The Chora of Metaponto 7

The seventh volume in the Institute of Classical Archaeology's series on the rural countryside (chora) of Metaponto is a study of the Greek sanctuary at Pantanello. The site is the first Greek rural sanctuary in southern Italy that has been fully excavated and exhaustively documented. Its evidence—a massive array of distinctive structural remains and 30,000-plus artifacts and ecofacts—offers unparalleled insights into the development of extra-urban cults in Magna Graecia from the seventh to the fourth centuries BC and the initiation rites that took place within the cults. Of particular interest are the analyses of the well-preserved botanical and faunal material, which present the fullest record yet of Greek rural sacrificial offerings, crops, and the natural environment of southern Italy and the Greek world. Excavations from 1974 to 2008 revealed three major phases of the sanctuary, ranging from the Archaic to Early Hellenistic periods. The structures include a natural spring as the earliest locus of the cult, an artificial stream (collecting basin) for the spring's outflow, Archaic and fourth-century BC structures for ritual dining and other cult activities, tantalizing evidence of a Late Archaic Doric temple atop the hill, and a farmhouse and tile factory that postdate the sanctuary's destruction. The extensive catalogs of material and special studies provide an invaluable opportunity to study the development of Greek material culture between the seventh and third centuries BC, with particular emphasis on votive pottery and figurative terracotta plaques.

Bronze Monsters and the Cultures of Wonder

The eighth and seventh centuries BCE were a time of flourishing exchange between the Mediterranean and the Near East. One of the period's key imports to the Hellenic and Italic worlds was the image of the griffin, a mythical monster that usually possesses the body of a lion and the head of an eagle. In particular, bronze cauldrons bore griffin protomes—figurative attachments showing the neck and head of the beast. Crafted in fine detail, the protomes were made to appear full of vigor, transfixing viewers. *Bronze Monsters and the Cultures of Wonder* takes griffin cauldrons as case studies in the shifting material and visual universes of pre-classical antiquity, arguing that they were perceived as lifelike monsters that introduced the illusion of verisimilitude to Mediterranean arts. The objects were placed in the tombs of the wealthy (Italy, Cyprus) and in sanctuaries (Greece), creating fantastical environments akin to later cabinets of curiosities. Yet griffin cauldrons were accessible only to elites, ensuring that the new experience of visibility they fostered was itself a symbol of status. Focusing on the sensory encounter of this new visibility, Nassos Papalexandrou shows how spaces made wondrous fostered novel subjectivities and social distinctions.

The Poseidonian Chora

In the sixth century BC the Greeks established the city of Poseidonia in the Sele Plain of Campania, Italy, in the area settled by an indigenous Italic population. Mikels Skele presents evidence from the Capodifiume survey of the region which provides insights into the nature of the interaction between indigenous and colonising populations.

Time and Space in Ancient Myth, Religion and Culture

From Homer to Sophocles and Greek Middle Comedy, and from Plato and Protagoras to Ovid, this volume features a panoramic and cross-generic overview of the diverse handling and ad hoc elaboration of the overarching literary notions of "time" and "space". The twenty-one contributions of this volume written by an international group of esteemed scholars provide an equal number of hermeneutic approaches to individual, distinct aspects of Greek and Latin literature. The volume is purposely designed not as a linear display of knowledge, but rather as an anthology of select paradigms that aim to demonstrate the multidimensional function and multifaceted role of the twin notions of "time" and "space" throughout ancient Greek and Latin literary texts. The volume opens with analyses of conspicuous cases from epic poetry, proceeds with examples from drama (tragedy and comedy), and concludes with diverse instances of chronotopes (empirical, imaginary, and even shifting ones), in various literary genres. The volume is of greatest relevance since it meets the cultural and theoretical trends of today's Classics. It therefore will attract not only the interest of specialised Classicists but it is also intended for a wider general readership.

Potters at Work in Ancient Corinth

An unparalleled assemblage of Archaic black-figure painted pinakes (plaques) was uncovered near Penteskouphia, a village west of ancient Corinth, over a century ago. The pinakes—represented by over 1,200 fragments—and their depictions of gods, warriors, animals, and the potters themselves, provide a uniquely rich source of information about Greek art, technology, and society. In this volume, the findspot of the pinakes is identified in a contribution by Ioulia Tzonou and James Herbst, and the assemblage as a whole is fully contextualized within the Archaic world. Then, by focusing specifically on the images of potters at work, the author illuminates the relationship between Corinthian and Athenian art, the technology used in ancient pottery production, and religious anxiety in the 6th century B.C. The first comprehensive register of all known Penteskouphia pinakes complements the well-illustrated discussion.

