The Prairie Chief

'The Prairie Chief' is a Western novel set during the Settlers era, where a Native American chieftain named Whitewing was featured prominently. He was a Red Indian of the North American prairies. Though not a chief of the highest standing, he was a very great man in the estimation of his tribe, for, besides being possessed of qualities which are highly esteemed among all savages—such as courage, strength, agility, and the like—he was a deep thinker, and held speculative views in regard to the Great Manitou (God), as well as the ordinary affairs of life, which perplexed even the oldest men of his tribe, and induced the younger men to look on him as a profound mystery.

The Prairie Chief

Whitewing was a Red Indian of the North American prairies. The Prairie Chief

Robert Michael Ballantyne (24 April 1825 - 8 February 1894) was a Scottish author of juvenile fiction who wrote more than 100 books. He was also an accomplished artist, and exhibited some of his water-colours at the Royal Scottish Academy. In 1848 he published his first book *Hudson's Bay: or, Life in the Wilds of North America*, and for some time was employed by the publishers Messrs Constable. In 1856 he gave up business to focus on his literary career, and began the series of adventure stories for the young with which his name is popularly associated.

The Prairie Chief

The Alarm. Whitewing was a Red Indian of the North American prairies. Though not a chief of the highest standing, he was a very great man in the estimation of his tribe, for, besides being possessed of qualities which are highly esteemed among all savages--such as courage, strength, agility, and the like--he was a deep thinker, and held speculative views in regard to the Great Manitou (God), as well as the ordinary affairs of life, which perplexed even the oldest men of his tribe, and induced the younger men to look on him as a profound mystery. Indeed the feelings of the latter towards Whitewing amounted almost to veneration, for while, on the one hand, he was noted as one of the most fearless among the braves, and a daring assailant of that king of the northern wilderness, the grizzly bear, he was, on the other hand, modest and retiring--never boasted of his prowess, disbelieved in the principle of revenge, which to most savages is not only a pleasure but a duty, and refused to decorate his sleeves or leggings with the scalp-locks of his enemies. Indeed he had been known to allow more than one enemy to

escape from his hand in time of war when he might easily have killed him. Altogether, Whitewing was a monstrous puzzle to his fellows, and much beloved by many of them. The only ornament which he allowed himself was the white wing of a ptarmigan. Hence his name. This symbol of purity was bound to his forehead by a band of red cloth wrought with the quills of the porcupine. It had been made for him by a dark-eyed girl whose name was an Indian word signifying "light heart." But let it not be supposed that Lightheart's head was like her heart. On the contrary, she had a good sound brain, and, although much given to laughter, jest, and raillery among her female friends, would listen with unflagging patience, and profound solemnity, to her lover's soliloquies in reference to things past, present, and to come. One of the peculiarities of Whitewing was that he did not treat women as mere slaves or inferior creatures. His own mother, a wrinkled, brown old thing resembling a piece of singed shoe-leather, he loved with a tenderness not usual in North American Indians, some tribes of whom have a tendency to forsake their aged ones, and leave them to perish rather than be burdened with them. Whitewing also thought that his betrothed was fit to hold intellectual converse with him, in which idea he was not far wrong. At the time we introduce him to the reader he was on a visit to the Indian camp of Lightheart's tribe in Clearvale, for the purpose of claiming his bride. His own tribe, of which the celebrated old warrior Bald Eagle was chief, dwelt in a valley at a considerable distance from the camp referred to. There were two other visitors at the Indian camp at that time. One was a Wesleyan missionary who had penetrated to that remote region with a longing desire to carry the glad tidings of salvation in Jesus to the red men of the prairie. The other was a nondescript little white trapper, who may be aptly described as a mass of contradictions....

The Prairie Chief

Notion Press proudly brings to you timeless classics from ancient texts to popular modern classics. This carefully chosen collection of books is a celebration of literature, our tribute to the pioneers, the legends and the giants of the literary world. Apart from being the voice of indie writers, we also want to introduce every reader to read all kinds of literature. In this series, you will find a wide range of books-from popular classics like the works of Shakespeare and Charlotte Brontë to rare gems by the likes of Edith Wharton and James Fenimore Cooper.

