International Sports Law: An Introductory Guide

This book, written by an expert in the field, covers some of the following issues, namely high-profile WADA cases such as that of Maria Sharapova, the Bosman ruling, decisions by the Court of Arbitration for Sport (CAS), and footballers' employment contracts and transfers for enormous amounts. These issues have led to sport no longer being confined to the back pages of traditional media such as newspapers, but increasingly finding its way onto the front pages and into new media. Since ancient times sport has been practised but today it is a multi-billion dollar 'industry', and Sports Law as a discipline in its own right is developing apace and is increasingly being studied and practiced at all levels of interest and competency. Thereby creating a need amongst students, lawyers, accountants, sports marketers, promoters, agents, sports broadcasters, sports administrators and managers for some basic and general knowledge of the legal aspects of sport. This introductory guide to international sports law will serve to satisfy the needs currently not being met in present-day sports law literature, and should also be of interest to researchers and the general reader. Although the topics covered are necessarily selective, sports law being such a vast subject, they are representative of the main legal issues facing the world of sport today. Throughout the book, the reader is referred to articles, publications and other materials that provide further information on the various subjects treated in the text, thus enhancing its value and usefulness. The Law is stated as at 1 January 2017, according to the sources available at that date. Prof. Ian S. Blackshaw is an International Sports Lawyer, a Solicitor of the Supreme Court of England and Wales, and a Visiting Professor at several Universities, including Anglia Ruskin University, Cambridge, United Kingdom, and The University of Pretoria, South Africa. He is also a member of the Court of Arbitration for Sport, Lausanne, Switzerland.

Handbook on International Sports Law

Despite taking a wide variety of forms, sport is universal. Circumstances and events generating legal issues in sport are similarly universal, but sport operates under many legal systems worldwide.

Fragmentation and inconsistency in legal outcomes often result. This innovative collection of essays by leading scholars of sports law addresses a gap in the literature. It advances understanding of how different legal systems respond to common issues and offers insights into the developing international system of sports law. Researchers will find this book of inescapable assistance and interest. Hayden Opie, Melbourne Law School, Australia Nafziger and Ross have provided an enormously useful collection of incisive and integrating essays that cover the gamut of important issues in the emerging field of international sport law. Andrew Zimbalist, Smith College, US This Handbook presents a comprehensive collection of essays by leading scholars and practitioners in the burgeoning field of international sports law. The authors address significant legal issues on two gradually converging tracks: the mainstream institutional framework of the law, primarily the International Olympic Committee, international sports federations, regional and national sports authority, and the Court of Arbitration for Sport; and the commercial sports industry. Topics include the institutional structure; fundamental issues, legal principles and decisions within those institutions; mediation, arbitration and litigation of disputes; doping, gambling and the expanding use of technology in competition; athlete eligibility requirements; discrimination; and protection of athletes. The book also covers a broad range of commercial issues related to competition law and labor markets; media, image, and intellectual property rights; event sponsorships; and players' agents. Comparative analyses of young sports models and practices in North America, Europe and elsewhere supplement the general theme of international sports law. This major collection of essays on some of the most controversial, cutting-edge issues in international sports law, will be a captivating read for academics and students of sports law, sports management, international law and comparative law, as well as practicing lawyers and players agents. Senior executives and other professionals in the sports industry will also find much to interest them in this well-documented Handbook.

Introduction to International and European Sports Law

The book is an introduction to sports law, in particular International (worldwide) and European (EU) sports law. The chapters are all put in the perspective of the innovative sports law doctrine that is developed and presented in the opening chapter on what sports law is. After a general coverage of the core concept of "sport specificity" (that is whether private sporting rules and regulations can be justified notwithstanding they are not in conformity with public law), the book covers the following specific main themes of International and European Sports Law (*capita selecta*): comparative sports law; competition law and sport; the collective selling of TV rights; sports betting; Social Dialogue in sport; sport and nationality; professional football transfer rules; anti-doping law in sport; transnational football hooliganism in Europe; international sports boycotts. In this book association football ("soccer") is the sport that is by far most on the agenda. It is the largest sport in the world and most popular all over the globe. The elite football in Europe is a day-to-day commercialized and professionalized industry, which makes it a perfect subject of study from an EU Law perspective.

