American Odyssey

A history of the United States in the twentieth century, featuring sociological and cultural events, as well as strictly historical, and using many pertinent literary excerpts.

CA Te Am Anthem 2007 Mod

Heide Fehrenbach traces the complex history of German attitudes to race following 1945 by focusing on the experiences of and the debates surrounding the several thousand postwar children born to African American GIs and their German partners.

Educational Reform in Japan, 1945-1952

Scholarship on the history of West Germany's educational system has traditionally portrayed the postwar period of Allied occupation as a failure and the following decades as a time of pedagogical stagnation. Two decades after World War II, however, the Federal Republic had become a stable democracy, a member of NATO, and a close ally of the West. Had the schools really failed to contribute to this remarkable transformation of German society and political culture? This study persuasively argues that long before the protest movements of the late 1960s, the West German educational system was undergoing meaningful reform from within. Although politicians and intellectual elites paid little attention to education after 1945, administrators, teachers, and pupils initiated significant changes in schools at the local level. The work of these actors resulted in an array of democratic reforms that signaled a departure from the authoritarian and nationalistic legacies of the past. The establishment of exchange programs between the United States and West Germany, the formation of student government organizations and student newspapers, the publication of revised history and civics textbooks, the expansion of teacher training programs, and the creation of a Social Studies curriculum all contributed to the advent of a new German educational system following World War II. The subtle, incremental reforms inaugurated during the first two postwar decades prepared a new generation of young Germans for their responsibilities as citizens of a democratic state.

It has long been assumed that the historical legacy of Soviet Communism would have an important effect on post-communist states. However, prior research has focused primarily on the institutional legacy of communism. *Communism's Shadow* instead turns the focus to the individuals who inhabit post-communist countries, presenting a rigorous assessment of the legacy of communism on political attitudes. Post-communist citizens hold political, economic, and social opinions that consistently differ from individuals in other countries. Grigore Pop-Eleches and Joshua Tucker introduce two distinct frameworks to explain these differences, the first of which focuses on the effects of living in a post-communist country, and the second on living through communism. Drawing on large-scale research encompassing post-communist states and other countries around the globe, the authors demonstrate that living through communism has a clear, consistent influence on why citizens in post-communist countries are, on average, less supportive of democracy and markets and more supportive of state-provided social welfare. The longer citizens have lived through communism, especially as adults, the greater their support for beliefs associated with communist ideology—the one exception being opinions regarding gender equality. A thorough and nuanced examination of communist legacies' lasting influence on public opinion, *Communism's Shadow* highlights the ways in which political beliefs can outlast institutional regimes.

Bulletin of the Public Affairs Information Service, a Cooperative Clearing House of Public Affairs Information

An illustrated exploration of fandom that combines academic essays with artist pages and experimental texts. *Fandom as Methodology* examines fandom as a set of practices for approaching and writing about art. The collection includes experimental texts, autobiography, fiction, and new academic perspectives on fandom in and as art. Key to the idea of “fandom as methodology” is a focus on the potential for fandom in art to create oppositional spaces, communities, and practices, particularly from queer perspectives, but also through transnational, feminist and artist-of-color fandoms. The book provides a

range of examples of artists and writers working in this vein, as well as academic essays that explore the ways in which fandom can be theorized as a methodology for art practice and art history. Fandom as Methodology proposes that many artists and art writers already draw on affective strategies found in fandom. With the current focus in many areas of art history, art writing, and performance studies around affective engagement with artworks and imaginative potentials, fandom is a key methodology that has yet to be explored. Interwoven into the academic essays are lavishly designed artist pages in which artists offer an introduction to their use of fandom as methodology. Contributors Taylor J. Acosta, Catherine Grant, Dominic Johnson, Kate Random Love, Maud Lavin, Owen G. Parry, Alice Butler, SooJin Lee, Jenny Lin, Judy Batalion, Ika Willis. Artists featured in the artist pages Jeremy Deller, Ego Ahaïwe Sowinski, Anna Bunting-Branch, Maria Fusco, Cathy Lomax, Kamau Amu Patton, Holly Pester, Dawn Mellor, Michelle Williams Gamaker, The Women of Colour Index Reading Group, Liv Wynter, Zhiyuan Yang

Public Affairs Information Service Bulletin

The 'knowledge turn' in curriculum studies has drawn attention to the central role that knowledge of the disciplines plays in education, and to the need for new thinking about how we understand knowledge and knowledge-building. Knowing History in Schools explores these issues in the context of teaching and learning history through a dialogue between the eminent sociologist of curriculum Michael Young, and leading figures in history education research and practice from a range of traditions and contexts. With a focus on Young's 'powerful knowledge' theorisation of the curriculum, and on his more recent articulations of the 'powers' of knowledge, this dialogue explores the many complexities posed for history education by the challenge of building children's historical knowledge and understanding. The book builds towards a clarification of how we can best conceptualise knowledge-building in history education. Crucially, it aims to help history education students, history teachers, teacher educators and history curriculum designers navigate the challenges that knowledge-building processes pose for learning history in schools.

