The Myth of Islamic Tolerance

This collection of essays by some of the world's leading authorities on Islamic social history focuses on the juridical and cultural oppression of non-Muslims in Islamic societies. The authors of these in-depth but accessible articles explode the widely diffused myth, promulgated by Muslim advocacy groups, of a largely tolerant, pluralistic Islam. In fact, the contributors lay bare the oppressive legal superstructure that has treated non-Muslims in Muslim societies as oppressed and humiliated tributaries, and they show the devastating effects of these discriminatory attitudes and practices in both past and contemporary global conflicts. Besides original articles, primary source documents here presented also elucidate how the legally mandated subjugation of non-Muslims under Islamic law stems from the Muslim concept of jihad - the spread of Islam through conquest. Historically, the Arab-Muslim conquerors overran vast territories containing diverse non-Muslim populations. Many of these conquered people surrendered to Muslim domination under a special treaty called dhimma in Arabic. As such these non-Muslim indigenous populations, mainly Christians and Jews, were then classified under Islamic law as dhimmis (meaning "protected"). Although protected status may sound benign, this classification in fact referred to "protection" from the resumption of the jihad against non-Muslims, pending their adherence to a system of legal and financial oppression, as well as social isolation. The authors maintain that underlying this religious caste system is a culturally ingrained contempt for outsiders that still characterizes much of the Islamic world today and is a primary impetus for jihad terrorism. Also discussed is the poll tax (Arabic jizya) levied on non-Muslims; the Islamic critique of the Universal Declaration of Human Rights; the use of jihad ideology by twentieth-century radical Muslim theorists; and other provocative topics usually ignored by Muslim apologists. This hard-hitting and absorbing critique of Islamic teachings and practices regarding non-Muslim minorities exposes a significant human rights scandal that rarely receives any mention either in academic circles or in the mainstream press.

The Place of Tolerance in Islam

Khaled Abou El Fadl, a prominent critic of Islamic puritanism, leads off this lively debate by arguing that Islam is a deeply tolerant religion. Injunctions to violence against nonbelievers stem from misreadings of the Qur'an, he claims, and even jihad, or so-called holy war, has no basis in Qur'anic text or Muslim theology but instead grew out of social and political conflict. Many of Abou El Fadl's respondents think differently. Some contend that his brand of Islam will only appeal to Westerners and students in "liberal divinity schools" and that serious religious dialogue in the Muslim world requires dramatic political reforms. Other respondents argue that theological debates are irrelevant and that our focus should be on Western sabotage of such reforms. Still others argue that calls for Islamic "tolerance" betray the Qur'anic injunction for Muslims to struggle against their oppressors. The debate underscores an enduring challenge posed by religious morality in a pluralistic age: how can we preserve deep religious conviction while participating in what Abou El Fadl calls "a collective enterprise of goodness" that cuts across confessional differences? With contributions from Tariq Ali, Milton Viorst, and John Esposito, and others.

Onward Muslim Soldiers

A finalist for World Magazine's Book of the Year! Scholars, journalists, and even politicians uphold Muslim-ruled medieval Spain—"al-Andalus"—as a multicultural paradise, a place where Muslims, Christians, and Jews lived in harmony. There is only one problem with this widely accepted account: it is a myth. In this groundbreaking book, Northwestern University scholar Darío Fernández-Morera tells the full story of Islamic Spain. The Myth of the Andalusian Paradise shines light on hidden history by drawing on an abundance of primary sources that scholars have ignored, as well as archaeological evidence only recently unearthed. This supposed beacon of peaceful coexistence began, of course, with the Islamic Caliphate's conquest of Spain. Far from a land of religious tolerance, Islamic Spain was marked by religious and therefore cultural repression in all areas of life and the marginalization of Christians and other groups—all this in the service of social control by autocratic rulers and a class of religious authorities. The Myth of the Andalusian Paradise provides a desperately needed reassessment of medieval Spain. As professors, politicians, and pundits continue to celebrate Islamic Spain for its "multiculturalism" and "diversity," Fernández-Morera sets the historical record straight—showing that a politically useful myth is a myth nonetheless.

