his career as a fiction writer more seriously, signing with Hodder and Stoughton in 1921. He was marketed as the 'King of Thrillers' and they gave him the trademark image of a trilby, a cigarette holder and a yellow Rolls Royce. He was truly prolific, capable not only of producing a 70,000 word novel in three days but of doing three novels in a row in such a manner. It was in, estimating that by 1928 one in four books being read was written by Wallace, for alongside his famous thrillers he wrote variously in other genres, including science fiction, non-fiction accounts of WWI which amounted to ten volumes and screen plays. Eventually he would reach the remarkable total of 170 novels, 18 stage plays and 957 short stories. Wallace became chairman of the Press Club which to this day holds an annual Edgar Wallace Award, rewarding 'excellence in writing'. Diagnosed with diabetes his health deteriorated and he soon entered a coma and died of his condition and double pneumonia on the 7th of February 1932.

Edgar Wallace : The Four Just Men

When the Foreign Secretary, Sir Philip Ramon, receives a threatening, greenish-grey letter signed FOUR JUST MEN, he remains determined to see his Aliens Extradition Bill made law. A device in the members smoke room and a sudden magnesium flash that could easily have been nitroglycerine leave Scotland Yard baffled. Even fleet Street cannot identify the illusive Manfred, Gonsalez, Pioccart and Thery FOUR JUST MEN dedicated to punishing by death those whom conventional justice cannot touch.

The Just Men of Cordova

There are crimes for which no punishment is adequate, offences that the written law cannot redress. The three friends, Pioccart, Manfred and Gonsalez, may be enjoying the exotic, Spanish city of Cordova with its heat and Moorish influences, but they are still committed to employing their intellect and cunning to dispense justice. They use their own methods and carry out their own verdicts. They are ruthless and they deal in death.

The Law of the Four Just Men

'Grace, ' he said, 'I am going to apply the methods of the Four to this devil Stedland.' But the judge finds Jeffrey Storr guilty, not Stedland. As Storr's wife Grace leaves the court a foreign-looking gentleman introduces himself. He and his companion are friends of her husband. Justice has failed and THE FOUR JUST MEN have stepped in. They will use their own laws to protect the innocent and will impose their own verdicts. There can be no appeal.

'A stimulating, elegant yet pugnacious essay'—Observer In this highly acclaimed seminal work, Edward Said surveys the history and nature of Western attitudes towards the East, considering Orientalism as a powerful European ideological creation—a way for writers, philosophers and colonial administrators to deal with the 'otherness' of Eastern culture, customs and beliefs. He traces this view through the writings of Homer, Nerval and Flaubert, Disraeli and Kipling, whose imaginative depictions have greatly contributed to the West's romantic and exotic picture of the Orient. In the Afterword, Said examines the effect of continuing Western imperialism.

The popular image of Scotland is dominated by widely recognized elements of Celtic culture. But a significant non-Celtic influence on Scotland's history has been largely ignored for centuries? This book argues that much of Scotland's history and culture from 1100 forward is Jewish. The authors provide evidence that many of the national heroes, villains, rulers, nobles, traders, merchants, bishops, guild members, burgesses, and ministers of Scotland were of Jewish descent, their ancestors originating in France and Spain. Much of the traditional historical account of Scotland, it is proposed, rests on fundamental interpretive errors, perpetuated in order to affirm Scotland's identity as a Celtic, Christian society. A more accurate and profound understanding of Scottish history has thus been buried. The authors' wide-ranging research includes examination of census records, archaeological artifacts, castle carvings, cemetery inscriptions, religious seals, coinage, burgess and guild member rolls, noble genealogies, family crests, portraiture, and geographic place names.

New technologies are changing our reading habits. Laptops, e-readers, tablets and other handheld devices supply new platforms for reading, and we must learn to manage them by scrolling, clicking or tapping. Reading Today places reading in current literary and cultural contexts in order to analyse how these contexts challenge our conceptions of who reads, what reading is, how we read, where we read, and for what purposes – and then responds to the questions this analysis raises. Is our reading experience becoming a 'flat' one? And does reading in a media environment favour quick reading? Alongside these questions, the contributors unpack emerging strategies of reading. They consider, for example, how paying attention to readers' emotional reactions as an indispensable component of reading affects our conception of the reading process. Other chapters consider how reading can be explored through such topics as experimental literature, the contemporary encyclopedic novel and the healing power of books.

