Joseph Stalin, el líder de la Unión Soviética, es aclamado como un héroe nacional, pero sigue siendo uno de los criminales más notorios de la historia.

La incesante búsqueda de Stalin de una utopía comunista en la Unión Soviética enfrenta obstáculos formidables y una calidad de vida en declive para sus ciudadanos.

El gobierno tiránico de Stalin se caracterizó por juicios políticos despiadados y una represión generalizada.

La hambruna provocada por el hombre en Ucrania provoca la muerte de millones de personas, mientras que los diplomáticos franceses son engañados por la propaganda.

La trágica y cruel saga de la construcción del Canal Stalin.

La era del Gran Terror

El fracaso de Stalin a la hora de captar la amenaza inminente de Hitler, dejó a la Unión Soviética sin preparación para la guerra.

El liderazgo de Stalin durante la Segunda Guerra Mundial, incluida la crucial Batalla de Stalingrado, consolida el estatus de la Unión Soviética como superpotencia.

El momento triunfal de Stalin en Berlín y su insistencia en una participación sustancial de Europa en la Conferencia de Potsdam.

La gente de Grigny desea su cumpleaños a Stalin y ensalza su liderazgo.

Malaysian Maverick

Mahathir Mohamad turned Malaysia into one of the developing world's most successful economies. He adopted pragmatic economic policies alongside repressive political measures and showed that Islam

was compatible with representative government and modernization. He emerged as a Third World champion and Islamic spokesman by standing up to the West.

A Doctor in the House

Malaysia's longest-serving and most outspoken prime minister, Dr Mahathir Mohamad has been politically active for more than 60 years. As a young doctor he agitated for independence from the British and promoted the rights of the Malays, and his long political career culminated in his 22-year term as prime minister during which Malaysia's rapid development, his forthright words and singular policies thrust the country into the eyes of the world. Throughout his career, Dr Mahathir has spoken and written in a frank and uncompromising manner and he has continued to do so since retiring from the premiership in 2003; he remains a controversial figure to this day. The Wit and Wisdom of Dr Mahathir Mohamad is a collection of nearly 600 quotations spanning his time in government and beyond. The quotations are arranged by topic, including those as varied as leadership, race relations, the media, economics and development, colonialism, international relations including Israel and Palestine, and Malaysia itself.

The Wit and Wisdom of Dr Mahathir Mohamad

When an apple falls, does it roll far or stay close to its tree? Is it an exact clone of all the other apples the tree produces or something entirely different? This is the question that has perplexed the public about Marina for the simple reason that she is the daughter of the man who has governed Malaysia for almost twenty-four years. Does she echo him in his view of the world, or does she chart her own path? Why is it that in her own public life, in her writing and speeches, she expresses opinions that seem to contradict his? This book hopes to detail how she has navigated her life as the daughter of a charismatic politician and a loving father, even as sometimes she has chafed at being constantly under his shadow. It talks about how she has struggled to find her own identity, to defend her worldview at times and to reconcile them with his at others. She tells the story of growing up as the daughter of Malaysia's most influential leader, from the values instilled in her as a child, right up to the day he was forced to step down as the 7th Prime Minister after leading the historic ouster of the government he used to lead.

Paradise Lost

Until the catastrophic economic crisis of the late 1990s, East Asia was perceived as a monolithic success story. But heady economic growth rates masked the most divided continent in the world - one half the most extraordinary developmental success story ever seen, the other half a paper tiger. Joe Studwell explores how policies ridiculed by economists created titans in Japan, Korea and Taiwan, and are now behind the rise of China, while the best advice the West could offer sold its allies in South-East Asia down the economic river. The first book to offer an Asia-wide deconstruction of success and failure in economic development, Studwell's latest work is provocative and iconoclastic - and sobering reading for most of the world's developing countries. How Asia Works is a must-read book that packs powerful insights about the world's most misunderstood continent.

The Apple and the Tree: Life as Dr Mahathir's Daughter

Julian Robertson is one of the most successful and well-known hedge fund managers of our time. For nearly twenty years his infamous fund--Tiger Management--was the talk of the town, routinely delivering double-digit performance. How Asia Works

Drawing on the fields of political economy and historical sociology, Jones dispels the overwhelming consensus among scholars that members of the Association of Southeast Asian Nations (ASEAN) never interfere in the internal affairs of other states, and pioneers a new approach to the understanding of regional politics in Southeast Asia.