The Prairie Chief

This is a reproduction of the original artefact. Generally these books are created from careful scans of the original. This allows us to preserve the book accurately and present it in the way the author intended. Since the original versions are generally quite old, there may occasionally be certain imperfections within these reproductions. We're happy to make these classics available again for future generations to enjoy!

The Prairie Chief

In the preface to *The Great Indian Chief of the West: Or Life and Adventures of Black Hawk*, Benjamin Drake shared with the reader the hope that his book might "contribute to awaken the public mind to a sense of the wrongs inflicted upon the Indians, and to arouse the Christian statesmen of this land to the adoption of a more liberal, upright and benevolent course of policy towards them." Of course, that benevolent course of policy was never adopted. Between the Black Hawk War of 1832 and the Wounded Knee Massacre of 1890, numerous wars, campaigns, and massacres took place west of the Mississippi. Benjamin Drake first published this excellent history on Black Hawk and the war named after him just six years after that war ended.

The Hunters of the Prairie

Reprint of the original, first published in 1875. The publishing house Anatiposi publishes historical books as reprints. Due to their age, these books may have missing pages or inferior quality. Our aim is to preserve these books and make them available to the public so that they do not get lost.

The Hunters of the Prairie

"The Prairie" was the third in order of Fenimore Cooper's *Leatherstocking Tales*. Its first appearance was in the year 1827. The idea of the story had suggested itself to him, we are told, before he had finished its immediate forerunner, "The Last of the Mohicans." He chose entirely new scenes for it, "resolved to cross the Mississippi and wander over the desolate wastes of the remote Western prairies." He had been taking every chance that came of making a personal acquaintance with the Indian chiefs of the western tribes who were to be encountered about this period on their way in the frequent Indian embassies to Washington. "He saw much to command his admiration," says Mrs. Cooper, "in these wild braves... It was a matter of course that in drawing Indian character he should dwell on the better traits of the picture, rather than on the coarser and more revolting though more common points. Like West, he could see the Apollo in the young Mohawk."

The Hunters of the Prairie

R. M. Ballantyne is best known for his westerns. As a young boy Ballantyne spent few years on American continent learning the local customs, trading for fur with Native Americans, sleighing and canoeing across the America. These experiences served as a source for his western novels that span from cowboy tales and gold mining stories to tales from Canadian wilderness. Content: Snowflakes and Sunbeams (The Young Fur Traders) The Dog Crusoe and his Master The Golden Dream Away in the Wilderness The Wild Man of the West Silver Lake Over the Rocky Mountains Digging for Gold The Pioneers Fort Desolation The Red Man's Revenge The Prairie Chief Charlie to the Rescue The Buffalo Runners Wrecked but not Ruined

The Hunters of the Prairie, Or the Hawk Chief

Death on the Prairie is a sweeping narrative history of the Indian wars on the western plains that never loses sight of the individual actors. Beginning with the Minnesota Sioux Uprising in 1862, Paul I. Wellman shifts to conflicts in present-day Wyoming, Montana, Idaho, Oklahoma, the Texas Panhandle, and South Dakota, involving, most spectacularly, the Sioux, but also the Cheyennes, Arapahos, Comanches, Kiowas, Utes, and Nez Perces—all being ezed out of their hunting grounds by white settlers. There is never a quiet page as Wellman describes the Sand Creek Massacre (1864), the Fetterman Massacre (1866), the Battle of the Washita (1868), the Battle of Adobe Walls (1874), the Battle of the Little Big Horn (1876), the Nez Perce War (1877), the Meeker Massacre (1879), and the tragedy at wounded Knee (1890) that ended the fighting on the plains. Celebrated chiefs (Red Cloud, Crazy Horse, Black Kettle, Satanta, Joseph, Ouray, Sitting Bull) clash with army officers (notably Custer, Sheridan, Miles, and Crook), and uncounted men, women, and children on both sides are cast in roles of fatal consequence.

Evenki

Evenki is one of nine Tungusic languages spoken in Siberia and Northern China. This book gives the first ever complete description of all this language's linguistic domain. Evenki is remarkable both for the vast area where it is spoken - from Western Siberia through the Amur region to the shores of the Arctic Ocean to Northern China - and for its immense number of dialects and sub-dialects.

