Cartographies of Diaspora

By addressing questions of culture, identity and politics, Cartographies of Diaspora throws new light on discussions about 'difference' and 'diversity', informed by feminism and post-structuralism. It examines these themes by exploring the intersections of 'race', gender, class, sexuality, ethnicity, generation and nationalism in different discourses, practices and political contexts. The first three chapters map the emergence of 'Asian' as a racialized category in post-war British popular and political discourse and state practices. It documents Asian cultural and political responses paying particular attention to the role of gender and generation. The remaining six chapters analyse the debate on 'difference', 'diversity' and 'diaspora' across different sites, but mainly within feminism, anti-racism, and post-structuralism.

Ulysses

Ulysses is a novel by the Irish writer James Joyce. It is considered to be one of the most important works of Modernist literature, it has been called "a demonstration and summation of the entire movement". "Before Joyce, no writer of fiction had so foregrounded the process of thinking." However, even proponents of Ulysses such as Anthony Burgess have described the book as "inimitable, and also possibly mad". There have been at least 18 different "Ulysses" editions (Joyce's handwritten

manuscripts were typed by a number of amateur typists). This eBook is a faithful reproduction of the the notable first book edition published in Paris on 2 February 1922 by Sylvia Beach at Shakespeare and Company (only 1000 copies were printed). James Augustine Aloysius Joyce (2 February 1882 – 13 January 1941) was an Irish novelist and poet, considered to be one of the most influential writers in the modernist avant-garde of the early 20th century. Joyce is best known for *Ulysses* (1922), a landmark work in which the episodes of Homer's *Odyssey* are paralleled in an array of contrasting literary styles, perhaps most prominent among these the stream of consciousness technique he perfected. Other major works are the short-story collection *Dubliners* (1914), and the novels *A Portrait of the Artist as a Young Man* (1916) and *Finnegans Wake* (1939). His complete oeuvre also includes three books of poetry, a play, occasional journalism, and his published letters.

A History of Modern Palestine

An update of the history of Palestine since the 1800s, which includes recent dramatic events.

The Bible Unearthed

In this groundbreaking work that sets apart fact and legend, authors Finkelstein and Silberman use significant archeological discoveries to provide historical information about biblical Israel and its neighbors. In this iconoclastic and provocative work, leading scholars Israel Finkelstein and Neil Asher Silberman draw on recent archaeological research to present a dramatically revised portrait of ancient Israel and its neighbors. They argue that crucial evidence (or a telling lack of evidence) at digs in Israel, Egypt, Jordan, and Lebanon suggests that many of the most famous stories in the Bible—the wanderings of the patriarchs, the Exodus from Egypt, Joshua's conquest of Canaan, and David and Solomon's vast empire—reflect the world of the later authors rather than actual historical facts. Challenging the fundamentalist readings of the scriptures and marshaling the latest archaeological evidence to support its new vision of ancient Israel, *The Bible Unearthed* offers a fascinating and controversial perspective on when and why the Bible was written and why it possesses such great spiritual and emotional power today.

Empire of Borders

The United States is outsourcing its border patrol abroad—and essentially expanding its borders in the process. The twenty-first century has witnessed the rapid hardening of international borders. Security, surveillance, and militarization are widening the chasm between those who travel where they please and those whose movements are restricted. But that is only part of the story. As journalist Todd Miller reveals in *Empire of Borders*, the nature of US borders has changed. These boundaries have effectively expanded thousands of miles outside of US territory to encircle not simply American land but Washington's interests. Resources, training, and agents from the United States infiltrate the Caribbean and Central America; they reach across the Canadian border; and they go even farther afield, enforcing the division between Global South and North. The highly publicized focus on a wall between the United States and Mexico misses the bigger picture of strengthening border enforcement around the world. *Empire of Borders* is a tremendous work of narrative investigative journalism that traces the rise of this border regime. It delves into the practices of "extreme vetting," which raise the possibility of "ideological" tests and cyber-policing for migrants and visitors, a level of scrutiny that threatens fundamental freedoms and allows, once again, for America's security concerns to infringe upon the sovereign rights of other nations. In Syria, Guatemala, Kenya, Palestine, Mexico, the Philippines, and elsewhere, Miller finds that borders aren't making the world safe—they are the frontline in a global war against the poor.