The American Journey

The ground-breaking report Teaching About the Holocaust in English Secondary Schools: An empirical study of national trends, perspectives and practice explores when, where, how and why the Holocaust is taught in state-maintained secondary schools in England. The challenges and issues identified have been used to design and develop the world's first research-informed programme of teacher professional development in Holocaust education. The landmark national research that underpins this report employed a two-phase mixed methodology. This comprised an online survey which was completed by more than 2,000 respondents and follow-up interviews with 68 teachers in 24 different schools throughout England. The report is the largest endeavour of its kind in the United Kingdom in both scope and scale. The authors hope it will be of considerable value to all those concerned with the advancement and understanding of Holocaust education both in the UK and internationally.

National Archives Records Relating to the Korean War

This important new book, which focuses on the 1940s, 1950s and 1960s, but which looks back to the earlier decades of the century and has a conclusion dealing with the 1970s to 1990s, maps the world of those known as "trade" -- ostensibly straight men who would engage in homosexual sex -- and hustlers -- those who were paid for it. It was a milieu that was central to the sexual histories of several generations of twentieth-century American men and also influenced American literary and visual culture; the "trade aesthetic" informed the work of a variety of artists, filmmakers, and writers. This sexual culture, though compelling in itself, also allows us to explore some key aspects of modern sexual history. This pioneering work, which draws on a wide range of visual and literary sources, including previously unpublished material from the Kinsey archives, will appeal to a wide range of readers, especially those interested in the histories of sex, the city, masculinity, and American culture.

Race After Hitler

Macroeconomics in Context lays out the principles of macroeconomics in a manner that is thorough, up to date, and relevant to students. Like its counterpart, Microeconomics in Context, the book is attuned to economic realities--and it has a bargain price. The in Context books offer affordability, engaging treatment of high-interest topics from sustainability to financial crisis and rising inequality, and clear,

straightforward presentation of economic theory. Policy issues are presented in context--historical, institutional, social, political, and ethical--and always with reference to human well-being.

Learning Democracy

Made to Break is a history of twentieth-century technology as seen through the prism of obsolescence. Giles Slade explains how disposability was a necessary condition for America's rejection of tradition and our acceptance of change and impermanence. This book gives us a detailed and harrowing picture of how, by choosing to support ever-shorter product lives, we may well be shortening the future of our way of life as well.

How to speed up business processes, improve quality, and cut costs in any industry In factories around the world, Toyota consistently makes the highest-quality cars with the fewest defects of any competing manufacturer, while using fewer man-hours, less on-hand inventory, and half the floor space of its competitors. The Toyota Way is the first book for a general audience that explains the management principles and business philosophy behind Toyota's worldwide reputation for quality and reliability. Complete with profiles of organizations that have successfully adopted Toyota's principles, this book shows managers in every industry how to improve business processes by: Eliminating wasted time and resources Building quality into workplace systems Finding low-cost but reliable alternatives to expensive new technology Producing in small quantities Turning every employee into a qualitycontrol inspector

Communism's Shadow

Hailed by many as the major experimental novel of the post-war period, Gravity's Rainbow is a bizarre comic masterpiece in which linguistic virtuosity creates a whole other world.

Fandom as Methodology

A panoramic global history of the nineteenth century A monumental history of the nineteenth century, The Transformation of the World offers a panoramic and multifaceted portrait of a world in transition. Jürgen Osterhammel, an eminent scholar who has been called the Braudel of the nineteenth century, moves beyond conventional Eurocentric and chronological accounts of the era, presenting instead a truly global history of breathtaking scope and towering erudition. He examines the powerful and complex forces that drove global change during the "long nineteenth century," taking readers from New York to New Delhi, from the Latin American revolutions to the Taiping Rebellion, from the perils and promise of Europe's transatlantic labor markets to the hardships endured by nomadic, tribal peoples across the planet. Osterhammel describes a world increasingly networked by the telegraph, the steamship, and the railways. He explores the changing relationship between human beings and nature, looks at the importance of cities, explains the role slavery and its abolition played in the emergence of new nations, challenges the widely held belief that the nineteenth century witnessed the triumph of the nation-state, and much more. This is the highly anticipated English edition of the spectacularly successful and critically acclaimed German book, which is also being translated into Chinese, Polish, Russian, and French. Indispensable for any historian, The Transformation of the World sheds important new light on this momentous epoch, showing how the nineteenth century paved the way for the global catastrophes of the twentieth century, yet how it also gave rise to pacifism, liberalism, the trade union, and a host of other crucial developments.

Knowing History in Schools

Tells the story of how television worked to change the minds of Americans in the categories of confrontation, politics, war, heroes and villains, and eye-openers, from the 1950s through the 1990s.

Teaching about the Holocaust in English Secondary Schools

"In recent years the field of modern history has been enriched by the exploration of two parallel histories. These are the social and cultural history of armed conflict, and the impact of military events on social and cultural history"--

New York Hustlers

In this an interdisciplinary study of a diverse set of public speeches given by major literary and cultural figures in the 1950s and 1960s, Sonja Boos demonstrates that these speakers both facilitated and subverted the construction of a public discourse about the Holocaust in postwar West Germany.