Evenki

First published in 1997. Routledge is an imprint of Taylor & Francis, an informa company.

The Siberian World

The Siberian World provides a window into the expansive and diverse world of Siberian society, offering valuable insights into how local populations view their environments, adapt to change, promote traditions, and maintain infrastructure. Siberian society comprises more than 30 Indigenous groups, old Russian settlers, and more recent newcomers and their descendants from all over the former Soviet Union and the Russian Federation. The chapters examine a variety of interconnected themes, including language revitalization, legal pluralism, ecology, trade, religion, climate change, and co-creation of practices and identities with state programs and policies. The book's ethnographically rich contributions highlight Indigenous voices, important theoretical concepts, and practices. The material connects with wider discussions of perception of the environment, climate change, cultural and linguistic change, urbanization, Indigenous rights, Arctic politics, globalization, and sustainability/resilience. The Siberian World will be of interest to scholars from many disciplines, including Indigenous studies, anthropology, archaeology, geography, environmental history, political science, and sociology. Chapter 25 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution-Non Commercial-No Derivatives (CC-BY-NC-ND) 4.0 license.

Functional Discourse Grammar

This is the first comprehensive presentation of Functional Discourse Grammar. The authors set out its nature and origins and show how it relates to contemporary linguistic theory. They demonstrate and test its explanatory power and descriptive utility against linguistic facts from over 150 languages across a full range of linguistic families.

Tungusic languages: Past and present

Tungusic is a small family of languages, many of which are endangered. It encompasses approximately twenty languages located in Siberia and northern China. These languages are distributed over an enormous area that ranges from the Yenisey River and Xinjiang in the west to the Kamchatka Peninsula and Sakhalin in the east. They extend as far north as the Taimyr Peninsula and, for a brief period, could even be found in parts of Central and Southern China. This book is an attempt to bring researchers from different backgrounds together to provide an open-access publication in English that is freely available to all scholars in the field. The contributions cover all branches of Tungusic and a wide range of linguistic features. Topics include synchronic descriptions, typological comparisons, dialectology, language contact, and diachronic reconstruction. Some of the contributions are based on first-hand data collected during fieldwork, in some cases from the last speakers of a given language.

The Syntax of Yes and No

This book is a cross-linguistic study of the syntax of yes-no questions and their answers, drawing on data from a wide range of languages with particular focus on English, Finnish, Swedish, Thai, and Chinese. There are broadly two types of answer to yes-no questions: those that employ particles such as 'yes' and 'no' (as found in English) and those that echo a part of the question, usually the finite verb, with or without negation (as found in Finnish). The latter are uncontroversially derived by ellipsis, while the former have been claimed to be clause substitutes. Anders Holmberg argues instead that even answers that employ particles are complete sentences, derived by ellipsis from full sentential expressions, and that the two types share essential syntactic properties. The book also examines the related cross-linguistic and intralinguistic variation observed in answers to negative questions such as 'does he not drink coffee?', whereby 'yes' in one language appears to correspond to 'no' in another. The book illustrates how a seemingly trivial phenomenon can have the most wide-ranging consequences for theories of language, and will be of interest not only to theoretical linguists but also to students and scholars of typological and descriptive linguistics.

Standard Negation

This book is the first cross-linguistic study of clausal negation based on an extensive and systematic language sample. Methodological issues, especially sampling, are discussed at length. Standard negation – the basic structural means languages have for negating declarative verbal main clauses – is typologized from a new perspective, paying attention to structural differences between affirmatives and negatives. In symmetric negation affirmative and negative structures show no differences except for the presence of the negative marker(s), whereas in asymmetric negation there are further structural differences, i.e. asymmetries. A distinction is made between constructional and paradigmatic asymmetry; in the former the addition of the negative marker(s) is accompanied by further structural differences in comparison to the corresponding affirmative, and in the latter the correspondences between the members of (verbal etc.) paradigms used in affirmatives and negatives are not one-to-one. Cross-cutting the constructional-paradigmatic distinction, asymmetric negation can be further divided into subtypes according to the nature of the asymmetry. Standard negation structures found in the 297 sample languages are exemplified and discussed in detail. The frequencies of the different types and some typological correlations are also examined. Functional motivations are proposed for the structural types – symmetric negatives are language-internally analogous to the linguistic structure of the affirmative and asymmetric negatives are language-externally analogous to different asymmetries between affirmation and negation on the functional level. Relevant diachronic issues are also discussed. The book is of interest to language typologists, descriptive linguists and to all linguists interested in negation.