Rebel Courts

Rebel Courts presents an argument that it is possible for non-state armed groups in situations of armed conflict to legally establish and operate a system of courts to administer justice. Neither the concept of the rule of law nor the general principle of state sovereignty stands in the way of framing an understanding of the rule of law adapted to the reality of rebel governance in the area of justice. Legal standards applicable to non-state armed groups in situations of international or non-international armed conflict, including international humanitarian law, international human rights law, and international criminal law, recognise their authority to regularly constitute or establish non-state courts. The lawful operation of such courts is of course subject to requirements of due process, corresponding to an array of guarantees that must be respected in all cases. Rebel courts that are regularly constituted and

operate in a manner consistent with due process guarantees demand a certain degree of recognition by international institutions, by states not involved in the conflict, to some extent by the territorial state, and even by other non-state armed groups. These normative claims are grounded in a series of detailed case studies of the administration of justice by non-state armed groups in a diverse range of conflict situations, including the FARC (Colombia), Islamic State (Syria and Iraq), Taliban (Afghanistan), Tamil Tigers (Sri Lanka), PKK (Turkey), PYD (Syria), and KRG (Iraq).

Water for People, Water for Life

The world's freshwater resources are coming under growing pressure through such environmental hazards as human waste, urbanization, industrialization, and pesticides. The problems are exacerbated through drought in many parts of the world. The improvement of the water quality itself and access to it have been major concerns for politicians and development agencies for over a decade. First officially formulated at the Rio Earth Summit of 1992, they have been restated or expanded since then. The UN Millennium Declaration of 2000 transformed general guidelines into specific targets. The international community pledged "to halve by 2015 the proportion of people who are unable to reach, or to afford, safe drinking water" and "to stop the unsustainable exploitation of water resources, by developing water management strategies at the regional, national and local levels, which promote both equitable access and adequate supplies." Thus, ten years after Rio it is time to take stock. Based on the collective inputs of 23 United Nations agencies and convention secretariats, this Report offers a global overview of the state of the world's freshwater resources. It is part of an on-going assessment process to develop policies and help with their implementation as well as to measure any progress towards achieving sustainable use of water resources. Generously illustrated with more than 25 full-color global maps and numerous figures, the report reviews progress and trends and presents seven pilot case studies of river basins representing various social, economic and environmental settings: Lake Titicaca (Bolivia, Peru); Senegal river basin (Senegal, Mali, Mauritania, Guinea); Seine Normandy (France); Lake Peipsi/Chudskoe (Estonia, Russia); Ruhuna basin (Sri Lanka); Greater Tokyo region (Japan); and Chao Phraya (Thailand). It assesses progress in 11 challenge areas, including health, food, environment, shared water resources, cities, industry, energy, risk management, knowledge, valuing water and governance. Proposing methodologies and indicators for measuring sustainability, it lays the foundations for regular, system-wide monitoring and reporting by the UN, together with the development of standardized methodologies and data. With its comprehensive maps, glossary, references and coverage of a broad range of themes and examples of real-world river basins, the UN World Water Development Report will no doubt prove to be a most valuable reference work. Visit the United Nation's Water Portal for more information on the report and on the International Year of Freshwater 2003.

The Temptation of Innocence

A highly insightful essay on the culture of dependency and its damaging effects on the moral fiber of society; from corporate welfare to affirmative action, the author takes on the culture of coping out. A book against depression, existential angst, cry-babies and whining "victims," either acting as a child in a candy store or as a martyr of one's own fears. Men against women, women against men, isn't it time to grow up and take charge of our own destiny?