The Man who Couldn't Speak the Truth

The first collection to explore infectious disease, agriculture, economics, and the nature of science together Thanks to breakthroughs in production and food science, agribusiness has been able to devise new ways to grow more food and get it more places more quickly. There is no shortage of news items on hundreds of thousands of hybrid poultry—each animal genetically identical to the next—packed together in megabarns, grown out in a matter of months, then slaughtered, processed and shipped to the other side of the globe. Less well known are the deadly pathogens mutating in, and emerging out of, these specialized agro-environments. In fact, many of the most dangerous new diseases in humans can be traced back to such food systems, among them *Campylobacter*, Nipah virus, Q fever, hepatitis E, and a variety of novel influenza variants. Agribusiness has known for decades that packing thousands of birds or livestock together results in a monoculture that selects for such disease. But market economics doesn't punish the companies for growing Big Flu—it punishes animals, the environment, consumers, and contract farmers. Alongside growing profits, diseases are permitted to emerge, evolve, and spread with little check. "That is," writes evolutionary biologist Rob Wallace, "it pays to produce a pathogen that could kill a billion people." In *Big Farms Make Big Flu*, a collection of dispatches by turns harrowing and thought-provoking, Wallace tracks the ways influenza and other pathogens emerge from an agriculture controlled by multinational corporations. Wallace details, with a precise and radical wit, the latest in

the science of agricultural epidemiology, while at the same time juxtaposing ghastly phenomena such as attempts at producing featherless chickens, microbial time travel, and neoliberal Ebola. Wallace also offers sensible alternatives to lethal agribusiness. Some, such as farming cooperatives, integrated pathogen management, and mixed crop-livestock systems, are already in practice off the agribusiness grid. While many books cover facets of food or outbreaks, Wallace's collection appears the first to explore infectious disease, agriculture, economics and the nature of science together. *Big Farms Make Big Flu* integrates the political economies of disease and science to derive a new understanding of the evolution of infections. Highly capitalized agriculture may be farming pathogens as much as chickens or corn.

Orientalism

This collection includes eighteen essays that introduce the concept of unpopular culture and explore its critical possibilities and ramifications from a large variety of perspectives. Proposing a third term that operates beyond the dichotomy of high culture and mass culture and yet offers a fresh approach to both, these essays address a multitude of different topics that can all be classified as unpopular culture. From David Foster Wallace and Ernest Hemingway to Zane Grey and fan fiction, from Christian Rock and Country to Black Metal, from Steven Seagal to Genesis (Breyer) P-Orridge, from *The Simpsons* to *The Real Housewives*, from natural disasters to 9/11, from thesis hatements to professional sports, these essays find the unpopular across media and genres, and they analyze the politics and the aesthetics of an unpopular culture (and the unpopular in culture) that has not been duly recognized as such by the theories and methods of cultural studies.

"Lose yourself: Swoon has wicked fun answering that age-old query: What do women want?"—Chicago Tribune Contrary to popular myth and dogma, the men who consistently beguile women belie the familiar stereotypes: satanic rake, alpha stud, slick player, Mr. Nice, or big-money mogul. As Betsy Prioleau, author of *Seductress*, points out in this surprising, insightful study, legendary ladies' men are a different, complex species altogether, often without looks or money. They fit no known template and possess a cache of powerful erotic secrets. With wit and erudition, Prioleau cuts through the cultural lore and reveals who these master lovers really are and the arts they practice to ensnare women. What she discovers is revolutionary. Using evidence from science, popular culture, fiction, anthropology, and history, and from interviews with colorful real-world ladykillers, Prioleau finds that great seducers share a constellation of unusual traits. While these men run the gamut, they radiate *joie de vivre*, intensity, and sex appeal; above all, they adore women. They listen, praise, amuse, and delight, and they know their way around the bedroom. And they've finessed the hardest part: locking in and revving desire. Women never tire of these fascinators and often, like Casanova's conquests, remain besotted for life. Finally, Prioleau takes stock of the contemporary culture and asks: where are the Casanovas of today? After a critique of the twenty-first-century sexual malaise—the gulf between the sexes and women's record discontent—she compellingly argues that society needs ladies' men more than ever. Groundbreaking and provocative, *Swoon* is underpinned with sharp analysis, brilliant research, and served up with seductive verve.

Southern Literature from 1579-1895

These Historical Novels have taught all men this truth, which looks like a truism, and yet was as good as unknown to writers of history and others, till so taught: that the bygone ages of the world were actually filled by living men, not by protocols, state-papers, controversies, and abstractions of men.

