Threading the Currents

Over the past twenty-five years, Alan Kesselheim has spent countless hours paddling along the blue veins of the continent. He has taken trips ranging from afternoon jaunts to year-long journeys, from social outings to white-knuckle adventures, in landscapes stretching from the canyons of the Rio Grande to the shores of Hudson Bay. In *Threading the Currents*, he explores how his great love of the outdoors and his intense passion for paddling have shaped his life. In a lively and engaging style, Kesselheim describes the highlights of his paddling trips with friends, family, and lovers. Some, like being stranded naked alongside a river, are humorous. Some, like being stalked for more than a mile by a determined bear, are frightening. Others, like his and his wife's surprise conception of their first child during a fourteen-month trek through the Canadian Arctic, are poignant. But all speak to the heart of things - to love and friendship, birth and death, anger and forgiveness, to the elemental joys and sorrows of life.

Abstract state machines (ASM) sharpen the Church-Turing thesis by the consideration of bounded resources for computing devices. They view computations as an evolution of a state. It has been shown that all known models of computation can be expressed through specific abstract state machines. These models can be given in a representation-independent way. That is one advantage of transferring these models to ASM. The main advantage is, however, to provide a unifying theory to all of these models. At the same time ASM can be refined to other ASMs. Stepwise refinement supports separation of concern during software development and will support component-based construction of systems thus providing a foundation of new computational paradigms such as industrial programming,

programming-in-the-large, and programming-in-the-world. ASM 2004 continued the success story of the ASM workshops. Previous workshops were held in the following European cities: Taormina, Italy (2003); Dagstuhl, Germany (2002); Las Palmas de Gran Canaria, Spain (2001); Monte Verita, Switzerland (2000); Toulouse, France (1999); Magdeburg, Germany (1998); Cannes, France (1998, 1997); Paderborn, Germany (1996); and H- burg, Germany (1994). The ASM workshops have had predecessors, e.g., the famous Lipari Summer School in 1993, whose influential outcome was the fundamental Lipari Guide.

The technological means now exists for approaching the fundamental limiting scales of solid state electronics in which a single carrier can, in principle, represent a single bit in an information flow. In this light, the prospect of chemically, or biologically, engineered molecular-scale structures which might support information processing functions has enticed workers for many years. The one common factor in all suggested molecular switches, ranging from the experimentally feasible proton-tunneling structure, to natural systems such as the micro-tubule, is that each proposed structure deals with individual information carrying entities. Whereas this future molecular electronics faces enormous technical challenges, the same limit is already appearing in existing semiconducting quantum wires and small tunneling structures, both superconducting and normal metal devices, in which the motion of a single charge through the tunneling barrier can produce a sufficient voltage change to cut-off

further tunneling current. We may compare the above situation with today's Si microelectronics, where each bit is encoded as a very large number, not necessarily fixed, of electrons within a charge pulse. The associated reservoirs and sinks of charge carriers may be profitably tapped and manipulated to provide macro-currents which can be readily amplified or curtailed. On the other hand, modern semiconductor ULSI has progressed by adopting a linear scaling principle to the down-sizing of individual semiconductor devices.

Following the Threads

This titled aims to address one of the fundamental units of .NET programming - the thread. A strong understanding of the role threads play in program execution, how multiple threads can interact in order to make efficient programs, and the pitfalls to beware of when developing multithreaded applications, are all core to a developer's ability to develop effective VB.NET programs. This book covers how .NET applications are executed, the lifecycle of a thread in .NET, how the .NET framework uses threads, how threads work in an event-driven environment, how we can create threads, how we can avoid race conditions and deadlocks, how the activity of multiple threads can be synchronized, and how to debug multithreaded applications.

