English actor Dirk Bogarde dominated the films in which he starred. Exploring the tension between his matinee idol appeal and his own closeted sexuality, this book focuses on the wide variety of genres in which he worked, and the highly charged interaction between his life and his roles. Beginning with an expose of gay life in post-war Britain and his relationship with partner/manager, Anthony Forwood, each chapter explores Bogarde's performances by genre--his juvenile delinquent movies, his military roles, his contribution to Basil Dearden's overtly gay thriller Victim (1961), and his "outsider" roles in such films as The Servant (1963), The Fixer (1968) and Despair (1978). Bogarde's "camp" cinema,

espionage thrillers and various roles as artists are also examined, along with the misogyny of the Doctor films and his later television work.

The Merrie Tales of Jacques Tournebroche

Twentieth-century British wood-engraved book illustration up to the beginning of the Second World War was among the most versatile and inventive of the graphic arts. In a climate of typographical renaissance, various wood-engravers made a significant impact on the appearance of the printed page, transforming good books into works of art and influencing modern standards of book production. This book reveals the methods by which these pioneering artists broke with nineteenth-century illustrative practices. The author surveys the subject in relation to the cultural and historical background, and within the context of mainstream developments in the visual arts, placing emphasis on the working relationship of illustrators with both private presses and commercial publishers. Detailed study of unpublished material, including art school records, publishers' and print societies' archives, and artists' correspondence, throws new light on the work and practices of the more innovative wood engravers.

Frank Sinatra

This book tells the story of a life spent on the road recording the rich diversity of music in America when it was a major part of our lives, not just digital background noise. For music fans, there was a golden era of live music, stretching from the 1960s through the 1980s, and even evolving into the 1990s, if you want to be generous. In the pre-digital era, music fans spent a large part of their free time (and money) listening to their favorite artist's recordings. It was an analog world so if they wanted to hear the music, they actually had to listen to the radio, buy the records, and go to the concerts. Popular artists had long performed live concerts in the major markets, but it took rock 'n' roll to make national touring a viable business. Touring sound systems grew from scratch to keep up with larger and larger venues. Likewise, the ability to record those shows had to grow as well. The rudimentary collection of semi-professional gear grew into full-blown remote recording studios to keep up with the demand for live records, films, and broadcasts. The truly wonderful thing about the remote recording business was the author experienced so many different musical cultures. Where else could you go from recording a tour with the Rolling Stones to a TV special with Mohamed Ali at the Apollo Theater? How about the season opening of Carnegie Hall on PBS TV (with a different major orchestra every year) to Frank Zappa's annual Halloween Show? Or maybe a Yoko Ono tour behind the 1980s Iron Curtain to the Eagles in modern Australia? Then there are worldwide live broadcasts like the Academy Awards and the Grammy Awards to intimate jazz settings with Miles Davis or Wynton Marsalis. Compare the grandeur of the Metropolitan Opera to the irreverent comedy of Saturday Night Live. *On the Road* contains the stories of recording all that music live in its natural habitat, the clubs, theaters, concert halls, and arenas. There were only a few companies that succeeded in the rough and tumble business of live recording. The author was one of the most successful live recording engineers and the constructor of remote recording studios during that era, with thousands of live shows to his credit.

On the Road

A celebration of Sinatra's enduring impact on American entertainment and cultural life. For nearly sixty years, Frank Sinatra [1915-98] triumphed in concert, in the recording studio, on television, and on the big screen, refashioning his image to suit the temper of the times. Sinatra did it "his way," remaining both elusive and alluring, and appealing to men and women alike. This collection analyzes the qualities that ensured Sinatra's staying power: his impeccable musicality, his charisma, his tough-mindedness, and even his peccadilloes. The contributors to this volume evaluate Sinatra's impact on all areas of entertainment, and examine many of the cultural forces he influenced and was influenced by, including Bing Crosby, Elvis, the "Beats," the Beatles, and Rock 'n' Roll. What emerges is a portrait of an artist, entertainment icon, and legendary symbol of popular culture. This appreciation of the Sinatra phenomenon celebrates his enduring impact on American entertainment and cultural life. Contributors: Blaine Allan, Samuel L. Chell, David Finck, Joseph Fioravanti, Jeanne Fuchs, Philip Furia, Roger Gilbert, Ruth Prigozy, Walter Raubicheck, Lisa Jo Sagolla, Ron Simon, Arnold Jay Smith, James F. Smith, Patricia M. Verrone, David Wild. Jeanne Fuchs is Professor Emerita of Comparative Literature and Languages at Hofstra University; Ruth Prigozy is Professor of English at Hofstra University.

