The Atlantis Connection

The sins of the past break through to the present in this chilling tale of supernatural suspense. When Benedict Doyle finds himself the owner of his great-grandfather's North London house, it stirs memories of his time there as a frightened eight-year-old and the strange glimpses that revealed the darkness in his family's past—through which runs the grisly thread of an old legend about a chess set believed to possess a dark power. And when Michael Flint, meeting Benedict in Oxford, starts to research his story, chilling facts begin to emerge—facts that suggest the old legend contains a disturbing reality. Could the chess set's malevolence be reaching out to the present?

MOXONS MASTER

The rules of "The Greatest Tournament in Chess History," the \$20 million Sheldrake Memorial Tournament, a.k.a. Los Voraces 2019, are: no seconds, no agents, no computers, no entourages, no pagers, no power palms, no phone calls—no outside contact of any kind—as the fourteen greatest chess players in the world gather to compete for money and fame. These geniuses of the game are strange characters—including two Russian world champions solely responsible for article 17.1 of FIDE's Laws of Chess (the "anti-hair-pull rule"), the Rumanian who speaks a "kind of personal Esperanto, using odds and ends of other languages," and a possible member of the Russian mafia—and when the tournament begins with the death of the ninth highest rated player in the world, everyone is under suspicion. This fabulous chess novel is full of game scores and diagrams—some pretty amazing games are played at Los Voraces! It's all told from the point of view of the arbiter, who is quickly drawn from his role as observer to that of target and suspect. By the time the tournament has only five rounds to go, five corpses have been discovered. Just who is the serial killer with a preference for 2700+ rated grandmasters? This edition is a revision, with illustrations, of a serialized electronic version run by Hanon Russell on ChessCafe from September 2001 to September 2002.

The Sin Eater

I wish particularly to point out in the present volume that I am not giving the meanings of symbols in the vestments in which they are now garbed. I am giving their origin and original meanings. Up to the time of Mu's submersion all symbols retained their original meanings. From the time of Mu's destruction I must pass over about 5,000 or 6,000 years. Those were years when seemingly no history was written except a few scraps in India and Egypt. During this time mankind apparently was reviving and repeopling the earth, after its almost total destruction by the submersion of Mu and other lands and the subsequent formation of gas belts and mountains. On entering Egypt 6,000 years ago we find that many of the original symbols had survived but were very much Egyptianized, especially in pattern or design, with an incomprehensible theology attached to them. A multitude of new ones had besides been added, most of them having esoteric or hidden meanings. This confusion increased when Upper and Lower Egypt merged into one kingdom. The two peoples not only commingled personally, but also their two sets of symbols. Thus two sets were made into one without any being discarded. It meant at least two symbols for every conception. So great was the confusion of symbols in Egypt, 4,000 to 5,000 years ago, that hardly one-half of the priesthood understood those used in the temples of other cities, although they might be but a few miles away.

The Spirit of Love

The most complete and only full-length biography of the legendary inventor of dynamite and founder of the prizes that bear his name. As with many extraordinary lives, Nobel's biography reads better than most fiction - born in poverty, his creation of a safe method for detonating nitro-glycerine catapulted him to wealth and fame. Spurned by the woman he loved and dubbed 'the merchant of death' by a press horrified at the capabilities of dynamite, Nobel bequeathed his fortune to the foundation of prizes celebrating peace, literature and scientific achievement.

The 64-Square Madhouse

"Perry Mason wasn't quite sure who his client was. He didn't even know whether she was alive or dead! Equally mystified, Paul Drake couldn't decide whether he was trailing suspects in his usual expert fashion--or leading the killer to the next victim! As for Della Street: she was far from convinced by the desperate telephone voice with the cryptic message: 'I'm sending you an envelope stuffed with money. You've got to help me, Mr.Mason...' " --

First published in 1997, this is the comprehensive and irrefutable proof of the flesh-and-blood gods who created us genetically in their own image. This interventionist solution identifies them as the builders of the Pyramids, Sphinx and other ancient sites. Up-to-date evidence is that the gods were real and came from within the Solar System.

"It all starts quietly enough -- with two cars side-swiping each other in the middle of the dessert. And in the trunk of one of them--an ancient jalopy--Perry Mason finds a fan-dancer's wardrobe (Item: Two fans; Item: One pair of dancing shoes). The fans lead to one of the most beautiful clients Perry Mason has ever had ... and to a body. A body on the end of a Japanese sword." --

Contes

This happened in 1892, a famine year, at a point between Sukhum and Ochemchiry, on the shore of the Kodor River, so near the sea that through the gay babble of the clear waters of the mountain stream the muffled thunder of the billows was distinctly heard. It was an autumn day. Yellow cherry-laurel leaves

were circling and glistening in the white foam of the Kodor like nimble salmon fry. I was sitting on some rocks near the bank and reflecting that the sea-gulls and cormorants, too, must be mistaking the leaves for fish, and that was why their cries were so fretful over there to the right, behind the trees where the sea was rumbling. The chestnut trees overhead were decked out in gold; at my feet lay piles of leaves which looked like the palms of hands that had been cut off. On the opposite bank the hornbeam boughs were already bare, and hung in the air like a torn net; caught in it, as it were, a red and yellow mountain woodpecker hopped along, tapping the bark with his black beak, while adroit titmice and dove-colored nuthatchesÑvisitors from the distant northÑpecked the insects he drove out. To the left, above the mountain peaks, hung smoky, heavy, rain-laden clouds; they cast shadows over the green slopes dotted with boxwood, ñthe dead tree.Ó Here in the hollows of old beeches and lindens is found that ñheady honey,Ó the intoxicating sweetness of which nearly caused the downfall of the soldiers of Pompey the Great long ago, having overcome a whole legion of iron Romans. The bees make it from laurel and azalea blossoms, and tramps get it out of the hollows and eat it, spreading it on what the natives called lavash, a thin flat cake made of wheat flour. That is exactly what I was doing, as I sat under the chestnut trees. Stung all over by angry bees, I was dipping pieces of bread into a kettle full of honey and eating, while I admired the lazy play of the weary autumnal sun.