The Myth of the Andalusian Paradise

The relationship between Islamic law and international human rights law has been the subject of considerable, and heated, debate in recent years. The usual starting point has been to test one system by the standards of the other, asking is Islamic law 'compatible' with international human rights standards, or vice versa. This approach quickly ends in acrimony and accusations of misunderstanding. By overlaying one set of norms on another we overlook the deeply contextual nature of how legal rules operate in a society, and meaningful comparison and discussion is impossible. In this volume, leading experts in Islamic law and international human rights law attempt to deepen the understanding of human rights and Islam, paving the way for a more meaningful debate. Focusing on central areas of controversy, such as freedom of speech and religion, gender equality, and minority rights, the authors examine the contextual nature of how Islamic law and international human rights law are legitimately formed, interpreted, and applied within a community. They examine how these fundamental interests are recognized and protected within the law, and what restrictions are placed on the freedoms associated with them. By examining how each system recognizes and limits fundamental freedoms, this volume clears the ground for exploring the relationship between Islamic law and international human rights law on a sounder footing. In doing so it offers a challenging and distinctive contribution to the literature on the subject, and will be an invaluable reference for students, academics, and policy-makers engaged in the legal and religious debates surrounding Islam and the West.

Islamic Law and International Human Rights Law

The attacks on 9/11 were part of a 1,400 year Islamic jihad against the non-Islamic world. Since 9/11 there have been over 10,000 additional violent jihads. In addition, there have been thousands of "soft jihads" where Muslims have attempted to replace Western culture with that of Islam. The jihadists are motivated by the core principles of Islam with the goal of converting, killing, or subjugating all non-Muslims. Unfortunately, too many non-Muslims have reverted to a pre-9/11 mentality and do not see the necessity of an offensive war in Iraq or Afghanistan, or of a defensive war at home. Non-Muslims are going to have to decide to fight for their cultures, freedoms, and values or they are going to lose them. Dr. Crandall has been teaching sociology at the college and university level for over 30 years. The focus of some of his other books have been in the area of gerontology, the physiological and psychological consequences of running, and Inuit art. The attacks on 9/11 changed the focus of his research, and he has spent the last seven years researching and writing this book.

Islam

Christian-Muslim Relations, a Bibliographical History 1 (CMR1) is the first part of a general history of relations between the faiths from the seventh century to the present. It covers the period from 600 to 1500, when encounters took place through the extended Mediterranean basin and are recorded in Syriac, Arabic, Greek, Latin and other languages. It comprises introductory essays on the treatment of Christians in the Qur'an, Qur'an commentaries, biographies of the Prophet, Hadith and Sunni law, and of Muslims in canon law, and the main body of more than two hundred detailed entries on all the works recorded, whether surviving or lost. These entries provide biographical details of the authors where known, descriptions and assessments of the works themselves, and complete accounts of manuscripts, editions, translations and studies. The result of collaboration between leading scholars, CMR1 is intended as a basic tool for research in Christian-Muslim relations.

Christian-Muslim Relations

Christian-Muslim Relations, a Bibliographical History 1 (CMR1) is a history of all the known works on Christian-Muslim relations from 600 to 1500. It comprises introductory essays and over 200 detailed entries containing descriptions, assessments and comprehensive bibliographical details of individual works.

Christian-Muslim Relations. A Bibliographical History. Volume 1 (600-900)

The American Journal of Islamic Social Sciences (AJISS) is an interdisciplinary journal that publishes a wide variety of scholarly research on all facets of Islam and the Muslim world: anthropology, economics, history, philosophy and metaphysics, politics, psychology, religious law, and traditional Islam. Submissions are subject to a blind peer review process.

