Uralisches etymologisches Wörterbuch

Die Zielsetzung des "Uralischen Etymologischen Wörterbuches" ist es, die uralische, die finnisch-ugrische, die finnisch-permische, die finnisch-wolgaische und die ugrische Schicht des uralischen Wortschatzes kritisch zu werten und zusammenzufassen. Ausser den Erbworthen werden auch die in der uralischen, der finnisch-permischen, der finnisch-wolgaischen und der ugrischen Zeit übernommenen Lehnwörter behandelt. Das Wörterbuch umfasst ausser den uralischen auch die in die übrigen aufgezählten Schichten gehörenden Etymologien und berücksichtigt unsichere bzw. umstrittene Etymologien. Band 1 behandelt die uralische und die finnisch-ugrische Schicht.

Uralisches etymologisches Wörterbuch

This is the first of a two-volume comparative history of negation in the languages of Europe and the Mediterranean. It examines the development of sentential negation and negative indefinites and quantifiers in languages and language groups such as Italian, English, Dutch, German, Celtic, Slavonic, Greek, Uralic, and Afro-Asiatic.

Uralisches etymologisches Wörterbuch

Die Habilitationsschrift des 1996 verstorbenen Münchner Finnougriken und Indogermanisten Hartmut Katz ist aus dessen langjähriger Beschäftigung mit der Lautlehre des Uralischen erwachsen, wobei den arischen Lehnwörtern eine wichtige Kontrollfunktion zukam. Die Arbeit bietet einen Extrakt aus der geplanten uralischen Lautgeschichte und eine Substitutionslehre. Das "Herzstück" der Arbeit besteht aus den nach Sachgruppen geordneten Lehnetymologien. Die Verbreitung der uralischen Belege kombiniert mit lautlichen Kriterien ergab eine prinzipiell klare Schichtung der arischen Lehnwörter in den uralischen Sprachen.

Uralisches etymologisches Wörterbuch

The Indo-European dispersal inalterably shaped the Eurasian linguistic landscape. This book offers the newest insights into this dramatic prehistoric event.

Uralisches etymologisches Wörterbuch

"In The Precursors of Proto-Indo-European some of the world's leading experts in historical linguistics shed new light on two hypotheses about the prehistory of the Indo-European language family, the so-called Indo-Anatolian and Indo-Uralic hypotheses. The Indo-Anatolian hypothesis states that the Anatolian branch of the Indo-European family should be viewed as a sister language of 'classical' Proto-Indo-European, the ancestor of all the other, non-Anatolian branches. The common ancestor of all Indo-European languages, including Anatolian, can then be called Proto-Indo-Anatolian. The Indo-Uralic hypothesis states that the closest genetic relative of Indo-European is the Uralic language family, and that both derive from a common ancestor called Proto-Indo-Uralic. The book unravels the history of these hypotheses and scrutinizes the evidence for and against them. Contributors are Stefan H. Bauhaus, Rasmus G. Bjørn, Dag Haug, Petri Kallio, Simona Klemen i , Alwin Kloekhorst, Frederik Kortlandt, Guus Kroonen, Martin J. Kümmel, Milan Lopuhaä-Zwakenberg, Alexander Lubotsky, Rose-marie Lühr, Michaël Peyrot, Tijmen Pronk, Andrei Sideltsev, Michiel de Vaan, Mikhail Zhivlov"--

Uralisches etymologisches Wörterbuch

Valency patterns and valency orientation have been frequent topics of research under different perspectives, often poorly connected. Diachronic studies on these topics is even less systematic than synchronic ones. The papers in this book bring together two strands of research on valency, i.e. the description of valency patterns as worked out in the Leipzig Valency Classes Project (ValPaL), and the assessment of a language's basic valency and its possible orientation. Notably, the ValPaL does not provide diachronic information concerning the valency patterns investigated: one of the aims of the book is to supplement the available data with data from historical stages of languages, in order to make it profitably exploitable for diachronic research. In addition, new research on the diachrony of basic valency and valency alternations can deepen our understanding of mechanisms of language change and of the propensity of languages or language families to exploit different constructional patterns related to transitivity.

The History of Negation in the Languages of Europe and the Mediterranean

This book provides a unique, up-to-date survey of individual Uralic languages and sub-groupings from Finnish to Selkup. Spoken by more than 25 million native speakers, the Uralic languages have important cultural and social significance in Northern and Eastern Europe, as well as in immigrant communities throughout Europe and North America. The introductory chapter gives an overview of the Uralic language family and is followed by 18 chapter-length descriptions of each language or sub-grouping, giving an analysis of their history and development as well as focusing on their linguistic structures. Written by internationally recognised experts and based on the most recent scholarship available, the volume covers major languages - including the official national languages of Estonia, Finland and Hungary - and rarely-covered languages such as Mordva, Nganasan and Khanty. The 18 language chapters are similarly-structured, designed for comparative study and cover phonology, morphology, syntax and lexicon. Those on individual languages also have sample text where available. Each chapter includes numerous tables to support and illustrate the text and bibliographies of the major references for each language to aid further study. The volume is comprehensively indexed. This book will be invaluable to language students, experts requiring concise but thorough information on related languages and anyone working in historical, typological and comparative linguistics.

Uralisches etymologisches Wörterbuch

The Kluge is the famous standard dictionary of German etymology. It comprehensively informs about the historical development and forming of 13,000 German and foreign words. For this edition, the editor has carefully examined, revised and updated the entire text. For the first time the Kluge is published with a CD-ROM that allows detailed and quick inquiries. The layout of the pages and the book cover

have a new design, and the book will have a modern appearance. System Requirements: Windows 95/98/ME/2000/NT 4.0/XP 80486 processor (Pentium recommended) Minimum 16 MB RAM (32 MB RAM recommended) Minimum 18 MB free disk space (cd drive) Minimum 40 MB free disk space (full installation)