Sports Law in Switzerland

Derived from the renowned multi-volume International Encyclopaedia of Laws, this practical analysis of sports law in Switzerland deals with the regulation of sports activity by both public authorities and private sports organizations. The growing internationalization of sports inevitably increases the weight of global regulation, yet each country maintains its own distinct regime of sports law and its own national and local sports organizations. Sports law at a national or organizational level thus gains a growing relevance in comparative law. The book describes and discusses both state-created rules and autonomous self regulation regarding the variety of economic, social, commercial, cultural, and political aspects of sports activities. Self-regulation manifests itself in the form of by-laws, and encompasses organizational provisions, disciplinary rules, and rules of play. However, the trend towards more professionalism in sports and the growing economic, social and cultural relevance of sports have prompted an increasing reliance on legal rules adopted by public authorities. This form of regulation appears in a variety of legal areas, including criminal law, labour law, commercial law, tax law, competition law, and tort law, and may vary following a particular type or sector of sport. It is in this dual and overlapping context that such much-publicized aspects as doping, sponsoring and media, and responsibility for injuries are legally measured. This monograph fills a gap in the legal literature by giving academics, practitioners, sports organizations, and policymakers access to sports law at this specific level. Lawyers representing parties with interests in Switzerland will welcome this very useful guide, and academics and researchers will appreciate its value in the study of comparative sports law. International Sports Law and Business

This comprehensive, three-volume set focuses on the legal and business aspects of sports in the United States and abroad. The authors have presented the subject matter from a practical and pragmatic perspective, yet with analytical precision and attention to fine points of detail. This book is composed of five parts: Part I deals with the law and business of sports in the United States, with the primary emphasis on the legal aspects of professional sports. Part II deals with the internationalization of sports from various perspectives, principally North American team sports. Part III explores the law and business of sports in 18 non-U.S. jurisdictions--subject matter hardly covered in other sources, if at all. Part IV treats the legal and, to some extent, business aspects of broadcasting and sports, both in the United States and in selected foreign jurisdictions. Part V focuses upon sports marketing in its various forms in the United States, as well as its international perspectives. This easy-to-read work is unmatched in that it covers subjects not addressed or only tangentially addressed in other works, presents insiders perspectives on the subject matter, and focuses extensively on international aspects of sports law and business in connection with many different subjects. Among its exhibits, International Sports Law and Business includes a World League of American Football Standard Player Contract form, a sample World League of American Football Acquisition and Operation Agreement, Statute of Court of Arbitration for Sport and Regulations. It also includes a comprehensive index.

Leading Cases in Sports Law

This book accounts for over 25 of the most influential cases in international sports law, as written by some of the leading authorities in the area. Authors from Europe, the United States, Australia, South Africa, Canada and New Zealand trace the evolution of this emerging discipline of law through an analysis of individual cases, as discussed under a number of key debates and themes in contemporary sports law, including: the "public" nature of legal disputes in sport; player employment mobility litigation; doping and the spirit of sport; TV rights holding proceedings; and enduring themes in sports law such as on-field violence, spectator safety, animal welfare and gender equality. Valuable for sports law academics, arbitrators and practitioners, sports administrators and governing bodies, but also for students (postgraduate and undergraduate) and all those with an interest in international sports law.

Advanced Introduction to Global Sports Law

Stephen F. Ross presents this succinct introduction to key topics of law specific to sports, comparing approaches to sports law across the globe, with particular focus on the United States, Europe, and common law jurisdictions. Contrasting the profit-maximizing approach of North American leagues with

the global integrated approach of professional sports governed by national and international governing boards, the book offers a novel model for the latter.

European Sports Law

The important theme "What is Sports Law?" was the topic of the international Conference on "The Concept of Lex Sportiva Revisited", which took place in Jakarta in late 2010. Academics and practitioners are still in debate to agree on this concept as is evident in this book. This book not only contains the worked out contributions of this Conference, but also other related chapters on the subject. It produces a reassessment of the content of Sports Law and its terminology keeping a close eye on the current literature. The book appears in the ASSER International Sports Law Series, under the editorship of Prof. Dr. Robert Siekmann, Dr. Janwillem Soek and Marco van der Harst LL.M.

Sports Law in the European Union

Katarina Pijetlovic is the first author to address the issue of breakaway leagues in football and their treatment under EU law. In this book she guides the reader through EU sports law, the specificities of the sporting industry and the problems and power struggles in European football governance in the context of the breakaway threats by elite clubs. In order to analyse the legality of UEFA clauses that restrict the formation of such breakaway structures, the author first provides a progressive interpretation of the applicable EU sports law and an in-depth analytical review of EU sports cases decided under internal market and competition provisions, including a novel perspective on the UEFA home-grown rule and the Bosman case. Thereafter, she sets out an original theory of convergence between TFEU provisions on competition and the internal market in the light of sporting exceptions. Finally, in applying the legal principles thus outlined Katarina Pijetlovic explores the legality of the restrictive UEFA clauses and the case for the formation of alternative leagues in European football under EU sports law. A number of surprising outcomes emerge from this analytical process. Conversely, she also tests the largely neglected issue of the legality of forming a breakaway league by the European elite football clubs. The systematic way in which the reader is guided through EU sports law and the legal issues under consideration makes the book accessible for EU lawyers as well as non-EU sports lawyers, on both an academic and a practitioner's level. Katarina Pijetlovic holds licentiate and doctoral degrees in EU sports law from the University of Helsinki. The book appears in the ASSER International Sports Law Series, under the editorship of Dr. David McArdle, Prof. Ben Van Rompuy and Marco van der Harst LL.M.