The Grand Strategy of Classical Sparta

DIV” “Powerfully illustrates . . . that this regime determined the character and limits of Sparta’s domestic and foreign policy.” (Susan D. Collins, *The Review of Politics*) More than 2500 years ago a confederation of small Greek city-states defeated the invading armies of Persia, the most powerful empire in the world. In this meticulously researched study, historian Paul Rahe argues that Sparta was responsible for the initial establishment of the Hellenic defensive coalition and was the most essential player in its ultimate victory. Drawing from an impressive range of ancient sources, including Herodotus and Plutarch, the author veers from the traditional Atheno-centric view of the Greco-Persian Wars to examine from a Spartan perspective the strategy that halted the Persian juggernaut. Rahe provides a fascinating, detailed picture of life in Sparta circa 480 B.C., revealing how the Spartans’ form of government and the regimen to which they subjected themselves instilled within them the pride, confidence, discipline, and discernment necessary to forge an alliance that would stand firm against a great empire, driven by religious fervor, that held sway over two-fifths of the human race. “[Rahe] has an excellent eye for military logistics . . . crisp and persuasive.” —*The Wall Street Journal* “Intensely well-researched and well-balanced.” —Steve Donoghue, *The National* “Masterful.” —Joseph Bottum, *Books and Culture* “A serious scholarly endeavor.” —Eric W. Robinson, *American Historical Review* “This brilliant revisionist study . . . reminds us how Sparta . . . saved Western freedom from the Persian aggression—and did so because of its innate courage, political stability, and underappreciated genius.” —Victor Davis Hanson, author of *The Other Greeks* “Full of keen understandings that help explain Spartan policy, diplomacy, and strategy.” —Donald Kagan, author of *The Peloponnesian War* /DIV

Greece

Combining archaeological and textual evidence the author suggests that most of the 8th Century settlements that would become the city-states of classical Greece were defined as much by the boundaries of civilised' space as by their urban centres.

Cults, Territory, and the Origins of the Greek City-State

This text is presented in English and German. This book contains 19 articles dealing with various aspects of the Greek goddess Artemis and the Roman goddess Diana. The themes presented in the volume deal with the Near Eastern equivalents of Artemis, the Bronze Age Linear B testimonies, and Artemis in Homer and in the Greek tragedies. Sanctuaries and cult, and regional aspects are also dealt with - encompassing Cyprus, the Black Sea region, Greece and Italy. Pedimental sculpture, mosaics and sculpture form the basis of investigations of the iconography of the Roman Diana; the role of the cult of Diana in a dynastic setting is also examined. There is a single section that deals with the reception of the iconography of the Ephesian Artemis during the Renaissance and later periods.

From Artemis to Diana

Aquamorphia: Falling for Water is a mythological, psychological and elemental poetic history of water in three deeply entrancing parts. Each section of this exciting and tumultuous water narrative takes the reader for a ride on different streams of intoxicating, daring and at times playful water worlds. From ancient Greek creation myths to the Australian beach, *Aquamorphia* moves symphonically, praising the maternal and generative qualities of fluidity since the Big Bang, or splitting of the Cosmic Egg. The verse is afloat with metaphors that flesh out the minutiae of the aquatic landscapes that sustain life.

Le Sanctuaire Grec

A systematic survey of archaic Greek society and culture which introduces the reader to a wide range of new approaches to the period. The first comprehensive and accessible survey of developments in the study of archaic Greece Places Greek society of c.750-480 BCE in its chronological and geographical context Gives equal emphasis to established topics such as tyranny and political reform and newer subjects like gender and ethnicity Combines accounts of historical developments with regional surveys of archaeological evidence and in-depth treatments of selected themes Explores the impact of Eastern and other non-Greek cultures in the development of Greece Uses archaeological and literary evidence to reconstruct broad patterns of social and cultural development

Aquamorphia

This book is a comprehensive introduction to ancient Athens, its topography, monuments, inhabitants, cultural institutions, religious rituals, and politics. Drawing from the newest scholarship on the city, this

volume examines how the city was planned, how it functioned, and how it was transformed from a democratic polis into a Roman urbs.

