A Crisis in the Sky

Beyond the sky there is hope. And danger. The rocket is ready, and the promise of a new future awaits Toume and Chi's exploration of space. Yet that dream is turning desperate. Drought afflicts many islands, and the resources needed to repair the wells are becoming scarce. Only the launch can save many from dying of thirst. Then, an unknown menace from space, more powerful and more oppressive than anything Toume has ever known, threatens to disrupt any chance he has at saving his planet. They deliver an ultimatum—do not leave the planet or annihilation will come. But this threat does not unite the clans against it. The Ihaashe and the Vaghka seek to take advantage of the situation, and their scheming drives a rift between Toume and Karima, and their alliance, and there is little time to repair it. Toume must fight to save his planet, but only if he can save himself first.

Crisis in the Sky

"A documentary on a face to face encounter with God" (As described by U.S. Copyright Office in Certificate of Registration). There I was, with zero (0) blood pressure for three hours (medical records, M.D. and R.N.), clinically dead in a drug induced coma. While in that coma I had an unusual experience. This book (documentation and illustration), is about that experience from which I was, "not expected to recover".

Sky Static

"Milne provides the first synthesis of the interdisciplinary work of the scientific community, which has been investigating how the satellite industry can be protected from manmade and natural space hazards. The result is an invaluable book for those concerned with space missions and space disasters, those worried about cosmic radiation and its effects on humans, members of the Spaceguard defense movement, and anyone concerned with defense and international cooperation efforts in general."--BOOK JACKET.

Red Sky at Morning

Presents an analysis of the worsening global environmental crisis, citing ten contributors to environmental deterioration, including affluence, the American culture and its values, population, and poverty.

Credit Crisis

In the twenty-first century man created the Eschaton, a . It pushed Earth through the greatest technological evolution ever known, while warning that time travel is forbidden, and transgressors will be eliminated. Distant descendants of this ultra high-tech Earth live in parochial simplicity on the far-flung worlds of the New Republic. Their way of life is threatened by the arrival of an alien information plague known as the Festival. As forbidden technologies are literally dropped from the sky, suppressed political factions descend into revolutionary turmoil. A battle fleet is sent from Earth to destroy the Festival, but Spaceship engineer Martin Springfield and U.N. diplomat Rachel Mansour have been assigned rather different tasks. Their orders are to diffuse the crisis or to sabotage the New Republic's war-fleet, whatever the cost, before the Eschaton takes hostile action on a galactic scale.

Singularity Sky

a collection of writing about rising above the earth during crisis.

I Belong Somewhere in the Sky

'A bracing, heart-lifting read. Patterson is a superb writer' Observer OUTSIDE, THE SKY IS BLUE is a heart-breaking yet also truly joyful and wise memoir of growing up, of dealing with mental health and illness, and of what it means to be part of a family that, despite everything, is able to laugh and to love. 'A memoir about the loss of faith and hope. A memoir about the loss of faith and hope. The book journeys to dark places but it's too honest and well written to be dispiriting. She perseveres in her quest to understand' Guardian When Christina Patterson's brother Tom died suddenly, she faced the harrowing task of clearing out his house. Tom had always been the one who held on to the family treasures and memories, but now Christina had to sift through boxes of letters, photos and belongings, not just of Tom's, but of their parents and their older sister, Caroline. The contents of those boxes tell the story of a young couple who decide to swap a glamorous diplomatic life in Rome for a housing estate in Surrey. But their new suburban, happy life, is increasingly disrupted by Caroline's erratic behaviour. As she is diagnosed with schizophrenia, Tom seeks solace in sport and Christina in a youth club where

she hopes to meet boys, but finds God instead. It doesn't help her in her quest for romance. 'A hymn to optimism, and a beacon of unflagging hope' iPaper 'This is a joyful book. Despite the sorrows, there is a determined joy to this tale, a pattern of finding the good despite the bad, of turning to face the sun so the shadows fall behind' Dr Kathryn Mannix 'She writes beautifully - crisp, yet emotional and page-turning. For me, it is something about her clarity and brutal honesty in describing both heartbreak and heart bursting life and love. In the end it is only the love that matters' Julia Samuel, author of Grief Works