Big Farms Make Big Flu

In the 1980s, corporate America experienced massive cutbacks and organizational decline after decades of economic growth and dominance. The institutional and ideological changes that were part of the transformation created a new landscape of work and social relations for corporate mid-

dle managers. *Managing in the Corporate Interest* assesses this landscape by examining a large diversified bank that restructured its organizational and personnel policies to meet a new era of corporate competition. Drawing on interviews with managers and personnel management employees, observation of management training seminars, and documentary sources, this book examines the unique mission handed to middle managers to scale back paternalistic employment policies. It also analyzes the intra-management conflict incurred when corporate top managers attempted to disguise their downsizing strategies and refused to acknowledge their own role in creating the bank's economic crisis. Vicki Smith's work suggests that quick-fix strategies such as downsizing and cutbacks, which dominated corporate profitability strategies in the 1980s, can corrode trust and legitimacy in the workplace. In the long run, such strategies also undermine consent to the current and very necessary transformation of the way American firms do business. *Managing in the Corporate Interest* contains important lessons about the rise and decline of economic enterprises and provides a wide-ranging look at changes in the management, structure, and production processes of American corporations. Richly documented and accessibly written, this incisive work will appeal to business people and scholars alike. This title is part of UC Press's *Voices Revived* program, which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice, reach, and impact. Drawing on a backlist dating to 1893, *Voices Revived* makes high-quality, peer-reviewed scholarship accessible once again using print-on-demand technology. This title was originally published in 1990.

A Guide to the Best Historical Novels and Tales

Transference of orientalist images and identities to the American landscape and its inhabitants, especially in the West—in other words, portrayal of the West as the “Orient”—has been a common aspect of American cultural history. Place names, such as the Jordan River or Pyramid Lake, offer notable examples, but the imagery and its varied meanings are more widespread and significant. Understanding that range and significance, especially to the western part of the continent, means coming to terms with the complicated, nuanced ideas of the Orient and of the North American continent that European Americans brought to the West. Such complexity is what historical geographer Richard Francaviglia unravels in this book. Since the publication of Edward Said's book, *Orientalism*, the term has come to signify something one-dimensionally negative. In essence, the orientalist vision was an ethnocentric characterization of the peoples of Asia (and Africa and the “Near East”) as exotic, primitive “others” subject to conquest by the nations of Europe. That now well-established point, which expresses a postcolonial perspective, is critical, but Francaviglia suggest that it overlooks much variation and complexity in the views of historical actors and writers, many of whom thought of western places in terms of an idealized and romanticized Orient. It likewise neglects positive images and interpretations to focus on those of a decadent and ostensibly inferior East. We cannot understand well or fully what the pervasive orientalism found in western cultural history meant, says Francaviglia, if we focus only on its role as an intellectual engine for European imperialism. It did play that role as well in the American

West. One only need think about characterizations of American Indians as Bedouins of the Plains destined for displacement by a settled frontier. Other roles for orientalism, though, from romantic to commercial ones, were also widely in play. In *Go East, Young Man*, Francaviglia explores a broad range of orientalist images deployed in the context of European settlement of the American West, and he unfolds their multiple significances.

Managing in the Corporate Interest

"TSQ: Transgender Studies Quarterly offers a high-profile venue for innovative research and scholarship that contest the objectification, pathologization, and exoticization of transgender lives. It publishes interdisciplinary work that explores the diversity of gender, sex, sexuality, embodiment, and identity in ways that have not been adequately addressed by feminist and queer scholarship. Its mission is to foster a vigorous conversation among scholars, artists, activists, and others that examines how "transgender" comes into play as a category, a process, a social assemblage, an increasingly intelligible gender identity, an identifiable threat to gender normativity, and a rubric for understanding the variability and contingency of gender across time, space, and cultures. Major topics addressed in the first few issues include the cultural production of trans communities, critical analysis of transgender population studies, transgender biopolitics, radical critiques of political economy, and problems of translating gender concepts and practices across linguistic communities"--Publisher's website.

Acoustic Properties: Radio, Narrative, and the New Neighborhood of the Americas discovers the prehistory of wireless culture. It examines both the coevolution of radio and the novel in Argentina, Cuba, and the United States from the early 1930s to the late 1960s, and the various populist political climates in which the emerging medium of radio became the chosen means to produce the voice of the people. Based on original archival research in Buenos Aires, Havana, Paris, and the United States, the book develops a literary media theory that understands sound as a transmedial phenomenon and radio as a transnational medium. Analyzing the construction of new social and political relations in the wake of the United States' 1930s Good Neighbor Policy, *Acoustic Properties* challenges standard narratives of hemispheric influence through new readings of Richard Wright's cinematic work in Argentina, Severo

Sarduy's radio plays in France, and novels by John Dos Passos, Manuel Puig, Raymond Chandler, and Carson McCullers. Alongside these writers, the book also explores Che Guevara and Fidel Castro's Radio Rebelde, FDR's fireside chats, Félix Caignet's invention of the radionovela in Cuba, Evita Perón's populist melodramas in Argentina, Orson Welles's experimental New Deal radio, Cuban and U.S. "radio wars," and the 1960s African American activist Robert F. Williams's proto-black power Radio Free Dixie. From the doldrums of the Great Depression to the tumult of the Cuban Revolution, Acoustic Properties illuminates how novelists in the radio age converted writing into a practice of listening, transforming realism as they struggled to channel and shape popular power.

