Why There Is Light on Earth But Not in Space - Why There Is Light on Earth But Not in Space by BRIGHT SIDE 3,739,734 views 4 years ago 8 minutes, 22 seconds - If you're not a morning person, then you'd probably love living on the moon or out in space! The whole "lack of oxygen" thing aside ... Why is the sky above the Moon is always black?

Why don't other stars shine with blazing light at night?
When we look at the sky, we glance into a very distant past
Why don't less distant stars shine as bright as the Sun?
Where the Big Bang comes into play

How do we know these black areas exist at all?