The Languages and Linguistics of Northern Asia

The Languages and Linguistics of Northern Asia: A Comprehensive Guide surveys the indigenous languages of Asia's North Pacific Rim, Siberia, and adjacent portions of Inner Eurasia. It provides in-depth descriptions of every first-order family of this vast area, with special emphasis on family-in-

ternal subdivision and dialectal differentiation. Individual chapters trace the origins and expansion of the region's widespread pastoral-based language groups as well as the microfamilies and isolates spoken by northern Asia's surviving hunter-gatherers. Separate chapters cover sparsely recorded languages of early Inner Eurasia that defy precise classification and the various pidgins and creoles spread over the region. Other chapters investigate the typology of salient linguistic features of the area, including vowel harmony, noun inflection, verb indexing (also known as agreement), complex morphologies, and the syntax of complex predicates. Issues relating to genealogical ancestry, areal contact and language endangerment receive equal attention. With historical connections both to Eurasia's pastoral-based empires as well as to ancient population movements into the Americas, the steppes, taiga forests, tundra and coastal fringes of northern Asia offer a complex and fascinating object of linguistic investigation.

Adjective attribution

This book is the first typological study of adjective attribution marking. Its focus lies on Northern Eurasia, although it covers many more languages and presents an ontology of morphosyntactic categories relevant to noun phrase structure in general. Beside treating synchronic data, the study contributes to historical linguistics by reconstructing the origin of new types specifically in the language contact area between the Indo-European and Uralic families.

A typology of questions in Northeast Asia and beyond

This study investigates the distribution of linguistic and specifically structural diversity in Northeast Asia (NEA), defined as the region north of the Yellow River and east of the Yenisei. In particular, it analyzes what is called the grammar of questions (GQ), i.e., those aspects of any given language that are specialized for asking questions or regularly combine with these. The bulk of the study is a bottom-up description and comparison of GQs in the languages of NEA. The addition of the phrase and beyond to the title of this study serves two purposes. First, languages such as Turkish and Chuvash are included, despite the fact that they are spoken outside of NEA, since they have ties to (or even originated in) the region. Second, despite its focus on one area, the typology is intended to be applicable to other languages as well. Therefore, it makes extensive use of data from languages outside of NEA. The restriction to one category is necessary for reasons of space and clarity, and the process of zooming in on one region allows a higher resolution and historical accuracy than is usually the case in linguistic typology. The discussion mentions over 450 languages and dialects from NEA and beyond and gives about 900 glossed examples. The aim is to achieve both a cross-linguistically plausible typology and a maximal resolution of the linguistic diversity of Northeast Asia.

The Tungusic Languages

The Tungusic Languages is a survey of Tungusic, a language family which is seriously endangered today, but which at the time of its maximum spread was present all over Northeast Asia. This volume offers a systematic succession of separate chapters on all the individual Tungusic languages, as well as a number of additional chapters containing contextual information on the language family as a whole, its background and current state, as well as its history of research and documentation. Manchu and its mediaeval ancestor Jurchen are important historical literary languages discussed in this volume, while the other Tungusic languages, around a dozen altogether, have always been spoken by small, local, though in some cases territorially widespread, populations engaged in traditional subsistence activities of the Eurasian taiga and steppe zones and the North Pacific coast. All contributors to this volume are well-known specialists on their specific topics, and, importantly, all the authors of the chapters dealing with modern languages have personal experience of linguistic field work among Tungusic speakers. This volume will be informative for scholars and students specialising in the languages and peoples of Northeast Asia, and will also be of interest to those engaged with linguistic typology, cultural anthropology, and ethnic history who wish to obtain information on the Tungusic languages.

