This open access book investigates female employment and the gender gap in the labor market and households during China's economic transition period. It provides the reader with academic evidence for understanding the mechanism of female labor force participation, the determinants of the gender gap in the labor market, and the impact of policy transformation on women's wages and employment in China from an economics perspective. The main content of this book includes three parts women's family responsibilities and women's labor supply (child care, parent care, and women's employment),

the gender gap in the labor market and society (gender gaps in wages, Communist Party membership, and participation in social activity), and the impacts of policy transformation on women's wages and employment (the social security system and the educational expansion policy on women's wages and employment) in China. This book provides academic evidence about these issues based on economics theories and econometric analysis methods using many kinds of long-term Chinese national survey data. This book is highly recommended to readers who are interested in up-to-date and in-depth empirical studies of the gender gap and women's employment in China during the economic transition period. 'Political Messaging in Music and Entertainment Spaces across the Globe' uniquely expands the frontiers of political communication by simultaneously focusing on content (political messaging) and platform (music and entertainment). As a compendium of valuable research work, it provides rich insights into the construction of political messages and their dissemination outside of the traditional and mainstream structural, process and behavioral research focus in the discipline. Researchers, teachers, students and other interested parties in political communication, political science, journalism and mass communication, sociology, music, languages, linguistics and the performing arts, communication studies, law and history, will find this book refreshingly handy in their inquiry. Furthermore, this book was conceptualized from a globalist purview and offers readers practical insights into how political messaging through music and entertainment spaces actually work across nation-states, regions and continents. Its authenticity is also further enhanced by the fact that most chapter contributors are scholars who are natives of their areas of study, and who painstakingly situate their work in appropriate historical contexts.

Neutrosophic Sets and Systems, book series, Vol. 11, 2016

How did gender figure in understandings of spatial realms, from the inner spaces of the body to the furthest reaches of the globe? How did women situate themselves in the early modern world, and how did they move through it, in both real and imaginary locations? How do new disciplinary and geographic connections shape the ways we think about the early modern world, and the role of women and men in it? These are the questions that guide this volume, which includes articles by a select group of scholars from many disciplines: Art History, Comparative Literature, English, German, History, Landscape Architecture, Music, and Women's Studies. Each essay reaches across fields, and several are written by interdisciplinary groups of authors. The essays also focus on many different places, including Rome, Amsterdam, London, and Paris, and on texts and images that crossed the Atlantic and the Mediterranean, or that portrayed real and imagined people who did. Many essays investigate topics key to the 'spatial turn' in various disciplines, such as borders and their permeability, actual and metaphorical spatial crossings, travel and displacement, and the built environment.

The meaning and significance of the institution of marriage has engendered angry and boisterous battles across the United States. This book uncovers broad cultural anxieties that fuel on-the-ground practices to reinforce a boundary of heterosexual marriage, questioning why marriage has become an issue of pervasive national preoccupation and anxiety.

Political Messaging in Music and Entertainment Spaces across the Globe. Volume 2.

This collection of readings is designed to clarify the relationship between social structures and psychological processes. Our awareness of the need for such a book derives from our extensive experiences in teaching a formal course for mental health professionals on gender and psychotherapy. The material in this anthology emphasizes the clinical implications of the new research and knowledge that has changed our understanding of the psychological development of women and men. Throughout the book, we present ideas that challenge conventional explanations of psychological distress in women and men and suggest alternative conceptualizations of these processes. As will be evident, our work is informed by and contributes to the growing field of knowledge produced by feminist scholars over the last decade. That this book on gender has more to say about women reflects the existence of a substantial body of research that reconceptualizes women's psychology. The corresponding research on men is still in its formative stages, due in part to the later development of a men's movement. Although many of the chapters focus on women, we have attempted in our discussion to consider the implications for men. We believe that the fundamental processes explored in this book are relevant to the understanding of both women and men.

After Marriage

This volume is intended to introduce university and seminary students and scholars to the neglected field of ritual studies, particularly within the larger context of biblical and theological studies. At the same time, the author hopes to further the discussion by interacting with numerous scholars in the field, providing an extensive bibliography of relevant works. Klingbeil defines the basic terms used in ritual studies and explains the concepts involved in interpreting biblical ritual. He offers a broad history of the study of biblical ritual, beginning with the critiques of ritual found in the Old Testament prophetic books and surveying attitudes toward ritual down to modern times. Drawing on the fields of anthropology and sociology, as well as his decade of work in the field, Klingbeil presents a comprehensive reading strategy for biblical ritual texts. In addition, he explores connections between ritual studies and theological research. This ground-breaking study promises to generate discussion about biblical ritual and provides an excellent introduction to this growing field of study for students and scholars.