American Journal of Islamic Social Sciences 23:2

Examines the treatment of non-Arab people under the rule of the Muslims and collects historical documents related to this subject

The Dhimmi

Despite the fact that many researchers have focused on Hamas' armed resistance activities, surprisingly few have theorised about the political choices and dilemmas that Hamas has faced in the context of the changing overarching conflict between Israelis and Palestinians. This study aims to show, theoretically, how context-dependent Hamas is when formulating its resistance and Demo-Islamic practise and that this occurs in interrelations with key actors of the conflict. This study also presents important new empirical data that, in part, also challenges previous research. Hamas is one of the very few Islamist organisations that has reached a governance position via democratic and fair elections. Thus, Hamas can serve as a case study of how Islamist may act in (quasi)democratic surroundings. At the same time, Hamas is a key actor in the overarching conflict, which has several unique characteristics. Hamas' armed resistance is described as an instrument for the Jihad against the Israeli occupation. However, the Dawa work at the grassroots level can also be seen as a resistance practice that can be identified as constructive resistance. The internal discussion in Hamas as to what strategies to apply, as will be shown, are also formed and impacted by various interrelations with external actors of the conflict. The Palestinian public, in particular, is a key actor that influences Hamas in various ways, although Fatah, PLO, Israel and other external actors also have their specific roles to play.

Between Resistance, Sharia Law, and Demo-Islamic Politics

Weaves together international and comparative law, religion, international relations, comparative politics, and legal history to illuminate and address the theoretical and practical dimensions of a significant human rights problem.

Religious Liberty in Western and Islamic Law

"This book describes the practices and propaganda that are preparing the fall of America and guaranteeing that nothing will be done to stop it. Other books focus on one aspect of the problem; this book tells you the whole story. Other books give you rants and unsupported claims. This book presents documented facts but also tells the victims' stories, bringing you face to face with the human costs.

When presenting misguided practices and anti-American ideology, the book lets the perpetrators hang themselves in their own words."--back cover.

While America Sleeps

"The courageous Robert Spencer busts myths and tells truths about jihadists that no one else will tell." —MICHELLE MALKIN While many choose to simply blame the West for provoking terrorists, Robert Spencer's new book *The Politically Incorrect Guide to Islam (and the Crusades)*TM reveals why it is time to ignore political correctness and identify the enemy - if we hope to ever defeat them. In a fast-paced, politically incorrect tour of Islamic teachings and Crusades history, Spencer reveals the roots of Islamic violence and hatred. Spencer refutes the myths popularized by left-wing academics and Islamic apologists who justify their political agendas with contrived historical "facts." Exposing myth after myth, *The Politically Incorrect Guide to Islam (and the Crusades)*TM tackles Islam's institutionalized mistreatment of non-Muslims, the stifling effect Islam has on science and free inquiry, the ghastly lure of Islam's X-rated Paradise for suicide bombers and jihad terrorists, the brutal Islamic conquests of the Christian lands of the Middle East and North Africa, and more. In *The Politically Incorrect Guide to Islam (and the Crusades)*TM, you will learn: How Muhammad did not teach "peace and tolerance"—instead he led armies and ordered the assassination of his enemies Why American Muslim groups and left-wing academics are engaged in a huge cover-up of Islamic doctrine and history How today's jihad terrorists following the Qur'an's command to make war on Jews and Christians have the same motives and goals as the Muslims who fought the Crusaders Why the Crusades were not acts of unprovoked aggression by Europe against the Islamic world, but a delayed response to centuries of Muslim aggression What must be done today—from reading the Qur'an to reclassifying Muslim organizations—in order to defeat jihad terrorists

The Politically Incorrect Guide to Islam (And the Crusades)

The increasingly transnational nature of terrorist activities compels the international community to strengthen the legal framework in which counter-terrorism activities should occur at every level, including that of intergovernmental organizations. This unique, timely, and carefully researched monograph examines one such important yet generally under-researched and poorly understood intergovernmental organization, the Organization of Islamic Cooperation ('OIC', formerly the Organization of the Islamic Conference). In particular, it analyses in depth its institutional counter-terrorism law-making practice, and the relationship between resultant OIC law and comparable UN norms in furtherance of UN Global Counter-Terrorism Strategy goals. Furthermore, it explores two common (mis)assumptions regarding the OIC, namely whether its internal institutional weaknesses mean that its law-making practice is inconsequential at the intergovernmental level; and whether its self-declared Islamic objectives and nature are irrelevant to its institutional practice or are instead reflected within OIC law. Where significant normative tensions are discerned between OIC law and UN law, the monograph explores not only whether these may be explicable, at least in part, by the OIC's Islamic nature, and objectives, but also whether their corresponding institutional legal orders are conflicting or cooperative in nature, and the resultant implications of these findings for international counter-terrorism law- and policy-making. This monograph is expected to appeal especially to national and intergovernmental counter-terrorism practitioners and policy-makers, as well as to scholars concerned with the interaction between international and Islamic law norms. From the Foreword by Professor Ben Saul, The University of Sydney Dr Samuels book must be commended as an original and insightful contribution to international legal scholarship on the OIC, Islamic law, international law, and counter-terrorism. It fills significant gaps in legal knowledge about the vast investment of international and regional effort that has gone into the global counter-terrorism enterprise over many decades, and which accelerated markedly after 9/11. The scope of the book is ambitious, its subject matter is complex, and its sources are many and diverse. Dr Samuel has deployed an appropriate theoretical and empirical methodology, harnessed an intricate knowledge of the field, and brought a balanced judgement to bear, to bring these issues to life.