The Principles of Biology

Over the past twenty-five years A. H. Almaas—widely recognized as a leader in integrating spirituality and psychology—has been developing and teaching the Diamond Approach, a spiritual path that integrates the insights of Sufism, Buddhism, Gurdjieff, and other wisdom traditions with modern psychology. In this new work, Almaas uses the metaphor of a "spacecruiser" to describe a method of exploring the immediacy of personal experience—a way of investigating our moment-by-moment feelings, thoughts, reactions, and behaviors through a process of open-ended questioning. The method is called the

practice of inquiry, and Spacecruiser Inquiry reveals what it means to engage with this practice as a spiritual path: its principles, challenges, and rewards. The author explores basic elements of inquiry, including the open-ended attitude, the focus on direct knowledge, the experience of not-knowing, and the process of questioning. He describes the experience of "Diamond Guidance"—the inner wisdom that emerges from our true nature—and how it can be realized and applied. In this process Almaas looks at many of the essential forms of Diamond Guidance, including knowing, clarity, truth, love, intelligence, compassion, curiosity, courage, and determination. Also included are exercises and questions and answers from the original talks by Almaas on which the book is based.

Tearing the Social Fabric

As the second most industrially developed economy in Sub-Saharan Africa, World Bank officials argued that Zimbabwe could be the first African country to succeed with economic liberalization. However, the experience of structural adjustment was disastrous, as it led to widespread deindustrialization. In contrast to predictions, a World Bank/International Monetary Fund program led to the collapse of industries it was meant to promote: textiles, clothing, and footwear. This book examines the reasons behind this seeming paradox through an in-depth case study of the experience of textiles, clothing, and footwear sub-sectors in Zimbabwe under structural adjustment. Economic liberalization failed because it did not relate to the local economic context. This failure led to autonomous development of the trade and financial sectors, to the detriment of production. The economic crisis that resulted is a critical factor behind recent political instability and the current crisis of governance in Zimbabwe. Pdraig Carmody argues that alternatives must be based on a better understanding of the local politico-economic context in Zimbabwe.

The Social Fabric

This anthology of readings portrays the lives of ordinary Americans and examines the diversity of the American people, from the earliest settlement of America to Reconstruction. The Social Fabric acquaints students with the ways in which important events in the nation's history were reflected in the everyday lives of ordinary people. A wide variety of essays deal with the experiences of all Americans: men as well as women, Native Americans, African-Americans, and Asian-Americans as well as whites, the poor as well as the wealthy. These readings highlight the diversity of Americans' experiences based on differences in race, ethnicity, and gender and the way in which those differences have at times led to conflict. Note: The author sequence has changed for this edition; Cary and Weinberg were the first authors on the previous editions.

Experts present proven methods and techniques for studying about or in Africa! Research, Reference Services, and Resources for the Study of Africa helps you steer clear of washouts, cave-ins, and dead ends on the road to successful research on—or in—Africa. This one-of-a-kind research guide presents practical solutions to frequently occurring problems in the study of Africa, including Internet accessibility problems, errors that will affect a “known item” search, the imposition of colonial legacy, and dealing with gender and class bias. Unlike most references on Africa that concentrate on collection development, this unique book focuses on the study of Africa, making it a must-have for academic librarians, Africanist scholars, and Africana librarians. Specialists, generalist librarians, and end users all depend on tools designed to provide access to information in libraries and on the web including OPACs databases, and search engines. In this book, these tools, research methods, and the accessibility of information on Africa are examined, offering students and professionals a thorough guide to the most successful researching route. Research, Reference Services, and Resources for the Study of Africa provides assistance in the research process according to a variety of categories including: evaluating OPACs and similar databases for known-item searching using keywords, subject headings, bias, indexing, full-text searching, terminology, cataloguing, user-centered information services, and other search strategies to find what you are looking for using Internet resources to your advantage using the partnerships between the U.S. and African libraries and scholarly institutions to help improve information access using techniques for reference librarians to act as a force increasing women’s roles in the study of Africa and much more! Research, Reference Services, and Resources for the Study of Africa offers all the information necessary to avoid research hang-ups that affect the study of Africa, and the necessary information to pass these skills on to students.

Research, Reference Service, and Resources for the Study of Africa

This volume--the fifth in a series of histories of the International Monetary Fund--examines the 1990s, a tumultuous decade in which the IMF faced difficult challenges and took on new and expanded roles. Among these were assisting countries that had long operated under central planning to manage transitions toward market economies, helping countries in financial crisis after sudden loss of support from private financial markets, adapting surveillance to reflect the growing acceptance of international standards for economic and financial policies, helping low-income countries grow and begin to eradicate poverty while staying within its mandate as a monetary institution, and providing adequate financial assistance to members in an age of limited official resources. The IMF's successes and setbacks in facing these challenges provide valuable lessons for an uncertain future.