Julian Robertson

The failure of two expected transitions of leadership from Dr Mahathir Mohamad to Anwar Ibrahim (in 1998 and 2020) are traceable beyond their personal entanglements to the social divides and political currents of their time. The unrealized transitions are symptomatic of UMNO's dynamic of 'dysfunctional succession'. Under Mahathir, the party split. Under Najib, it was defeated. The condition persists as the current prime minister, Muhyiddin Yassin, has not even appointed a deputy prime minister after being in power for fifteen months. The unrealized transitions were a setback for a 'reform agenda', which Anwar Ibrahim articulated, but which emerged from dissident movements for diverse reforms. These movements helped the multiethnic, socially inclusive, opposition to win the 14th General Election. They are only seemingly dormant because of the pandemic. The Pakatan Harapan regime had the best chance to supply a fresh vision, deeper social understanding, and commitment to reform. The present Perikatan Nasional regime's fixation on 'Malayness' overlooks twenty years of intense intra-Malay conflicts that began with the failure of the first transition. As the '7th Prime Minister', Mahathir had a rare chance to redeem himself from major errors of his first twenty-two-year tenure. He squandered his chance by not honouring the Pakatan Harapan transition plan. Anwar Ibrahim's opponents mock him for being obsessed with wanting to be prime minister. Yet they obsessively fear his becoming prime minister. Anwar may be twice loser in political succession but 'the spectre of Anwar' still haunts Malaysian political consciousness.

ASEAN, Sovereignty and Intervention in Southeast Asia

This book presents interviews with 20 successful Malaysian housing developers, to provide real-world insights and practical know-how for future developers. It is designed in a way that reveals the secrets of successful developers, from their origins to their current status with the interviews conducted in a semi-structured manner so that the interviewees were able to freely share their experiences, thoughts, opinions and tips acquired throughout their business careers. Covering the developers' success stories, from their background, educational history and personal traits to their business challenges and achievements, it appeals to academics and practitioners alike.

The Unrealized Mahathir-Anwar Transitions

While public administration practice and education in general has become considerably professionalized in the last decade, existing knowledge on public administration in Southeast Asia is fragmented at best, and often devoid of a useful reference. While journal articles and government reports provide decentralized information, *Public Administration in Southeast Asia: Thailand, Philippines, Malaysia, Hong Kong and Macao* takes a comprehensive and comparative look at the major components of administration systems. The selection of countries and regions included reflects the diversity of Southeast Asia. Organized by Country The handbook fills a critical need by bringing together leading scholars who provide an insider perspective and viewpoint on essential and advanced issues. Divided into five sections, each dedicated to a particular country, the text outlines topics relevant to modern public administration, including: History and Political Context of Public Administration Decentralization and Local Governance Public Ethics and Corruption Performance Management Reforms Civil Service System Focusing on recent developments in public administration in these countries which are among the fastest growing economies in the world, the book explores their practices and innovative approaches in public administration. For many years people have been fascinated by the cultures, peoples, and governments of Southeast Asia, and now they have a book that discusses the apparatus of government in Southeast Asia – their agencies, contexts, processes, and values.

Business Sustainability Model for Malaysian Housing Developers

Within the context of Malaysia's recent political history, it charts the evolution of Mahathir's complex world-view to reveal paradoxes, alternating patterns of consistency and contradiction, which help us understand his politics, policies, and personality. In biographical terms, it examines the legacy of

Mahathir's youthful immersion in the Malay world, the class background to his religiosity, and the medical influence on his political style.

Public Administration in Southeast Asia

We live in a world populated not just by individuals but by figures, those larger-than-life people who in some way express and challenge our conventional understandings of social types. This innovative and collaborative work takes up the wide range of figures that populate the social and cultural imaginaries of contemporary Southeast Asia—some familiar only in specific places, others recognizable across the region and even globally. It puts forward a series of ethnographic portraits of figures that represent and give voice to something larger than themselves, offering a view into social life that is at once highly particular and general. They include the Muslim Television Preacher in Indonesia, Miss Beer Lao, the Rural DJ in Thailand, the Korean Soap Opera Junkie in Burma, the Filipino Seaman, and the Photo Retoucher in Vietnam. *Figures of Southeast Asian Modernity* brings together the fieldwork of over eighty scholars and covers the nine major countries of the region: Burma (Myanmar), Cambodia, Indonesia, Laos, Malaysia, the Philippines, Singapore, Thailand, and Vietnam. An introduction outlines important social transformations in Southeast Asia and key theoretical and methodological innovations that result from ethnographic attention to the study of key figures. Each section begins with an introduction by a country editor followed by short essays offering vivid and intimate portraits set against the background of contemporary Southeast Asia. The result is a volume that combines scholarly rigor with a meaningful, up-to-date portrayal of a region of the world undergoing rapid change. A reference bibliography offers suggestions for further reading. *Figures of Southeast Asia Modernity* is an ideal teaching tool for introductory classes to Southeast Asia studies, anthropology, and geography.