The OIC, the UN, and Counter-Terrorism Law-Making

Analysing the rules governing the treatment of foreigners in Islam and situating them in their historical, political, and legal context, this book sets out a new framework for understanding these rules as part of a wider problem of governing through law amidst pluralism.

Religious Pluralism and Islamic Law

Alexis convincingly examines the crisis in education from a Christian perspective. (Social Issues)

In the Name of Education

In late July 2011, Norway was struck by the worst terror attacks in its history. In a fertilizer-bomb attack on Government Headquarters in Oslo and a one-hour-long shooting spree at the Labour Party Youth Camp at Utøya, seventy-seven people, mostly teenagers, were killed by Anders Behring Breivik. By targeting young future social democratic leaders, his actions were meant to lead to the downfall of Europe's purportedly multiculturalist elites, thus removing an obstacle to his plans for an ethnic cleansing of Muslims from Europe. In this highly original work, leading Norwegian social anthropologist Sindre Bangstad reveals how Breivik's beliefs were not simply the result of a deranged mind, but rather they are the result of the political mainstreaming of pernicious racist and Islamophobic discourses. These ideas, currently gaining common currency, threaten equal rights to dignity, citizenship and democratic participation for minorities throughout contemporary Europe. An authoritative account of the Norwegian terror attacks and the neo-racist discourse that motivated them.

Islam

This volume analyzes a century of intellectual debates, political ideologies, and literary media in order to track the emergence, spread and decline of liberal thought as a response to both authoritarian rule and Westernization in the Eastern Mediterranean.

Anders Breivik and the Rise of Islamophobia

Since after the Second World War, the crime of aggression is – along with genocide, crimes against humanity and war crimes – a “core crime” under international law. However, despite a formal recognition of aggression as a matter of international criminal law and the reinforcement of the international legal regulation of the use of force by States, numerous international armed conflicts occurred but no one was ever prosecuted for aggression since 1949. This book comprehensively analyses the historical development of the criminalisation of aggression, scrutinises in a detailed manner the relevant jurisprudence of the Nuremberg and Tokyo Tribunals as well as of the Nuremberg follow-up trials, and makes proposals for a more successful prosecution for aggression in the future. In identifying customary international law on the subject, the volume draws upon a wealth of applicable sources of national criminal law and puts forward a useful classification of States’ legislative approaches towards the criminalisation of aggression at the national level. It also offers a detailed analysis of the current international legal regulation of the use of force and of the Rome Statute’s substantive and procedural provisions pertaining to the exercise of the International Criminal Court’s jurisdiction with respect to the crime of aggression, after 1 January 2017.

The Crime of Aggression in International Criminal Law

Are Muslims Distinctive? represents the first major scientific effort to assess how Muslims and non-Muslims differ--and do not differ--in the contemporary world. Using rigorous methods and data drawn from around the globe, M. Steven Fish reveals that in some areas Muslims and non-Muslims differ less than is commonly imagined. Muslims are not inclined to favor the fusion of religious and political authority or especially prone to mass political violence. Yet there are differences: Gender inequality is more severe among Muslims, Muslims are unusually averse to homosexuality and other controversial behaviors, and democracy is rare in the Muslim world. Other areas of divergence bear the marks of a Muslim advantage: Homicide rates and class-based inequities are less severe among Muslims than non-Muslims. Fish's findings have vital implications for human welfare, interfaith understanding, and international relations.