The Oxford Guide to the Transeurasian Languages

The Oxford Guide to the Transeurasian Languages provides a comprehensive account of the Transeurasian languages, and is the first major reference work in the field since 1965. The term 'Transeurasian' refers to a large group of geographically adjacent languages that includes five uncontroversial linguistic families: Japonic, Koreanic, Tungusic, Mongolic, and Turkic. The historical connection between these languages, however, constitutes one of the most debated issues in historical compara-

tive linguistics. In the present book, a team of leading international scholars in the field take a balanced approach to this controversy, integrating different theoretical frameworks, combining both functional and formal linguistics, and showing that genealogical and areal approaches are in fact compatible with one another. The volume is divided into five parts. Part I deals with the historical sources and periodization of the Transeurasian languages and their classification and typology. In Part II, chapters provide individual structural overviews of the Transeurasian languages and the linguistic subgroups that they belong to, while Part III explores Transeurasian phonology, morphology, syntax, lexis, and semantics from a comparative perspective. Part IV offers a range of areal and genealogical explanations for the correlations observed in the preceding parts. Finally, Part V combines archaeological, genetic, and anthropological perspectives on the identity of speakers of Transeurasian languages. The Oxford Guide to the Transeurasian Languages will be an indispensable resource for specialists in Japonic, Koreanic, Tungusic, Mongolic, and Turkic languages and for anyone with an interest in Transeurasian and comparative linguistics more broadly.

The Oxford Handbook of Cognitive Linguistics

Part I: Basic Concepts (16 cap.) + Part II: Models of Grammar (3 cap.) + Part III: Situating Cognitive Linguistics (3 cap.) + Part IV: Linguistic Structure and Language Use (13 cap.) + Part V: Linguistic Variation and Change (7 cap.) + Part VI: Applied and Interdisciplinary Perspectives.

Modality and Theory of Mind Elements across Languages

Modality is the way a speaker modifies her declaratives and other speech acts to optimally assess the common ground of knowledge and belief of the addressee with the aim to optimally achieve understanding and an assessment of relevant information exchange. In languages such as German (and other Germanic languages outside of English), this may happen in covert terms. Main categories used for this purpose are modal adverbials ("modal particles") and modal verbs. Epistemic uses of modal verbs (like German *sollen*) cover evidential (reportative) information simultaneously providing the source of the information. Methodologically, description and explanation rest on Karl Bühler's concept of *Origo* as well as Roman Jakobson's concept of *shifter*. Typologically, East Asian languages such as Japanese pursue these semasiological fundamentals far more closely than the European languages. In particular, Japanese has to mark the source of a statement in the declarative mode such that the reliability may be assessed by the hearer. The contributions in this collection provide insight into these modal techniques.

Transeurasian Verbal Morphology in a Comparative Perspective

The term Transeurasian refers to a large group of geographically adjacent languages stretching from the Pacific in the East to the Mediterranean in the West. They share a significant amount of linguistic properties and include five linguistic families: Japanese, Korean, Tungusic, Mongolic and Turkic. There is disagreement among scholars on the question whether these languages are genealogically related in the sense of an "Altaic" family. Many linguists, however, seem to agree on at least one point, namely that investigations into the striking correspondences in the domain of verbal morphology could substantially help unravelling the question. The present volume brings together prominent specialists in the field who explore potentially shared features of verbal morphology among the Transeurasian languages and search for the best way to explain them. Important issues dealt with include the following: How useful is verbal morphology really in establishing genealogical relations among languages? Is there concrete evidence for cognate verbal morphology across the Transeurasian languages? Is it possible to draw wider connections with Indo-European and Uralic? How to distinguish between genealogical retention and copying of verbal morphology? In which ways can typological similarities be significant in this context?

Suppletion in Verb Paradigms

This book examines stem change in verb paradigms, as in English *go* 'go.PRESENT' vs. *went* 'go.PAST', a phenomenon referred to as suppletion in current linguistic theory. The work is based on a broad sample of 193 languages, and examines this long neglected phenomenon from a typological perspective. In addition to identifying types of suppletion which occur cross-linguistically, the study brings to light areal patterns of the occurrence of suppletive forms in verb paradigms. Several hypotheses as regards the diachronic development of suppletive forms are presented as well. The author also seeks to explore the methodological issues of evaluating the frequency of linguistic features in large language

samples by introducing a method of weighting languages according to their genetic relatedness. All figures obtained in this way are compared to the proportions yielded by more familiar counting methods, and the results and implications of the different procedures are compared and discussed throughout.

