MEN'S TRADITIONAL DANCERS ARE THE WARRIORS, PROTECTORS AND STORYTELLERS. MEN'S FANCY FEATHER IS ONE OF THE MORE MODERN POW-WOW DANCES.

IT IS BELIEVED TO HAVE ORIGINATED FROM BUFFALO BILL'S WILD WEST SHOWS WHERE YOUNG MEN WOULD DANCE HARD AND FAST TO IMPRESS THE CROWDS.

GRASS DANCERS ARE YOUNG MEN WITH LONG STRANDS OF RIBBON OR YARN, SIMULATING WAVING FIELDS OF GRASS.

GRASS DANCERS ARE STRANDS OF RIBBON

WOMEN'S TRADITIONAL DANCERS ARE MATURE WOMEN, MOTHERS AND GRANDMOTHERS WHO MOVE GRACEFULLY AROUND THE CIRCLE.

THE JINGLE DANCE WAS BORN AFTER A MEDICINE MAN HAD A DREAM

HISTORICALLY WOMEN WORE SMALL MEGIS SHELLS TO REPRESENT SPIRIT, WATER AND HEALING

WOMEN'S SHAWL DANCERS MARRY INTRICATE FOOTWORK WITH SMOOTH FANNING SHAWL MOVEMENTS

WOMEN'S SI FOOTWORK

THE GOAL IS TO LOOK LIKE YOU'RE FLOATING AND BARELY TOUCHING THE GROUND.

THERE ARE HUNDREDS OF DIFFERENT SONGS AND STYLES OF DRUMMING THAT HELP THE DANCERS TELL THEIR STORIES.

Why do early films present the Netherlands as a country full of canals and windmills, where people wear traditional costumes and wooden shoes, while industries and modern urban life are all but absent? Images of Dutchness investigates the roots of this visual repertoire from diverse sources, ranging from magazines to tourist brochures, from anthropological treatises to advertising trade cards, stereoscopic photographs, picture postcards, magic lantern slide sets and films of early cinema. This richly illustrated book provides an in-depth study of the fascinating corpus of popular visual media and their written comments that are studied for the first time. Through the combined analysis of words and images, the author identifies not only what has been considered "typically Dutch" in the long nineteenth century, but also provides new insights into the logic and emergence of national clichés in the Western world.

Het Nederlandse boek

'The story of oncology is not only fascinating but also contains many accounts of dead ends, chance discoveries, illusions, mistakes and disappointments alongside the few successes.' These words are taken from the introduction to this book. The author, professor emeritus of Medical Oncology, reviews all aspects of the problem of cancer from a historical perspective, from the oldest existing records to the latest scientific and medical advances. It will interest the many people engaged in the treatment of cancer to read how the current therapeutic methods came about, and the book may also provide inspiration for cancer researchers, and for all those directly or indirectly involved with cancer. The layman looking for background information on a particular treatment may find it useful too. The various chapters can be read independently. A glossary and a few explanatory diagrams augment the text. This book grew out of an invitation the author received to lecture on the history of oncology. During his background reading, he discovered that there was no single volume dealing with the entire history of the subject. Fortunately, however, a great deal of information could be found here and there in the literature. As he read, he was struck by the fascinating stories behind many discoveries, and felt impelled to put them together in a single comprehensive account. The results of his labors are presented in this remarkable volume. The author, Prof. D.J.Th. (Theo) Wagener, was head of the department of Medical Oncology at the Radboud University Nijmegen Medical Centre in the Netherlands from 1982 to 2001, chairman of the Educational Committee of the European Society of Medical Oncology (ESMO), a member of the Educational Committee of the American Society of Clinical Oncology (ASCO) and a member of various international scientific working groups, mainly of the European Organization for Research and Treatment of Cancer (EORTC).