Misplaced Democracy

This is a study of Malaysia's new political economy, with a focus on ownership and control of the corporate sector. It offers a pioneering assessment of government-linked investment companies (GLICs), a type of state-owned institution that has long prevailed in the corporate sector but has not been analysed. Malaysia's history of government-business ties is unique, while the nature of the nexuses between the state and the corporate sector has undergone major transitions. Corporate power has shifted from the hands of foreign firms to the state to the ruling party, and well-connected businessmen, and back to the state. Corporate wealth is now heavily situated in the leading publicly-listed government-linked companies (GLCs), controlled through block shareholdings by a mere seven GLICs under the jurisdiction of the Minister of Finance. To indicate why these GLICs are important actors in Corporate Malaysia, this study provides a deep assessment of their ownership and control of Bursa Malaysia's top 100 publicly-listed enterprises.

In *Elite Transition*, Patrick Bond examines the economic and social compromises that have been, and are being, made between the past and present powers in South Africa. A former adviser to the ANC, Bond investigates how groups such as the ANC went from being a force of liberation for all people to a vehicle now perceived as serving the economic interests of an elite few. Bond covers a range of socioeconomic factors under both the old and new South Africa, highlighting the reasons for the transition's 'development' failure and drawing on case studies on key issues: social contracts, black economic empowerment, housing and corporate power. He explores the idea that progressive policymaking is being compromised by the new petit bourgeoisie and ruling elite, and assesses the view that, as change slows down, official policy is increasingly one of lower expectations.

The Comparative Survey of Freedom is an institutional effort by Freedom House to monitor the progress and decline of political rights and civil liberties in 191 nations and 59 related territories. These year-end reviews of freedom began in 1955, when they were called the Balance Sheet of Freedom and, still later, the Annual Survey of the Progress of Freedom. This program was expanded in the early 1970s, and has appeared in Freedom Review since 1973. It has also been issued in a more developed context as a yearbook since 1978. Since 1989, the Survey project has been a year-long effort produced by regional experts, consultants and human rights specialists. The Survey derives its information from a wide range of sources. Most valued of these are the many human rights activists, journalists, editors and political figures around the world who keep us informed of the human rights situation in

their countries. Throughout the year, Freedom House personnel regularly conduct fact-finding missions to gain more in-depth knowledge of the vast political transformations affecting our world. During these week-to-month-long investigations, we make every effort to meet a cross-section of political parties and associations, human rights monitors, religious figures, representatives of both the private sector and trade union movement, academics and journalists. During the past year, Freedom House staff traveled to numerous countries throughout most of the world's geographical and political regions. The Survey project team also consults a vast array of published source materials, ranging from the reports of other human rights organizations to often rare, regional newspapers and magazines. This year's Survey team includes: Adrian Karatnycky, Martin Edwin Anderson, Kristen Guida, Marshall Freeman Harris, Thomas R. Lansner, Arch Puddington, Leonard R. Sussman, and George Zarycky. The general editor of Freedom in the World is Roger Kaplan; the managing editor is Tara Kelly. This year's research coordinator was Ch