Diversity, Globalization and the Ways of Nature

Mirrors

In *Mirrors*, Galeano smashes aside the narrative of conventional history and arranges the shards into a new pattern, to reveal the past in radically altered form. From the Garden of Eden to twenty-first-century cityscapes, we glimpse fragments in the lives of those who have been overlooked by traditional histories: the artists, the servants, the gods and the visionaries, the black slaves who built the White House, and the women who were bartered for dynastic ends

Behold a Pale Horse

Bill Cooper, former United States Naval Intelligence Briefing Team member, reveals information that remains hidden from the public eye. This information has been kept in Top Secret government files since

the 1940s. His audiences hear the truth unfold as he writes about the assassination of John F. Kennedy, the war on drugs, the Secret Government and UFOs. Bill is a lucid, rational and powerful speaker who intent is to inform and to empower his audience. Standing room only is normal. His presentation and information transcend partisan affiliations as he clearly addresses issues in a way that has a striking impact on listeners of all backgrounds and interests. He has spoken to many groups throughout the United States and has appeared regularly on many radio talk shows and on television. In 1988 Bill decided to "talk" due to events then taking place worldwide, events which he had seen plans for back in the early '70s. Since Bill has been "talking," he has correctly predicted the lowering of the Iron Curtain, the fall of the Berlin Wall and the invasion of Panama. All Bill's predictions were on record well before the events occurred. Bill is not a psychic. His information comes from Top Secret documents that he read while with the Intelligence Briefing Team and from over 17 years of thorough research. "Bill Cooper is the world's leading expert on UFOs." -- Billy Goodman, KVEG, Las Vegas. "The onlt man in America who has all the pieces to the puzzle that has troubled so many for so long." -- Anthony Hilder, Radio Free America "William Cooper may be one of America's greatest heros, and this story may be the biggest story in the history of the world." -- Mills Crenshaw, KTALK, Salt Lake City. "Like it or not, everything is changing. The result will be the most wonderful experience in the history of man or the most horrible enslavement that you can imagine. Be active or abdicate, the future is in your hands." -- William Cooper, October 24, 1989.

I See Satan Fall Like Lightning

Rene Girard holds up the gospels as mirrors that reveal our broken humanity, and shows that they also reflect a new reality that can make us whole. Like Simone Weil, Girard looks at the Bible as a map of human behavior, and sees Jesus Christ as the turning point leading to new life. The title echoes Jesus' words: "I saw Satan falling like lightning from heaven". Girard persuades us that even as our world grows increasingly violent the power of the Christ-event is so great that the evils of scapegoating and sacrifice are being defeated even now. A new community, God's nonviolent kingdom, is being realized -- even now.

World War Z

An account of the decade-long conflict between humankind and hordes of the predatory undead is told from the perspective of dozens of survivors who describe in their own words the epic human battle for survival, in a novel that is the basis for the June 2013 film starring Brad Pitt. Reissue. Movie Tie-In.

Liquid Fear

Modernity was supposed to be the period in human history when the fears that pervaded social life in the past could be left behind and human beings could at last take control of their lives and tame the uncontrolled forces of the social and natural worlds. And yet, at the dawn of the twenty-first century, we live again in a time of fear. Whether its the fear of natural disasters, the fear of environmental catastrophes or the fear of indiscriminate terrorist attacks, we live today in a state of constant anxiety about the dangers that could strike unannounced and at any moment. Fear is the name we give to our uncertainty in the face of the dangers that characterize our liquid modern age, to our ignorance of what the threat is and our incapacity to determine what can and can't be done to counter it. This new book by Zygmunt Bauman one of the foremost social thinkers of our time is an inventory of liquid modern fears. It is also an attempt to uncover their common sources, to analyse the obstacles that pile up on the road to their discovery and to examine the ways of putting them out of action or rendering them harmless. Through his brilliant account of the fears and anxieties that weigh on us today, Bauman alerts us to the scale of the task which we shall have to confront through most of the current century if we wish our fellow humans to emerge at its end feeling more secure and self-confident than we feel at its beginning.

