

Are Automatic Transmissions Slower Than Manual

[#automatic vs manual speed](#) [#are automatics slower](#) [#manual transmission performance](#) [#car transmission comparison](#) [#automatic gearbox efficiency](#)

The debate about whether automatic transmissions are slower than manual gearboxes has evolved significantly. While historically manuals often held an edge in raw acceleration and driver control, modern automatic transmissions, particularly those with dual-clutch technology, can now shift faster and more precisely, often outperforming manuals in terms of pure speed and lap times. The answer largely depends on the specific vehicle, its technology, and the driver's skill.
