Learn CBT #3- **Skilled Helper**, An Easy Introduction to ...

Gerard Egan's Skilled Helper Model of eclectically based counselling provides a structured and solution focused basis for counsellors, psychotherapists and hypnotherapists. It is a three stage model in which each state consists of specific skills that the therapist uses to help the client move forwards. By mastering the process of using these basic skills in an appropriate way the talking therapist may be able to increase their efficiency and structure their work in a more logical way, thus helping clients in a more consistent manner and being less reliant upon their fluctuating therapeutic inspiration'.

The **Egan Skilled Helper approach**, encourages clients ...

Effective Listening - SOLER Effective listening is key to being a Skilled Helper. It consists of various skills, which Egan covers with the acronym: S. If it suits them, face the client Squarely (some prefer up to 45 degrees etc) O. Maintain an Open Posture with the client. L. Lean towards the client (as

appropriate). E. Maintain appropriate Eye Contact with the client. R. Be a Relaxed helper as by doing so you greatly improve the quality and comfort of the sessions.

Active Listening Active Listening is a key skill for the Skilled Helper. It consists in concentrating on the client's non-verbal and verbal communications and relating them to the client's story (non-verbal communication includes body language, expressions, reactions etc). Verbal communication articulates the client's experiences, behaviours and feelings. The Skilled Helper encourages the client to stick to the point (what is relevant), they are non-judgemental and they are Empathic rather than sympathetic