Turcology in Mainz

This volume contains contributions in English and German on various topics of linguistic turcology. All contributors are in some way associated with the turcological department in Mainz. The articles cover a broad specter of linguistic fields such as syntax, phonology, morphophonology, semantics, pragmatics, lexicon, onomastics, socio-linguistics and language contact. All major branches of the Turkic languages are covered, with the focus of the individual contributions either on a single language or on several languages from a comparative perspective. Both synchronic and diachronic issues are addressed. There are contributions with either a descriptive or a theoretical bias.

A Descriptive Grammar of English

Revised and updated version - 2023 Recommended in IATEFL Voices The magazine of the International Association for Teachers of English as a Foreign Language Andrew Rossiter's A Descriptive Grammar of English by Example should be included on your list of reference materials. It reviews language as it is not only written but also spoken, and will cater for learners from upper-intermediate to advanced levels.... For the invested student, this book is a huge step forward, and having the English language laid out in such a user-friendly approach is a welcome treat for non-native teachers and learners. Reviewed in TESOLANZ bulletin, New Zealand. "All good useful stuff and made very user friendly with clear formatting and colour coding. ... a useful, compact grammar reference, especially for those who want to improve their confidence in teaching grammar." Reviewed in EFL Magazine. "This is a useful reference book to have on hand when planning for and teaching grammar lessons. The clarity of explanations and wealth of examples, alongside helpful visual keys, provide both new and experienced teachers with something easy to dip into, regardless of the language level they are teaching." Reviewed in ELTAF Online bulletin, Germany. This book is ... very extensive without being too deep or analytical. The author seems to have a great understanding of many of the challenges that teachers and learners have, and tries to combat these challenges to make the English language more accessible for all." This is a compact pedagogical reference Grammar of English for the 2020s, thorough, complete, original, clearly explained and accessible to all. It covers in detail all the essential points of English grammar, with abundant and carefully chosen examples and clear explanations, avoiding the confusing jargon that is common to many books on English grammar. Approaching grammar as a semantic system rather than from the more technical morphosyntactic approach currently favoured in the world of linguistics, this book not only takes the mystery out of English grammar but also answers questions that students (and teachers) ask, providing explanations that teachers can use and students can understand. It pays particular attention to the tricky questions that often baffle speakers of other languages, and even native speakers, such as the use of articles and determiners, or of conjunctions and connectors, or when to use an 's or an of for possession, which past tense to use, and other sometimes confusing points. As a descriptive and pedagogical grammar, it shows by example how English is used today, and explains the principles or rules that define this usage. Descriptive grammar does not mean grammar without rules, but grammar with rules that reflect widely accepted contemporary usage. While these rules are largely based on the norms of written English, they apply too to spoken English, and this book points out significant differences where they exist. A Descriptive Grammar of English is designed to cater specifically to the needs of teachers and students in the real life situations of school, university, home study or language classes; crucially, it sets out to demonstrate how simple the underlying rules of basic English grammar really are, not to show how complicated they can be. It provides clear explanations of the many aspects of English grammar that native speakers seem to master intuitively, but are at a loss to explain. How is it that native speakers seem to know by intuition how to put adjectives in the right order? What's the difference between couldn't have and wasn't able to, and so on? Coherently organised, and with a detailed table of contents, it is a very useful handbook for teachers and students from B1 level

A Descriptive Grammar of Early Old Japanese Prose

This publication provides important new information detailing the orthography, phonology, morphology, and lexicon of a previously poorly studied and understood stage of the Japanese language, Early Old Japanese prose.

Korean

A lively and fascinating introduction to the sound, structure, and history of Korean.