Tearing Down Walls

The awareness that the churches shaped out of the European Reformations are in an advanced process of unraveling is becoming increasingly sensed by many. This book proposes a way of addressing this unraveling based on the experiences and knowledge of people who have always had to struggle with the unraveling of their own communities and worlds. It takes us outside the circular conversations of the Euro-tribal churches into dialogue with people who have been marginalized to see how they have learned to reenter their formative stories to discover ways of remaking themselves in the unraveling. The book then turns these discoveries into ways the churches can engage their own massive unraveling.

Joining God in the Great Unraveling

The Classical Tradition in Economic Thought demonstrates that classicism, in all its many faces, is not only alive but generating an ongoing flow of interpretative literature which will be of interest to students and scholars concerned with economic theory and the history of economic thought as well as the heterodox schools in modern economics.

The Classical Tradition in Economic Thought

On October 17, 1994, The Nation ran the headline "The Immigration Wars" on its cover over an illustration showing the western border of the United States with a multitude of people marching toward it. In the foreground, the Statue of Liberty topped by an upside-down American flag is joined by a growling guard dog lunging at a man carrying a pack. The magazine's coverage of emerging anti-immigrant sentiment shows how highly charged the images and texts on popular magazine covers

can be. This provocative book gives a cultural history of the immigration issue in the United States since 1965, using popular magazine covers as a fascinating entry into a discussion of our attitudes toward one of the most volatile debates in the nation. Leo Chavez gathers and analyzes over seventy cover images from politically diverse magazines, including Time, Newsweek, U.S. News and World Report, Business Week, The New Republic, The Nation, and American Heritage. He traces the connections between the social, legal, and economic conditions surrounding immigration and the diverse images through which it is portrayed. Covering Immigration suggests that media images not only reflect the national mood but also play a powerful role in shaping national discourse. Drawing on insights from anthropology, sociology, and cultural studies, this original and perceptive book raises new questions about the media's influence over the public's increasing fear of immigration.

Covering Immigration

War devastates the lives of those who are caught up in it. For thousands of years, reparations have been used to secure the end of war and alleviate its deleterious consequences. More recently, human rights law has established that victims have a right to reparations. Yet, in the face of conflicts that last for decades with millions of victims, how feasible are reparations? And what are the obstacles to delivering them? Using interviews with hundreds of victims, ex-combatants, government officials, and civil society actors from six post-conflict countries, Reparations and War examines the history, theoretical justifications, and practical challenges of implementing reparations after war. It examines the role of non-state armed groups in making reparations, the role of victim mobilisation, the evolving use of reparations, and the political instrumentalization of redress. Luke Moffett offers a measured and honest account of what reparations can and cannot do. This book sheds new light on how reparations can be politically manipulated, or used to reward those loyal to the State, rather than to achieve justice for the victims who suffer.

Reparations and War

The inhabitants of the urban margins are hardly ever heard in discussions about public safety.

Violence at the Urban Margins

Mark's Gospel has been seen as history, or as literature. The tensions between these two approaches point to what neither approach can articulate: the rich and ambiguous connections and disjuncture's between human experience itself and human retelling, remembering, and reliving of that experience. This energetic pulling and resistance between our ordered categories and the chaos of existence fuels Mark's gospel and arguably Christianity itself. With the aid of ritual theory this book seeks to explore that energy in Mark's passion narrative. In particular, Duran uses Catherine Bell's concept of 'ritualization', the process of ordinary actions taking on ritual meaning and form, to examine the ways in which the gospel draws from the chaos of Jesus' death and the wrong, upside-down order it signifies, a frightening kind of meaning and hope. Mark sets out to understand his world through the story he tells, to stake out some area of sense amid what he views as a chaotic universe. His effort to find or produce sense pushes against the very medium of language, going as far as language can into the boundary lands of ritual performance. In his effort to see and to present the apparently senseless movement of this crisis as meaningful, Mark is drawn into ritual, where unexplained and inexplicable actions do have meaning. Defining ritual as an effort to make order of experience without losing the turbulent truth of experience itself, Duran points out ways in which Mark's story engages in such an effort of ritualization.