Sport: Law and Practice

Match –fixing has become a widespread international problem in recent years. It includes everything from bribery of players, to putting undue influences on the owners of the soccer clubs, managers, coaches and others who have the ability to affect the final scores. In addition, match-fixing spills over into the arena of illegal betting (in person and online), which creates a host of additional organized crime opportunities, including human trafficking, prostitution, drugs, extortion and even terrorism. This timely volume brings together international contributions with an aim is to increase awareness of the problems associated with match-fixing and the degree to which key agents in sport, particularly young people, are vulnerable. The contributions are based on INTERPOL's Global Experts Meeting in Singapore, in November 2012, which brought together key speakers to discuss issues surrounding match-fixing and how to combat corruption in football through channels of education. The purpose of this meeting was to identify ways that academia can play a role in developing and implementing training modules and academic courses, including certification procedures, to prevent match-fixing and develop lines of study at all educational levels. This unique work reflects the gravity of the situation around the world together with possible solutions.

Sports Law in India

With a Foreword by Dr Michal Krejza, Head of Sport Unit, Directorate-General for Education and Culture, European Commission, Brussels Much has changed since the publication of *Professional Sport in the EU: Regulation and Re-regulation* (edited by Andrew Caiger and Simon Gardiner, The Hague, T.M.C. Asser Press 2000). The present book explores new territory and its scope and tone reflect the maturity of the discipline of EU sports law and policy. The book seeks to balance contributions from established authorities and the best of the new generation of sports law and policy academics. New theoretical insights are revealed which accompany in particular two further sections dealing first with governance and regulatory issues (also including freedom of movement and competition law issues) and second with questions of representation. The issue of the representation of stakeholders within sports governance structures (Social Dialogue between employers/clubs and employees/players) is arguably the most significant development in the last decade and the inclusion of the word 'Representation' in the title is merited. Contributions on anti-doping, football hooliganism and sports betting are added to the book. The editing team consisted of Simon Gardiner, Leeds Metropolitan University, United Kingdom, Richard Parrish, Edge Hill University, Ormskirk, United Kingdom, and Robert Siekmann, ASSER International Sports Law Centre, The Hague, The Netherlands. This book appears in the ASSER International Sports Law Series, under the editorship of Robert Siekmann and Janwillem Soek.

The Council of Europe and Sport: Basic Documents is the second volume in the Asser series of collections of documents on international sports law, containing material on the intergovernmental (inter-state) part of international sports law. *The European Union and Sport: Legal and Policy Documents* was the first volume devoted to the European Union. In previous other publications, non-governmental materials, i.e. statutes and constitutions, doping rules and regulations, arbitral and disciplinary rules and regulations of the international sports organisations were published. The book provides an invaluable source of reference for governmental and sports officials, legal practitioners and the academic world. With the increasing public interest in the legal aspects of sports, this collection of documents is a timely and welcome contribution to enhancing the accessibility of basic texts on international sports law and policy.

EU, Sport, Law and Policy

This electronic version has been made available under a Creative Commons (BY-NC-ND) open access license. Adopting a distinctive legal and political analysis, this book argues that the EU is receptive to the sports sectors claims for special treatment before the law. The book investigates the birth of EU sports law and policy by examining significant court decisions, the possibility of exempting sport from EU law, sport and the EU treaty, and more.

The Council of Europe and Sport

During the past decade, the media landscape and the coverage of sports events have changed fundamentally. Sports fans can consume the sports content of their choice, on the platform they prefer and at the time they want. Furthermore, thanks to electronic devices and Internet, content can now be created and distributed by every sports fan. As a result, it is argued that media regulation which traditionally contains rules safeguarding access to information and diversity would become redundant. Moreover, it is sometimes proposed to leave the regulation of the broadcasting market solely to competition law. This book, illustrates that media law is still needed, even in an era of abundance, to guarantee public's access to live and full sports coverage. Dealing with the impact of new media

on both media and competition law this book will greatly appeal to academics and stakeholders from various disciplines, such as legal and public policy, political science, media and communications studies, journalism and European studies. Additionally it contains valuable information and points of view for policy makers, lawyers and international and intergovernmental organisations, active in media development. The book contains an up-to-date analysis and overview of the different competition authorities' decisions and media provisions dealing with the sale, acquisition and exploitation of sports broadcasting rights. Katrien Lefever is Senior Legal Researcher at IBBT - The Interdisciplinary Centre for Law and ICT (ICRI), KU Leuven, Belgium. The book appears in the ASSER International Sports Law Series, under the editorship of Prof. Dr. Robert Siekmann, Dr. Janwillem Soek and Marco van der Harst LL.M.

