Procedures in International Law

The character of international law between scholarly reflection of foreign policy expediencies and recognising prescriptive rules binding on all concerned has long been a particular challenge to those active in the field. Law is not law if there is no procedure to both determine its contents and to show ways to enforce it. It is through its procedures that international law becomes real. Based on an overview of the varied procedures e.g. in both The Hague's and the national courts and those found in international organisations a more consistent picture of international law emerges. This compendium for students and practitioners is accessible yet sophisticated in its approach.

Advanced Introduction to Private International Law and Procedure

Litigating disputes in international civil and commercial cases presents a number of special challenges. Which country's courts have jurisdiction, and where is it advantageous to sue? Given the international elements of the case, which country's law will the court apply? Finally, if a successful plaintiff cannot find enough local assets, what does it take to have the judgment recognized and enforced in a country with assets? Advanced Introduction to Private International Law and Procedure addresses these questions through a comparative overview of legal systems, contrasting Anglo-American common law and the civil law approach of the European Union.

Participants in the International Legal System

The international legal system has weathered sweeping changes over the last decade as new participants have emerged. International law-making and law-enforcement processes have become increasingly multi-layered with unprecedented numbers of non-State actors, including individuals, insurgents, multinational corporations and even terrorist groups, being involved. This growth in the importance of non-State actors at the law-making and law-enforcement levels has generated a lot of

new scholarly studies on the topic. However, while it remains uncontested that non-State actors are now playing an important role on the international plane, albeit in very different ways, international legal scholarship has remained riddled by controversy regarding the status of these new actors in international law. This collection features contributions by renowned scholars, each of whom focuses on a particular theory or tradition of international law, a region, an institutional regime or a particular subject-matter, and considers how that perspective impacts on our understanding of the role and status of non-State actors. The book takes a critical approach as it seeks to gauge the extent to which each conception and understanding of international law is instrumental in the perception of non-State actors. In doing so the volume provides a wide panorama of all the contemporary legal issues arising in connection with the growing role of non-state actors in international-law making and international law-enforcement processes.

The United Nations and International Law

This volume provides students and scholars with a text that examines, explains, and appraises contributions made by the United Nations to contemporary international law and the law-creating process. The authors consider how UN institutions have made the law, what law has been made, and the extent to which that law has been meaningfully accepted by and evidenced in contemporary state practice. The study first deals with processes and measures that cut across law-making, covering practical as well as conceptual aspects. Then the substantive law is addressed in terms of the different fields of activity that the United Nations has made subject to legal rules and processes. Some chapters cover prominent areas, such as human rights, use of force, and economic relations; others deal with topics which have not previously been examined with sufficient care, such as labor, the environment, refugees, and women. The book's final section deals with the internal law of the UN system itself - the international civil services and financial contributions.

Procedures to Enforce Foreign Judgments

This title was first published in 2002: Within Europe and beyond, foreign judgement enforcement is now an essential component for the development of international commerce. This indispensable volume traces and analyzes steps and procedures for the enforcement of foreign judgements in national courts, including summarizing the principles which are the preconditions for that enforcement.

An Introduction to International Criminal Law and Procedure

This market-leading textbook gives an authoritative account of international criminal law, and focuses on what the student needs to know - the crimes that are dealt with by international courts and tribunals as well as the procedures that police the investigation and prosecution of those crimes. The reader is guided through controversies with an accessible, yet sophisticated approach by the author team of four international lawyers, with experience both of teaching the subject, and as negotiators at the foundation of the International Criminal Court and the Rome conference. It is an invaluable introduction for all students of international criminal law and international relations, and now covers developments in the ICC, victims' rights, and alternatives to international criminal justice, as well as including extended coverage of terrorism. Short, well chosen excerpts allow students to familiarise themselves with primary material from a wide range of sources. An extensive package of online resources is also available.

Problems and Process

This text offers an original and scholarly introduction to a number of key topics which lie at the heart of modern international law. Based upon the author's highly acclaimed Hague Academy lectures, the book introduces the student to a series of pressing problems which help reveal the complex relationship between legal norms and policy objectives which define contemporary international law.