Testo Junkie

This visionary book on gender and sexuality weaves together high theory and intimate memoir, with "spectacular" results—"and the gendered body will never be the same again" (Jack Halberstam). What constitutes a "real" man or woman in the twenty-first century? Since birth control pills, erectile dysfunction remedies, and factory-made testosterone and estrogen were developed, biology is definitely no longer destiny. In this penetrating analysis of gender, Paul B. Preciado shows the ways in which the synthesis of hormones since the 1950s has fundamentally changed how gender and sexual identity

are formulated, and how the pharmaceutical and pornography industries are in the business of creating desire. This riveting continuation of Michel Foucault's *The History of Sexuality* also includes Preciado's diaristic account of his own use of testosterone every day for one year, and its mesmerizing impact on his body as well as his imagination.

A History of Warfare

The acclaimed author and preeminent military historian John Keegan examines centuries of human conflict. From primitive man in the bronze age to the end of the cold war in the twentieth century, Keegan shows how armed conflict has been a primary preoccupation throughout the history of civilization and how deeply rooted its practice has become in our cultures. "Keegan is at once the most readable and the most original of living military historians . . . *A History of Warfare* is perhaps the most remarkable study of warfare that has yet been written."--The New York Times Book Review.

New approaches to tourism study demonstrate a notable 'critical turn' – a shift in thought that emphasises interpretative and critical modes of tourism inquiry. The chapters in this volume reflect this emerging critical school of tourism studies and represent a coordinated effort of tourism scholars whose work engages innovative research methodologies. Since such work has been dispersed across a variety of tourism-related and other research fields, this book responds to a pressing need to consolidate recent advances in a single text. Adopting a broad definition of 'criticality', the contributors seek to find 'fresh' ways of theorising tourism by locating the phenomenon in its wider political, economic, cultural and social contexts. The collection addresses the power relations underpinning the production of academic knowledge; presents a range of qualitative data collection methods which confront the field's dominant (post)positivist approaches; foregrounds the emotional dynamics of research relations and explores the personal, the political and the situated nature of research journeys. The book has been divided into two parts, with the essays in the first part establishing a context-specific framework for engaging philosophical and theoretical debates in contemporary tourism enquiry. The second set of essays then present, discuss and critique specific methodologies, research techniques, methods of interpretation and writing strategies, all of which are in some sense illustrative of 'critical' tourism research. Contributors range from postgraduate students to established academics and are drawn from both the geopolitical margins and the 'powerbases' of the tourism academy. Their various relationships with the English-speaking academy thus range from relative 'outsider' to well-positioned 'insider' and as a result, their essays are reflective of a range of locations within the complexly spun web of academic power relations and social divisions.

The Critical Turn in Tourism Studies

In this edition, originally published in 1983, the late Professor Raymond Aron, one of France's most distinguished social scientists, presented a major re-evaluation of Carl von Clausewitz, 'the genius of war'. He sees in Clausewitz a political philosopher of major importance, whose impact and significance permeate many facets of modern society. Yet Clausewitz's reputation was entirely posthumous, for his great work, *On War*, was published after his death, and in his lifetime he achieved only a limited

reputation as a military thinker and planner. Even today he is more often quoted than closely read. Aron begins by elucidating the complexity of Clausewitz's thought and by describing his main ideas. He gives an account of the successive phases in the development of *On War*, and traces the different interpretations of Clausewitz's doctrine in Germany, in France and in Soviet Russia. Finally, Aron analyses many aspects of the present world using the concepts of Clausewitz, and is therefore able to examine such modern phenomena as the theory of the nuclear deterrent and 'total war' in Clausewitzian terms. This is a book of piercing insights by a writer of world-wide reputation, who used the Clausewitz world-view as a means of political analysis. It is thus still of great importance and interest to contemporary historians and to all who are concerned with military and political affairs.

