operations management, and productivity, and especially explains the important ...

Introduction

Production is the creation of goods and services Operations management (OM) is the set of activities that Create value in the form of goods and services by transforming inputs into outputs

OM is one of three major functions of any organization, we want to study how people organize themselves for productive enterprise

Basic Management Functions

Table 1.2 Ten Strategic Operations Management Decisions

1. Design of goods and services - Defines what is required of operations - Product design determines quality, sustainability and

Process and capacity design - How is a good or service produced? - Commits management to specific technology, quality

Layout strategy - Integrate capacity needs, personnel levels

Supply chain management - Integrate supply chain into the firm's strategy - Determine what is to be purchased from whom, and

Scheduling - Determine and implement intermediate and short

Figure 1.4 Significant Events in Operations Management

Productivity is the ratio of outputs (goods and services) divided by the inputs (resources such as labor and capital)

1. Basic education appropriate for the labor force 2. Diet of the labor force 3. Social overhead that makes labor available

Challenges facing operations managers: • Develop and produce safe, high-quality green products • Train, retrain, and motivate employees in a safe workplace

Stakeholders