The Killers: Days & Ages

Tony Bennett is the man Frank Sinatra called 'the best singer in the business', and whose 1995 Grammy Awards for 'Album of the Year' and 'Best Traditional Pop Vocal Performance' for MTV Unplugged moved the New York Times to say, 'Tony Bennett has not just bridged the generation gap, he has demolished it.' He has legions of fans over a staggeringly large age span and in a recording career spanning five decades he has made 40 albums. His autobiography is rich with the stories of his long career and of the personalities he has known and includes the highs and lows, the successes and excesses of what has ultimately been a blessed life.

PREFACE This is such a funny world where for everything that we do we need a license, and for each and every license we go to school, spend hours, days and even years of studies, but that is not enough, we have to be subjugated to a test. If we pass this test we will be granted a diploma, a certificate or a license and then we will be qualified to practice whatever we have learned. A food handler is not allowed to work in a kitchen unless he/she passes a test on the rules and regulations of how to handle food and then he/she will be granted a permit to work in the food industry. A lawyer will spend years of intense studies and still would not be permitted to practice law unless he/she passes the bar exam. A physician, a pharmacist, a smog check tester, a hair stylist, a nurse, a dental assistant, a chiropractor, and mostly any kind of job that will affect any other individual would need an intense course of studies and an exam before a license is granted. But the most important of professions, the one on which the future of the country depends on, the one that the future of the society and the future of the family relies on, the one that causes happiness and pleasure or sadness and depression, the one that makes scholars and professionals or drug addicts and prostitutes of the children does not need a course of studies, but anyone can go and get a license, no questions asked. This most important license of them all is the MARRIAGE LICENSE. It does not mean, however, that dooms-day is at the door. It only means

that if marriage is not going to be taken seriously, the family as a whole will crumble from all the side effects of divorces, separations, quarrels and lack of communication. And this is why each individual who is married or thinks of marriage should learn its ABC-s regardless of whether the government will mandate a school program in all its high schools for that purpose or offer marriage courses with tests before it grants a marriage license. Until we find other means, marriage will continue to be the only way for the continuance of the human survival as it is known today. There is no doubt that life will continue as long as the powerful among us will not use their ingenuity of mass destruction and turn our little planet into ashes. It is very important to know something about the history of mankind and figure out the truths and the lies that the media showers us with every single day. Once we figure the truth, it will be very easy to handle our lives in a more positive way. History was greatly distorted and this book tackles a few of those distortions so that marriage will be meaningful, significant and rewarding. The book is full of real short stories, about different people and different problems, many people can and will identify with one or more of those real stories, simply because they are common, and each of them happened to too many people. The purpose was to expose those situations anonymously, find solutions and hope that they will benefit others before they fall in the same situation, and not to demote or promote the character of any of the readers. This informative book is for all, married or single, rich or poor, religious or atheists even democrats or republicans, so as to live a very loving, rewarding and pleasant life, and so as to see the hidden problems that might lie ahead, and solve them before they destroy the family structure which is the basic foundation of the whole society and thus the whole country.

