

Structuration Theory Anthony Giddens And The Constitution Of Social Life

[#Structuration Theory](#) [#Anthony Giddens](#) [#sociological theory](#) [#agency and structure](#) [#social life constitution](#)

Anthony Giddens' Structuration Theory offers a profound sociological framework that explores the dynamic interplay between human agency and social structures. It argues that social life is not merely a product of either individual action or pre-existing structures, but is continuously constituted and reconstituted through their recursive relationship, emphasizing how structures enable and constrain actions while being simultaneously reproduced or transformed by them.

Each publication is designed to enhance learning and encourage critical thinking.
