Intro

These vegetables can usually be planted once the soil is workable. (40°F and up)

Conditioning our soil is a vital step at the start of our growing season.

Our pH in our raised beds typically around 6.5.

We added about 1.5 of this organic compost (4 cm).

Organic matter like compost helps soil hold onto nutrients that plants need to develop.

This compmost will also help with moisture retention.

Soil test kits are an inexpensive way to see any nutrient defficiencies.

We use an all-purpose organic fertilizer (following bag instructions).

Pulverized Azomite contains over 70 trace minerals!

Check out the link in the description.

The trellis on this bed is 4' tall (120 cm).

The Seeding Square really cuts down on planting time.

Germination in cooler soil typically takes about 7-10 days.

Leave us a comment: What do you like to plant alongside your peas?

Check out our video on hardening off vegetables.

If we were planting spinach seeds, we would use the square.

Spinach spacing is typically 2-4 (5-10 cm).

Spinach can grow in soil as cool as 40°F (4-5°C).

Most radishes take just over a month to mature.

These seeds should germinate in a week or less.

Radishes can be planted as soon as the soil is workable.

Radishes do not like the heat, so container planting is a good option later in the season.

300+ radishes in this small bed!!!

The Canadian Magazine of Politics, Science, Art and Literature, May-October 1901, Vol. 17 (Classic Reprint)

Excerpt from The Canadian Magazine of Politics, Science, Art and Literature, May-October 1901, Vol. 17 He had a very lonely life at school but solitude has ever been the nurse of genius. He cared nothing for the ordinary games and pursuits of boys, and was in consequence much bullied. He had one great friend at Eton, but the friend died. Swinburne felt his death keenly. An amusing instance of Mr. Swinburne's peculiarly winning personality, even as a boy, is his conquest of Dr. Hawtrey, the Headmaster at Eton. Dr. Hawtrey entered upon the boy's education with many worthy aphorisms he was not to devote himself so much to poetry, etc., etc. The interview beginning thus, ended in the complete conversion

of the professor, and the arrangement that the boy was to have whatever of the old English dramatists he wanted from Dr. Haw trey's own library. The Canadian Magazine, Volume 14

Excerpt from The Pulp and Paper Magazine of Canada, 1918, Vol. 17 There were 465 accidents altogether. 421 caused temporary disability, 34 caused permanent disability, and 10 caused death. Machinery and tools were responsible for 2 deaths and 27 permanent disablements. Shafting and set screws caused 1 death and 3 permanent disablements. Falling objects caused 4 deaths and 2 Permanent disablements. Electric current caused 1 death, and drowning accidents accounted for 2

deaths. Of the 421 temporary cases. 30 developed blood poisoning. These figures speak loudly and teach us many valuable lessons. For instance, blood poisoning cases could be very much reduced if the injured parties would immediately apply for a First Aid dressing. I know many men consider it beneath their dignity to have slight cuts and bruises attended to, but isn't it better to pay attention to slight injuries than suffer the result of a poisoned limb? A Joint Catalogue of the Periodicals, Publications and Transactions of Societies, and Other Books Published at Intervals to be Found in the Various Libraries of the City of Toronto

Excerpt from Pulp and Paper Magazine of Canada, Vol. 17: July 3, 1919 The joy of the Allied Peoples over the signing of the peace treaty has doubtless been somewhat dimmed by the many delays and lengthy discussions that have taken place since the conference has been working on this important

document. The business world has had plenty of opportunity to consider the possible and probable effects of the treaty and the lack of any marked reaction one way or the other on the New York stock exchange seems to indicate that the business world had pretty well made up its mind some time ago.