International Law and Litigation

Containing contributions by twenty-five scholars, this volume aims to examine the increasingly notable subject of international dispute settlement from an innovative procedural perspective. Indeed, with the 'jurisdictionalisation' of international law that has taken place during the last thirty years, both scholars and practitioners have shown an important and growing interest in international law litigation. Yet, little attention has been paid to the procedural aspects thereof. In building upon research into subfields of international litigation (general international law analysis, international economic law procedures,

human rights and European law mechanisms), this book endeavours to provide an up-to-date seminal picture of the evolution of the role of procedure across these domains as well as an overall illustration of the field.

International Law of Human Rights

International law is a social construct crafted by human endeavour to achieve or at least contribute to the achievement of goals perceived to be valuable or necessary to effective social relations. In effect, international law is no more than a facilitative process and so cannot have answers and conclusions of its own other than what lies within the ambitions of those who define the limits of the process. The essays collected together here reveal how international law facilitates the achievement of the long standing ambition of turning human rights ideals and rhetoric into reality.

Punishment and Process in International Criminal Trials

International sentencing has become significant given the numerous events on the world stage which have focused attention on the justifications and adequacy of punishment for heinous crimes such as genocide and crimes against humanity. In addition to providing a detailed evaluation of the philosophical and theoretical difficulties raised by this rapidly developing area of international criminal justice, this book provides an integrated socio-legal analysis of the law and process of international sentencing. It considers the rationale and development of international sentencing structures and processes, the nature and scope of legal and procedural constraints on decision-making, as well as access to justice and rights issues. The book discusses sentencing within the context of international criminal law and examines internationalized trial processes and alternative mechanisms for resolution. In seeking to comprehend the punishment of international crimes through the comparative contextual analysis of trial processes, it challenges our present understanding of how and why particular sentencing outcomes are produced and the perceived legitimacy of international trial justice.

Dispute Settlement in Public International Law

In recent years, instruments and institutions for dispute settlement have multiplied. They now cover almost all areas of international law ranging from international economic law and international criminal law to more traditional fields such as arbitration procedures. Given this development, it became necessary, if not mandatory, to envisage a revised, updated and considerably enlarged second edition of the standard compilation of texts and materials on dispute settlement in public international law, which was first published in 1984 under the auspices of the Heidelberg Max Planck Institute for Comparative Public Law and International Law. Continuing that tradition, the second edition has largely retained the purpose and concept of the publication, namely to make available to researchers, scholars and practitioners a comprehensive collection of more than 150 different instruments which are otherwise sometimes rather difficult to find elsewhere.

An Introduction to Contemporary International Law

An Introduction to Contemporary International Law: A Policy-Oriented Perspective introduces the reader to all major aspects of contemporary international law. It applies the highly acclaimed approach developed by the New Haven School of International Law, holding international law as an ongoing process of authoritative decision-making through which the members of the world community identify, clarify, and secure their common interests. Unlike conventional works in international law, this book is organized and structured in terms of the process of decision making in the international arena, and references both classic historical examples and contemporary events to illustrate international legal processes and principles. Using contemporary examples, this Third Edition builds on the previous editions by contextualizing and dramatizing recent events with reference to seven features that characterize the New Haven School approach to international law: participants, perspectives, arenas of decision, bases of power, strategies, outcomes, and effects. This new edition highlights cutting-edge ideas in international law, including the right to self-determination, the evolution of Taiwan statehood, the expanding scope of international concern and the duty of states to protect human rights, the trend towards greater accountability for states and individual decision-makers under international law, and the vital role individual responsibility plays in the emerging field of international criminal law. It offers a new generation the intellectual tools needed to act as responsible citizens in a world community seeking human dignity and human security for all people.