I dosmoi pilii a Poseidon

Time, Tradition and Society in Greek Archaeology is an innovative volume which examines the relevance of archaeological theory to classical archaeology. It offers a wideranging overview of classical archaeology, from the Bronze Age to the Classical period and from mainland Greece to Cyprus. Within this framework Spencer examines many of the issues which have become important in the study of archaeology in recent years - time, the 'past', gender, ideology, social structure and group identity. The papers in this collection cover such diverse topics as the rural landscape, classical art and scientific methodologies. Over the last century the study of classical archaeology has been orthodox and static. The essays in this collection examine it in the light of current theoretical archaeology and anthropology, making it more relevant and valuable to the study of archaeology in the 1990s. This is a diverse and topical collection, of great value to classicists, ancient historians, anthropologists and everyone interested in new approaches to archaeology.

The Cambridge Companion to Ancient Athens

Galen, príncipe dos Syrenas, vasculha a terra procurando uma garota capaz de se comunicar com os peixes e salvar seu reino. Quando eles se encontram, Emma parece ter o dom que Galen procura. Cabe ao príncipe convencê-la a enfrentar sua real natureza e nada pode impedi-lo de alcançar seu objetivo.

Handbook for Travellers in Asia Minor, Transcaucasia, Persia, Etc

Late Classical and Early Hellenistic Corinth, 338-196 B.C. challenges the perception that the Macedonians' advent and continued presence in Corinth amounted to a loss of significance and autonomy. Immediately after Chaironeia, Philip II and his son Alexander III established close relations with Corinth and certain leading citizens on the basis of goodwill (eunoia). Mutual benefits and respect characterized their discourse throughout the remainder of the early Hellenistic period; this was neither a period of domination or decline, nor one in which the Macedonians deprived Corinthians of their autonomy. Instead, Corinth flourished while the Macedonians possessed the city. It was the site of a vast building program, much of which must be construed as the direct result of Macedonian patronage, evidence suggests strongly that those Corinthians who supported the Macedonians enjoyed great prosperity under them. Corinth's strategic location made it an integral part of the Macedonians' strategy to establish and maintain hegemony over the mainland Greek peninsula after Philip II's victory at Chaironeia. The Macedonian dynasts and kings who later possessed Corinth also valued its strategic position, and they regarded it as an essential component in their efforts to claim legitimacy due to its association with the Argead kings, Philip II and Alexander III the Great, and the League of Corinth they established. This study explicates the nature of the relationship between Corinthians and Macedonians that developed in the aftermath of Chaironeia, through the defeat at the battle of Kynoskephalai and

the declaration of Greek Freedom at Isthmia in 196 B.C. Late Classical and Early Hellenistic Corinth is not simply the history of a single polis; it draws upon the extant literary, epigraphic, prosopographic, topographic, numismatic, architectural, and archaeological evidence to place Corinth within broader Hellenistic world. This volume, the full first treatment of the city in this period, contributes significantly to the growing body of scholarly literature focusing on the Hellenistic world and is a crucial resource for specialists in late Classical and early Hellenistic history.

The Northern Black Sea in Antiquity brings together the latest research on an important region of the ancient Mediterranean world.

Time, Tradition and Society in Greek Archaeology

Theatre/Archaeology is a provocative challenge to disciplinary practice and intellectual boundaries. It brings together radical proposals in both archaeological and performance theory to generate a startlingly original and intriguing methodological framework.

Arkadia

Twenty-five papers presented at the December 1996 symposium held in Athens to celebrate the 100th anniversary of the American School of Classical Studies excavations at ancient Corinth. The papers are intended to illustrate the range in subject matter of research currently being undertaken by scholars of ancient Corinth, and their inclusion in one volume will serve as a useful reference work for nonspecialists. Each of the topics (which vary widely from Corinthian geology to religious practices to Byzantine pottery) is presented by the acknowledged expert in that area. The book includes a full general bibliography of articles and volumes concerning material excavated at Corinth. As a summary of one hundred years' research it will be useful to generations of scholars to come.