Outside, the Sky is Blue

Crisis Chronicles Press is pleased to announce the publication of Scraping the Sky by Luba Gawur. This is the latest release in our NineSense series of 9-poem chapbooks by writers you need to read. Scraping the Sky includes "In One Day in New York City," "Almost Satori in Times Square," "Suspended," "The Girls of Midtown," "Christmas in Harlem," "Nostalgia," "Poem for Sasha," "Thief," "Defying Gravity" and more. The chapbook is available beginning 15 April 2017 for only \$4.99 from Crisis Chronicles Press, 3431 George Avenue, Parma, Ohio 44134 USA. Scraping the Sky is hand assembled and saddle stapled. It features a pale gray stock cover, sky blue end papers and eggshell faux parchment pages. Cover photo by Luba Gawur. 8.5 x 5.5". Laser printed. ISBN: 978-1-940996-41-7. Limited 1st edition of 99 copies.

Scraping the Sky

It is the middle of the 2nd Century, and the world is mired in chaos. In China, it is the third century of rule for the Han Dynasty, and all is far from well. A strange alliance of corrupt officials and supposedly timid court eunuchs have managed to gain a firm grip on power, and any that oppose them are slandered as 'Partisans' and all but destroyed. As the years wear on, a coalition of nobleman officials - including Confucius' descendant Kong Rong, polymath Cai Yong, the influential Yuan clan heir Yuan Shao and rising star Cao Cao - dedicates itself to challenging the wrongdoers, while in the country at large, a number of new and dangerous movements rally the weary and frustrated common folk against their rulers. The most dangerous of these new movements is the Taoist sect known as the 'Way of Peace', whose leader inspires an uprising that is known to history as the 'Yellow Turban Rebellion'. But these divisive troubles all precede a unifying horror: Dong Zhuo. The obedient provincial inspectors make way for ambitious provincial governors, and passive calls for change are replaced by armed dissent: this is the beginning of the chaos that precedes the arrival of the famous 'Three Kingdoms era' that changed China forever.

Yellow Sky

Under a Sacred Sky is a treasure trove of essays by the author on the ancient art of astrology. This far-reaching collection is drawn from articles and interviews ranging from discussions of its use in our personal lives to its value for understanding historical cycles and patterns. It also includes a fascinating chapter on planetary stations, a topic rarely covered in other astrological literature. Along the way Ray Grasse interjects with some of his own personal experiences in the discipline, while exploring its broader implications for subjects like synchronicity, spirituality, and the yogic concept of the chakras. This book includes interviews with Rick Tarnas and Laurence Hillman and is suitable for both beginner and advanced students of the subject.

Under a Sacred Sky

This book has several purposes. First, I intend to illustrate that Christianity can be a good foundation for a career in music. Second, I would like to mention and thank as many people as possible who have made positive contributions to my career. Third, I would like to provide a collection of stories (perhaps proverbs or parables) that could be useful to teachers. Fourth, I recognize now that my lifetime has seen historical revolution in the arts, finance, sex, marriage, military, politics, transportation, entertainment: practically every value we took for granted when I was a child has either been discarded or modified to the point where it is hardly recognizable. However, humanity still exists and with all its faults it is lovable and worth preserving. Oh, yes, I would also like this book to be enjoyable reading! Vernal E. Richardson