English Grammar

For graduates or advanced undergraduates going into a profession that entails analyzing other people's speech, such as English, linguistics, speech-language pathology, and teaching English as a second language. Explains the history, goals, strengths, and weaknesses of the four main approaches to Eng

The Interplay of Variation and Change in Contact Settings

This volume is at the cross-roads between two research traditions dealing with language change: contact linguistics and language variation and change. It starts out from the notion that linguistic variation is still a little researched area in most contact-induced language change studies. Intending to fill this gap, it offers a rich panorama of case studies and approaches dealing with linguistic variation in contact settings. It concentrates both on monolingual data, tracing variation and contact beneath surface homogeneity, and on bilingual data such as code-switching and other forms of variation, to trace their underlying regularities. It investigates the relationship between variation and change in language contact settings. The book will be relevant for students and researchers in contact linguistics, sociolinguistics, language variation and change, sociology of language, descriptive linguistics and linguistic typology.

A Descriptive Grammar of English

A Descriptive Grammar of English is a concise pedagogical reference grammar, highlighting the fundamentals of contemporary English grammar, clearly illustrated with unambiguous and pertinent examples of modern usage.

Strategies for Knowledge Elicitation

This volume provides an overview of experimental methods, approaches, and techniques used by field linguists of the Russian school, and highlights the fieldwork experience of Russian scholars working in regions with a range of languages that differ genetically, typologically, and in the degree of their preservation. The collection presents language and sociolinguistic data relating to fieldwork in diverse languages: Uralic, Altaic, Paleo-Siberian, Yeniseian, Indo-European Iranian, Vietic, Kra-Day, and Mayan languages, as well as pidgin. The authors highlight the fieldwork techniques they use, and the principles underlying them. The volume's multidisciplinary approach covers linguistic, ethnolinguistic, sociolinguistic, educational, and ethnocultural issues. The authors explore problems associated with the study of minority languages and indicate diverse and creative techniques for data elicitation. Close collaboration with speakers lies at the core of their approach. The collection presents strategies for eliciting systems of knowledge from mother-tongue speakers, triggering linguistic self-awareness, and providing semantic and morphosyntactic context for their languages. This publication is intended for academics, and for specialists in the field of linguistics and minority and indigenous languages. It will also benefit students as a guide to field research, as well as language activists, interested in documenting and preserving their mother tongue.

The Hungarian Nominal Functional Sequence

The Hungarian Nominal Functional Sequence combines the methods of syntactic cartography with evidence from compositional semantics in a comprehensive exploration of the structure of Noun Phrases. Proceeding from the lexical core to the top of DP, it uses Hungarian as a window on the underlying universal functional hierarchy of Noun Phrases, but it also regularly complements and supports the analysis with cross-linguistic evidence. The book works out a minimal map of the extended NP in the sense that the proposed hierarchy only has projections which host overt material and it does not draw on semantically empty word order projections. Topics which receive special attention include the syntax of classifiers, demonstratives, proper names, possessive NPs and plural pronouns.

Handbook of Descriptive Language Knowledge

This rich volume deals comprehensively with cross-linguistic variation in the morphosyntax of ditransitive constructions: constructions formed with verbs (like give) that take Agent, Theme and Recipient arguments. For the first time, a broadly cross-linguistic perspective is adopted. The present volume, consisting of an overview article and twenty-odd in-depth studies of ditransitive constructions in

individual languages from different continents, arose from the conference on ditransitive constructions held at the Max Planck Institute for Evolutionary Anthropology (Leipzig) in 2007. It opens with the editors' survey article providing an overview of cross-linguistic variation in ditransitive constructions, followed by the questionnaire on ditransitive constructions, compiled by the editors in order to elicit various properties of these patterns. The editors' overview discusses formal properties of ditransitive constructions as well as behavioral (or syntactic) and lexical properties (i.e., the extension of ditransitive constructions across different verb classes). The volume includes 23 contributions describing properties of ditransitive constructions in languages from all over the world, written by leading experts. Care has been taken that the contributions to the volume will be representative of structural, geographic and genealogical diversity in the domain of ditransitive constructions. Thus the present volume provides a unique source of information on typological diversity of ditransitive constructions. It is expected that it will be of central interest to all scholars and advanced students of linguistics, especially to those working in the field of language typology and comparative syntax.

Studies in Ditransitive Constructions

This book deals with shared verb morphology in Japanese and other languages that have been identified as Transeurasian (traditionally: "Altaic") in previous research. It analyzes shared etymologies and reconstructed grammaticalizations with the goal to provide evidence for the genealogical relatedness of these languages.