Clausewitz

Ami Pedahzur and Arie Perliger, world experts on the study of terror and security, propose a theory of violence that contextualizes not only recent acts of terror but also instances of terrorism that stretch back centuries. Beginning with ancient Palestine and its encounters with Jewish terrorism, the authors analyze the social, political, and cultural factors that sponsor extreme violence, proving religious terrorism is not the fault of one faith, but flourishes within any counterculture that adheres to a totalistic ideology. When a totalistic community perceives an external threat, the connectivity of the group and the rhetoric of its leaders bolster the collective mindset of members, who respond with violence. In ancient times, the Jewish sicarii of Judea carried out stealth assassinations against their Roman occupiers. In the mid-twentieth century, to facilitate their independence, Jewish groups committed acts of terror against British soldiers and the Arab population in Palestine. More recently, Yigal Amir, a member of a Jewish terrorist cell, assassinated Yitzhak Rabin to express his opposition to the Oslo Peace Accords. Conducting interviews with former Jewish terrorists, political and spiritual leaders, and law-enforcement officials, and culling information from rare documents and surveys of terrorist networks, Pedahzur and Perliger construct an extensive portrait of terrorist aggression, while also describing the conditions behind the modern rise of zealotry.

Jewish Terrorism in Israel

This novel explores Captain Robert Fitzroy's abduction of Jemmy Button from his home in Cape Horn and Fitzroy's attempt to "civilize" Button in England in order to return him to his country as a bearer of "enlightened society." The experiment leads to tragic consequences. *Tierra del Fuego* deals with European arrogance and exploitation without resorting to the cliché of the "Noble Savage."

Tierra Del Fuego

Confronting contemporary issues in museum practice, this collection provides a practical guide to all aspects of collections care. Contributors cover a wide range of issues including: conservation practice the monitoring and control of light relative humidity and atmospheric pollution packing, handling and transportation of collections storage and access to collections biological infestation disaster planning. Including material and sources that have, up until now, not easily been available, students of museum studies and professionals within the industry now have this invaluable aid to their work.

Care of Collections

An eye-opening biography of one of the most influential psychiatrists of the modern age, drawing from his lectures, conversations, and own writings. "An important, firsthand document for readers who wish to understand this seminal writer and thinker." —Booklist In the spring of 1957, when he was eighty-one years old, Carl Gustav Jung undertook the telling of his life story. *Memories, Dreams, Reflections* is that book, composed of conversations with his colleague and friend Aniela Jaffé, as well as chapters written in his own hand, and other materials. Jung continued to work on the final stages of the manuscript until shortly before his death on June 6, 1961, making this a uniquely comprehensive reflection on a remarkable life. Fully corrected, this edition also includes Jung's VII *Sermones ad Mortuos*.

Biodiversity, Science and Governance

In the latter half of the twentieth century, millions of impoverished people all over Latin America participated in illegal seizures of urban land. As many cities became saturated with squatter settlements by the 1980s, it was expected that such invasions would wane. But the increased economic vulnerability and expansion of informal labor activity brought about by neoliberal government policies spurred yet more invasions. Their goals remained the same: reliable electricity, potable water, sewer drainage, and legal title to illegally acquired land. But changes in the economic and political context required different means for achieving these goals. Social safety nets were weakened, organized labor lost power, and some urban service monopolies were privatized—and the introduction of democratic municipal elections offered new avenues to secure these much-needed services. In this careful study of ten neighborhoods in Quito, Ecuador, and Lima, Peru, Paul Dosh examines these new patterns to cast light on the reasons why some neighborhood groups succeed and survive while others do not.

Architecture and Tourism

Trying to be Ernest Hemingway is never easy. After reading *A Moveable Feast*, aspiring novelist Enrique Vila-Matas moves to Paris to be closer to his literary idol, Ernest Hemingway. Surrounded by the writers, artists and eccentrics of '70s Parisian café culture, he dresses in black, buys two pairs of reading glasses, and smokes a pipe like Sartre. Now, in later life, he reflects on his youth while giving a three-day lecture on irony. And he's still convinced he looks like Hemingway. *Never Any End to Paris* is a hilarious, playful novel about literature and the art of writing, and how life never quite goes to plan.

