The Civilization of the Renaissance in Italy

This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1904 edition. Excerpt: ... arrives, and after giving him the explanation quoted above of the opinion of St. Thomas Aquinas on tyrannicide, exhorts him to bear death manfully. Boscoli makes answer: 'Father, waste no time on this; the philosophers have taught it me already; help me to bear death out of love to Christ.' What follows--the communion, the leave-taking and the execution-- is very touchingly described, one point deserves special mention. When Boscoli laid his head on the block, he begged the executioner to delay the stroke for a moment: ' During the whole time since the announcement of the sentence he had been striving after a close union with God, without attaining it as he wished, and now in this supreme moment he thought that by a strong effort he could give himself wholly to God.' It is clearly some half-understood expression of Savonarola which was troubling him. If we had more confessions of this character the spiritual picture of the time would be the richer by many important features which no poem or treatise has preserved for us. We should see more clearly how strong the inborn religious instinct was, how subjective and how variable the relation of the individual to religion, and what powerful enemies and competitors religion had. That men whose inward condition is of this nature, are not the men to found a new church, is evident; but the history of the Western spirit would be imperfect without a view of that fermenting period among the Italians, while other nations, who have had no share in the evolution of thought, may be passed over without loss. But we must return to the question of immortality. If unbelief in this respect made such progress among the more highly cultivated natures, the reason lay partly in the fact that the great earthly...

History as a Visual Art in the Twelfth-Century Renaissance

Karl Morrison discusses historical writing at a turning point in European culture: the so-called Renaissance of the twelfth century. Why do texts considered at that time to be masterpieces seem now

to be fragmentary and full of contradictions? Morrison maintains that the answer comes from ideas about art. Viewing histories as artifacts made according to the same aesthetic principles as paintings and theater, he shows that twelfth-century authors and audiences found unity not in what the reason read in a text but in what the imagination read into it: they prized visual over verbal imagination and employed a circular, or nuclear, spectator-centered perspective cast aside in the Renaissance of the fourteenth and fifteenth centuries. Twelfth-century writers assimilated and transformed a tradition of the conceptual unity of all the arts and attributed that unity to the fact that art both conceals and discloses. Recovering that tradition, especially the methods and motives of concealment, provides extraordinary insights into twelfth-century ideas about the kingdom of God, the status of women, and the nature of time itself. It also identifies a strain in European thought that had striking affinities to methods of perception familiar in Oriental religions and that proved to be antithetic to later humanist traditions in the West. World History Readers

Renaissance means "rebirth" in French. The Renaissance period of European history is aptly named because people had a rebirth, or renewed, interest in the ideas of ancient Greeks and Romans. This led to a new age of science and art. Readers will learn about the many aspects of the Renaissance as well as the prominent figures of this era, including Nicolaus Copernicus, Leonardo da Vinci, and others. A timeline helps summarize the crucial dates of the Renaissance while stunning images convey the scope of the period in splendid detail.

Chambers's Historical Questions, with Answers

Jacob Burckhardt was born in 1818 in Basel, Switzerland. He studied history at the University of Berlin and taught art history and the Italian Renaissance in Berlin and Basel. His essay, as he called *The Civilization of the Renaissance in Italy*, was first published in 1860. Rich in its detailed account of the arts, fashions, manners, and thought of one of the most innovative eras in human history, this brilliant panorama of Renaissance life is also a thorough examination of the nature of civilization and of our place within it. Burckhardt's encyclopedic knowledge, his mastery of style, and his genius for synthesis make this one of the few classics of history and the prototype for cultural history. Burckhardt's *The Age of Constantine the Great* and *Cicerone* were published in his lifetime, and *The History of Greek Civilization and Reflections on World History* after his death in 1897.

World History: Renaissance through the Age of Revolution

Presents, in text and illustrations, a range of people whose way of life reveals various aspects of the society developing in Europe and America from the fifteenth through the eighteenth centuries.

The Renaissance and the New World

More than ever before, the Renaissance stands as one of the defining moments in world history. Between 1400 and 1600, European perceptions of society, culture, politics and even humanity itself emerged in ways that continue to affect not only Europe but the entire world. This wide-ranging exploration of the Renaissance sees the period as a time of unprecedented intellectual excitement

and cultural experimentation and interaction on a global scale, alongside a darker side of religion, intolerance, slavery, and massive inequality of wealth and status. It guides the reader through the key issues that defined the period, from its art, architecture, and literature, to advancements in the fields of science, trade, and travel. In its incisive account of the complexities of the political and religious upheavals of the period, the book argues that Europe's reciprocal relationship with its eastern neighbours offers us a timely perspective on the Renaissance as a moment of global inclusiveness that still has much to teach us today.

