Iowa in War Times (Classic Reprint)

Excerpt from Iowa in War Times This book is not a book of biography - neither is it a book of incidents. The sincere effort has been made to prepare an enduring history of great events of Iowa during the war period. If there is any art in the book it has been the art of condensing. Men have been largely passed over - leaving the story of their deeds to speak for them. No other plan for a single volume seemed possible - and a book beyond a single volume could not be issued at a price desirable for the public. A Substitute for War - War College Series

This is a curated and comprehensive collection of the most important works covering matters related to national security, diplomacy, defense, war, strategy, and tactics. The collection spans centuries of thought and experience, and includes the latest analysis of international threats, both conventional and asymmetric. It also includes riveting first person accounts of historic battles and wars. Some of the books in this Series are reproductions of historical works preserved by some of the leading libraries in the world. As with any reproduction of a historical artifact, some of these books contain missing or blurred pages, poor pictures, errant marks, etc. We believe these books are essential to this collection and the study of war, and have therefore brought them back into print, despite these imperfections. We hope you enjoy the unmatched breadth and depth of this collection, from the historical to the just-published works.

Operating in the Gray Zone

So-called gray zone wars are not new, but they have highlighted shortcomings in the way the West thinks about war and strategy. This monograph proposes an alternative to the U.S. military's current campaign-planning framework, one oriented on achieving positional advantages over rival powers and built around the use of a coercion-deterrence dynamic germane to almost all wars as well as to conflicts short of war. AUDIENCE: This text may appeal to security analysts, military soldiers and leaders, policy practitioners, defense scholars, war planners and military strategists, and international relations teams that may be instrumental in achieving policy goals. Additionally, military historians, and students pursuing coursework in military science, international relations, and public administration may be interested in this work as a supplemental text.