Nederlandsche bibliographie

Since the early days of film, critics and theorists have contested the value of formula, cliché, conventional imagery, and recurring narrative patterns of reduced complexity in cinema. Whether it's the high-noon showdown or the last-minute rescue, a lonely woman standing in the window or two lovers saying goodbye in the rain, many films rely on scenes of stereotype, and audiences have come to expect them. Outlining a comprehensive theory of film stereotype, a device as functionally important as it is problematic to a film's narrative, Jörg Schweinitz constructs a fascinating though overlooked critical history from the 1920s to today. Drawing on theories of stereotype in linguistics, literary analysis, art history, and psychology, Schweinitz identifies the major facets of film stereotype and articulates the positions of theorists in response to the challenges posed by stereotype. He reviews the writing

of Susan Sontag, Roland Barthes, Theodor W. Adorno, Rudolf Arnheim, Robert Musil, Béla Balázs, Hugo Münsterberg, and Edgar Morin, and he revives the work of less-prominent writers, such as René Fülöp-Miller and Gilbert Cohen-Séat, tracing the evolution of the discourse into a postmodern celebration of the device. Through detailed readings of specific films, Schweinitz also maps the development of models for adapting and reflecting stereotype, from early irony (Alexander Granowski) and conscious rejection (Robert Rossellini) to critical deconstruction (Robert Altman in the 1970s) and celebratory transfiguration (Sergio Leone and the Coen brothers). Altogether a provocative spectacle, Schweinitz's history reveals the role of film stereotype in shaping processes of communication and recognition, as well as its function in growing media competence in audiences beyond cinema.

Het Leeskabinet

The reforms initiated by Peter the Great transformed Russia not only into a European power, but into a European culture--a shift, argues James Cracraft, that was nothing less than revolutionary. The author of seminal works on visual culture in the Petrine era, Cracraft now turns his attention to the changes that occurred in Russian verbal culture. The forceful institutionalization of the tsar's reforms--the establishment of a navy, modernization of the army, restructuring of the government, introduction of new arts and sciences--had an enormous impact on language. Cracraft details the transmission to Russia of contemporary European naval, military, bureaucratic, legal, scientific, and literary norms and their corresponding lexical and other linguistic effects. This crucial first stage in the development of a "modern" verbal culture in Russia saw the translation and publication of a wholly unprecedented number of textbooks and treatises; the establishment of new printing presses and the introduction of a new alphabet; the compilation, for the first time, of grammars and dictionaries of Russian; and the initial standardization, in consequence, of the modern Russian literary language. Peter's creation of the St. Petersburg Academy of Sciences, the chief agency advancing these reforms, is also highlighted. In the conclusion to his masterwork, Cracraft deftly pulls together the Petrine reforms in verbal and visual culture to portray a revolution that would have dramatic consequences for Russia, and for the world. Table of Contents: Figures Preface Note on Dates and Transliteration 1. Introduction Historiography Language, Culture, Modernity Russian before Peter 2. The Nautical Turn Russia in Maritime Europe The Naval Statute of 1720 Other Nautical Texts Institutionalization 3. Military Modernization Military Revolutions: Europe to Russia The Military Statute of 1716 Textbooks and Schools 4. Bureaucratic Revolution Advent of the Modern European State The Petrine State The General Regulation of 1720 Regulations and Justifications 5. Science and Literature Geometry, Geography, History Eloquence, Theology, Philosophy The Academy 6. The Language Question The Print Revolution in Russia Lexical Proliferation Dictionaries and Grammars Russian after Peter 7. Conclusion The Petrine Revolution in Russia The Persistence of Muscovy Abbreviations Appendix I: Texts Appendix II: Words Notes Bibliography Index No previous author has attempted to document the changes in the Russian language during Peter the Great's reign by setting such a wide range of texts in historical context -- with full reference to the European background -- in a discussion accessible to non-specialists. James Cracraft extends the definition of literature beyond belles lettres and private writings, in which the Petrine era is relatively poor, to 'verbal culture,' in which it is rich, thereby offering a much wider range of material from a crucial age of reform and allowing exploration of such phenomena as the vocabulary of political power. In no other work in print in English can one find such detailed expositions of the publishing history and contents of such key texts as the Naval Statute and Military Statutes. Cracraft's judicious interpretation will be invaluable to serious students of Russian history. This is a work of immense erudition and a major contribution to scholarship. --Lindsey Hughes, University College London

Story of Jewish girl in the Dutch Resistance during World War II.

Eene halve eeuw 1848-1898

In *The Viewer as Poet*, Norman Land provides the first comprehensive survey of ekphrasis in literature and art criticism from antiquity through the Renaissance. Land demonstrates, more fully than anyone has so far, that Renaissance art criticism assimilated the poetic tradition of ekphrasis while maintaining its function of analyzing works of art. Broadly speaking, the book shows that purely literary descriptions of art in poetry and prose contain a response like that found in art-critical ekphrasis. This is true in both antiquity and the Renaissance. The response to art in the elder Philostratus's *Imagines*, for example,

is like that found in the descriptions of Apuleius and Lucian. Later Dante, Boccaccio, and Poliziano, among others, respond to imaginary works of art in their poetry in much the same way that Lorenzo Ghiberti, Aretino, and Vasari respond to real works in their writings. Land offers for the first time a synthetic description of the Renaissance response to, or experience of, art as embodied in literature, including art criticism. This book will form the basis for a deeper understanding of Renaissance art than we have now, for it provides not only a tool for viewing works of art as they were originally seen and experienced--that is, from a historical perspective--but also an outline of the tradition out of which modern writings about art grew.