Made to Break

After decades of bloodshed and political terror, many lament the rise of the left in Latin America. Since the triumph of Castro, politicians and historians have accused the left there of rejecting democracy, embracing communist totalitarianism, and prompting both revolutionary violence and a right-wing backlash. Through unprecedented archival research and gripping personal testimonies, Greg Grandin powerfully challenges these views in this classic work. In doing so, he uncovers the hidden history of the Latin American Cold War: of hidebound reactionaries holding on to their power and privilege; of Mayan Marxists blending indigenous notions of justice with universal ideas of equality; and of a United States supporting new styles of state terror throughout the region. With Guatemala as his case study, Grandin argues that the Latin American Cold War was a struggle not between political liberalism and Soviet communism but two visions of democracy—one vibrant and egalitarian, the other tepid and unequal—and that the conflict's main effect was to eliminate homegrown notions of social democracy. Updated with a new preface by the author and an interview with Naomi Klein, *The Last Colonial Massacre* is history of the highest order—a work that will dramatically recast our understanding of Latin American politics and the role of the United States in the Cold War and beyond. "This work admirably explains the process in which hopes of democracy were brutally repressed in Guatemala and its people experienced a civil war lasting for half a century."—*International History Review* "A richly detailed, humane, and passionately subversive portrait of inspiring reformers tragically redefined by the Cold War as enemies of the state."—*Journal of American History*

The Toyota Way

An introduction to the science of neuroplasticity recounts the case stories of patients with mental limitations or brain damage whose seemingly unalterable conditions were improved through treatments that involved the thought re-alteration of brain structure.

Gravity's Rainbow

Scholars from across law and internet and media studies examine the human rights implications of today's platform society. Today such companies as Apple, Facebook, Google, Microsoft, and Twitter play an increasingly important role in how users form and express opinions, encounter information, debate, disagree, mobilize, and maintain their privacy. What are the human rights implications of an online domain managed by privately owned platforms? According to the Guiding Principles on Business and Human Rights, adopted by the UN Human Right Council in 2011, businesses have a responsibility to respect human rights and to carry out human rights due diligence. But this goal is dependent on the willingness of states to encode such norms into business regulations and of companies to comply. In this volume, contributors from across law and internet and media studies examine the state of human rights in today's platform society. The contributors consider the "datafication" of society, including the economic model of data extraction and the conceptualization of privacy. They

examine online advertising, content moderation, corporate storytelling around human rights, and other platform practices. Finally, they discuss the relationship between human rights law and private actors, addressing such issues as private companies' human rights responsibilities and content regulation. Contributors Anja Bechmann, Fernando Bermejo, Agnès Callamard, Mikkel Flyverbom, Rikke Frank Jørgensen, Molly K. Land, Tarlach McGonagle, Jens-Erik Mai, Joris van Hoboken, Glen Whelan, Jillian C. York, Shoshana Zuboff, Ethan Zuckerman Open access edition published with generous support from Knowledge Unlatched and the Danish Council for Independent Research.

The Transformation of the World

In this lively and approachable volume based on his popular blog series, Martin Weller demonstrates a rich history of innovation and effective implementation of ed tech across higher education. From Bulletin Board Systems to blockchain, Weller follows the trajectory of education by focusing each chapter on a technology, theory, or concept that has influenced each year since 1994. Calling for both caution and enthusiasm, Weller advocates for a critical and research-based approach to new technologies, particularly in light of disinformation, the impact of social media on politics, and data surveillance trends. A concise and necessary retrospective, this book will be valuable to educators, ed tech practitioners, and higher education administrators, as well as students.

'A towering intellect ... powerful, always provocative.' Guardian'A superb polemicist who combines fluency of language with a formidable intellect.' Observer'Must be read by everyone concerned with public affairs.' Edward SaidNecessary Illusions explodes the myth of an independent media, intent on uncovering the truth at any cost. Noam Chomsky demonstrates that, in practice, the media in the developed world serve the interests of state and corporate power - despite protestations to the contrary. While individual journalists strive to abide by high standards of professionalism and integrity in their work, their paymasters - the media corporations - ultimately decide what we view, hear and read.Rigorously documented, Necessary Illusions continues Chomsky's celebrated tradition of profoundly insightful indictments of US foreign and domestic institutions and tears away the veneer of propaganda that portrays the media as the servant of free speech and democracy.

How TV Changed America's Mind

Integrating theory and case studies, this cogent text explores the processes and factors that shape foreign policy. Following a levels-of-analysis organization, Neack considers all elements that influence foreign policy, including the role of leaders, bargaining, national image, political culture, public opinion, the media, and nonstate actors.

The War Inside

More than one-half million people of Korean descent reside in Japan today—the largest ethnic minority in a country often assumed to be homogeneous. This timely, interdisciplinary volume blends original empirical research with the vibrant field of diaspora studies to understand the complicated history, identity, and status of the Korean minority in Japan. An international group of scholars explores commonalities and contradictions in the Korean diasporic experience, touching on such issues as citizenship and belonging, the personal and the political, and homeland and hostland.