The Power of Disorder

A radical call to take justice more seriously and to offer mercy more lavishly. We live in a world that craves justice. But what transforms us to truly seek justice, even at cost to ourselves? And what enables us to do so in a way that also offers mercy? Stephen Um opens up the book of Micah, showing how God's call to his people then is God's call to his people now—a call to so enjoy the gospel that we are freed to seek true justice and offer real mercy. This minor prophet is a voice for our times. This Expository Guide takes you verse by verse through the text in an accessible and applied way. It is less academic than a traditional commentary and can be read cover-to-cover, used in personal devotions, used to lead small group studies, or used for sermon preparation. There is an accompanying Good Book Guide for small group Bible studies.

Micah For You

This book provides the readers with a series of complex cases that are organized by psychiatric disorder. Written by experts in the field, the cases offer insight on how to navigate care in delicate situations while considering preexisting medical conditions. Topics cover pharmacological concerns in women who are pregnant or nursing, working with dementia patients suffering from HIV, assessing and treating ADHD in special populations, monitoring medication use in patients recovering from Substance Use Disorder, and working with patients suffering from personality disorders. Each chapter offers guidance through the maze of classifications, clinical features, diagnosis and various complex interventions. The book also covers new information on the advances in research and management aspects. *Complex Clinical Conundrums in Psychiatry* is a valuable resource for psychiatrists, psychologists, family physicians, geriatricians, counselors, social workers, nurses, and all medical professionals working with complex psychiatric patients.

Complex Clinical Conundrums in Psychiatry

Disasters! Looking beyond their acute impact to how they affect communities in the years that follow is the focus of discussion in this issue of *Psychiatric Clinics*. Reviews of cases of well known disasters such as 9/11, the 2004 South Asian tsunami, Hurricane Katrina, the Haiti earthquake of 2010, the 3/11/11 "triple disaster" in Northern Japan, and others are presented from the perspective of local experts who have been asked to take a long view of what they learned and may still be learning from their post-disaster experiences that mental health professionals faced with future disasters should know. World renowned experts in disaster psychiatry and global psychiatry, Craig Katz and Anand Pandya, lead this publication.

Disaster Mental Health: Around the World and Across Time, An Issue of *Psychiatric Clinics*

An original deep history of the internet that tells the story of the centuries-old utopian dreams behind it—and explains why they have died today. Many think of the internet as an unprecedented and overwhelmingly positive achievement of modern human technology. But is it? In *The Internet Is Not What You Think It Is*, Justin Smith offers an original deep history of the internet, from the ancient to the modern world—uncovering its surprising origins in nature and centuries-old dreams of radically improving human life by outsourcing thinking to machines and communicating across vast distances. Yet, despite the internet's continuing potential, Smith argues, the utopian hopes behind it have finally died today, killed by the harsh realities of social media, the global information economy, and the attention-destroying nature of networked technology. Ranging over centuries of the history and philosophy of science and technology, Smith shows how the "internet" has been with us much longer than we usually think. He draws fascinating connections between internet user experience, artificial intelligence, the invention of the printing press, communication between trees, and the origins of computing in the machine-driven looms of the silk industry. At the same time, he reveals how the internet's organic structure and development root it in the natural world in unexpected ways that challenge efforts to draw an easy line between technology and nature. Combining the sweep of intellectual history with the incisiveness of philosophy, *The Internet Is Not What You Think It Is* cuts through our daily digital lives to give a clear-sighted picture of what the internet is, where it came from, and where it might be taking us in the coming decades.

Study of self-consciousness in Hegel and Shakespeare.

Hegel and Shakespeare on Moral Imagination

The global Islamic resurgence of the last two decades has spawned parallel intellectual efforts to articulate an alternative Islamic way of life. This volume critically assesses much of what is said to be Islamic economics today - its theories, assumptions, concepts and the alternatives it claims to offer. While critical of much of contemporary Islamisation and the interests such economic policies protect, the current relevance of progressive policy alternatives inspired by Islamic economic morality is also analyzed.