The Settlement of Disputes in International Law

For many years it was said that the weakness of international law was the lack of a system for the enforcement of legal obligations. Commentators pointed to the paucity of cases in the International Court and the unwillingness of States to undertake binding obligations to settle their disputes. This position has now changed beyond recognition. The number of international tribunals has increased and many of them, such as ICSID and the International Court of Justice, are busier than at any time in their history. Increasingly, the classical procedures of diplomatic protection are circumvented as corporations and individuals litigate in their own right against States in international tribunals. This book surveys the range of procedures for the settlement of international disputes, whether the disputes arise between States or between States and corporations or individuals. The first part of the book examines non-judicial procedures such as negotiation, mediation, fact-finding, as well as judicial procedures. Among the tribunals covered are ICSID, the UNCC and the Iran-US Claim Tribunal, the WTO disputes panels, ad-hoc inter-State and international commercial arbitral tribunals and the International Court of Justice. In the second part of the book the emerging principles of procedural law applied in these tribunals are discussed. Here the authors go through the entire settlement process from the agreement to submit to a settlement procedure and the constitution of the tribunal, through to the determination of the law applicable to the merits and to the procedure of the tribunal, to the review, and ultimately the recognition and enforcement of tribunal awards.

International Law

Written by some of the leading International Law scholars in the nation, International Law: Norms, Actors, Process: A Problem-Oriented Approach employs a unique problem-based approach to examining international issues. Using real-life case studies as teaching problems, the text explores the processes for making and applying international law, with an interdisciplinary approach that goes beyond mere doctrinal explanation. New to the Fifth Edition: An introduction to international law through the Julian Assange episode Presentation of state responsibility through the problem of cyber espionage and of the responsibility of international organizations through the problem of sexual assaults by UN peacekeepers Integration of new U.S. Supreme Court decisions on the Alien Tort Statute, jurisdiction, and other topics Analysis of the challenges that artificial intelligence and autonomous weapons pose to international humanitarian law Comprehensive treatment of the Paris Accord on Climate Change New cases and analysis on the role and legitimacy of international courts Professors and students will benefit from: Contemporary problems as a vehicle for learning international legal rules and processes Clear explanation of legal rules and institutions Interdisciplinary approach to international law with attention to the law's relevance in global affairs Careful selection and editing of primary materials to produce a casebook of teachable dimensions Inclusion of maps, charts, and photographs Casebook website offering relevant texts and updates

International Law at a Time of Perplexity

This volume contains a consolidated reproduction of Part One (articles 1 to 35) of the Draft Article on State Responsibility & their important Commentaries, prepared by the International Law Commission in the period ending in 1980. These articles deal with the origin of international responsibility, including general principles, the act of State, breach of an international obligation, & circumstances precluding wrongfulness. They were drawn up on the basis of eight reports submitted by the Special Rapporteur, Professor, now Judge Roberto Ago. An introduction written by Shabtai Rosenne traces the history of the official codification of the topic of State Responsibility since the League of Nations first broached the matter in 1924. State Responsibility is central to the daily practice of international law, & its systematic treatment is central to the codification process. The International Law Commission is continuing work on the topic. In the meantime, the articles of Part One, now concentrated for the first time in a single volume, are the major starting point for this work. This volume will be of great value to practitioners, teachers & students of international law. Shabtai Rosenne was a member of the International Law Commission from 1962 to 1971, when the basic decisions regarding the approach to the current phase of the work were taken.

First Steps in International Law

International criminal law has developed extraordinarily quickly over the last decade, with the creation of ad hoc tribunals in the former Yugoslavia and Rwanda, and the establishment of a permanent International Criminal Court. This book provides a timely and comprehensive survey of emerging and existing areas of international criminal law. The Handbook features new, specially commissioned papers by a range of international and leading experts in the field. It contains reflections on the theoretical aspects and contemporary debates in international criminal law. The book is split into four parts for ease of reference: The Historical and Institutional Framework – Sets international criminal law firmly in context with individual chapters on the important developments and key institutions which have been established. The Crimes – Identifies and analyses international crimes, including a chapter on aggression. The Practice of International Tribunals – Focuses on topics relating to the practice and procedure of international criminal law. Key Issues in International Criminal Law – Goes on to explore issues of importance such as universal jurisdiction, amnesties and international criminal law and human rights. Providing easy access to up-to-date and authoritative articles covering all key aspects of international criminal law, this book is an essential reference work for students, scholars and practitioners working in the field.