Far... Beyond the Starry Sky

**** Los Angeles Times bestseller **** It's warming. It's us. We're sure. It's bad. But we can fix it. After speaking to the international public for close to fifteen years about sustainability, climate scientist Dr. Nicholas realized that concerned people were getting the wrong message about the climate crisis. Yes, companies and governments are hugely responsible for the mess we're in. But individuals CAN effect real, significant, and lasting change to solve this problem. Nicholas explores finding purpose in a warming world, combining her scientific expertise and her lived, personal experience in a way that seems fresh and deeply urgent: Agonizing over the climate costs of visiting loved ones overseas, how to find low-carbon love on Tinder, and even exploring her complicated family legacy involving supermarket turkeys. In her astonishing, bestselling book *Under the Sky We Make*, Nicholas does for climate science what Michael Pollan did more than a decade ago for the food on our plate: offering a hopeful, clear-eyed, and somehow also hilarious guide to effecting real change, starting in our own lives. Saving ourselves from climate apocalypse will require radical shifts within each of us, to effect real change in our society and culture. But it can be done. It requires, Dr. Nicholas argues, belief in our own agency and value, alongside a deep understanding that no one will ever hand us power--we're going to have to seize it for ourselves.

Under the Sky We Make

2071. The world is different now, but the mistakes are the same as always. The old global balance of power is a thing of the past. The USA is gone. China and India have emerged as the main world powers alongside Europe which, drowned in the economic crisis and the need to confront the Asian Coalition, has reinvented itself through neo-capitalism at the expense of its citizens. Traditional religions have been replaced by the House of Conciliation, an amalgamation of all of them that serves the interests of the State. Political freedom no longer exists, religious freedom no longer exists and freedom of thought no longer exists. Freedom no longer exists. In this context, three lives run parallel without knowing that they could change the course of history: Benjamin, a young publicist at the sweetest moment of his career; Emily, a senior government official determined to change the inequities of the system; and Seymour, a boy who threatens to destabilize the foundations of the new Faith. The mistakes are the same as always, but the world is different now. 'Dust in the sky' is the first instalment of this trilogy. The second part, 'Blood on Earth', will be available soon.

Dust in the Sky

At first he thought it was all part of some crazy nightmare. But it wasn't. Russell Grahame, M.P. was one of a handful of passengers flying from Stockholm to London. One moment flying peacefully in the sky, the next lying in an un-Earthly green coffin. Grahame was the first to emerge from this strange resting place. But for him, as well as for the others, it had been only the ecliptical experience. Soon all were to find themselves lost in a bizarre world of Mediaeval knights, Stone Age warriors and gremlins, caught unalterably in the weirdest cocoon of Time.

Seahorse in the Sky

It is the middle of the 2nd Century, and the world is mired in chaos. In China, it is the third century of rule for the Han Dynasty, and all is far from well. A strange alliance of corrupt officials and supposedly timid court eunuchs have managed to gain a firm grip on power, and any that oppose them are slandered as 'Partisans' and all but destroyed. As the years wear on, a coalition of nobleman officials - including Confucius' descendant Kong Rong, polymath Cai Yong, the influential Yuan clan heir Yuan Shao and rising star Cao Cao - dedicates itself to challenging the wrongdoers, while in the country at large, a number of new and dangerous movements rally the weary and frustrated common folk against their rulers. The most dangerous of these new movements is the Taoist sect known as the 'Way of Peace', whose leader inspires an uprising that is known to history as the 'Yellow Turban Rebellion'. But these divisive troubles all precede a unifying horror: Dong Zhuo. The obedient provincial inspectors make way for ambitious provincial governors, and passive calls for change are replaced by armed dissent: this is the beginning of the chaos that precedes the arrival of the famous 'Three Kingdoms era' that changed China forever.

