Today, we take the issues of endangered species and extinction very seriously; however, in the early twentieth century, these ideas had barely begun to enter the popular discourse. In *Birds and Man*, ornithologist William Henry Hudson's discussions of dwindling bird populations helped to highlight the need to protect endangered species and usher this idea into the mainstream.

The publication of such a list speaks eloquently for the vitality of the Church. It may be regarded as a challenge by some, but nothing is further from the wish of the author. To all fair-minded men, the movement towards the Church is cannot fail to be of great interest. With the bigot, the author has no concern except to remind him that in yielding allegiance to the Old Faith the convert becomes no less loyal to Ills native country. His Gracious Majesty King George V has not in the thousands enumerated in these pages lost a single subject; rather has lie gained, for loyalty like all the virtues only grows stronger in the fuller life.

Modern study of the Hospitallers, of other military-religious orders, and of their activities both in the Mediterranean and in Europe has been deeply influenced by the work of Anthony Luttrell. To mark his 75th birthday in October 2007 twenty-three colleagues from ten different countries have contributed to this volume. The first section focuses on the crusading period in the Holy Land, considering the Hospital in Jerusalem, relations with the Assassins, finances, indulgences, transportation and the careers of the brothers and knights. The second and third sections move to the later Middle Ages, when the Hospitallers had their centre on Rhodes, and military and charitable activities in the East had to be supported with men and money from the West. The papers in the second section consider the Hospitallers on Rhodes, relations between Rhodes and the West and plans for crusades, while the third section includes papers on the Hospitallers in the Iberian Peninsula and in Hungary, the territorial administration of the Order of Montesa in Valencia, a plan to transfer the headquarters of the Teutonic Order from Prussia to Frisia, and a Hospitaller reconsideration of warfare and learning on the eve of the council of Trent. The final paper proposes new definitions and guidelines for future work on the military-religious orders. The authors include both well-known experts and younger scholars who promise to follow in the footsteps of Anthony Luttrell and to continue research into the Hospitallers and their fellow orders, these peculiar European communities avant la lettre.

The Hospitallers, the Mediterranean and Europe

Caz's Birthday Blues

"This volume draws together a series of papers that present some of the most up-to-date thinking on the history, archaeology and toponymy of Wessex and Anglo-Saxon England more broadly. In honour of one of early medieval European scholarship's most illustrious doyennes, no less than twenty-nine contributions demonstrate the indelible impression Barbara Yorke's work has made on her peers and a generation of new scholars, some of whom have benefitted directly from her tutorage. From the identities that emerged in the immediate post-Roman period, through to the development of kingdoms, the role of the church, and impacts felt beyond the eleventh century, the rich and diverse character of the studies presented here are testimony to the versatility and extensive range of the honorand's contribution to the academic field"--

The concept of 'Natural Capital' has come to play a central role in current debates about biodiversity and nature conservation. It implies an approach to the natural world based on the valuation of places and species in terms of money. This is, in a variety of ways, both attractive and problematic. This edited collection comprehensively discusses the issues raised by the concept of 'Natural Capital', with contributors presenting not only arguments for and against the widespread adoption of the idea, but also viewpoints arguing for nuanced, pragmatic and middle-ground positions.