In his business memoir, *When My Boss Calls, Get the Name*, Howard Berk shares the excitement of surviving and thriving in a corporate world transformed by takeovers, leveraged buyouts, mergers, and acquisitions. With warmth and insight, he depicts the differing styles of the high-profile executives he reported to as they went through the constantly revolving door of management, and he reflects on what he learned from them. Follow the author's evolving career in the broadcasting industry, from the early days of radio to cable television and new media. See "the vice president in charge of everything" become a key participant in the 1973 modernization of Yankee Stadium, which kept the franchise in New York. Watch him help develop licensing and merchandising for the highly competitive and volatile business end of sports and entertainment. At the same time, enjoy his humorous anecdotes about the famous and glamorous figures he met along the way, including Thomas Mitchell, Samuel Goldwyn, Jack Benny, Mickey Mantle, Jackie Gleason, and a host of Miss Americas.

An Administrator's Guide to Better Teacher Mentoring

From a singing waiter, to a boy singer with the big bands, to the 'Sultan of Swoon', in just a few years in the 1940s Frank Sinatra became America's epitome of class and elegance before becoming the Chairman of the Board. Ol' blue eyes lived a life more colourful and exciting than almost anyone from his generation and it's all here in this superbly illustrated book. It charts Frank Sinatra's career – the highs, the lows, his hits, his loves and his films, with fantastic archive photographs that bring to life the faces, places and personalities that made his world so memorable. Frank was a massive success in Vegas with his sell out seasons and also got to sing with his mates in his very own Rat Pack. He retired from singing in the early seventies only to return proclaiming that 'Ol' Blue Eyes is Back'. He continued to record and perform dressed up in his 'tux' until the mid-nineties. He passed away in 1998 aged 82. We shall never see his like again and as he so eloquently put it, "You only live once, and the way I live, once is enough." This book tells the wonderful story of one of the greatest performing artists of all time!

Richard O. Davies won Foreword Reviews' INDIEFAB Book of the Year Bronze Medal in Sports for *The Main Event: Boxing in Nevada from the Mining Camps to the Las Vegas Strip*. Davies' book was chosen as one of the best indie books of 2014. As the twentieth century dawned, bare-knuckle prizefighting was transforming into the popular sport of boxing, yet simultaneously it was banned as immoral in many locales. Nevada was the first state to legalize it, in 1897, solely to stage the Corbett-Fitzsimmons world heavyweight championship in Carson City. Davies shows that the history of boxing in Nevada is integral to the growth of the sport in America. Promoters such as Tex Rickard brought in fighters like Jack Dempsey to the mining towns of Goldfield and Tonopah and presented the Johnson-Jeffries "Fight of the Century" in Reno in 1910. Prizefights sold tickets, hotel rooms, drinks, meals, and bets on the outcomes. It was boxing--before gambling, prostitution, and easy divorce--that first got Nevada called "America's Disgrace" and the "Sin State." *The Main Event* explores how boxing's growth in Nevada relates to the state's role as a social and cultural outlier. Starting in the Rat Pack era, organized gambling's moguls built arenas outside the Vegas casinos to stage championships--more than two hundred from 1960 to the present. Tourists and players came to see and bet on historic bouts featuring Sonny Liston, Muhammad Ali, George Foreman, Sugar Ray Leonard, Mike Tyson, and other legends of the ring. From the celebrated referee Mills Lane to the challenge posed by mixed martial arts in contemporary Las Vegas, the story of boxing in Nevada is a prism for viewing the sport. Davies utilizes primary and secondary sources to analyze how boxing in the Silver State intersects with its tourist economy and libertarian values, paying special attention to issues of race, class, and gender. Written in an engaging style that shifts easily between narrative and analysis, *The Main Event* will be essential reading for sports fans and historians everywhere.