Few gave tiny Singapore much chance of survival when it was granted independence in 1965. How is it, then, that today the former British colonial trading post is a thriving Asian metropolis with not only the world's number one airline, best airport, and busiest port of trade, but also the world's fourth-highest per capita real income? The story of that transformation is told here by Singapore's charismatic, controversial founding father, Lee Kuan Yew. Rising from a legacy of divisive colonialism, the devastation of the Second World War, and general poverty and disorder following the withdrawal of foreign forces, Singapore now is hailed as a city of the future. This miraculous history is dramatically recounted by the man who not only lived through it all but who fearlessly forged ahead and brought about most of these changes. Delving deep into his own meticulous notes, as well as previously unpublished government papers and official records, Lee details the extraordinary efforts it took for an island city-state in Southeast Asia to survive at that time. Lee explains how he and his cabinet colleagues finished off the communist threat to the fledgling state's security and began the arduous process of nation building: forging basic infrastructural roads through a land that still consisted primarily of swamps, creating an army from a hitherto racially and ideologically divided population, stamping out the last vestiges of colonial-era corruption, providing mass public housing, and establishing a national airline and airport. In this illuminating account, Lee writes frankly about his trenchant approach to political opponents and his often unorthodox views on human rights, democracy, and inherited intelligence, aiming always "to be correct, not politically correct." Nothing in Singapore escaped his watchful eye: whether choosing shrubs for the greening of the country, restoring the romance of the historic Raffles Hotel, or openly, unabashedly persuading young men to marry women as well educated as themselves. Today's safe, tidy Singapore bears Lee's unmistakable stamp, for which he is unapologetic: "If this is a nanny state, I am proud to have fostered one." Though Lee's domestic canvas in Singapore was small, his vigor and talent assured him a larger place in world affairs. With inimitable style, he brings history to life with cogent analyses of some of the greatest strategic issues of recent times and reveals how, over the years, he navigated the shifting tides of relations among America, China, and Taiwan, acting as confidant, sounding board, and messenger for them. He also includes candid, sometimes acerbic pen portraits of his political peers, including the indomitable Margaret Thatcher and Ronald Reagan, the poetry-spouting Jiang Zemin, and ideologues George Bush and Deng Xiaoping. Lee also lifts the veil on his family life and writes tenderly of his wife and stalwart partner, Kwa Geok Choo, and of their pride in their three children — particularly the eldest son, Hsien Loong, who is now Singapore's deputy prime minister. For more than three decades, Lee Kuan Yew has been praised and vilified in equal measure, and he has established himself as a force impossible to ignore in Asian and international politics. *From Third World to First* offers readers a compelling glimpse into this visionary's heart, soul, and mind.

The Elite Transition

Opposing Suharto presents an account of democratization in the world's fourth most populous country, Indonesia. It describes how opposition groups challenged the long-time ruler, President Suharto, and his military-based regime, forcing him to resign in 1998. The book's main purpose is to explain how ordinary people can bring about political change in a repressive authoritarian regime. It does this by telling the story of an array of dissident groups, nongovernmental organizations, student activists, and political party workers as they tried to expand democratic space in the last decade of Suharto's rule. This book is an important study not only for readers interested in contemporary Indonesia and political change in Asia, but also for all those interested in democratization processes elsewhere in the world.

Unlike most other books on Indonesia, and unlike many books on democratization, it provides an account from the perspective of those who were struggling to bring about change.

Freedom in the World 1997-1998

This is a long-awaited book by one of Malaysia's most interesting entrepreneurs. How Tan Sri Lim Goh Tong built Genting Highlands into a world-class resort has been well-publicised. But this is the first time readers are offered an insight into his life and unique approach. His story is an inspiring one: beginning with nothing to his name, turning difficulties into opportunities, acting on brainwaves, taking calculated risks and confounding sceptics through sheer foresight and perseverance. Typically modest, Tan Sri Lim gives an account that is refreshingly original, wryly humorous and moving in its poignancy.

From Third World to First

A leading expert explains why we fail to understand Iran and offers a new strategy for redefining this crucial relationship. For more than a quarter of a century, few countries have been as resistant to American influence or understanding as Iran. The United States and Iran have long eyed each other with suspicion, all too eager to jump to conclusions and slam the door. What gets lost along the way is a sense of what is actually happening inside Iran and why it matters. With a new hard-line Iranian president making incendiary pronouncements and pressing for nuclear developments, the consequences of not understanding Iran have never been higher. Ray Takeyh, a leading expert on Iran's politics and history, has written a groundbreaking book that demystifies the Iranian regime and shows how the fault lines of Iran's domestic politics serve to explain its behavior. In *Hidden Iran*, he explains why this country has so often confounded American expectations and why its outward hostility does not necessarily preclude the normalization of relations. Through a clearer understanding of the competing claims of Muslim theology, republican pragmatism, and factional competition, he offers a new paradigm for managing our relations with this rising power.