Islamic Economic Alternatives

Modern Rome is a city rife with contradictions. Once the seat of ancient glory, it is now often the object of national contempt. It plays a significant part on the world stage, but the concerns of its residents are

often deeply parochial. And while they live in the seat of a world religion, Romans can be vehemently anticlerical. These tensions between the past and the present, the global and the local, make Rome fertile ground to study urban social life, the construction of the past, the role of religion in daily life, and how a capital city relates to the rest of the nation. Michael Herzfeld focuses on Rome's historic Monti district and the wrenching dislocation caused by rapid economical, political, and social change. Evicted from Eternity tells the story of the gentrification of Monti—once the architecturally stunning home of a community of artisans and shopkeepers now displaced by an invasion of rapacious real estate speculators, corrupt officials, dithering politicians, deceptive clerics, and shady thugs. As Herzfeld picks apart the messy story of Monti's transformation, he ranges widely over many aspects of life there and in the rest of the city, richly depicting the uniquely local landscape of globalization in Rome.

Evicted from Eternity

This book documents the experiences of rural Iowa families, who lived through the "farm crisis" years of the 1980s, in a fashion that might help families of the future cope more successfully with economic reversals. The documentation could be used to fashion more effective social policies.

Families in Troubled Times

Most books on recovery from addiction focus either on the addict or the family. While most alcoholics and addicts coming out of treatment have a recovery plan, families are often left to figure things out for themselves. The author takes a fresh approach to the recovery process by making family members and friends part of the reecovering team, beginning in the early stages of sobriety.

It Takes a Family

The House of Representatives--the people's House--is supposed to most closely reflect the needs and desires of ordinary citizens. But over the past decade, House leaders fearful of losing power have torn the House from its roots. The creation of politically safe, more ideologically-tilted congressional districts through redistricting has cemented this shift and seated more politicians from both the extreme left and right. Fight Club Politics will show how we have come to the point where average Americans have little say over what happens in the House, and what can be done about it.

Fight Club Politics

Extending the inquiry of his early groundbreaking books, Christopher Small strikes at the heart of traditional studies of Western music by asserting that music is not a thing, but rather an activity. In this new book, Small outlines a theory of what he terms "musicking," a verb that encompasses all musical activity from composing to performing to listening to a Walkman to singing in the shower. Using Gregory Bateson's philosophy of mind and a Geertzian thick description of a typical concert in a typical symphony hall, Small demonstrates how musicking forms a ritual through which all the participants explore and celebrate the relationships that constitute their social identity. This engaging and deftly written trip through the concert hall will have readers rethinking every aspect of their musical worlds.

A lot has changed since 2015, and Ben Shapiro has something to say about it. In this curated sequel to "Facts Don't Care About Your Feelings," Shapiro breaks down American politics from 2015 to today like you've never seen before. Review political dog fights and the Democrats' radicalism problem through a poignant lens. Analyze the novel coronavirus and its economic implications through a perspective too often stamped out by the mainstream media. Explore the absurdities of "anti-racism," "mostly peaceful" protests and other leftist attempts to rewrite America. And discover pieces of the American identity—unity, free speech, capitalism and so much more—we have lost in the mayhem.

Facts (Still) Don't Care About Your Feelings

With each passing day that Donald Trump is in the White House, controversial conservative radio host Ben Shapiro sees the social fabric tear before his very eyes. Trump acts; the left overreacts; and Republicans don't act to shift the playing field. This cycle shrinks the space for rational politics and conversation, and we end up in a "race to the bottom." This collection of Shapiro's 2017 syndicated columns paints a picture of the current American landscape.

D.C.'s Dirty Politics

Using a range of interdisciplinary ideas, *Major Reward and Recognition Events: Transformations and Critical Perspectives* is an expert-led, informative volume exploring the global growth of major award shows and prize-giving ceremonies since the start of the twentieth century and outlining their key multimodal components, core functions and transformations over time. Given the growth of these events, and therefore the increase in complex resources and specialist workers required to assemble and promote them, this book discusses concerns relating to such events, including those pertaining to social justice and representation, environmental impacts, wellbeing, commercialisation, and materialistic excess. Embellished with illustrative tables and images throughout, the book covers a plethora of award shows and ceremonies, evaluating their collective future in an increasingly politically unstable, post-Covid-19 world dealing with growing global environmental change. This significant book is an invaluable resource for academics and researchers of critical event studies, communication, and media studies, as well as related social science disciplines. The book will also be of interest to enthusiasts and organisers of major recognition and reward events.