Demanding the Land

The historiography of modern India is largely a pageant of presumed virtues: harmonious territorial unity, religious impartiality, the miraculous survival of electoral norms in the world's most populous democracy. Even critics of Indian society still underwrite such claims. But how well does the "Idea of India" correspond to the realities of the Union? In an iconoclastic intervention, Marxist historian Perry Anderson provides an unforgettable reading of the Subcontinent's passage through Independence and the catastrophe of Partition, the idiosyncratic and corrosive vanities of Gandhi and Nehru, and the close interrelationship of Indian democracy and caste inequality. *The Indian Ideology* caused uproar on first publication in 2012, not least for breaking with euphemisms for Delhi's occupation of Kashmir. This new, expanded edition includes the author's reply to his critics, an interview with the Indian weekly *Outlook*, and a postscript on India under the rule of Narendra Modi.

Never Any End to Paris

"Rarely have more profound changes in American foreign policy been called for than today," begins Amitai Etzioni in the preface to this book. Yet Etzioni's concern is not to lay blame for past mistakes but to address the future: What can now be done to improve U.S. relations with the rest of the world? What should American policies be toward recently liberated countries such as Iraq and Afghanistan, or rogue states like North Korea and Iran? When should the United States undertake humanitarian intervention abroad? What must be done to protect America from nuclear terrorism? The author asserts that providing basic security must be the first priority in all foreign policy considerations, even ahead of efforts to democratize. He sets out essential guidelines for a foreign policy that makes sense in the real world, builds on moral principles, and creates the possibility of establishing positive relationships with Muslim nations and all others. Etzioni has considered the issues deeply and for many years. His conclusions fall into no neat categories—neither "liberal" nor "conservative"—for he is guided not by ideology but by empirical evidence and moral deliberation. His proposal rings with the sound of reason, and this important book belongs on the reading list of every concerned leader, policy maker, and voter in America.

The Indian Ideology

Edward Said experienced both British and American imperialism as the old Arab order crumbled in the late 1940s and early 1950s. This account of his early life reveals how it influenced his books *Orientalism* and *Culture and Imperialism*. Edward Said was born in Jerusalem and brought up in Cairo, spending every summer in the Lebanese mountain village of Dhour el Shweir, until he was 'banished' to America in 1951. This work is a mixture of emotional archaeology and memory, exploring an essentially irrecoverable past. As ill health sets him thinking about endings, Edward Said returns to his beginnings in this personal memoir of his ferociously demanding 'Victorian' father and his adored, inspiring, yet ambivalent mother.

Mysteries from Forgotten Worlds

Hugh Clapperton was one of the first British explorers to enter the central Sahara, but his journals have never been published before. Recently discovered in South Africa, they show him to be one of the most sensitive and sympathetic travellers, his observations untainted by any sense of moral superiority. Hugh Clapperton has a sharp eye for detail, be it wind-stiller magicians, the effect of the evil eye or slave skeletons clustered around well heads. He hears musicians in jackal-headed masks and bagpipes in a wedding procession. He has a gift for friendship, feasting locals, offering himself to women and delighting in the company of both dignified tribal sheikhs and fearsome renegades like Mustapha the Red.

Traditional Mediterranean Architecture

Tourism and Degrowth develops a conceptual framework and research agenda for exploring the relationship between tourism and degrowth. Rapid and uneven expansion of tourism as a response to the 2008 economic crisis has proceeded in parallel with the rise of social discontent concerning so-called "overtourism." Meanwhile, despite decades of concerted global effort to achieve sustainable development, socioecological conflicts and inequality have rarely reversed, but in fact increased in many places. Degrowth, understood as both social theory and social movement, has emerged within the context of this global crisis. However, thus far the vibrant degrowth discussion has yet to engage systematically with the tourism industry in particular, while, by the same token, tourism research has largely neglected explicit discussion of degrowth. This volume brings the two discussions together to interrogate their complementarity. Identifying a growth imperative in the basic structure of the capitalist economy, the contributors contend that mounting critique of overtourism can be understood as a structural response to the ravages of capitalist development more broadly. Debate concerning overtourism thus offers a valuable opportunity to re-politicise discussion of tourism development generally. Exploring the potential for degrowth to facilitate a truly sustainable tourism, *Tourism and Degrowth* will be of great interest to scholars of tourism, environmental sustainability and development. The chapters were originally published as a special issue of the *Journal of Sustainable Tourism*.