NATIONAL BESTSELLER • The Pulitzer Prize-winning author of *The Sixth Extinction* returns to humanity's transformative impact on the environment, now asking: After doing so much damage, can we change nature, this time to save it? **RECOMMENDED BY PRESIDENT OBAMA AND BILL GATES**

• SHORTLISTED FOR THE WAINWRIGHT PRIZE FOR WRITING • ONE OF THE TEN BEST BOOKS OF THE YEAR: The Washington Post • ONE OF THE BEST BOOKS OF THE YEAR: Time, Esquire, Publishers Weekly, Kirkus Reviews • “Beautifully and insistently, Kolbert shows us that it is time to think radically about the ways we manage the environment.”—Helen Macdonald, The New York Times With a new afterword by the author That man should have dominion “over all the earth, and over every creeping thing that creepeth upon the earth” is a prophecy that has hardened into fact. So pervasive are human impacts on the planet that it’s said we live in a new geological epoch: the Anthropocene. In *Under a White Sky*, Elizabeth Kolbert takes a hard look at the new world we are creating. Along the way, she meets biologists who are trying to preserve the world’s rarest fish, which lives in a single tiny pool in the middle of the Mojave; engineers who are turning carbon emissions to stone in Iceland; Australian researchers who are trying to develop a “super coral” that can survive on a hotter globe; and physicists who are contemplating shooting tiny diamonds into the stratosphere to cool the earth. One way to look at human civilization, says Kolbert, is as a ten-thousand-year exercise in defying nature. In *The Sixth Extinction*, she explored the ways in which our capacity for destruction has reshaped the natural world. Now she examines how the very sorts of interventions that have imperiled our planet are increasingly seen as the only hope for its salvation. By turns inspiring, terrifying, and darkly comic, *Under a White Sky* is an utterly original examination of the challenges we face.

Under a White Sky

This book explores a new theory which delves into the explanation of God and how mankind came to be. It starts by questioning the idea of God and continues with how the idea was exploited by the messengers. It explores the topics of Evolution, Science, War and Society. The moon conspiracy controversy is thoroughly examined revealing new information which has been hidden in plain sight for decades. It then brings into the fold the question of who controls the planet, the concept of a shadow world government and its connection to extraterrestrial life. It explores the State of Denial the human race is in and concludes with a new theory of God and how the Universe may have been created. It is not for the faint hearted.

The Sky is The Limit

Dancing in the Sky is the first complete telling of the First World War fighter pilot training initiative established by the British in response to losses occurring in European skies in 1916.

Dancing in the Sky

This book, the first to cover the SES in depth, presents unparalleled insight into a versatile and complex undertaking which will determine the future of air traffic management in Europe. Its chapters analyse the progress as well as the shortcomings and setbacks encountered in the implementation of the SES policy objectives. With forward-looking contributions from over forty well-known experts working in virtually every arena of aviation, from airports and airlines to regulatory agencies and air law practice and scholarship, the book thoroughly explains what has been achieved so far, not only in theory but in fact.

A Guide to American Defenders of Land, Sea & Sky

Brainiac returns to invade Earth with his ultimate weapon, Warworld, a planet-sized satellite built for destruction. With the help of super-powered friends like Wonder Woman, The Flash, Green Lantern and many more, Superman must lead the attack on Brainiac and protect Earth! Collects ACTION COMICS #474-475, SUPERMAN: MAN OF STEEL #9-10, ADVENTURES OF SUPERMAN #488-489, SUPERMAN #66.

Achieving the Single European Sky

Elephants are among the earth's most sentient beings. They remember, they experience grief and joy, fear and love. Indeed, as our knowledge of these extraordinary creatures increases, the more they transcend all preconceptions of animal behavior. Michael Nick Nichols, longtime photographer for National Geographic as well as the magazine's editor-at-large for photography, has been working with African elephants for more than twenty years. In *Earth to Sky* he tells their story through poignant images that bring us directly into their habitats lush forests and open savannas, or stark landscapes ravaged by human intervention to observe the animals' daily engagements and activities. Nichols