Routledge Handbook of International Criminal Law

The proliferation in terrorist activity has provoked an increase in the body of law, both at national and international level, which has sought to counter and prevent it. The bodies involved in this process range from the UN Security Council to government legislatures. This book is the first to address, in one volume, the wide variety of responses to terrorism as they exist in both international and domestic contexts. It also represents the first ever comprehensive collection of documents referring to terrorism which are to be found in the laws of the UK and France as well as in international law. Terrorism and International Law comprises contributions by thirteen well-known authorities in the areas of international, French and UK law, and is divided into four main sections: international cooperation against terrorism, the French and British responses to terrorism, the limits of state action and a documentary supplement. The contributors have sought to show how international and domestic law can be used together to combat the multi-faceted problems which terrorism raises. The issue of human rights is also discussed with particular reference to the jurisprudence of the European Commission and Court of Human Rights. The fourth documentary section of the book provides coverage of international treaties, UN resolutions, UK and French legislation, case-law and official statements relating to terrorism. This book provides an invaluable source of commentary and reference material in the area of terrorism and international and domestic law which will be useful for practitioners, diplomats, students and teachers.

First Steps in International Law

The dramatic rise in the number of international courts and tribunals and the expansion of their legal powers has been one of the most significant developments in international law of the late 20th century. The emergence of an international judiciary provided international law with a stronger than ever law enforcement apparatus, and facilitated the transformation of many aspects of international relations from being power-based to being law-based. The first edition of the Manual on International Courts and Tribunals, published in 1999, was the first book to survey systematically this new institutional

landscape, by describing in an accessible and uniformly structured manner the legal powers and operating procedures of all major international judicial and quasi-judicial bodies. In doing so, it laid the groundwork for comparative study and research of the law and practice of international courts and tribunals - an emerging field of international legal research, which has already spurred a series of publications, conferences and academic courses. This second edition updates the first edition by describing the many legal changes that have taken place in the last decade, including important reforms in the laws and procedures of many international courts and tribunals, relevant developments in their increasingly rich jurisprudence and the creation of new judicial fora. Moreover, it assesses the overall record of these judicial bodies. The data and legal analysis offered in the book provide both practitioners and academics with an important basis of knowledge that will help them better understand the details of international adjudication and its context.

Terrorism and International Law

This book focuses on major amendments introduced in the Brussels I regulatory framework. The contributions scrutinise the changes introduced in the Brussels Ibis Regulation, a legal instrument that presents a core of the unification of private international law rules on the European Union level. It is one of the first publications addressing all the changes in the Brussels I regulatory scheme, which takes into consideration relevant CJEU case law up to July 2016. The texts, written by legal scholars who have published extensively in the field of private international law and international civil procedure, will add to the development of EU private international law. In addition, the authors' critical analysis may open further discussions on the topic and so benefit a consistent and harmonised application of the Regulation. In this respect the book takes a different approach than the commentaries which have so far been published. It is primarily meant for legal academics in private international law and practitioners who are regularly engaged in cross-border civil proceedings. It may also be of added value to advanced students and to those with a particular interest in the subject of international litigation and more generally in the area of dispute resolution. Vesna Lazić is a Senior Researcher at the T.M.C. Asser Instituut, an Associate Professor of Private Law at Utrecht University and Professor of European Civil Procedure at the University of Rijeka. Steven Stuij is an expert in Private International Law and an external Ph.D. candidate at Erasmus School of Law, Rotterdam.

Manual on International Courts and Tribunals

First Published in 1995. Routledge is an imprint of Taylor & Francis, an informa company.