Sports law and policy in the European Union

Sport: Law and Practice, Fourth Edition is the leading legal title covering sports law and practice in the UK, and at the Court of Arbitration for Sport. It serves both as a comprehensive statement of applicable law and precedent, and as a very practical guide to circumnavigating a complex sector. The new edition retains and updates all of the key chapters from previous editions, including the extended sections on challenges to the actions of sports governing bodies, and on anti-doping regulation and enforcement (with an introduction to the new 2021 World Anti-Doping Code). There are important updates to the chapters on Regulating Financial Fair Play, Misconduct, Safeguarding in Sport, the Court of Arbitration for Sport, and Media Rights and Sport. The Fourth Edition also adds brand new chapters dealing with: -Effective sports regulation (including the first ever comprehensive discussions of the 'general principles of law' applied by CAS panels in determining challenges to sports regulations, as well as of the principles of interpretation of sports regulations). -Best practice in sports governance (describing developments such as the strengthening of the competence and independence of boards and the emergence of independent integrity units). -Data protection law and sport (including discussion of the provisions of the Data Protection Act 2018 that facilitate the sharing of personal data by sports bodies for integrity-related purposes). -Exploiting commercially valuable sports data (explaining how sports rights-holders can fashion commercial agreements to meet the demand for sports data from the betting industry and others). -ESports (the first comprehensive treatment of the legal and practical principles underlying the regulation and commercial exploitation of the increasingly important ESports sector). Readers will also benefit from practice tips, precedent clauses, detailed explanations of key practical issues, and step-by-step analysis. This is an essential title for all sports law practitioners (solicitors and barristers, common law and civil lawyers), sports governing bodies, event organisers, clubs, participants, sports agencies and commercial partners, arbitrators, universities, and students.

New Media and Sport

This book takes a close look at the Court of Arbitration for Sport (CAS), challenging existing claims and answering previously unanswered questions, by considering all of its publicly available decisions, both in its entirety as a body of jurisprudence and on a case-by-case level. It also investigates the actors involved in adjudication before the CAS, both the parties that bring disputes before the CAS and the arbitrators that resolve them, and in so doing establish precedents that govern sports generally. While the book relies upon and includes more traditional legal theory and analysis, it combines this with an empirical analysis of a large portion of the CAS's decisions. Hereby it relies upon and relates to the theory of the development of a transnational legal order in sports, the *lex sportiva*. The publication is targeted at and will benefit those professionally working in or interested in the fields of sports law, arbitration law, transnational law, or empirical legal studies. Johan Lindholm is a Professor of Law at Umeå University in Sweden.

Sport: Law and Practice

This comprehensive collection of leading articles covers legal issues that have arisen out of international sports competition and its management. These papers trace the burgeoning field of international sports law from its origins about a half-century ago, through the course of complex challenges ranging from political boycotts of competition to doping of athletes, corruption, discrimination, players' rights and commercial influences such as broadcast rights. Within a unique institutional framework of national, international, non-governmental and inter-governmental authority, the emerging regime of public law is of fundamental importance not only to the sports industry and bar but, quite obviously, to a global public. This authoritative collection puts particular emphasis on the central role of the Olympic Movement and

affiliated sports federations, the regional mechanism of the European Union and the characteristics of the European and North American sports models. The collection, along with an original introduction, will be of interest and value to students, researchers, academics and practitioners interested in international sports law.