"English is so illogical!" It is generally believed that English is a language of exceptions. For many, learning to spell and read is frustrating. For some, it is impossible... especially for the 29% of Americans who are functionally illiterate. But what if the problem is not the language itself, but the rules we were taught? What if we could see the complexity of English as a powerful tool rather than a hindrance? --Denise Eide *Uncovering the Logic of English* challenges the notion that English is illogical by systematically explaining English spelling and answering questions like "Why is there a silent final E in have, large, and house?" and "Why is discussion spelled with -sion rather than -tion?" With easy-to-read examples and anecdotes, this book describes: - the phonograms and spelling rules which explain 98% of English words - how English words are formed and how this knowledge can revolutionize vocabulary development - how understanding the reasons behind English spelling prevents students from needing to guess. The author's inspiring commentary makes a compelling case that understanding the logic of English could transform literacy education and help solve America's literacy crisis. Thorough and filled with the latest linguistic and reading research, *Uncovering the Logic of English* demonstrates why this systematic approach should be as foundational to our education as $1+1=2$.

The Refused

A hard-hitting and readable book which examines Mahathir's character, his ideas and policies and relates them to the social, economic and political setting inside Malaysia. Up until recently, high rates of economic growth and a striking reduction in poverty have been the hallmarks of this vibrant Tiger economy. Mahathir's success has now been placed in jeopardy by the recent economic crisis, and his rule is coming under hostile scrutiny. As one of the most controversial political figures in South-east Asia, Mahathir's success at managing ethnic tensions, policies of industrialization, modernization and foreign policy are explored, as are his grandiose projects, his human rights record and approach to corruption. Milne and Mauzy, leading authors in this field, assess Mahathir's rule within this context as well as the abrupt dismissal from office, arrest and trial of Anwar Ibrahim, Mahathir's deputy, in late 1998.

Adrian Mole is 39 and a quarter. Unable to afford the mortgage on his riverside apartment, he has been forced to move into a semi-detached converted pigsty next door to his parents, George and Pauline. His ravishing wife Daisy loathes the countryside, longs for Dean Street and has yet to buy a pair of Wellingtons; they are both aware the passion has gone out of their marriage, but neither knows how to reignite the flame. To cap it all off, Adrian is leaving his bed numerous times a night to go to the lavatory and has other alarming symptoms, leading him to suspect prostate trouble. Meanwhile, his mother thinks that an appearance on the Jeremy Kyle show might solve the mystery of her daughter's paternity once and for all. And when George is asked to provide a DNA sample, will the shock kill him? He is already disabled, though still chain smoking and has had an ashtray welded onto the arm of his wheelchair. As Adrian's worries multiply, a phone call to his old flame Dr Pandora Braithwaite, BA, MA, PhD, MP and Junior Minister in the Foreign Office, ignites memories of a shared passion and makes him wonder – is she the only one who can save him now?

Hidden Iran

"This book provides an alternative insight to the debate on inequality in Malaysia, by focusing on the distribution of wealth or assets, rather than income. Despite tremendous increase in national income, the wealth gap in Malaysia is alarmingly high and extremely skewed. For instance, the top 0.2 per cent of depositors in ASB has about 1,133 times more than the bottom 80 per cent of depositors combined. This gap is echoed by the fact that approximately two-thirds of Malaysian workers earn less than RM3,000 per month, and about 90 per cent of Malaysians have nearly zero savings. The current policies are not facilitating improvements in this wealth gap, which could lead to aristocracy where birth, not hard work or talent and effort, matter the most in wealth accumulation. This book explores possible policy interventions that can be undertaken to ensure that economic growth is equitably shared, which is vital for a stable and prosperous society"--Page 4 of cover.

Uncovering the Logic of English: A Common-Sense Solution to America's Literacy Crisis

Malaysia's sultans have in recent years taken on an increasingly discernible role in the country's political life. However, rather than something new, the rulers' resurgence should be viewed as part of a longer term negotiation over the precise boundaries of their role. The Sultan of Johor, Ibrahim Ismail, is arguably the most visible of the country's rulers at present. Since ascending to the throne in 2010, he has constructed a prominent media profile and been active in many areas of policy-making. He reinstated the Islamic week, suggested expanding the role of the Johor Military Force, and promoted a unique state identity. Planned initiatives by him include a Bank of Johor, a large-scale low-cost housing scheme, as well as a maglev train linking the eastern and western parts of the state's southern coast. Sultan Ibrahim Ismail has also weighed in on national-level issues, such as the quality of national education and bilateral relations with Singapore. While the more ceremonial aspects of his actions are inspired by the pivotal role traditionally played by Malay rulers, the more operational aspects hark back to the colonial era when Johor had a reputation for modern administration, well-developed infrastructure, and a high degree of autonomy. At its core, the Sultan raises questions about Malay leadership, and may revive a long-standing contest between the rulers and the political elite, sometimes referred to as a battle between ""princes and politicians"".