Brussels Ibis Regulation

This book provides a comprehensive collection of legal materials relevant to the study of Private International Law. Its chief emphasis is to provide a compact source of materials for students and lecturers for whom these materials may otherwise be quite difficult to obtain. The choice of materials is very much based on the standard Conflict of Laws syllabus. The coverage extends to general concepts in private international law, family, succession, property law, jurisdiction and civil litigation, tort, contract, commercial law, and enforcement and recognition of foreign judgments. However, there is also some focus on less common subject areas such as international testacy, power of UK courts to assist in obtaining evidence for international proceedings, international arbitration, the Convention on the law applicable to trusts and on their recognition. The legal practitioner needing swift and easy access to a bulky area of law such as Private International Law should also find the book useful. This book is designed to be used in conjunction with any textbook on Private International Law at undergraduate, postgraduate or professional level

Introduction to the Law of Treaties

Introducing one of the central topics and concerns of jurisprudence – the authorisation and authority of law - Jurisdiction aims to re-introduce and refresh jurisdictional thinking about law by addressing the ways that questions of jurisdiction still give shape to law and to legal thought. Questions of jurisdiction have been central to Western legal traditions, yet in contemporary accounts of law this is often hard to recognise. At its broadest, the question of jurisdiction engages with the fact that there is law, and with the power and authority to speak in the name of the law. Such questions encompass the authorisation and ordering of law as such, as well as determinations of authority and the administration of justice within a legal regime. Without an account of jurisdiction, this book argues, it would not be possible to articulate a position from which to speak, or speak about, the law. Jurisdiction thus examines the conceptual and

institutional formation of contemporary jurisdictional techniques and procedures, and explore the ways in which the jurisdictional idiom of law remains central to a critical practice and understanding of law. Providing an original, and historically grounded, elaboration of the key themes of jurisdiction, this book offers students and scholars of law a way of thinking about the contemporary world as much in terms of law's technologies, techniques and procedures as with its ideas.

Statutes and Conventions on Private International Law

Also available as an e-book This General Course is concerned, first, with understanding and assessing the aggregate performance of the world constitutive process, in present and projected constructs; second, with providing the intellectual tools that can enable those involved in making decisions to be more effective, whether they are operating in islands or offshore; and, third, with inquiring into ways the international legal system might be improved. Reisman identifies the individual as the ultimate actor in international law and explores the dilemmas of meaningful individual commitment to a world order of human dignity amidst interlocking communities and overlapping loyalties.

Jurisdiction

First Published in 1995. The law of treaties, a central field of international law, was also a central concern for Paul Reuter as a jurist. In close association with Jean Monnet, he made a decisive contribution to the Schuman Plan which led to the treaty instituting the European Coal and Steel Community in 1951. But it was mainly from 1964 onwards, when he became a member of the International Law Commission, that he took an ever-growing part in the development of the law of treaties.

The Quest for World Order and Human Dignity in the Twenty-first Century

Public International Law found in business schools, government and political science departments. Written in plain English easily understood by nonspecialists, this introduction to public international law draws on sources and materials from around the world and features law cases taken from countries from all regions of the world.

Introduction To The Law Of Treaties

The fully revised and updated new edition of this authoritative work provides a clear and detailed analysis of the institutions and procedures for the settlement of international disputes. There has been a continued expansion of the number of international tribunals and the number of cases before international courts in recent years. The proliferation of such fora and of the jurisprudence they generate has made it essential to understand and regulate evolving and competing jurisdictions. This new edition authoritatively sets out the substance and procedure of the law of international dispute settlement in the context of these new developments. The first part of the book examines the different methods and institutions of dispute settlement. It introduces the most important dispute settlement methods and discusses the role of domestic courts in settling international disputes. It assesses the institutions of general jurisdiction, notably the International Court of Justice, and the various sectoral regimes of dispute settlement. Part two provides a comprehensive examination of procedure before an international court or tribunal. It sets out the shared elements of procedure, while also highlighting the important procedural differences between the various international courts and arbitral bodies. This section includes an discussion of the law of evidence and the conduct of counsel in international adjudication. The third part focuses on the problems facing the system of international dispute settlement as a result of the proliferation of dispute resolution mechanisms, and the augmenting specialization and fragmentation of international law. It analyses the various ways competing jurisdictions can be regulated to avoid creating conflicting decisions, and the resultant systemic incoherence. The book remains essential reading for both students of international law and international legal practitioners.