De Toekomst, 1857-1898

This volume results from a conference on the 1965 Hajnal hypothesis at Stanford University in 1999. Scholars from all over the world reviewed the contribution Hajnal's hypothesis made to our knowledge of historical demography. First, the hypothesis is placed in its historiographic context. Geography comes next. Hajnal distinguished Western Europe from the rest of the world because marriage there was late and non-universal. By contrast, in Eastern Europe, but even more so in Asia, young and universal marriage dominated. The second part of this book explores these geographic divisions, covering Western, Eastern, and Southern Europe, Japan, India and China. The third part of the volume introduces new issues and thus revises and even extends Hajnal's hypothesis into patriarchy, the role of children, women's labor, servants, and illegitimacy. This volume is the first in the series *Life at the Extremes*. The demography of Europe and China edited by Chuang Ying-Chang (Academia Sinica, Taiwan), Theo Engelen (Radboud University Nijmegen, the Netherlands) and Arthur P. Wolf (Stanford University, U.S.A.). Book jacket.

Purchase one of 1st World Library's Classic Books and help support our free internet library of downloadable eBooks. Visit us online at www.1stWorldLibrary.ORG - - I was a devil of a scapegrace in my time. No tree was too high for me, no water too deep; and, when there was mischief going, I was the ring-leader of the band. Father racked his head for days together to find a punishment that I should remember; but it was all no good: he wore out three or four birch-rods on my back; his hands pained him merely from hitting my hard head; and bread and water was a welcome change to me from the everyday monotony of potatoes and bread-and-butter. After a sound drubbing followed by half a day's fasting, I felt more like laughing than like crying; and, in half a while, all was forgotten and my wickedness began afresh and worse than ever. One summer's evening, I came home in fine fettle. I and ten of my school-fellows had played truant: we had gone to pick apples in the priest's orchard; and we had pulled the burgomaster's calf into the brook to teach it to swim, but the banks were too high and the beast was drowned. Father, who had heard of these happenings, laid hold of me in a rage and gave me a furious trouncing with a poker, after which, instead of turning me into the road, as his custom was, he caught me up fair and square, carried me to the loft, flung me down on the floor and bolted the trap-door behind him.

Eene halve eeuw, 1848-1898

The Nazi regime in Germany was terrible enough without even accounting for the policy of collaboration. So what extra does collaboration say about Hitler and his plans for Europe? Peter Davies explores the mindset and political attitudes of Hitler and also many other controversial pro-Nazi leaders in Western Europe, Scandanavia, Central and Eastern Europe, and also beyond. Delving into four different "types" of collaboration: political, financial, the Holocaust, and collaboration at a social level, he asks some difficult questions. The story of collaboration is brought up to date, assessing both the legacy and its contemporary parallels.

Brinkman's catalogus van boeken en tijdschriften

This book examines the manifold forms and motives for collaboration between the Dutch and their German occupiers during the Second World War, by looking at the main areas of political and economic life under occupation. It investigates the policies of accommodation during the first phase of Nazi rule and analyses the desperate survival tactics of the prewar parties, trade unions and the press.

This work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it. This work is in the public domain in the United States of America, and possibly other nations. Within the United States, you may freely copy and distribute this work, as no entity (individual or corporate) has a copyright on the body of the work. Scholars believe, and we concur, that this work is important enough to be preserved, reproduced, and made generally available to the public. To ensure a quality reading experience, this work has been proofread and republished using a format that seamlessly blends the original graphical elements with text in an easy-to-read typeface. We appreciate your support of the preservation process, and thank you for being an important part of keeping this knowledge alive and relevant.