Malaysia's Political Economy

Risk consideration is central to more accurate post-crisis valuation Corporate Valuation presents the most up-to-date tools and techniques for more accurate valuation in a highly volatile, globalized, and risky business environment. This insightful guide takes a multidisciplinary approach, considering both accounting and financial principles, with a practical focus that uses case studies and numerical examples to illustrate major concepts. Readers are walked through a map of the valuation approaches proven most effective post-crisis, with explicit guidance toward implementation and enhancement using advanced tools, while exploring new models, techniques, and perspectives on the new meaning of value. Risk centrality and scenario analysis are major themes among the techniques covered, and the companion website provides relevant spreadsheets, models, and instructor materials. Business is now done in a faster, more diverse, more interconnected environment, making valuation an increasingly more complex endeavor. New types of risks and competition are shaping operations and finance, redefining the importance of managing uncertainty as the key to success. This book brings that perspective to bear in valuation, providing new insight, new models, and practical techniques for the modern finance industry. Gain a new understanding of the idea of "value," from both accounting and

financial perspectives Learn new valuation models and techniques, including scenario-based valuation, the Monte Carlo analysis, and other advanced tools Understand valuation multiples as adjusted for risk and cycle, and the decomposition of deal multiples Examine the approach to valuation for rights issues and hybrid securities, and more Traditional valuation models are inaccurate in that they hinge on the idea of ensured success and only minor adjustments to forecasts. These rules no longer apply, and accurate valuation demands a shift in the paradigm. Corporate Valuation describes that shift, and how it translates to more accurate methods.

Malaysian Politics Under Mahathir

As you are reading this, you are finding yourself in the ubiquitous public sphere that is the Web. Ubiquitous, and yet not universally accessible. This volume addresses this dilemma of the public sphere, which is by definition open to everyone but in practice often excludes particular groups of people in particular societies at particular points in time. The guiding questions for this collection of articles are therefore: Who has access to the public sphere? How is this access enabled or disabled? Under what conditions is it granted or withheld, and by whom? We regard the public sphere as the nodal point for the discourses of business, politics and media, and this basic assumption is also reflected in the structure of the volume. Each of these three macro-topics comprises chapters by international scholars from a variety of disciplines and research traditions who each combine up-to-date overviews of the relevant literature with their own cutting-edge research into aspects of different public spheres such as corporate promotional communication, political rhetoric or genre features of electronic mass media. The broad scope of the volume is perhaps best reflected in a comprehensive discussion of communication technologies ranging from conventional spoken and written formats such as company brochures, political speeches and TV shows to emerging ones like customer chat forums, political blogs and text messaging. Due to the books' wide scope, its interdisciplinary approach and its clear structure, we are sure that whether you work in communication and media studies, linguistics, political science, sociology or marketing, you will find this handbook an invaluable guide offering state-of-the-art literature reviews and exciting new research in your field and adjacent areas.

The Johor Sultanate

The overtly secular state of Singapore has unapologetically maintained an authoritarian approach to governance in the realm of religion. Islam is particularly managed by the state. Muslim activists thus have to meticulously navigate these realities - in addition to being a minority community - in order to maximize their influence in the political system. Significantly, Muslim activists are not a monolith: there exists a multitude of political and theological differences amongst them. This study analyses the following categories of Muslim activists: Islamic religious scholars (ulama), liberal Muslims, and the more conservative-minded individuals. Due to constricting political realities, many activists attempt to align themselves with the state, and call upon the state to be an arbiter in their disagreements with other factions. Though there are activists who challenge the state, these are by far in the minority, and are typically unable to assert their influence in a sustained manner.