Public International Law

In recent years, instruments and institutions for dispute settlement have multiplied. They now cover almost all areas of international law ranging from international economic law and international criminal law to more traditional fields such as arbitration procedures. Given this development, it became necessary, if not mandatory, to envisage a revised, updated and considerably enlarged second edition of the standard compilation of texts and materials on dispute settlement in public international law, which was first published in 1984 under the auspices of the Heidelberg Max Planck Institute for

Comparative Public Law and International Law. Continuing that tradition, the second edition has largely retained the purpose and concept of the publication, namely to make available to researchers, scholars and practitioners a comprehensive collection of more than 150 different instruments which are otherwise sometimes rather difficult to find elsewhere.

The Settlement of Disputes in International Law

Carter (law, Georgetown U.), Trimble (emeritus, law, U. of California at Los Angeles), and Bradley (law, U. of Virginia) present a casebook designed for an introductory course in international law. In addition to the standard subjects it explores the relationship between international law and domestic law and the blurred line between public and private law. The edition has been updated to include material related to the war in Iraq as of April 2003, the September 11th attacks, and recent decisions of the International Court of Justice, including *Congo v. Belgium* on official immunity. Annotation (c)2003 Book News, Inc., Portland, OR (booknews.com).

Dispute Settlement in Public International Law

The Brussels I Regulation is by far the most prominent cornerstone of the European law of international civil procedure. Every practitioner in the international field has to work with it - and its importance is still growing. The first edition of this full scale article-by-article commentary found a very warm reception. This new edition brings the book up to date, incorporating a host of developments in the four years since its first appearance, combines in-depth analysis with a genuine and truly European perspective, authored by top experts from all over Europe, covers the jurisprudence of the ECJ and of the Member States, and integrates thorough discussion of the pending proposal for a Brussels IIbis Regulation. This truly European commentary offers invaluable guidance for lawyers, judges and academics throughout Europe.

International Law

This new third edition is a comprehensive manual of the rules of procedure and conduct of business at the UN General Assembly, at international conferences and at assemblies of inter-governmental organisations such as the World Health Organization. It examines the legal basis of these rules, the history of their development and the attempts at their codification. At the heart of the book is an examination of the practical applications of rules of procedure. Procedural rulings, updated to October 2016, are quoted from the records of UN General Assembly meetings, from assemblies of international organisations and from treaty-making conferences. This book is of interest to those involved in international law, international relations and international organisations. It also serves as an indispensable practical guide for delegates to the UN General Assembly and to international inter-governmental conferences. The first edition of this book was awarded the American Society of International Law 'Special Award'.

Brussels I Regulation

The 2020 edition marks the 20th Anniversary of The Global Community Yearbook of International Law and Jurisprudence. The Yearbook has established itself as an authoritative source of reference on global legal issues and international jurisprudence. It includes analysis of the most significant global trends in a way that allows readers to monitor the development of the global legal order from several perspectives. The Yearbook publishes annually in a volume of carefully chosen primary source material and corresponding expert commentary. The General Editor, Professor Giuliana Ziccardi Capaldo, employs her vast expertise in international law to select excerpts from important court opinions and to choose experts from around the world to contribute essay-guides, which illuminate those cases. Although the main focus is recent case law from the major international tribunals and regional courts, the first four parts of each year's edition features expert articles by renowned scholars who address broader themes in current and future developments in international law and global policy, themes that appear throughout the case law of the many courts covered by the series as a whole. The Global Community Yearbook has thus become not just an indispensable window to recent jurisprudence: the series now also serves to prepare researchers for the issues facing emerging global law. This anniversary edition updates readers on the important work of long-standing international tribunals and introduces readers to more novel topics in international law. The journal's founding editor, Professor Emeritus Giuliana Ziccardi Capaldo, in her Editorial gives a presentation of the Yearbook's intellectual trajectory, as developed from its original roots, showing intriguing prospects for a publication that aims