photographs are accompanied here by the words of such celebrated figures in the field of conservation as Iain Douglas-Hamilton, J. Michael Fay, Peter Matthiessen, Cynthia Moss, David Quammen, and many others. In addition, Nichols engages us in his photographic journey with personal and informative introductions to each of the books four chapters exploring life in the wild, the ivory trade, family interactions, and programs for orphaned elephants. The survival of elephants is under dire threat from humankind, most immediately from the market for ivory. More than twenty-five thousand elephants are slaughtered each year, and their ivory is sold at astronomically high prices to countries such as China, Japan, the Philippines, and Singapore. African elephant refuges are under siege; many park rangers have been murdered in the fray. The misuse of elephants ivory as a commodity has to stop but, as Nichols makes clear, the issue must be addressed with a full and empathetic understanding of the poverty and corruption that persist in the countries where elephants roam. In *Earth to Sky* Nichols demonstrates that the world needs elephants, and insists that we do all we can to protect their spaces and their lives. Sadly, most signs point to a tragic conclusion for these wise and emotionally complex creatures. This book is an urgent call for us to bring that process to a halt, while we still can.

Superman: Panic in the Sky (New Edition)

"Our sorrows and wounds are healed only when we touch them with compassion." —Buddha The loss of a loved one is one of the most difficult things a person can endure, and it is all too easy to lose sight of ourselves in the experience of grief. Yet it is in these times of trouble, when comfort is most needed, that it seems hardest to find. *When I Look to the Sky* is a collection of thoughts, prayers, and poems, carefully selected to provide those who grieve with much-needed strength and support in their darkest moments. Serving as a source of both emotional support and personal guidance, *When I Look to the Sky* helps put things in perspective, allowing each of us to come to terms with loss in our own way, and in our own time. *When I Look to the Sky* mixes hope with introspection, sorrow with beauty, and loss with love. Its timeless quotes and captivating verses belong in the hands of anyone who looks to the sky for answers. From the Hardcover edition.

Earth to Sky

Public relations expert Sarah Seville tries to prevent the breakup of a raucous country band and corral Quentin Cox—its wild, and irresistible, lead singer. Original. 175,000 first printing.

When I Look to the Sky

Eleanor Dark (1901–85) is one of Australia's most innovative 20th-century writers. Her extensive oeuvre includes ten novels published from the early 1930s to the late 1950s, and represents a significant engagement with global modernity from a unique position within settler culture. Yet Dark's contribution to 20th-century literature has been undervalued in the fields of both Australian literary studies and world literature. Although two biographies have been written about her life, there has been no book-length critical study of her writing published since 1976. *Middlebrow Modernism* counters this neglect by providing the first full-length critical survey of Eleanor Dark's writing to be published in over four decades. Focusing on the fiction that Dark produced during the interwar years and reading this in the context of her larger body of work, this book positions Dark's writing as important to the study of Australian literature and global modernism. Melinda Cooper argues that Dark's fiction exhibits a distinctive aesthetic of middlebrow modernism, which blends attributes of literary modernism with popular fiction. It seeks to mediate and reconcile apparent binaries: modernism and mass culture; liberal humanism and experimental aesthetics; settler society and international modernity. The term middlebrow modernism also captures the way Dark negotiated cosmopolitan commitments with more place-based attachments to nation and local community within the mid-20th century. *Middlebrow Modernism* posits that Dark's fiction and the broader phenomenon of Australian modernism offer essential case studies for larger debates operating within global modernist and world literature studies, providing perspectives these fields might otherwise miss.

Handful of Sky

In Book 2 of The Catherine Wheel Series, Dr. Wheel learns of the existence of a massive decades-long mission to a distant planet when NASA declares it needs her expertise. Endangered by an unknown saboteur, the mission is jeopardized when one of its cargo vessels falls out of synch with the rest of the fleet. When Catherine agrees to help find a solution to the crisis, she has no idea of the bombshell from her own past that is about to change everything.

Middlebrow Modernism

A reticent Mehra family, comfortably nested in obscure kaudiyala on the lower folds of the Himalayas, is rocked by emotional unrest as their daughter Supriya provides refuge to Farooq, a Kashmiri student of temple art, a distantly related family br>Unit, empowered by a new citizenship law arrives and settles down with them, and Darshan, indifferent towards supriya's love for him, comes in search of his love Farooq at a time of raging political crisis in India. In this novella four Lonely hearts redefine love, rediscover longing and explore the strings that continue to br>tug at their hearts in difficult times.