The Renaissance Bazaar

A distinguished group of historians answers key questions about the past and about the present and future. What wins wars? Why do empires rise and fall? What makes a great leader? What causes nationalism? How do spiritual movements spread? These are the questions in the forefront of our minds today but they meant just as much to people in the past. How did earlier generations tackle them, and how far can historians use the lessons of the past to help find some answers? Drawing on examples from ancient Greece to Tony Blair's Britain, leading historical thinkers address twenty of the really big questions that have been asked over the centuries: What is history? How does personality affect politics? What is the impact of technology on social change? How do intellectual movements start? How do our physical bodies and our private lives impact history? Each essay is accompanied by commentary by a journalist, discussing the views of other leading thinkers, today and in the past. The result is a stimulating ride over continents and across centuries in search of answers that are sometimes surprising, often controversial, and all of great relevance to how we live today. "From the Hardcover edition."

Big Questions in History

Writing about the Renaissance can be a daunting task. Not only do scholars disagree on what the Renaissance is, but they also disagree on whether or not it even took place. Margaret L. King's richly illustrated social history of the Renaissance succeeds as a trusted resource, introducing readers to Europe between 1300–1700, as well as to the problems of cultural renewal. *A Short History of the Renaissance in Europe* includes a detailed discussion of Burckhardt as well as new content on European contact with the Islamic world. This new edition also provides improved coverage of the Protestant and Catholic Reformations. "Focus" features provide fascinating insights into the Renaissance era, and "Voices" sections introduce a wealth of primary sources. King's engaging narrative is enhanced by over 100 images, statistical tables, timelines, a glossary, and suggested readings.

A Short History of the Renaissance in Europe

We know the Renaissance as a key period in the history of Europe. It saw the development of court and urban cultures, witnessed the first global voyages of discovery and gave rise to the Reformation and Counter Reformation. It also started with the 'invention' of oil painting, linear perspective and moveable type, all visual technologies. Does that mean, as has been suggested, that the Renaissance stands for the 'ascendancy of the eye'? If so, then what happened to the sensory extremes which the famous Dutch historian Johan Huizinga still perceived in the 15th century? Did they simply disappear? Or is there another history to be told, a history of a surprising continuity, not only of the sense of hearing but also of the 'lower' senses – those of taste, smell and touch? And was the Renaissance not first and foremost a time of deep sensory anxiety? This volume, assembling nine outstanding specialists, seeks to answer these questions while offering a lively and 'sensational' portrait of the period. *A Cultural History of the Senses in the Renaissance* presents essays on the following topics: the social life of the senses; urban sensations; the senses in the marketplace; the senses in religion; the senses in philosophy and science; medicine and the senses; the senses in literature; art and the senses; and sensory media.

A Cultural History of the Senses in the Renaissance

"The Renaissance" (1300—1500) provides an overview of the years from the Late Middle Ages through the Renaissance. Special emphasis is given to the natural and political disasters that ravaged 14th-century Europe, as well as the unprecedented intellectual, cultural, and artistic flourishing of the 15th and 16th centuries. The Black Death, The Hundred Years' War, the invention of the printing press, the birth of humanism, and the life of Leonardo da Vinci are among the dramatic events vividly

documented in this richly illustrated text. Challenging map exercises and provocative review questions encourage meaningful reflection and historical analysis. Tests and answer keys are included.

KS3 History: Renaissance, Revolution and Reformation: Britain 1509-1745

"The Renaissance is usually portrayed as a period dominated by the extraordinary achievements of great men: rulers, philosophers, poets, painters, architects and scientists. Leading scholar Margaret King recasts the Renaissance as a more complex cultural movement rooted in a unique urban society that was itself the product of many factors and interactions: commerce, papal and imperial ambitions, artistic patronage, scientific discovery, aristocratic and popular violence, legal precedents, peasant migrations, famine, plague, invasion and other social factors. Together with literary and artistic achievements, therefore, today's Renaissance history includes the study of power, wealth, gender,

class, honour, shame, ritual and other categories of historical investigation opened up in recent years. Tracing the diffusion of the Renaissance from Italy to the rest of Europe, Professor King marries the best work of the last generation of scholars with the findings of the most recent research, including her own. Ultimately, she points to the multiple ways in which this seminal epoch influenced the later development of Western culture and society."--Jacket.

