Impact Investing

A ground-breaking book on the transformative power of impact investing This is the first book to chart the catalytic path of this new industry, explaining how it is and can be a positive disruptive force. It shows how impact investing is a transformational vehicle for delivering "blended value" throughout the investment spectrum, giving a single name to a set of activities previously siloed in enclaves, revealing how they are linked within what is becoming a new field of investing. Written by two leaders in the growing field of impact investing, the book defines this emerging industry for participants on all sides of the funding equation (investors, funders and social entrepreneurs). Filled with illustrative examples of impact investing success stories Reveals how the field can expand in order to address the most critical social and environmental issues of our day Explores the wide-ranging applications of impact investing as well as entrepreneurial opportunities The authors do not take a normative approach to argue how investors should behave like an investment guide might but show how entrepreneurial people and institutions are already offering an integrated alternative.

Making Money Matter

The way we think about money has extraordinary impact. This book satisfies the growing longing for a financial overview that can provide practical advice and demonstrate how money is a social tool. Making Money Matter introduces the reader to common money mistakes, and the dysfunctional nature of the current financial framework. Its overview of the SRI world will inspire investors to push their advisors' envelope while providing new strategies to meet the demand for positive impact. It provides a philosophical basis for transforming our view of money from an end unto itself to a means to change the world for the better. This book traces the author's journey from early financial innocence to an appreciation of how money works and how it can be transformed. People who care about the planet and society at large need a bridge from deeply felt values to practical understanding and advice that will lead to a new money paradigm. This new approach covers all aspects of money from everyday transactions to high impact investment options. It describes a new investment paradigm that will support both reasonable returns and long-term societal and planetary health. Socially Responsible Investing (SRI) is well established for smaller scale investors in the public space and impact investing for accredited and qualified investors is taking hold in the private-space. Readers want more than flat definitions, and need an inclusive overview that can inspire investors on all levels to move the trillions required for addressing the world's many dire problems. This book's unique contribution is a personal, practical and holistic approach to socially conscious investing, which engages the reader in a way that is both healing and empowering. Making Money Matter is designed for mass appeal. First, its biographical, true-confessions format introduces the reader to common money mistakes made by the author, while personalizing the dysfunctional nature of the current financial framework. Secondly, its personalized overview of the countermovement of socially-conscious investment options is designed to inspire investors to push their advisors' advice-envelope while providing investment managers with practical new strategies to meet the burgeoning demand for positive impact. Finally, this book provides a philosophical basis for the new money paradigm that shows how to transform our view of money from an end unto itself to a means to change the world for the better. This book is aimed at people who are concerned about Wall Street, banking and our current monetary and finance system, average investors, businessmen, progressives, libertarians or fiscal conservatives. However it should be of particular interest to investment professionals looking for new ways of meeting their clients' needs. Investment managers and consultants need to be educated about this space. This book should be as popular among family office associations as the Chartered Financial Analysts Association. But this book's ultimate goal is to provide inspiration to all levels of investors. Everyone uses money, and the way we think about money has more impact than all the impact investments put together. This thinking needs to change. Just as consumers drove the growth of the local and organic movements, investors will drive the new money paradigm. This may help anyone to begin to think about the real bottom line of every transaction, which is the impact of our actions on the planet - including all living beings that inhabit it.

Money Saving Step by Step Guide on How to Open an Assisted Living Facility from Start to Finish MAKE MONEY WHILE MAKING a DIFFERENCE

I will show you a detailed step-by-step process of how I opened an Assisted Living Facility (ALF) in a residential area from scratch. I purchased the house, prepared the required installations per licensing standards, purchased necessary items, developed and submitted the facility plans, submitted applications, paid fees, and obtained my ALF license. I had no experience in the ALF industry. I was not a nurse, and still not a nurse. So I went through the sweats, the tears, and the sleepless nights as a new person in the ALF industry with no friends and connections. I am going to save you time, frustration, and money. If you don't believe me, don't buy this book and continue to sit on your dreams, or get frustrated from the lack of information sharing and give up. The very few pieces of information you might find out there is confusing because, sadly, most people who own and operate smaller ALF don't fully understand the process because they did not do or don't know how to do their research. They hire consultants who never thoroughly explain the process to them. So, you will receive as much information as THEY understand; thus, only pieces of the puzzle, never the complete process. But here, I break down the whole process and make it easy to understand and follow.

Integral Investing

Today, early-stage investors and entrepreneurs find themselves in a dilemma in which they must choose between profit and impact; between traditional, for-profit-only models on the one hand, and

multiple-bottom-line structures with a positive social or environmental impact on the other. At a time in which climate change, exponentially growing technologies, social polarization, and looming pandemics are calling into question humanity's priorities, this Report to the Club of Rome and the World Academy of Art and Science dissolves this dilemma by proposing a new investment paradigm, namely Integral Investing. Integral Investing incorporates and transcends the best practices of both traditional venture capital and impact investing. It provides a seamless integration and shows how technological progress need not be our rival, but can instead be our ally in ensuring the prosperous society we all want. Drawing on her own investments and stellar track record since 1995, the author reveals the mechanism of Integral Investing. At the heart of it is a powerful, 360-degree de-risking tool called the Theta Model, which reveals how to make smart investment decisions based on the comprehensive integration of traditional due-diligence criteria, sustainability metrics, and assessments of the founders' and team culture. But it doesn't stop there. In turn, this handbook demonstrates how to use human-centered AI to scale and digitalize the investment process. The goal here is to accelerate the use of exponential tech, capital, and consciousness leadership to transition to a sustainable global society: a process the author refers to as the Investment Turnaround. The 21 principles of Integral Investing, which she defines using Ken Wilber's Integral Theory, lead to her manifesto on how to implement the UN Sustainable Development Goals within Planetary Boundaries by 2050 through early-stage investing and entrepreneurship. Similar to the 15th century, when the Medicis inspired the Renaissance, today humanity is once again at a crucial turning point where pioneering public and private financiers, investors, entrepreneurs, and other committed individuals have the opportunity to leave behind the legacy of a prosperous society. This handbook provides a source of inspiration, and shows how self-actualization, a positive mindset, and a consciousness that is backed by a world-centric desire can become the driving force for solving the global grand challenges.

If you have already started making some strides, I will help you achieve even more. Read on and see how you can make a difference in your life and be financially successful. The Pythagoreans, according to Dr. Isaac Watts, had a very sacred rule in life. It was their practice to evaluate all the day's activities or events before going to sleep. The evaluation was not done only once or twice but thrice. The reason, of course, is obvious - they wanted to ascertain how they fared in all their affairs, what was done wrong and what was accomplished right. Like the Pythagoreans, all of us need to evaluate our lives from time to time because doing so is a critical step towards financial success. To be wealthy, you need to look inward first. Yes, begin with an honest look at yourself. Looking inward allows you to understand your need to undergo a heart surgery, even a brain surgery. Do you have the right mindset to make money? The point is this: making money is all about psychology. To accumulate wealth, you have to have a brand new mind, convinced that everything is possible to those who believe. According to Equity Group Investments founder Sam Zell, the state of one's mind dictates his or her lot in life, particularly the area of financial stability. In an interview, Zell said, "Why is it always assumed that somebody doesn't succeed because he can't, as opposed to he doesn't want to..." In short, Zell is arguing that people are poor because they choose to be poor. It's not that they are helpless, but because they don't try. I agree a hundred percent.