The Court of Arbitration for Sport and Its Jurisprudence

The Textbook was prepared in accordance with the Federal State Educational Standard for Higher Education as applied to specialisation 40.03.01 "Jurisprudence" (Bachelor (degree) qualification) and the syllabus of the academic discipline "International Sports Law", approved by the International Law Department of the Kutafin Moscow State Law University in January 2017. The Textbook consists of 17 chapters. They correspond to the themes of the syllabus of the academic discipline. In its General part, the history, object, subjects, sources, special principles of international sports law, the process of regulation of international sports relations at the universal level within the framework of the United Nations, its specialised agencies and programs, at the regional level within the Council of Europe and the European Union, at the bilateral level are considered. The Author makes a corresponding distinction with the object, subjects, sources, special principles of *lex sportiva*, a set of corporate norms elaborated by the International Olympic Committee, the International Paralympic Committee, international and national sports federations. Special attention is paid to the study of ways of resolving sports disputes through arbitration and appeal proceedings in the Court of Arbitration for Sport (CAS), by means of judicial proceedings in the European Court of Human Rights (ECtHR) and the Court of Justice of the European Union (CJEU). The Special Part of the Textbook identifies problem areas that require additional efforts to implement international legal and corporate regulations: the use of doping in sport, violence and hooligan behaviour of spectators and fans, environmental protection when organising international sports competitions, economic crimes and discrimination in international sports, protection of property rights with regard to television and radio broadcasts of international sports competitions, the use of Olympic symbols, countering threats to a healthy lifestyle. International instruments and acts of the Russian legislation are as of May 2018. The Textbook will be of interest for Bachelor students of law, lecturers of higher education institutions, practicing lawyers, staff members of organizations of the Olympic and Paralympic movements, as well as for all those whose academic interests and practical activities are connected with international law, sports law and *lex sportiva*.

Sports Law

The aim of this book is to provide an account of how the law influences the operation, administration and playing of modern sports. Although the book focuses on legal doctrine it has been written bearing in mind sport's historical, cultural, social and economic context, including the drama and colour of sport's major events and leading personalities. And although it is inevitably very much concerned with elite professional sports it is not dominated by them, and seeks to cover the widest possible range of sports, professional and amateur. Initially, the book addresses practical issues such as the structures of national and international sport, and examines the evolution of the body of law known as 'sports law'. Thereafter three main themes are identified: regulatory; participatory; and financial aspects of modern sport. The regulatory theme is dealt with in chapters considering the manner in which decisions of sports governing bodies may be challenged in the ordinary courts and the development of alternative dispute resolution mechanisms in sport. The participatory theme includes the legal regulation of doping and violence in sport, as well as the broader topic of tortious liability for sporting injuries. The financial theme, reflecting the enhanced commercialisation of sport at all levels, is developed in chapters concerning issues in applied contract and employment law for players and legal matters surrounding the organisation of major sports events. The conclusion summarises modern sport's experience of EU law, pointing the way to the future direction of sports law more generally. While the book is aimed primarily at students, and is designed to cover fundamental and topical areas of sports law (sports law in general; sports bodies and the courts; arbitration in sport; corruption; doping; violence; civil liability; discrimination; the commodification of modern sport; and the likely future of sports law), it should also prove of wider interest to practitioners, sports administrators and governing bodies; and though focused primarily on UK law it will also appeal to readers in Australia, Canada, New Zealand and the USA.

Sports Law in Italy

This book addresses the most important judicial aspects in relation to the FIFA Dispute Resolution Chamber (DRC), as well as the different categories of disputes, inter alia, the termination of player contracts, the amount of compensation, sporting sanctions, training compensation and the solidarity mechanism. The DRC was established in 2001 by FIFA for the purpose of resolving disputes regarding the international status and transfer of players. Since then the DRC has developed into a major and influential alternative resolution body, with an impressive and everincreasing caseload. In this updated and revised Second Edition the most important decisions of the DRC as of the date of its establishment in 2001 until 2016 are analysed. It is a reference work for those with a legal and financial interest in professional football, such as lawyers, agents, managers and administrators, but is also aimed at researchers and academics. Michele Bernasconi, Attorney-at-law in Zurich, Switzerland, Arbitrator at CAS and President of the Swiss Sports Law Association provided a foreword for the book. Frans M. de Weger is senior legal counsel working for the Dutch Federation of Professional Football Clubs (FBO). In 2015 he was, at the proposal of the European Club Association (ECA), appointed as an arbitrator for the Court of Arbitration for Sport (CAS). As a legal counsel and a CAS arbitrator he is involved in several national and international football-related legal disputes. This book appears in the ASSER International Sports Law Series, under the editorship of Prof. Dr. Ben Van Rompuy and Dr. Antoine Duval. "Frans de Weger's work on the jurisprudence of the DRC is a "must-have" for anybody dealing with sports law and, in particular, dealing with football issues under the FIFA Regulations on the Status and Transfer of Players." Massimo Coccia Professor of International Law and Attorney-at-Law in Rome and CAS Arbitrator "Where to go when trying to understand the FIFA Regulations on the Status and Transfer of Players? Now Frans de Weger has the answer with his new version of the much-awaited and needed Jurisprudence of the FIFA Dispute Resolution Chamber." Juan de Dios Crespo Pérez Sports Lawyer "The second edition of this book, which is systematic and practical at the same time, will surely be of great interest to both specialists active in the world of "football law" and aspiring individuals." Wouter Lambrecht Attorney-at-law, Head of Legal at the European Club Association, FIFA Dispute Resolution Chamber Member and Mediator at the CAS

Modern Sports Law

FIFA has accepted the jurisdiction of the CAS as from 11 November 2002. This date does not mark the beginning of the arbitration of the CAS in football matters, however it has to be stated, that from this date on football disputes in front of the CAS increased enormously. This book is dedicated to the most important decisions of the CAS in football disputes. These awards are analyzed by experts, practicing all over the world. Most of the authors have been directly involved in the proceedings before the CAS.