Study and Teaching Guide for The History of the Renaissance World

In *Power and Imagination*, a noted historian rethinks the evolution of the city-state in Renaissance Italy and recasts the conventional distinction between "society" and "culture." Martines traces the growth of commerce and the evolution of governments; he describes the attitudes, pleasures, and rituals of the ruling elite; and he seeks to understand the period's towering works of the imagination in literature, painting, city planning, and philosophy—not simply as the creations of individual artists, but as the form an expression of the ambitions and egos of those in power.

The new edition of this classic history examines the political, economic, social, religious and cultural life of Europe at the height of the Renaissance. J.R. Hale not only records the events of 1480-1520, but also suggests what it was like to have lived in this period. He provides readers with an understanding of the quality of lives of people living at this time and includes processes and personalities not often covered by other books. For the second edition Professor Michael Mallet provides an updated bibliography and an extended introduction explaining the book's place in the historiography of the subject. The book is arranged thematically, each chapter designed to provide information about a specific field of inquiry and also give an insight into the people of this era. J. R. Hale investigates how these people felt about their environment and the passage of time; their relationships with government and other institutions, from the Church to the family; their economic frameworks; the part religion played in their lives; and what cultural and intellectual pursuits were available to them. Renaissance Europe compares our own attitudes to those of the Renaissance and vice versa, thereby enriching the readers understanding of everyday life in the past.

Teaching World History: A Resource Book

The uniqueness and importance of Humanism in Crisis arises from the way in which a significant historical event--the end of the French Renaissance--is examined from several different perspectives in order to provide a thorough investigation of its causes and consequences. Although historians, philosophers, sociologists, and literary critics view the French Renaissance differently, they all seem to agree on the notion that something happened between 1580 and 1630--between Montaigne and Descartes--that transformed every aspect of society and that undermined the foundation of humanism in France, dividing the French Renaissance from the "Grand siècle" that followed it. The causes of this decline, however, are as obscure as a precise determination of when the French Renaissance "died."

In *Humanism in Crisis*, fourteen internationally known scholars examine such topics as education, philosophy, scientific method, historical relativism, cosmography, literary genres, everyday life, medicine, and mythology and detect a series of crises that acted to bring about the decline of humanism and the end of the French Renaissance. The diversity of approaches allows a comprehensive vision of society to be presented. Moreover, several essays provide answers to questions asked in others, thus creating a sense of unity by relating individual contributions to each other.

World History

With an interdisciplinary approach that encompasses the history of ideas, political history, cultural history and art history, this volume, in the successful Routledge Worlds series, offers a sweeping survey of Europe in the Renaissance, from the late thirteenth to early seventeenth centuries, and shows how the Renaissance laid key foundations for many aspects of the modern world. Collating thirty-four essays from the field's leading scholars, John Jeffries Martin shows that this period of rapid and complex change resulted from a convergence of a new set of social, economic and technological forces alongside a cluster of interrelated practices including painting, sculpture, humanism and science, in which the elites engaged. Unique in its balance of emphasis on elite and popular culture, on humanism and society, and on women as well as men, *The Renaissance World* grapples with issues as diverse as Renaissance patronage and the development of the slave trade. Beginning with a section on the antecedents of the Renaissance world, and ending with its lasting influence, this book is an invaluable read, which students and scholars of history and the Renaissance will dip into again and again.

Renaissance Europe 1480 - 1520

The creator of the hit podcast series *Tides of History* and *Fall of Rome* explores the four explosive decades between 1490 and 1530, bringing to life the dramatic and deeply human story of how the West was reborn. In the bestselling tradition of *The Swerve* and *A Distant Mirror*, *The Verge* tells the story of a period that marked a decisive turning point for both European and world history. Here, author Patrick Wyman examines two complementary and contradictory sides of the same historical coin: the world-altering implications of the developments of printed mass media, extreme taxation, exploitative globalization, humanistic learning, gunpowder warfare, and mass religious conflict in the long term, and their intensely disruptive consequences in the short-term. As told through the lives of ten real people—from famous figures like Christopher Columbus and wealthy banker Jakob Fugger to a ruthless small-time merchant and a one-armed mercenary captain—*The Verge* illustrates how their lives, and the times in which they lived, set the stage for an unprecedented globalized future. Over an intense forty-year period, the seeds for the so-called "Great Divergence" between Western Europe and the rest of the globe would be planted. From Columbus's voyage across the Atlantic to Martin Luther's sparking the Protestant Reformation, the foundations of our own, recognizably modern world came into being. For the past 500 years, historians, economists, and the policy-oriented have argued which of these individual developments best explains the West's rise from backwater periphery to global dominance. As *The Verge* presents it, however, the answer is far more nuanced.
