Problem 1. In this figure l and m the two lines are parallel to each other. Jessie listed the first two steps in a proof that $\text{angle } 1 + \text{angle } 2 + \text{angle } 3 = 180$ degrees.

Problem 2. This table defines a function with x values making up the domain and y values making up the range.

Problem 3. You have the measure of arc QR which is 72 degrees, and you are asked to find the measure of $\angle QPR$. This is what we call an inscribed angle. The rule is it is half of the arc. So if this is 72 then this angle is half of it which is $C\ 36$

Problem 4. Which of these expressions has a real number value?