Shared Identities

Just Wars, Holy Wars, and Jihads explores the development of Christian, Muslim, and Jewish thinking on just war, holy war, and jihad over the past fourteen centuries.

Are Muslims Distinctive?

This book is about the transformation of Europe into "Eurabia," a cultural and political appendage of the Arab/Muslim world. Eurabia is fundamentally anti-Christian, anti-Western, anti-American, and antisemitic. The institution responsible for this transformation, and that continues to propagate its ideological message, is the Euro-Arab Dialogue, developed by European and Arab politicians and intellectuals over the past thirty years.--From publisher description.

Just Wars, Holy Wars, and Jihads

This book is a comparative study of terrorism and counterterrorism in Saudi Arabia and Indonesia. It explores the history and contemporary developments of terrorism, especially Islamist terrorism, in these two Sunni Muslim-majority countries. In doing so, it analyzes the strengths and weaknesses of governments' policies, strategies, and models of counterterrorism, including terrorist rehabilitation and reintegration programs. In addition, the book also documents the opinions of Saudis and Indonesians to find societal voices on effective ways of combating violent extremism and discusses Saudi-Indonesian cooperation on counterterrorism, defense, and security issues. The book suggests that although particular Islamic texts, teachings, and discourses might influence radical behaviors and practices of some Muslim individuals and groupings, terrorism is beyond ideological, religious, and doctrinal issues. Therefore, multiple methods and strategies are needed to combat radicalism and create sustainable peace in society. The work will be beneficial for both academic and non-academic communities, particularly students of conflict, violence, peacebuilding, and religious studies.

Eurabia-paperback

In the United Nations, on university campuses, and among a growing number of our most prestigious Western newspapers, the historical record has been rewritten so thoroughly that Israel is seen as the worst of the oppressive Western occupiers of the Third World. So successful has this propaganda campaign been that Palestinian spinmeisters and their apologists have effectively declared the Israelis, a people living in the shadow of the Holocaust, to be "Nazis." How could this happen? How did unacceptable anti-Semitism morph into justifiable anti-Zionism, and odious Jew-hatred turn into a politically correct Israel-hatred? In *History Upside Down*, David Meir-Levi exposes the ideological DNA of Palestinian nationalism and its ludicrous "alternative" histories, revealing how Nazi fascism gave the Arab world's amorphous hatred of the Jews an intellectual structure and how Soviet communism masked its genocidal intentions with the mantle of national liberation. Meir-Levi then explodes the cornerstone myths that the Palestinian movement created--myths that rationalize and celebrate decades of unrelenting terror and genocidal ambitions, turning the history of the Middle East upside down and inside out, making the victim the aggressor and the aggressor the victim. *History Upside Down* is the first wave in a counterattack against this Arab war on history. It rejects the idea that the basic situation in the Middle East has changed since the United Nations first established the Jewish state and the Palestinian state that would have stood alongside it. Sadly, argues Meir-Levi, the issue in the Middle East is today what it has been since the Muslim invasion in the seventh century: the Arabs' hatred of the Jews.

Terrorism and Counter-terrorism in Saudi Arabia and Indonesia

This book articulates a deeper understanding of the phenomenon of Jew hatred as a metaphysical aspect of the human soul. Proceeding from the Jewish thinking that the anti-Semites oppose, David Patterson argues that anti-Semitism arises from the most ancient of temptations, the temptation to be as God, and thus to flee from an absolute accountability to and for the other human being.