Diachrony of Verb Morphology

Earlier empirical studies on valency have looked at the phenomenon either in individual languages or a small range of languages, or have concerned themselves with only small subparts of valency (e.g. transitivity, ditransitive constructions), leaving a lacuna that the present volume aims to fill by considering a wide range of valency phenomena across 30 languages from different parts of the world. The individual-language studies, each written by a specialist or group of specialists on that language and covering both valency patterns and valency alternations, are based on a questionnaire (reproduced in the volume) and an on-line freely accessible database, thus guaranteeing comparability of cross-linguistic results. In addition, introductory chapters provide the background to the project and discuss its main characteristics and selected results, while a series of featured articles by leading scholars who helped shape the field provide an outside perspective on the volume's approach. The volume is essential reading for anyone interested in valency and argument structure, irrespective of theoretical persuasion, and will serve as a model for future descriptive studies of valency in individual languages.

Anthropological Linguistics

The phenomenon of insubordination can be defined diachronically as the recruitment of main clause structures from subordinate structures, or synchronically as the independent use of constructions exhibiting characteristics of subordinate clauses. Long marginalised as uncomfortable exceptions, insubordinated clause phenomena turn out to be surprisingly widespread, and provide a vital empirical testing ground for various central theoretical issues in current linguistics – the interplay of langue and parole, the emergence of structure, the question of where productive syntactic rules give way to constructions, the role of prosody in language change, and the question of how far grammars are produced by isolated speakers as opposed to being collaboratively constructed in dialogue. This volume – the first book-length treatment on the topic – assembles studies of languages on all continents, by scholars who bring a range of approaches to bear on the topic, from historical linguistics to corpus studies to typology to conversational analysis.

Introducing the Framework, and Case Studies from Africa and Eurasia

Linguists and specialists are familiar with the name Ket, which designates a small ethnic group on the Yenisei and their language. Ket is a severely endangered language with today less than 500 native speakers. Together with Yugh, Kott, Arin, Assan and Pumpokol, it forms the Yeniseic family of languages, which has no known linguistic relatives.

Insubordination

The languages of Europe and North and Central Asia provide a rich variety of data. In this volume, some articles are summaries of large areal typological research projects, and some articles focus on structures or constructions in a single language. However, it is common to all the articles that they investigate phenomena that have not been examined previously, or they apply a new framework to a topic. The volume will be of interest to scholars with a focus on this broad geographic region, typologists, historical linguists and discourse analysts. The uniqueness of this volume is that it brings together work on a genetically diverse set of languages that have some shared areal traits.

Acta Orientalia Academiae Scientiarum Hungaricae

Understanding sociolinguistics as a theoretical and methodological framework hopefully could attempt to promote change and social development in human communities. Yet it still presents important political, epistemological, methodological and theoretical challenges. A sociolinguistics of development, in which the revitalization of linguistic communities is the priority, opens new perspectives for the emerging field of linguistic documentation, in which the societal aspects of research, stressed by sociolinguistics, have frequently been marginal. The need to focus on the documentation of linguistic communities to contribute to the revitalization of these communities requires an in-depth revision of a number of different perspectives. Especially regarding the links between commonly separated fields of enquiry such as sociolinguistics, documentation and revitalization. Instead of creating mere museum pieces of academic contemplation for the future, as has been the major trend up to now in language documentation and even sociolinguistics, there is a growing concern to join forces to revitalize the actual use of endangered languages in order to place languages as a main focus of a community's development which constitutes a major challenge for both scholars, civil society and speakers alike."

A Descriptive Grammar of Ket (Yenisei-Ostyak)

Der 2. Teilband behandelt detailliert und oft unter neuen Blickwinkeln die einzelnen Entwicklungsstufen des Sprachstudiums als autonome Disziplin, von der wachsenden Erkenntnis von genetischen Beziehungen zwischen Sprachfamilien im 17. und 18. Jahrhundert bis zur Etablierung der komparativ-historisch ausgerichteten Indo-Germanistik im 19. Jahrhundert, von der Generation der Schlegels, Bopp, Rask und Grimm bis hin zu den Junggrammatikern und der Anwendung vergleichender Methoden für Nicht-Indo-Europäische Sprachen dieser Erde.