Brinkman's Catalogus der boeken, plaat- en kaartwerken

This book investigates how fascism – as an ideology and political praxis – reconfigured the ideological, political, and moral landscape of interwar Europe, generating an atmosphere of extreme ‘license’ that facilitated the leap into eliminationist violence. It demonstrates how fascist ideology linked the prospect of violent ‘cleansing’ to utopias of national/racial regeneration, thus encouraging and legitimizing targeted hatred against particular ‘others’. It also shows how the diffusion and internationalization of fascism in the 1930s produced a sense of a revolutionary new beginning and created a transnational fascist ‘new order’ in which Nazi Germany came to occupy a potent position of authority. The book analyzes how the eliminationist initiative and precedent of Nazi Germany became a second ‘license’ that empowered fascist regimes across Europe to embark on their own eliminationist projects with diminished accountability. Finally, it examines how this ‘license’ – enhanced by the actions of fascists and the collapse of order caused by World War Two – released individuals and communities from the burden of legal and moral accountability, turning them into accomplices in the most wide, brutal, and devastating genocidal campaign that the continent had ever experienced.

Geïllustreerde encyclopædie

While the majority of these essays are about wars fought against Venice's enemies or on the building and defence of Venetian and other fortifications, there are also essays on other aspects of Venetian life and art: on Giorgione's earliest work; on the career of a Venetian pope; on the building of the Ca' d'Oro; and on the Diarii of Marino Sanuto.

The new edition of an introduction to multiagent systems that captures the state of the art in both theory and practice, suitable as textbook or reference. Multiagent systems are made up of multiple interacting intelligent agents—computational entities to some degree autonomous and able to cooperate, compete, communicate, act flexibly, and exercise control over their behavior within the frame of their objectives. They are the enabling technology for a wide range of advanced applications relying on distributed and parallel processing of data, information, and knowledge relevant in domains ranging from industrial manufacturing to e-commerce to health care. This book offers a state-of-the-art introduction to multiagent systems, covering the field in both breadth and depth, and treating both theory and practice. It is suitable for classroom use or independent study. This second edition has been completely revised, capturing the tremendous developments in multiagent systems since the first edition appeared in 1999. Sixteen of the book's seventeen chapters were written for this edition; all chapters are by leaders in the field, with each author contributing to the broad base of knowledge and experience on which the book rests. The book covers basic concepts of computational agency from the perspective of both individual agents and agent organizations; communication among agents; coordination among agents; distributed cognition; development and engineering of multiagent systems; and background knowledge in logics and game theory. Each chapter includes references, many illustrations and examples, and exercises of varying degrees of difficulty. The chapters and the overall book are designed to be self-contained and understandable without additional material. Supplemental resources are available on the book's Web site. Contributors Rafael Bordini, Felix Brandt, Amit Chopra, Vincent Conitzer, Virginia Dignum, Jürgen Dix, Ed Durfee, Edith Elkind, Ulle Endriss, Alessandro Farinelli, Shaheen Fatima, Michael Fisher, Nicholas R. Jennings, Kevin Leyton-Brown, Evangelos Markakis, Lin Padgham, Julian Padget, Iyad Rahwan, Talal Rahwan, Alex Rogers, Jordi Sabater-Mir, Yoav Shoham, Munindar P. Singh, Kagan Tumer, Karl Tuyls, Wiebe van der Hoek, Laurent Vercouter, Meritxell Vinyals, Michael Winikoff, Michael Wooldridge, Shlomo Zilberstein

Images of Dutchness

How did painters and their public speak about art in Rembrandt's age? This book about the writings of the painter-poet Samuel van Hoogstraten, one of Rembrandt's pupils, examines a wide variety of themes from painting practice and theory from the Dutch Golden Age. It addresses the contested issue of 'Dutch realism' and its hidden symbolism, as well as Rembrandt's concern with representing emotions in order to involve the spectator. Diverse aspects of imitation and illusion come to the fore, such as the theory behind sketchy or 'rough' brushwork and the active role played by the viewer's imagination. Taking as its starting point discussions in Rembrandt's studio, this unique study provides an ambitious overview of Dutch artists' ideas on painting.

General Catalogue of Printed Books to 1955

This volume originates from an international conference held at Oxford University in 2007. Texts by classical archaeologists, art historians, students of the history of collecting, curators, conservators and artists address objects and themes from antiquity to the present day, ancient Egypt to 20th-century Mexico and contemporary Europe. They explore status, reception and functions of casts as well as hands-on issues, such as the making, trading, display and conservation of plaster casts. A handbook for students, academics, curators and collectors, the text will become a standard work on the role of plaster casts in the history of Western sculpture.