Widely comparative using a nine-country sample (Australia, Canada, France, Germany, Italy, Portugal, Switzerland, the United Kingdom, and the United States of America) in the analysis of individual-level determinants of public opinion about immigration and extending to other countries like Belgium, Brazil, and Japan when evaluating contextual factors. Facets of International Law & Justice

"Kingsley Davis (1908-1997) was one of the pioneers in social demography, and was particularly identified with the theory of the demographic transition. This holds that the process of industrialization first causes mortality to decline, leading to a substantial rate of population growth and only later causes fertility to fall, leading eventually to the cessation of population growth. Kingsley Davis is especially remembered for his arresting and forceful critique of family-planning programs intended to achieve zero population growth. Before he devoted his major attention to social demography, Davis had distinguished himself through influential articles on the structure of family and kinship, including the topics of jealousy and sexual property, the sociology of prostitution, and illegitimacy. He had an early interest in structural-functional analysis, which resulted in his famous and controversial article on stratification, co-authored with Wilbert Moore, and his equally famous presidential address to the American Sociological Association in 1959. David Heer's biography of Kingsley Davis is based on material contained in the Kingsley Davis Archive at the Hoover Institution Library at Stanford University,

the Kingsley Davis graduate file at Harvard University, the interview of Kingsley Davis by Jean van der Tak in *Demographic Destinies* (1990), and David Heer's personal relationship with Kingsley Davis. The book also contains thirty of the most important writings by Kingsley Davis. These were chosen, in part, for the number of citations received in the Cumulative Social Science Citation Index, and in part to ensure that readers would be able to assess the continuity of Kingsley Davis's ideas at all stages of his career."

political science is for everybody

2008 was a watershed year for global finance. The banking system was eventually pulled back from the brink, but the world was saddled with the worst slump since the 1930s Depression, and millions were left unemployed. While numerous books have addressed the financial crisis, very little has been written about its social consequences. Journalist Tom Clark draws on the research of a transatlantic team led by Professors Anthony Heath and Robert D. Putnam to determine the great recession's toll on individuals, families, and community bonds in the United States and the United Kingdom. The ubiquitous metaphor of the crisis has been an all-encompassing "financial storm," but Clark argues that the data tracks the narrow path of a tornado—destroying some neighborhoods while leaving others largely untouched. In our vastly unequal societies, disproportionate suffering is being meted out to the poor—and the book's new analysis suggests that the scars left by unemployment and poverty will linger long after the economy recovers. Politicians on both sides of the Atlantic have shown more interest in exploiting the divisions of opinion ushered in by the slump than in grappling with these problems. But this hard-hitting analysis provides a wake-up call that all should heed.

Men and women remain unequal in the United States, but in this provocative book, Robert Max Jackson demonstrates that gender inequality is irrevocably crumbling. *Destined for Equality*, the first integrated analysis of gender inequality's modern decline, tells the story of that progressive movement toward equality over the past two centuries in America, showing that women's status has risen consistently and continuously. Jackson asserts that women's rising status has been due largely to the emergence of modern political and economic organizations, which have transformed institutional priorities concerning gender. Although individual politicians and businessmen generally believed women should remain in their traditional roles, Jackson shows that it was simply not in the interests of modern enterprise and government to foster inequality. The search for profits, votes, organizational rationality, and stability all favored a gender-neutral approach that improved women's status. The inherent gender impartiality of organizational interests won out over the prejudiced preferences of the men who ran them. As economic power migrated into large-scale organizations inherently indifferent to gender distinctions, the patriarchal model lost its social and cultural sway, and women's continual efforts to rise in the world became steadily more successful. Total gender equality will eventually prevail; the only questions remaining are what it will look like, and how and when it will arrive.

Handbook of Marriage and the Family

Large housing estates of the post-war era have shaped the face of many cities throughout Europe. In the original plans of the 1950s-1980s they were to amend the urban structure and in many cases they were expected to enable a superior form of communality and urbanity. The estates were built to ease the housing shortage, but were also thought to quite literally become the home for a "new society", be it under socialist regimes or the democratic welfare state. The reformation of society was expected to be supported by the environment of the newly built estates and, most crucially, their community spaces. The different manifestations of these community spaces were the subject of the second conference of the 45plus network, which took place in Darmstadt in September 2012 and which is documented in this volume. By focusing on community spaces, such as community centers, schools, churches, hospitals, shopping districts but also parks, open spaces and sport-grounds, the contributions to the conference addressed spaces that were thought to be particularly important points of identification for the "new societies" these estates were expected to foster. Community spaces were planned in order to