Startled Broken Sky

To frame his story, Schneiders goes back to the nineteenth-century journals of fur traders and settlers and in the record of flora, fauna, floods, and human activity he finds evidence of rapid and disruptive change. Bison once had the greatest influence on the land, and Schneiders depicts an original bison and Indian trail networks on which were overlaid the first torts and towns and then the railroads, highways, and reservoirs that reconfigured the region forever.

Where the Sky Feels Cold

It has been a month since retired Army Ranger, martial arts expert Sean McConnell's battle with the murderous townspeople of Hadestville in which he barely escaped the deadly encounter with his life. With his scars from the savage ordeal still fresh, McConnell continues his bicycling expedition across America, leaving the sadistic town far behind. Now, pedaling across Montana's pristine countryside, captivated by the stunning, untamed beauty of the state's frontier land, life seems like it might finally be settling down for Sean McConnell. Then, in an instant, his peace is shattered once again when anguished cries belonging to someone clearly in distress erupt from within the heavily wooded forest nearby. The moment that Sean McConnell decides to investigate so begins a terrifying new adventure. Sean is once again plunged into a life or death struggle for survival, only this time his adversaries aren't human.

Big Sky Rivers

i in the Sky is a collection of essays by more than 40 experts, including such leading writers as Charles Handy, Don Tapscott, and Kevin Warwick, giving their personal vision of the future of information. Information here is given its widest meaning and includes such subjects as the Internet, electronic commerce, cybernetics, robotics, artificial intelligence, and even computers as fashion accessories. Information as phenomenon pervades all areas of life, and its evolution has consequences for everyone. Many of the essays have as their central themes the future of computer intelligence; library and information services; interactive Internet marketing; networked learning in higher education; the linking of technology enabling remote and online communication to the deconstruction of the modern corporation; artificial intelligence; scholarly communication; smart houses; intelligent appliances; etc.

Grim Sky Country

When a fire disrupts the London Air Traffic Control Centre, the controllers move to an emergency control room at Heathrow - which is exactly where a group of terrorists want them. The crisis deepens and the whole of London's Air Traffic Control system comes under attack. Despite facing personal danger, the controllers struggle to keep the airspace safe. Desperate measures are needed to discover who is behind the attack, and what they want. Measures that put innocent lives at risk. As the answers begin to emerge, it becomes clear that far more is at stake than the safety of aircraft and passengers. By then, there seems no way to stop a terrorist attack far more shocking than anyone had imagined. "David Hough takes his reader on a nail-biting journey: the clock is ticking and the stakes are getting higher and higher - and the disaster is getting closer an closer. A rip-roaring, page-turner of a novel."

i in the Sky

'Without a doubt, the definitive account of South Sudan's birth. Unique in modern history, this untold story carries lessons not only for Africa but for the rest of the world.' Sir Nicholas Kay, KCMG, former British Ambassador to Sudan.

Heathrow

New Statesman's Best Books of the Year, 2018 Mail on Sunday, Books of the Year, 2018 We plan, as the old proverb says, and God laughs. But most of us don't find it all that funny when things go wrong. Most of us want love, a nice home, good work, and happy children. Many of us grew up with parents who made these things look relatively easy and assumed we would get them, too. So what do you do if you don't? What do you do when you feel you've messed it all up and your friends seem to be doing just fine? For Christina Patterson, it was her job as a journalist that kept her going through the ups and downs of life. And then she lost that, too. Dreaming of revenge and irritated by self-help books, she decided to do the kind of interviews she had never done before. The resulting conversations are surprising, touching and often funny. There's Ken, the first person to be publicly fired from a FTSE-100 board. There's Winston, who fell through a ceiling onto a purple coffin. There's Louise, whose baby was seriously ill, but who still worried about being fat. And through it all, there's Christina, eating far too many crisps as she tries to pick up the pieces of her life. The Art of Not Falling Apart is a joyous, moving and sometimes shockingly honest celebration of life as an adventure, one where you ditch your expectations, raise a glass and prepare for a rocky ride.