The commentaries cover a broad spectrum of disputes, inter alia, disputes concerning the contractual stability, protection of young football players, doping, football hooliganism, match fixing, players release, multiple club ownership, player agents and the stays of execution. This book provides a wide range of valuable information and is a useful tool for those whose main concern is professional football, such as sports lawyers, sports managers and sports agents, but also academics and researchers. The book appears in the ASSER International Sports Law Series, under the editorship of Dr. Robert Siekmann, Dr. Janwillem Soek and Marco van der Harst LL.M.

The Jurisprudence of the FIFA Dispute Resolution Chamber

I am very pleased and proud to write the Foreword to this Book on the occasion of the Court of Arbitration for Sport (CAS) having completed its first twenty years of operations. And I warmly congratulate the ASSER International Sports Law Centre and the Editors, Ian Blackshaw, Rob Siekmann and Janwillem Soek – in cooperation with Andrew Gibson, Griffith University, Brisbane, Australia, and Steve Cornelius, University of Johannesburg, South Africa –, on their joint initiative in putting together and publishing this Book. The CAS has come a long way since the idea of establishing it was first mentioned by Juan Antonio Samaranch, the former IOC President. His vision and confidence in its future have been truly vindicated. Since its creation and up to 31 December 2003, 576 cases have been submitted, of which 550 were requests for arbitration and 26 for an advisory opinion. In 2004, there was a sharp rise in the number of cases handled by the CAS and this trend continues apace. Thus, the CAS goes from strength to strength and has a great future, having, in the words of the Swiss Federal Tribunal in its landmark judgement of 27 May 2003, “built up the trust of the sporting world [and] . . . now widely recognised . . . [as] . . . one of the principal mainstays of organised sport.

International Human Rights Law

Undoubtedly one of the paragons of public international law in contemporary times, Colin Warbrick is truly held in high esteem by his peers at home and abroad. His breadth of knowledge is reflected in a large number of scholarly works and in his appointment as a Specialist Adviser to the Select Committee on the Constitution of the House of Lords and as a consultant to both the Council of Europe and OSCE. This "festschrift" celebrates on his retirement as Barber Professor of Jurisprudence at Birmingham University, his extraordinary talent and academic career by bringing together a group of eminent judges, practitioners and academics to write on international human rights, international criminal justice and international order and security, fields in which Professor Warbrick has left an indelible mark.

International Law

Even when governments have no democratic basis, they are regarded as the sole representatives of their populations on the international plane and take important decisions on their behalf. It is therefore important that other voices can be heard in international fora alongside governments. NGOs have an increasingly important legal and political role and use several different avenues for their work, such as lodging cases before international courts and other bodies and participating in international meetings

and conferences. This book explores these possibilities for the participation of NGOs in international law.

Non-Governmental Organisations in International Law

Fifty years after the adoption of the Declaration on Permanent Sovereignty over Natural Resources by the General Assembly of the United Nations in December 1962, this volume assesses the evolution of the principle of permanent sovereignty over natural resources into a principle of customary international law as well as related developments. International environmental and human rights law leave unresolved questions regarding the limitations of this principle, e.g. extraterritorial and international influences such as the applicable criminal and tort law, as well as the extraterritorial and international promotion of good governance, including transparency obligations.

A Modern Introduction to International Law

The content and scope of this companion make it an ideal text for generalist International Law courses in Australia.

A Companion to U.S. Foreign Relations

An explosive insider account of grime, from subculture to international phenomenon. ***** A group of kids in the 2000s had a dream to make their voice heard - and this book documents their seminal impact on today's pop culture. DJ Target grew up in Bow under the shadow of Canary Wharf, with

money looming close on the skyline. The 'Godfather of Grime' Wiley and Dizzee Rascal first met each other in his bedroom. They were all just grime kids on the block back then, and didn't realise they were to become pioneers of an international music revolution. A movement that permeates deep into British culture and beyond. Household names were borne out of those housing estates, and the music industry now jumps to the beat of their gritty reality rather than the tune of glossy aspiration. Grime has shaken the world and Target is revealing its explosive and expansive journey in full, using his own unique insight and drawing on the input of grime's greatest names.