Major Reward and Recognition Events

States of Exception in American History brings to light the remarkable number of instances since the Founding in which the protections of the Constitution have been overridden, held in abeyance, or deliberately weakened for certain members of the polity. In the United States, derogations from the rule of law seem to have been a feature of—not a bug in—the constitutional system. The first comprehensive account of the politics of exceptions and emergencies in the history of the United States, this book weaves together historical studies of moments and spaces of exception with conceptual analyses of emergency, the state of exception, sovereignty, and dictatorship. The Civil War, the Great Depression, and the Cold War figure prominently in the essays; so do Francis Lieber, Frederick Douglass, John Dewey, Clinton Rossiter, and others who explored whether it was possible for the United States to survive states of emergency without losing its democratic way. *States of Exception* combines political theory and the history of political thought with histories of race and political institutions. It is both inspired by and illuminating of the American experience with constitutional rule in the age of terror and Trump.

Sixteen new essays by a team of leading international scholars on the theme of the Bible and its reception and appropriation in the context of radical practices, and an exposition of the imaginative possibilities of radical engagement with the Bible in inclusive social contexts.

Radical Christian Voices and Practice

On February 13, 1982, the Guatemalan army stormed into the remote northern Guatemalan village of Santa Maria Tzeja. The villagers had already fled in terror, but over the next six days seventeen of them, mostly women and children, were caught and massacred, animals were slaughtered, and the entire village was burned to the ground. Twelve years later, utilizing terms of refugee agreements reached in 1982, villagers from Santa Maria who had fled to Mexico returned to their homes and lands to re-create their community with those who had stayed in Guatemala. *Return of Guatemala's Refugees* tells the story of that process. In this moving and provocative book, Clark Taylor describes the experiences of the survivors -- both those who stayed behind in conditions of savage repression and those who fled to Mexico where they learned to organize and defend their rights. Their struggle to rebuild is set in the wider drama of efforts by grassroots groups to pressure the government, economic elites, and army to fulfill peace accords signed in December of 1996. Focusing on the village of Santa Maria Tzeja, Taylor defines the challenges that faced returning refugees and their community. How did the opposing subcultures of fear (generated among those who stayed in Guatemala) and of education and human rights (experienced by those who took refuge in Mexico) coexist? Would the flood of international money sent to settle the refugees and fulfill the peace accords serve to promote participatory development or new forms of social control? How did survivors expand the space for democracy firmly grounded in human rights? How did they get beyond the grief and trauma that remained from the terror of the early eighties? Finally, the ultimate challenge, how did they work within conditions of extreme poverty to create a grassroots democracy in a militarized society?

Essential Papers on Hasidism

As America approaches her 250th birthday, she is also approaching a fork in the road. The choice before us is moral and boils down to two terms: liberty or social justice? We cannot have both. This book, written by a Swedish immigrant, lays out the moral case for returning America to the Christian, libertarian values that the Founding Fathers wrote into the Declaration of Independence and the Constitution. These values guarantee liberty and opportunity, but they also require responsible citizenship in return. In understanding the latter, we can resurrect the former. By contrast, the failure to understand responsible citizenship and its critical role in defending liberty opens the door for America to irrevocably change character. Our country is already on the cusp of becoming a full-fledged egalitarian welfare state, defined not by liberty, but by the endless pursuit of social justice. As this book explains, there is a path back to freedom, one illuminated by faith, paved with practical, sensible policy reforms and traveled by people ready to exercise responsible citizenship.

Return Of Guatemala'S Refugees

Majoritarian State traces the ascendance of Hindu nationalism in contemporary India. Led by Prime Minister Narendra Modi, the BJP administration has established an ethno-religious and populist style of rule since 2014. Its agenda is also pursued beyond the formal branches of government, as the new dispensation portrays conventional social hierarchies as intrinsic to Indian culture while condoning communal and caste- and gender-based violence. The contributors explore how Hindutva ideology has permeated the state apparatus and formal institutions, and how Hindutva activists exert control over civil society via vigilante groups, cultural policing and violence. Groups and regions portrayed as 'enemies' of the Indian state are the losers in a new order promoting the interests of the urban middle class and business elites. As this majoritarian ideology pervades the media and public discourse, it also affects the judiciary, universities and cultural institutions, increasingly captured by Hindu nationalists. Dissent and difference silenced and debate increasingly sidelined as the press is muzzled or intimidated in the courts. Internationally, the BJP government has emphasised hard power and a fast-expanding security state. This collection of essays offers rich empirical analysis and documentation to investigate the causes and consequences of the illiberal turn taken by the world's largest democracy.