Michael Gurian's blockbuster bestseller *The Wonder of Boys* is the bible for mothers, fathers, and educators on how to understand and raise boys. It has sold over 400,000 copies, been translated into 17 languages, and sells over 25,000 every year, which is more than any other book on boys in history. To follow up on this first book, which launched the boy's movement, he has now written this revolutionary new book which confronts what he and a lot of other parents and teachers in this country truly believe to be a "boy's crisis". Here are the facts: Boys today are simply not learning as well as girls Boys receive 70% of the Ds and Fs given all students Boys cause 90% of classroom discipline problems 80% of all high school dropouts are boys Millions of American boys are on Ritalin and other mind-bending control drugs Only 40% of college students are boys And three out of four learning disabled students are boys So what can we do? Gurian has the answer in this enormously fascinating and practical book which shows parents and teachers how to help boys overcome their current classroom obstacles by helping to create the proper learning environment, understand how to help boys work with their unique natural gifts, nurture and expand every bit of their potential, and enabling them to succeed in life the way they ought to. Gurian presents a whole new way of solving the problem based on the success of his program in schools across the country, the latest research and application of neuro-biological research on how boys' brains actually work and how they can learn very well if they're properly taught. Anyone who cares about the future of our boys must read this book.

Michel Foucault's Conception of Discourse as Knowledge and Power - Michel Foucault's Conception of Discourse as Knowledge and Power by University Quick Course 155,159 views 4 years ago 11 minutes, 39 seconds - This video provides a basic overview of Foucauldian discourse, defined by **Foucault**, as ways of constituting knowledge, together ...

Discourse means you have a range of statements that provide a language with the way of talking about something. It provides a language with a way of representing knowledge about a particular subject matter at a particular given historical juncture.

"All social practices entail meaning and meaning shapes and influences what we do---all the practices that we have possess a discursive aspect to them" (Hall, The West and the Rest, 1992, Pg. 291).

Discourse is about the production of knowledge through language---that there are rules and practices that produce meaningful statements and that regulate discourse in particular historical periods.

Discourse constructs the topic. It defines and produces the objects of our knowledge.

Discourse never consists of just one statement or just one action or one source of information. The same discourse that characterizes a way of talking or thinking in a state of knowledge at any one time can cross a range of texts that may lead to different forms of conduct within different institutional sites within a society.

Objects have no real meaning outside discourse---the way one talks about them and acts upon these ideas.

It is impossible to determine what the meaning of an object is outside of how it is used.

Physical things and actions exist but they only take on meaning and become objects of knowledge within discourse---how they are talked about and how they are put into practice and become institutionalized.

Meaning only comes through discourse (objects + practice) produces knowledge--- a way of thinking about and acting on things that then become institutionalized.

The power accorded to discourse is similar to that given to language by other cultural theorists---the power to define how the world is categorized and perceived.

Foucault believed individuals give meaning to objects and events.

Foucault argued that portraying an object or an event will reflect journalistic interpretation and ways of thinking and seeing

Foucault rejected the reduction of the relationship between knowledge and power to one solely confined to class interests--- preferring to believe that other social forces are in operation as well (Hall, 1997, Pg. 48).

It is discourse, not the subjects who speak it, which produces knowledge. Subjects may produce particular texts, but they are operating within the limits of the episteme, the discursive formation, the regime of truth, of a particular period and culture. Indeed, this is one of Foucault's most radical propositions: the subject' is produced within discourse.

"This subject of discourse cannot be outside discourse, because it must be subjected to discourse. It must submit to its rules and conventions, to its dispositions of power/knowledge. The subject can become the bearer of the kind of knowledge which discourse produces. It can become the object through which power is relayed. But it cannot stand outside power/knowledge as its source and author" (Hall, 1997, Pg. 55).

Tracing the origins of life to a moment prior to life will result in paradoxes. Bacteria

Drawing distinctions between life and non-life is strictly impossible, yet unavoidable.

Differentiating between one species and another is never absolute.