Elements of Legal Writing

This book, which can be used as a text for teaching purposes, gives a fascinating, and authoritative treatment both the rights protected by the Inter-American system and of the way in which its institutions work. An important part of the book is a thorough, article by article account of the guarantee in the American Declaration of the Rights and Duties of Man and in the American Convention on Human Rights of civil, political, economic, social and cultural rights in the light of the jurisprudence of the Inter-American Commission on Human Rights and the Inter-American Court of Human Rights, and of the Commission's many country reports on the human rights situation in particular states. There are also chapters on the rights of indigenous peoples, amnesty laws and states of emergencies. The evolution and current methods of work of the Commission and the Court are set out at length and their achievements are critically assessed. The role of non-governmental organisations is also examined in this context. The book will be invaluable to all those interested in the protection of human rights in the Americas and international human rights law generally.

Permanent Sovereignty over Natural Resources

Pakistan was once only an inspired vision. In 1947, through great sacrifice, a miraculous new nation was born. With its people energised and free, it seemed there was no height Pakistan would not scale. Now, many decades later, as we look back on years of strife, division and poverty cultivated by generations of misguided leaders, we find ourselves wondering how this glorious inheritance became so spoiled. Atif F Qureshi examines the causes of the calamity, in particular the explanation that trumps all others - the import of Western political, legal and economic systems. Detailing why these methods are wholly unworkable for an independent Muslim nation, he examines how Western concepts such as socialism and English Civil Law have led to crises ranging from economic stagnation to terrorist insurgencies. Yet the decline is not irreversible. Qureshi outlines policies that by returning to core Islamic values will revive, rejuvenate and revitalise this beautiful nation. From defence and the environment to education and banking, every aspect of national planning is explored. He shows how in spite of all the travails, Pakistan is well-placed for a glorious future. After all, a manifest destiny awaits...

An Australian Companion to Harris

This book reveals the many harms which flow across the ever-more porous sovereign borders of a globalising world. These harms expose weaknesses in the international legal regime built on sovereignty of nation states. Using the Trail Smelter Arbitration, one of the most cited cases in international environmental law, this book explores the changing nature of state responses to transboundary harm. Taking a critical approach, the book examines the arbitration's influence on international law generally, and international environmental law specifically. In particular, the book explores whether there are lessons from Trail Smelter that are useful for resolving transboundary challenges confronting the international community. The book collects the commentary of a distinguished set of international law scholars who consider the history of the Trail Smelter arbitration, its significance for international environmental law, its broader relationship to international law, and its resonance in fields beyond the environment.

Grime Kids

Commercial contract law is in every sense optional given the choice between legal systems and law and arbitration. Its 'doctrines' are in fact virtually all default rules. Contract Law Minimalism advances the thesis that commercial parties prefer a minimalist law that sets out to enforce what they have decided - but does nothing else. The limited capacity of the legal process is the key to this 'minimalist' stance. This book considers evidence that such minimalism is indeed what commercial parties choose to govern their transactions. It critically engages with alternative schools of thought, that call for active regulation of contracts to promote either economic efficiency or the trust and co-operation necessary

for 'relational contracting'. The book also necessarily argues against the view that private law should be understood non-instrumentally (whether through promissory morality, corrective justice, taxonomic rationality, or otherwise). It sketches a restatement of English contract law in line with the thesis.

The Inter-American System of Human Rights

This book explores how Indigenous Peoples are impacted by globalization and the cult of the individual that often accompanies the phenomenon.

Pakistan

The Human Rights Act 1998 has had a profound effect in numerous private law decisions and has been the subject of extensive academic debate, in particular on the issue of the extent to which it has horizontal effect and its application in disputes between individuals. With contributions from a variety of academics and practitioners, this volume covers and contributes to the academic debate on horizontal effect and considers how theory matches up with case law; the limits of the Act for private law; and its impact on key areas including privacy, defamation, negligence, nuisance, property, commercial law and employment. Together, the book provides a practical critique of the areas discussed, which will be of academic interest to theorists and of practical benefit to lawyers and judges who wish to understand how the academic debates can be brought to bear in particular cases.

Transboundary Harm in International Law

This book explores how international drug control law should be interpreted within the context of international human rights law.

Contract Law Minimalism

This book identifies the rights of stateless people and outlines the major legal obstacles preventing the eradication of statelessness.

At the Margins of Globalization

Clearly and accessibly written, this new text provides a valuable resource for undergraduate and postgraduate students of international law and covers subjects including the history, theories and sources of international law, as well as current areas of interest such as international criminal law.