History Upside Down

Mark Walia's *A Tale of Two Cultures: Islam and the West* lays out the contrasts between the Western and Islamic worlds with remarkable clarity and documentation, and concludes there are nearly irreconcilable differences between these worlds. keywords: Islam, Muslim, Religion, Christianity, War, Culture, Travel, Sharia, Hate, Mohammed

Anti-Semitism and Its Metaphysical Origins

This major new Handbook synthesises more than two decades of scholarly research, and provides a comprehensive overview of the field of terrorism studies. The content of the Handbook is based on

the responses to a questionnaire by nearly 100 experts from more than 20 countries as well as the specific expertise and experience of the volume editor and the various contributors. Together, they guide the reader through the voluminous literature on terrorism, and propose a new consensus definition of terrorism, based on an extensive review of existing conceptualisations. The work also features a large collection of typologies and surveys a wide range of theories of terrorism. Additional chapters survey terrorist databases and provide a guide to available resources on terrorism in libraries and on the Internet. It also includes the most comprehensive World Directory of Extremist, Terrorist and other Organizations associated with Guerrilla Warfare, Political Violence, Protest and Organized- and Cyber-Crime. The Routledge Handbook of Terrorism Research will be an essential work of reference for students and researchers of terrorism and political violence, security studies, criminology, political science and international relations, and of great interest to policymakers and professionals in the field of counter-terrorism.

A Tale of Two Cultures

Today, and historically, religions often seem to be intolerant, narrow-minded, and zealous. But the record is not so one-sided. In *Religious Tolerance in World Religions*, numerous scholars offer perspectives on the "what" and "why" traditions of tolerance in world religions, beginning with the pre-Christian West, Greco-Roman paganism, and ancient Israelite Monotheism and moving into modern religions such as Christianity, Judaism, Islam, Buddhism, and Hinduism. By tolerance the authors mean "the capacity to live with religious difference, and by toleration, the theory that permits a majority religion to accommodate the presence of a minority religion." The volume is introduced with a summary of a recent survey that sought to identify the capacity of religions to tolerate one another in theory and in practice. Eleven religious communities in seven nations were polled on questions that ranged from equality of religious practitioners to consequences of disobedience. The essays frame the provocative analysis of how a religious system in its political statement produces categories of tolerance that can be explained in that system's logical context. Past and present beliefs, practices, and definitions of social order are examined in terms of how they support tolerance for other religious groups as a matter of public policy. *Religious Tolerance in World Religions* focuses attention on the attitude "that the 'infidel' or non-believer may be accorded an honorable position within the social order defined by Islam or Christianity or Judaism or Buddhism or Hinduism, and so on." It is a timely reference for colleges and universities and for makers of public policy.

The Routledge Handbook of Terrorism Research

America is at a crossroads, and the road we elect to travel will either restore the spirit of America or continue to weaken our country forever. Ordinary American citizens must make fundamental decisions. We have been warned and though the warnings have been muted by media sources and special interest groups, they are growing louder. Voices of genuine concern come from within the United States and from abroad. We Americans must listen to and take seriously what we are being told. We need to educate ourselves about American history; real, unbiased history. We need to know the Constitution, the very cornerstone of our nation and we need to hold our politicians and government leaders accountable. Americans must once again stand united to defend our beloved country and our very way of life.

Religious Tolerance in World Religions

Did Muslims and Jews in the Middle Ages cohabit in a peaceful "interfaith utopia"? Or were Jews under Muslim rule persecuted, much as they were in Christian lands? Rejecting both polemically charged ideas as myths, Mark Cohen offers a systematic comparison of Jewish life in medieval Islam and Christendom--and the first in-depth explanation of why medieval Islamic-Jewish relations, though not utopic, were less confrontational and violent than those between Christians and Jews in the West. *Under Crescent and Cross* has been translated into Turkish, Hebrew, German, Arabic, French, and Spanish, and its historic message continues to be relevant across continents and time. This updated edition, which contains an important new introduction and afterword by the author, serves as a great companion to the original.

America: Our Sacred Honor

Encyclopedia of the Peoples of Africa and the Middle East is a two-volume A-to-Z reference to the history and culture of the peoples of Africa and the Middle East.

The Muslim World Book Review

This volume is a monumental collection of definitions, conceptual frameworks, paradigmatic formulations, and bibliographic sources, which is now being revised and updated as a resource for the expanding community of researchers on the subject of terrorism.

Under Crescent and Cross

Argues that modern Middle Eastern terrorism stems from aborted efforts by Western intelligence agencies to co-opt political Islam as an opposing force against other global ideologies deemed more politically dangerous at the time.

Encyclopedia of the Peoples of Africa and the Middle East

Drawing upon Jewish categories of thought, this book suggests a way of thinking that might help prevent genocide.