at the very forefront of events in law, politics, ethics, and jurisprudence in a global community. The Yearbook continues to provide expert coverage of the Court of Justice of the European Union and diverse tribunals from the International Court of Justice (ICJ), human rights courts (ECtHR, IACtHR, ACtHPR), criminal tribunals such as the International Criminal Court (ICC) and the International Residual Mechanism for Criminal Tribunals (MICT), to economically based tribunals such as ICSID and the WTO dispute settlement system. This edition contains original research articles on the development and analysis of the concept of global law and the views of the leading global law theorists on the subject of globalization. This 20th anniversary edition also includes a special section which provides an interdisciplinary overview of China's Belt and Road Initiative; and an examination of the global public health order in a post-COVID-19 world. The Yearbook provides students, scholars, and practitioners alike a valuable combination of expert discussion and direct quotes from the court opinions to which that discussion relates, as well as an annual overview of the process of cross-fertilization between international courts and tribunals.

Rules of Procedure at the UN and at Inter-Governmental Conferences

The book is a study of the rules of procedure of international conferences. It examines the legal basis of these rules of procedure and the history of their development since the end of the Second World War. The central part of the work consists of an examination of the practical application of rules of procedure at international conferences. The book also compares the application of rules at conferences with the relevant practice of the UN General Assembly, and the assemblies of international organisations such as the WHO and ILO. The book examines whether certain procedural rules and applications have become so well established that they have by now attained the status of customary international law.

The Global Community Yearbook of International Law and Jurisprudence 2020

This book addresses the central issues in international law, beginning with the reality of international law itself, and extending through the use of force and coercion, the identification and enforcement of human rights, and the role of the individual versus the state. In the course of his analysis, Professor D'Amato discusses specific international incidents, such as the taking of American hostages in Tehran, the Contras War in Nicaragua, the war between Iran and Iraq, the Grenada invasion, the Israeli attack against the nuclear reactor in Iraq, and the "Homelands" policy affecting Blacks in Southern Africa.

Procedure at International Conferences

We are proud to present to our readers Czech Yearbook of International Law 2012, Volume 3. The overarching topic of this volume, Public Policy and Ordre Public turns its focus to the doctrine which is inherently connected with private international law, which is true only at first glance. The problem of Public Policy and Ordre Public is intertwined more deeply in the national legal orders than virtually any legal branch. However, the platform of private international law through which these doctrines emerge and find its strongest application is in the cross-border traffic of the court and extra-court decisions. In these relationships, the most important differences in understanding the extent and nature of these terms take shape. The third volume of the Czech Yearbook of International Law focuses on the uncovering of national differences and the comparison of such doctrines in a global perspective. CYIL 2012 takes into account the completely different connotations given to both doctrines in the United States and the Common Law countries in continental Europe. International Law

As one of the most definitive texts on the market, *European Private International Law* provides an essential guide for both students and practitioners to the complex field of international litigation within the EU. The private international law of the Member States is increasingly regulated by European law, making private international law ever less 'national' and ever more EU based. Consequentially EU law in this area has penetrated national law to a very high degree, making it an essential area of study and an area of increasing importance to practising lawyers. This book provides a thorough overview of core European private international law, including the Brussels I, Rome I and Rome II Regulations (jurisdiction, applicable law for contracts and tort), while additional chapters deal with the recently adopted Succession Regulation, private international law and insolvency, freedom of establishment, and the impact of PIL on corporate social responsibility. From the reviews of the first edition 'As a result of his broad knowledge on the subject and rich professional experience, Mr van Calster provides great insight into current issues within international law. The book is practical as both a student textbook and a general introduction for legal professionals'. Vladimir Cupryszak, Association for International Arbitration 'Excellent overview of European Private International Law issues, as well as a very helpful introduction to basic concepts of conflicts of laws and jurisdictions'. Professor Stavros Brekoulakis, Queen Mary University of London 'This is a most useful book. I recommend it to my students as a great way to come to terms with the EU elements of Private International Law'. Dr David Kenny, Trinity College Dublin 'This book is essential reading for law students in Europe and abroad. It provides a coherent overview of all main elements of European private international law; concepts, legal instruments and practice'. Professor Kim Talus, UEF Law School, Finland 'Well-written, clear and understandable. Excellent value for money'. Dr Jan Oster, King's College London, UK