Art and the Early Greek State

Completely updated and revised for 1999, this popular guide book provides the routes and schedules that make traveling through Greece by ferry from island to island an ideal vacation. Includes news of how to handle tough new ticketing regulations and covers every inhabited Greek island as well as Athens.

Linear B, a 1984 Survey

Artemis is a literary, iconographic, and archaeological study of the ancient Greek goddess of the hunt, who presided over the transitions and mediations between the wild and the civilized, youth and maturity, life and death. Beginning with a study of the early origins of Artemis and her cult in the Bronze and Archaic Ages, Budin explores the goddess' persona and her role in the lives of her worshippers. This volume examines her birth and childhood, her place in the divine family, her virginity, and her associations with those places where the wilds become the "cities of just men." The focus then turns to Artemis' role in the lives of children and women, particularly how she helps them navigate the transition to adulthood and, perhaps too often, death. Budin goes on to reconsider some of the more harrowing aspects of Artemis' mythology, such as plague and bloodshed, while also examining some of her kinder, oft overlooked associations. Finally, the role of Artemis in the Renaissance and modern society is addressed, from the on-going fascination with the "breasts" on the statue of Artemis of Ephesos to the Artemisian aspects of Katniss Everdeen. Written in an accessible style, Artemis is a crucial resource for students not only of Greek myth, religion and cult, but also those seeking to understand the lives and roles of girls and women in ancient Greece, as this goddess presided over their significant milestones, from maiden to wife to mother.

Poseidon

G. J. Oliver provides a new assessment of the economic history of Athens in the Hellenistic era, when the city was no longer an imperial power and struggled to maintain its territory, both at home in Attica and overseas in the cleruchies. Oliver assesses how political and military change affected the fragile economies of the Athenian polis. Warfare in Attica required the Athenians to protect their domestic grain supply and seek out those beyond the city to provide commodities from abroad. Oliver stresses

the economic importance of benefaction and civic honours, and shows how much the citizens of Athens contributed to the defence and finances of their city.

Epoché

The need for a "new" book on Greek colonization arose to analyse this phenomenon as a long-term process in a wide geographic area. The events related to individual cities and regions, although geographically very distant from each other, are linked through an articulated network of material and immaterial relations and have to be considered as part of a broader mobility process in a Mediterranean perspective. The intention of "Comparing Greek Colonies" is to bring geographically and culturally distant regions such as Southern Italy/Sicily and the Black Sea, closer together, not merely to find "similarities and differences"

The Metal Objects (1952-1989)

Using deposits recently excavated from the Panayia Field, this volume substantially revises the absolute chronology of Corinthian Hellenistic pottery as established by G. Roger Edwards in *Corinth VII.3* (1975). This new research, based on quantitative analysis of over 50 deposits, demonstrates that the date range for most fine-ware shapes should be lowered by 50-100 years. Contrary to previous assumptions, it is now possible to argue that local ceramic production continued in Corinth during the interim period between the destruction of the city in 146 B.C. and when it was refounded as a Roman colony in 44 B.C. This volume includes detailed shape studies and a comprehensive catalogue. With its presentation of this revised "Panayia Field chronology," *Corinth VII.7* is a long-awaited and much-needed addition to the *Corinth* series.

Late Classical and Early Hellenistic Corinth

The division of land and consolidation of territory that created the Greek polis also divided sacred from productive space, sharpened distinctions between purity and pollution, and created a ritual system premised on gender difference. Regional sanctuaries ameliorated competition between city-states, publicized the results of competitive rituals for males, and encouraged judicial alternatives to violence. Female ritual efforts, focused on reproduction and the health of the family, are less visible, but, as this provocative study shows, no less significant. Taking a fresh look at the epigraphical evidence for Greek ritual practice in the context of recent studies of landscape and political organization, Susan Guettel Cole illuminates the profoundly gendered nature of Greek cult practice and explains the connections between female rituals and the integrity of the community. In a rich integration of ancient sources and current theory, Cole brings together the complex evidence for Greek ritual practice. She discusses relevant medical and philosophical theories about the female body; considers Greek ideas about purity, pollution, and ritual purification; and examines the cult of Artemis in detail. Her nuanced study demonstrates the social contribution of women's rituals to the sustenance of the polis and the identity of its people.