hold the housing estates together – as well designed and attractive built environments, as social hubs and especially as symbolic anchors. Quite often, they boasted prominent design features, intended to serve as recognisable markers of the estates and their programmatic subtexts. While planners and politicians conceptualized community spaces with their potential to shape identification in view, communities tended to appropriate such spaces in different ways and to reinterpret their meanings. In short, local inhabitants – as well as the broader public – possibly identified with community spaces, their individual features and with the ideas and practices they associated with them in significantly different ways than originally intended. Today, the continuing tension between intention and appropriation of community spaces can be understood as an indicator of identification processes and appears to be one of the major challenges in the redevelopment of large housing estates, but might also provide unexpected opportunities. Großwohnsiedlungen der Nachkriegszeit haben das Gesicht vieler Städte in ganz Europa geprägt. Ursprünglich sollten diese Planungen der 1950er bis 1980er Jahre die Stadtstruktur verbessern und teilweise auch eine neue Form von Gemeinschaftlichkeit und Urbanität schaffen. In erster Linie zur Linderung der Wohnungsnot gebaut, wurden die Siedlungen auch als buchstäbliche Heimat für eine "neue Gesellschaft" geplant, sei es unter sozialistischen Regimes oder im demokratischen Wohlfahrtsstaat. Die Umgestaltung der Gesellschaft sollte durch die Gestaltung der neuen Siedlungen unterstützt werden, wobei den gemeinschaftlich genutzten Räumen ein besonderer Stellenwert zukam. Die verschiedenen Ausformungen dieser Räume waren Gegenstand der zweiten Konferenz des 45plus-Netzwerk, die in Darmstadt im September 2012 stattfand und in diesem Band dokumentiert wird. Durch die Fokussierung auf gemeinschaftlich genutzte Räume wie Parks, Freiflächen und Sportplätze, aber auch Gemeindezentren, Schulen, Kirchen, Krankenhäuser, Einkaufsstraßen, stellen die in den Beiträgen der Konferenz angesprochen Räume wichtige Identifikationspunkte der "neue Gesellschaften" dar. Gemeinschaftliche Räume wurden geplant, um die neuen Wohnsiedlungen zusammenzuhalten – als gut gestaltete und attraktive gebaute Umwelt, als soziale Scharniere und vor allem als symbolische Anker. Oft setzten sie prominente Gestaltungsmerkmale um so als Symbole der Siedlungen und ihrer programmatischen Subtexte zu dienen. Während Planer und Politiker die gemeinschaftlichen Räume mit dem Fokus auf ihr Potenzial als Ort der Identifikation gestalteten, wurden diese Räume durch die sie nutzenden Gemeinden in unterschiedlicher Weise angeeignet und auch uminterpretiert. Kurz gesagt, Bewohner – wie auch die breite Öffentlichkeit – verstanden, interpretierten und nutzten die gemeinschaftlichen Räume und deren individuellen Eigenschaften möglicherweise auf deutlich andere Art und Weise als ursprünglich geplant. Heute können die anhaltenden Spannungen zwischen Absicht und Nutzung der gemeinschaftlichen Räume als Indikator für Identifikationsprozesse verstanden werden und stellen gleichzeitig eine der großen Herausforderungen bei der Sanierung von Großwohnsiedlungen dar, offenbaren jedoch vielleicht auch unerwartete Chancen.

Kingsley Davis

The insurrection of January 6, 2021, demonstrated conclusively that tribalism in the United States has become dangerous. The "other side" is no longer viewed as a well-intentioned opponent but as an existential threat. If we don't change course, American democracy is far from assured. This book outlines specific steps that average citizens can take to back the nation away from the brink. Instead of looking to political leaders, institutions, or policy for solutions to extreme partisanship, Christopher Beem argues that concerned citizens can and must take up the cause. He spells out seven civic practices we can all follow that will help us work against our antidemocratic tendencies and reorient the nation toward the "more perfect union" of our Founders. Beem's road map to restore our democracy draws on thinkers from Aristotle and Thomas Aquinas to James Madison, Hannah Arendt, Abraham Lincoln, and Franklin Delano Roosevelt. Empathetic and eminently reasonable, *The Seven Democratic*

Virtues presents practical advice for what each of us can do to change the political discourse and save our democracy. This is necessary reading for our politics today—and in the future.

Hard Times

Many questions remain unanswered about the observable differences in voting behavior, partisanship, and cultural attitudes among men and women. Latino political participation in the United States is generally lower than the rest of the population, mainly due to their high proportion of youth and foreign born populations that are ineligible to vote. This dynamic is slowly changing, partly as a result of the rapidly growing Latino population in the United States. This book delves deeper into the complex gender differences for Latino political behavior. More specifically, it is a political analysis of the diverse U.S. Latino population and the interacting factors that can influence male and female differences in voting and policy attitudes. Christina E. Bejarano carefully unpacks more aspects of the gender category for Latinos, including analyzing the gender differences in Latino political behavior across national origin, foreign born status, and generational status. The Latino gender gap can have far-reaching political implications on electoral politics. As the Latino population highlights their growing political sway, the major political parties have and will strategically mobilize and court the Latino electorate, Latinas in particular.

Forced Marriage: Introducing a social justice and human rights perspective brings together leading practitioners and researchers from the disciplines of criminology, sociology and law. Together the contributors provide an international, multi-disciplinary perspective that offers a compelling alternative to prevailing conceptualisations of the problem of forced marriage. The volume examines advances in theoretical debates, analyses existing research and presents new evidence that challenges the cultural essentialism that often characterises efforts to explain, and even justify, this violation of women's rights. By locating forced marriage within broader debates on violence against women, social justice and human rights, the authors offer an intersectional perspective that can be used to inform both theory and practical efforts to address violence against diverse groups of women. This unique book, which is informed by practitioner insights and academic research, is essential reading for practitioners and students of sociology, criminology, gender studies and law.