The Oxford Textbook of Migrant Psychiatry brings together the theoretical and practical aspects of the mental health needs of migrants, refugees and asylum seekers into one comprehensive resource for researchers and professionals.

Sin Perdón

It is 20 years since environmental issues were first put on the international agenda at the Stockholm Conference, and concern for planetary survival has shifted from desertification to acid rain to ozone depletion to biodiversity. The official responses to all the various crises, however, has largely been one of offering technological and managerial 'fixes,' which often fail to address or solve the basic ecological issues. Genuine, viable improvements can only be implemented at ground level, by those most strongly affected by the problem. Because of their location 'on the fringes,' and their traditional role in providing sustenance, it is women who are often able to offer ecological insights that are deeper and richer than the technocratic recipes of international experts, or the responses of men in their own societies. Close to Home emphasises that the environment is not some distant concern, but one that affects the health and well-being of communities on a daily basis. For women, 'the environment' is the place in which we live. The contributions in this book, edited by Vandana Shiva, show how women worldwide are taking action at grass-roots level, battling toxic wastes, low-level radiation and biotechnology in the struggle for truly sustainable community development.

Despite decades of efforts to combat homelessness, many people continue to experience it in Canada's major cities. There are a number of barriers that prevent effective responses to homelessness, including a lack of agreement on the fundamental question: what is homelessness? In Multiple Barriers, Alison

Smith explores the forces that shape intergovernmental and multilevel governance dynamics to help better understand why, despite the best efforts of community and advocacy groups, homelessness remains as persistent as ever. Drawing on nearly 100 interviews with key actors in Vancouver, Calgary, Toronto, and Montreal, as well as extensive participant observation, Smith argues that institutional differences across cities interact with ideas regarding homelessness to contribute to very different models of governance. Multiple Barriers shows that the genuine involvement of locally based service providers, with the development of policy, are necessary for an effective, equitable, and enduring solution to the homelessness crisis in Canada.

A long-respected standard in the psychology of adjustment, Psychology and the Challenges of Life, Eleventh Edition has been thoroughly updated and contemporized to provide students the ability to reflect on how psychology relates to the lives we live and the roles that psychology can play in helping us with the challenges we face. Authors Jeffrey Nevid and Spencer Rathus explore the many applications of psychological concepts and principles used to meet the challenges of daily life, while encouraging students to apply concepts to themselves through active learning exercises, self-assessment questionnaires, and journaling exercises.

Labour migration has been on the agenda of many countries around the globe at the same time as governments of both sending and receiving countries have been trying to develop regulatory mechanisms. This book opens the debate on the global politics of labour migration by proposing a re-assessment of the interaction between states regarding labour migration. Presenting case-specific scholarship from leading experts from five different continents, each contribution engages with the changing landscape of migration control and teases out emerging control patterns, dynamics and correlations that can be made between them and existing control paradigms. The multidisciplinary and global focus in 'Constructing and Imagining Labour Migration' sheds much needed light on the mechanisms deployed by states in their attempts to control labour migration and on the manner in which these mechanisms impact upon migrants themselves, leaving some caught up in the politics of labour market control

Psychology and the Challenges of Life

This highly original study of the 'manic style' in enthusiastic writing of the seventeenth and eighteenth centuries identifies a literary tradition and line of influence running from the radical visionary and prophetic writing of the Ranters and their fellow enthusiasts to the work of Jonathan Swift and Christopher Smart. Clement Hawes offers a counterweight to recent work which has addressed the subject of literature and madness from the viewpoint of contemporary psychological medicine, putting forward instead a stylistic and rhetorical analysis. He argues that the writings of dissident 'enthusiastic' groups are based in social antagonisms; and his account of the dominant culture's ridicule of enthusiastic writing (an attitude which persists in twentieth-century literary history and criticism) provides a powerful and daring critique of pervasive assumptions about madness and sanity in literature.