The Sea and the Hills Elegantly written and suffused with optimism... --Blueink Review, Colorado, USA

The Sea and the Hills: The Life of Hussain Najadi, is more than just a memoir of a man with a talent for high finance. It is, as the cover notes, a story of oil, politics and justice, and it is the latter that makes the book a good and worthwhile read. -- Mark G. McLaughlin, Clarion Review, USA

Ultimately vindicated, the author (Hussain Najadi) reflects upon the ways that fate, determination and the support of loved ones influenced his life. He later defines success from a significantly altered perspective as he continues to pursue the original quest of building bridges among nations, cultures, and civilisations in order to create a more equitable world in which everyone is able to share the fruits of our global resources. --Kirkus Indie, Texas, USA

As a friend for more than 30 years, from the day I met him in Kuala Lumpur, I'm extremely pleased that Hussain has told his story. It is fascinating in itself, but it is also worth reading for the lessons it contains. The most obvious is that intellectual curiosity, combined with an open mind and relentless drive, can go a long way towards compensating for the lack of formal education. Readers will find others as well. --Barry Wain, Singapore, Author, former Managing Editor, Wall Street Journal Asia. ...it's a fine piece of literature, a master piece I should say, true life experience of the up & down, the different culture across the many continents brought down generation after generation, the vision of the past live the present culture, oppression, colonialism, powerful sheikh, fair play, the power that be of the day say it all, it is a very motivational piece of literature to read. -- Albert Cheong ys - Malaysia

A brilliant and inspirational story from a charismatic figure! A fascinating story not only from a historical point of view, the rise of the Arab and Asian world, but touching from a human perspective, the story of a man who is never defeated and goes ahead despite of the adversities of his personal and his country's history...this autobiography is a masterpiece, its characters are beautifully portrayed, the story is superbly told ... --Elena of Italy (also shown on Amazon's review page)

Hussain Najadi is no stranger to hardships, and his autobiography, *The Sea and the Hills*, showcases his extraordinary life. From being ejected from his home country Bahrain for plotting against British colonial rule, to his golden triangle- Western technology, management, and know-how, Asian natural resources, and Arab capital- he has had successes and triumphs at every turn. The book tells the story of his rapid rise to success and his reign as the leader in wholesale and corporate banking in Southeast Asia. Matthew Bryant, Bohlson Group, Indiana, USA

The Chinese Dilemma

Scottish devolution brought high hopes for an open political culture. But how far have these been fulfilled? *Open Scotland?* argues that in the field of political communication the old, established ways of the British state still remain firmly in place. Westminster and Whitehall still cast long shadows over Edinburgh. This book offers the first full-scale coverage of how media, politicians and lobbyists interact in the new Scotland. Based on their exceptional first-hand access to the key players, Philip Schlesinger, David Miller and William Dinan have written an inside account of the struggles to establish the rules of the game for covering politics. They have talked to the journalists of Scotland's political media pack who are at the heart of the new political system and who have a decisive impact on the image of the Scottish Parliament and government. They have observed and interviewed the professional lobbyists and reveal their strategies for achieving a respectable image in Scottish public life. And they have analysed some of the key rows and the failures of news management inside Scotland's government. *Open Scotland?* offers an insight to the world of lobbyists, journalists and spin doctors, revealing the motivations behind the news stories in Scottish politics today.

Political Parties in the Pacific Islands

Filmatised in 2013 and the official recipient of three Oscars, Solomon Northup's powerful slave narrative 'Twelve Years a Slave' depicts Northup's life as he is sold into slavery after having spent 32 years of his life living as a free man in New York. Working as a travelling musician, Northup goes to Washington D.C, where he is kidnapped, sent to New Orleans, and sold to a planter to suffer the relentless and brutal life of a slave. After a dozen years, Northup escapes to return to his family and pulls no punches, as he describes his fate and that of so many other black people at the time. It is a harrowing but vitally important book, even today. For further reading on this subject, try 'Uncle Tom's Cabin' by Harriet Beecher Stowe. Solomon Northup (c.1807-c.1875) was an American abolitionist and writer, best remembered for his powerful race memoir 'Twelve Years a Slave'. At the age of 32, when he was a married farmer, father-of-three, violinist and free-born man, he was kidnapped in Washington D.C and shipped to New Orleans, sold to a planter and enslaved for a dozen years. When he gained his freedom, he wrote his famous memoir and spent some years lecturing across the US, on behalf of the abolitionist movement. 'Twelve Years a Slave' was published a year after 'Uncle Tom's Cabin' by Harriet

Beecher Stowe and built on the anti-slavery momentum it had developed. Northup's final years are something of a mystery, though it is thought that he struggled to cope with family life after being freed.