Aegean Sea Continental Shelf Case (Greece V. Turkey)

A Treatise of Legal Philosophy and General Jurisprudence is the first-ever multivolume treatment of the issues in legal philosophy and general jurisprudence, from both a theoretical and a historical perspective. The work is aimed at jurists as well as legal and practical philosophers. Edited by the renowned theorist Enrico Pattaro and his team, this book is a classical reference work that would be of great interest to legal and practical philosophers as well as to jurists and legal scholar at all levels. The work is divided in two parts. The theoretical part (published in 2005), consisting of five volumes, covers the main topics of the contemporary debate; the historical part, consisting of six volumes (Volumes 6-8 published in 2007; Volumes 9 and 10, published in 2009; Volume 11 published in 2011 and Volume 12 forthcoming in 2015), accounts for the development of legal thought from ancient Greek times through the twentieth century. The entire set will be completed with an index. Volume 12 Legal Philosophy in the Twentieth Century: The Civil Law World Volume 12 of A Treatise of Legal Philosophy and General Jurisprudence, titled Legal Philosophy in the Twentieth Century: The Civil-Law World, functions as a complement to Gerald Postema's volume 11 (titled Legal Philosophy in the Twentieth Century: The Common Law World), and it offers the first comprehensive account of the complex development that legal philosophy has undergone in continental Europe and Latin America since 1900. In this volume, leading international scholars from the different language areas making up the civil-law world give an account of the way legal philosophy has evolved in these areas in the 20th century, the outcome being an overall mosaic of civil-law legal philosophy in this arc of time. Further, specialists in the field describe the development that legal philosophy has undergone in the 20th century by focusing on three of its main subjects—namely, legal positivism, natural-law theory, and the theory of legal reasoning—and discussing the different conceptions that have been put forward under these labels. The layout of the volume is meant to frame historical analysis with a view to the contemporary theoretical debate, thus completing the Treatise in keeping with its overall methodological aim, namely, that of combining history

and theory as a necessary means by which to provide a comprehensive account of jurisprudential thinking.

The Impact of the UK Human Rights Act on Private Law

This book provides an international legal analysis of the most important questions regarding Iran's nuclear program since 2002. Setting these legal questions in their historical and diplomatic context, this book aims to clarify how the relevant sources of international law - including primarily the 1968 Nuclear Non-proliferation Treaty and IAEA treaty law - should be properly applied in the context of the Iran case. It provides an instructional case study of the application of these sources of international law, the lessons which can be applied to inform both the on-going legal and diplomatic dynamics surrounding the Iran nuclear dispute itself, as well as similar future cases. Some questions raised regard the watershed diplomatic accord reached between Iran and Western states in July, 2015, known as the Joint Comprehensive Program of Action. The answers will be of interests to diplomats and academics, as well as to anyone who is interested in understanding international law's application to this sensitive dispute in international relations.

Drug Control and Human Rights in International Law

In this original and incisive study, the author investigates the relationship between Islamic law, States practices and International terrorism.

Nationality and Statelessness under International Law

In *The Juridical Nature of Unilateral Acts of States in International Law* Eva Kassoti explores the question of the legal nature of unilateral acts by focusing on their essential characteristics, namely unilateralism and the manifest intention to be bound.

Elements of Private International Law

International law is a rapidly growing area and Australian cases are mounting. In view of world events over the last few years, it is timely for a case book to highlight that Australia is part of an international community and is subject to international law. Can be used as a supplement to Harris' volume on this subject.

International Law

This volume provides a rigorously structured analysis of the EU system of judicial protection and procedure before the Union courts. It examines their role, competences and the types of actions that may be brought before them.

A Treatise of Legal Philosophy and General Jurisprudence

This publication gives the opinions and discussions of an international Symposium on the judicial settlement of international disputes as well as three expert reports which were submitted for the Symposium's preparation. The Symposium sought to answer the following three questions: (1) Does the International Court of Justice, as it is presently shaped, correspond to the requirements which follow from its functions as the central judicial body of the international community? (2) To which extent and for which subject matters is it advisable to create and develop special judicial bodies with a jurisdiction limited to certain regions or to certain subject matters? (3) To which extent and for which questions is it advisable to provide for the settlement of international legal disputes by other organs than permanent courts? The Symposium took place from July 10-12, 1972 in the Max-Planck Institut für ausländisches öffentliches Recht und Völkerrecht in Heidelberg. Experts in international law and international jurisdiction from many countries were invited, not in their official capacity, but rather on the basis of their individual competence; the list of participants appears at the end of this volume.

Iran's Nuclear Program and International Law

A landmark publication in the teaching of international law from one of the world's leading international lawyers. This refreshingly clear, concise textbook conveys the dynamics of international law through four questions: Where does it come from? To whom does it apply? How does it resolve conflict? What does it say?
