Tracing Your Family History on the Internet

Updated edition: A genealogist's practical guide to researching family history online while avoiding inaccurate, incomplete, or misleading information. The internet has revolutionized family history research—every day new records and resources are placed online and new methods of sharing research and communicating become available. Never before has it been so easy to research family history and to gain a better understanding of who we are and where we came from. But, as British genealogist Chris Paton demonstrates in this second edition of his straightforward, practical guide, while the internet is an enormous asset, it is also something to be wary of. For this edition, Paton has checked and updated all the links and other sources, added new ones, written a new introduction, and substantially expanded the social networking section. As always, researchers need to take a cautious approach to the information they acquire on the web. Where did the original material come from? Has it been accurately reproduced? Why was it put online? What has been left out and what is still to come? As he leads researchers through the multitude of resources that are now accessible online with an emphasis

on UK and Ireland sites, Chris Paton helps to answer these questions. He shows what the internet can and cannot do—and he warns against the various traps researchers can fall into along the way.

A family tree helps them keep track of who was who, other people's names. With a family tree, when Grandpa talks about an Uncle, your kids will understand exactly who he means and where he fits in the family story. Features: Story pages to write about family experiences past and present Blank family trees for both parents Genealogy pages with room to write details of the family Source information pages Timeline of events This 8.5 x 11" size journal is large enough and provides enough room to clearly write about the family and its history. You don't have to create an extravagant or complicated family tree for it to be of value to the kids. This simple family tree notebook and journals works wonders to help them make the right connections. You could tell stories about family members who died when the kids were young or even before they were born, but these stories become more meaningful when they can be placed in the correct association. ADD TO CART We have a wide variety of journals, planners and notebooks to suit all ages and needs. Why not get one for each family member especially ones who are about to start their own families. Our Family Origins

Using the three steps explained in the 1-2-3 Family Tree, anyone can master the basics of family history research. Step One explains how to gather information about yourself and your family using "home sources" such as photo albums, school records, letters, birth certificates, and much more. Handy worksheets are included so readers have an easy place to take note of any information they find. Step Two shows how to organize and record discoveries using Family Tree Maker version 16. And finally, Step Three explains how to search for additional records and resources.
