Student Workbook to Accompany Basic Health

Diversified Health Occupations, 6th edition was written to provide the beginning student in health occupations with the basic entry-level knowledge and skills required for a variety of health occupations. Student Workbook to Accompany Diversified Health Occupations

This text emphasizes the importance of a positive lifestyle gained through an active approach to wellness, rather than simply the absence of disease or illness. It incorporates the Prochaska Stages of Change model of health behaviour and modification in each chapter, providing students with a practical system for making health lifestyle changes. In this edition the chapter on noncommunicable diseases has been split into separate chapters on cancer and cardiovascular disease; and there is an increased emphasis on diversity, including ethnicity, gender, age and socioeconomic status.

Connections For Health

This workbook provides a wealth of tools and 'top tips' for students of health and social care struggling to survive the demands of 21st century practice placements. The authors artfully distil their knowledge, experience, and expertise in placement learning in order to accompany the student on their journey from novice to qualified professional. In student friendly language it covers all the main areas of placement learning.

Choosing Health uses student stories, social-networking tools, and a wealth of online resources to speak to today's students better than any other personal health textbook. With its magazine-style design and inclusion of real student stories (both online and in the printed text), this text is the one that you can most relate to—and the one that will most inspire you to choose a healthy lifestyle. Health-related stories from real college students are woven throughout the book, accompanied by videos of real students on the book's companion website. A "Health Online" feature points you to online podcasts, videos, and resources related to health topics and encourages them to become a part of Choosing Health's lively online health community via Facebook, Twitter, and YouTube. The Connection traces the remarkable relationship between Johns Hopkins Hospital and Vanderbilt Hospital, beginning in 1919 and continuing to this day. More than 400 faculty members, including five deans/vice chancellors of medical affairs and at least twenty department chairs, moved from Hopkins to Vanderbilt and brought the cutting-edge concepts of Hopkins with them. These methods and approaches transformed Vanderbilt and indeed the American medical center into the modern institution it is today. Friesinger tracks the effects on departments, administration, and the practice of medicine itself while bringing to life many of the distinguished—and colorful—individuals who played parts.