Czech Yearbook of International Law - Public Policy and Ordre Public - 2012

a. The set generally: [Please note that the following description applies to both volumes in the 2010 Yearbook, not solely to Volume II.] The Global Community Yearbook is a one-stop resource for all researchers studying international law generally or international criminal tribunals specifically. The Global Community Yearbook appears annually in two-volume editions of carefully chosen primary source material and corresponding expert commentary. The general editor, Professor Giuliana Ziccardi Capaldo, employs her vast expertise in international law to select excerpts from important court opinions and also to choose experts from around the world who contribute essay-guides to illuminate those cases. Although the main focus is recent case law from the major international tribunals and regional courts, the first volume of each year's edition always features expert articles by renowned scholars who address broader themes in international law, themes that appear throughout the case law of the many courts covered by the series as a whole. b. This particular edition (2010): Beginning with the 2010 edition, the Yearbook will include the new section, Forum-Jurisprudential Cross-Fertilization: An Annual Overview. This section aims to compare and analyze the interconnections between the decisions of international courts and tribunals, as a way of exploring and examining judicial dialogue and the development of common legal principles and concepts in all branches of international law. The Yearbook is the first academic journal to present an annual overview of the process of jurisprudential cross-fertilization between the courts, based on the drafting and systematic classification of legal maxims (i.e. points of law decided by various international courts) in the section entitled Decisions of International Courts and Tribunals. A comprehensive and complete survey by eminent international law scholars exploring, evaluating and documenting this process has the potential to enhance our contribution and thus further guide our understanding of how to reduce conflicts and create an effective exchange of legal reasoning between different courts. The aim is to promote a favorable environment for the courts to advance the process of judicial cooperation with a view to the possible harmonization of legal principles governing the global community. c. Individual volumes: Volume 1: The 2010 edition of the Global Community Yearbook presents three categories of material wholly beneficial to any international law-researcher: International tribunals' court opinions, excerpted with scholarly skill by General Editor Giuliana Ziccardi Capaldo; expert guidance on those cases in the form of commentary by globally recognized luminaries whom Ziccardi has chosen personally; and more broadly focused introductory essays by similarly prominent scholars whom Ziccardi has also selected for that purpose. In the introductory essays, those scholars take on current topics such as

global intellectual property law and policy, the nature of international law and human development, and the legal-political connotation of material support to terrorism. These incisive and knowledgeable introductory articles help frame the debates currently raging in international law before this edition leads the reader on to expert commentary on the noteworthy cases from this past year's dockets of the following tribunals: - The International Court of Justice - The International Tribunal for the Law of the Sea - WTO Dispute Settlement System - International Criminal Court - International Criminal Tribunal for the Former Yugoslavia - International Criminal Tribunal for Rwanda - Court of Justice of the European Union Ziccardi has arranged the sections of this volume according to that list of tribunals, and she has included a short, targeted index for each of those sections, making any research in this volume efficient and fruitful. The 2010 edition of the Global Community Yearbook also gives researchers an illuminating tour through the varied and dynamic law of regional and organizational courts. In the court opinion excerpts and expert commentary that fill this volume, researchers will find detailed guidance on a rich diversity of legal topics. On these questions and a host of others, this volume provides to students, scholars, and practitioners alike a valuable combination of expert discussion and direct quotes from the court opinions to which that discussion relates. The courts covered in this edition include: - The Court of Justice - The European Court of Human Rights - Inter-American Court of Human Rights - International Centre for the Settlement of Investment Disputes