A Rope from the Sky

What do you do when the thrill is gone, and the things you expected from life seem to have passed you by? Once, Patrick and Thea didn't need to say it out loud. They knew they would have a family together. But the years pass and what they once never needed to say has turned into secrets and silence. Alice and Nicholas have an open marriage, but it is not as simple or harmonious as they intended, or pretend. These two very different marriages collide at a time when each is in crisis. And in the end, all the things that didn't get said, find a way to change everything.

The Art of Not Falling Apart

New York Times bestselling author Dale Brown's powerful tale of America's greatest challenge since the Gulf War: a crisis on the oil-rich islands near China... Sky Masters is Dale Brown's powerful tale of America's greatest challenge since the Gulf War. After the devastating "Flight of the Old Dog," Lt. Col. Patrick McClanahan was virtually exiled. But now he's offered a chance to test-fly a new, state-of-the-art B-2 bomber in strategic warfare training sorties. It's his last chance to prove himself to the Pentagon brass. But no one anticipated the crisis brewing on the oil-rich islands near China. No one knew the war games would become so real.

From the Night Sky

I graduated from the University 1985, very positive and hopeful about the future. I looked to the world of possibilities and was very optimistic. In the course of time, I lost my job, came to the blackest depression of my life. I then learned this lesson in life. There is limit to sky's the limit philosophy. In life, we battle against circumstances which are not mere fantasies but real, powerful enough to quench the fire in us. We all have a weak spot, our Achilles heel which makes us vulnerable and fatal especially if we are caught unawares. The limit we experience and our ability to overcome the limit determines the highest we can go. The decision to handle failure proactively and to deal with impossible situations is the key to the highest we can go. The book addresses 15 secrets of life to help you to come out of mess and live the dreams of your life. To the reader this book won't just pose many questions but will give you some answers too. It will help you empower yourself by making the most of your God-given talents which many of us don't take advantage of. Take the best of what you read in this book, comprehend it, use it and make something out of your life.

Sky Masters

Engages the question: "Why do the poor and ethnic minorities bear the brunt of both named and political disaster?"

Sky's the Limit. How Far Can You Go?

"It is too late!" said Emok. "Hang in there, old friend!" Lunok cried. "Pointless!" said the entity that had assimilated Emok's essence. Its voice was deep and infused with energy so dark it made Lunok and the other four Shemsus stagger backwards. "Who are you?!" Lunok demanded. "Soon, you will know, creature," replied the entity. Lunok raged and thrust his fist towards the sky. A bolt of energy surged from the sky, struck the containment chamber of the entity and started sinking it deeper into the ground. "I swear by what I am and the essence I have taken over," the entity promised said via telepathy. "I will be free and then, I will annihilate you all!" The Dimension of Asah contains the Realm of Atlantia, home of creatures called the Shemsus. The essence of Emok, a prominent Shemsu, has become tainted by an entity only known as 'the darkness'. During their latest assignment, Emok passed his tainted essence unto two of their new creations: Michael and Luciel. Now, Lunok must find a way to stop this entity and find a cure for the angels before a Celestial Crisis erupts and eradicates them.

The Sky is Crying

'The Sheltering Sky is a book about people on the edge of an alien space; somewhere where, curiously, they are never alone' Michael Hoffman. Port and Kit Moresbury, a sophisticated American couple, are finding it more than a little difficult to live with each other. Endeavouring to escape this predicament, they set off for North Africa intending to travel through Algeria - uncertain of exactly where they are heading, but determined to leave the modern world behind. The results of this casually taken decision are both tragic and compelling.