Here is the story of Jerry Weintraub: the self-made, Brooklyn-born, Bronx-raised impresario, Hollywood producer, legendary deal maker, and friend of politicians and stars. No matter where nature has placed him--the club rooms of Brooklyn, the Mafia dives of New York's Lower East Side, the wilds of Alaska, or the hills of Hollywood--he has found a way to put on a show and sell tickets at the door. "All life was a theater and I wanted to put it up on a stage," he writes. "I wanted to set the world under a marquee that read: 'Jerry Weintraub Presents.'" In *When I Stop Talking, You'll Know I'm Dead*, we follow Weintraub from his first great success at age twenty-six with Elvis Presley, whom he took on the road with the help of Colonel Tom Parker; to the immortal days with Sinatra and Rat Pack glory; to his crowning hits as a movie producer, starting with Robert Altman and Nashville, continuing with *Oh, God!*, *The Karate Kid* movies, and *Diner*, among others, and summing with Steven Soderbergh and *Ocean's Eleven*, *Twelve*, and *Thirteen*. Along the way, we'll watch as Jerry moves from the poker tables of Palm Springs (the games went on for days), to the power rooms of Hollywood, to the halls of the White House, to Red Square in Moscow and the Great Palace in Beijing--all the while counseling potentates, poets, and kings, with clients and confidants like George Clooney, Bruce Willis, George H. W. Bush, Armand Hammer, Brad Pitt, Matt Damon, Bob Dylan, Led Zeppelin, John Denver, Bobby Fischer . . . well, the list goes on forever. And of course, the story is not yet over . . . as the old-timers say, "The best is yet to come." As Weintraub says, "When I stop talking, you'll know I'm dead." With wit, wisdom, and the cool confidence that has colored his remarkable career, Jerry chronicles a quintessentially American

journey, one marked by luck, love, and improvisation. The stories he tells and the lessons we learn are essential, not just for those who love movies and music, but for businessmen, entrepreneurs, artists . . . everyone.

The Italian American Experience

"An intimate, revealing portrait of Frank Sinatra-from the man closest to the famous singer during the last decade of his life. More than a hundred books have been written about legendary crooner and actor Frank Sinatra. Every detail of his life seems to captivate: his career, his romantic relationships, his personality, his businesses, his style. But a hard-to-pin-down quality has always clung to him-a certain elusiveness that emerges again and again in retrospective depictions. Until now. From Sinatra's closest confidant and an eventual member of his management team, Tony Oppedisano, comes an extraordinarily intimate look at the singing idol. Deep into the night, for more than two thousand nights, Frank and Tony would converse-about music, family, friends, great loves, achievements and successes, failures and disappointments, the lives they'd led, the lives they wished they'd led. In these full-disclosure conversations, Sinatra spoke of his close yet complex relationship with his father, his conflicts with record companies, his carousing in Vegas, his love affairs with some of the most beautiful women of his era, his triumphs on some of the world's biggest stages, his complicated relationships with his talented children, and, most important, his dedication to his craft. Toward the end, no one was closer to the singer than Oppedisano, who kept his own rooms at the Sinatra residences for many years, often brokered difficult conversations between family members, and held the superstar

entertainer's hand when he drew his last breath. Featuring never-before-seen photos and offering startlingly fresh anecdotes and new revelations that center on some of the most famous people of the past fifty years—including Jackie Kennedy, Marilyn Monroe, Sam Giancana, Madonna, and Bono—*Sinatra and Me* pulls back the curtain to reveal a man whom history has, in many ways, gotten wrong"--

ABC Sports traces the storied division from its beginnings through the internet age to reveal the changes it endured along with the new sports media environment it spawned.

The Life and Adventures of Peter Wilkins

In this study Thomas Peattie offers a new account of Mahler's symphonies by considering the composer's reinvention of the genre in light of his career as a conductor and more broadly in terms of his sustained engagement with the musical, theatrical, and aesthetic traditions of the Austrian fin de siècle. Drawing on the ideas of landscape, mobility, and theatricality, Peattie creates a richly interdisciplinary framework that reveals the uniqueness of Mahler's symphonic idiom and its radical attitude toward the presentation and ordering of musical events. The book goes on to identify a fundamental tension between the music's episodic nature and its often-noted narrative impulse and suggests that Mahler's symphonic dramaturgy can be understood as a form of abstract theatre.

The Spectator

Now updated with groundbreaking research, this award-winning classic examines the construction of sexual identity in biology, society, and history. Why do some people prefer heterosexual love while others fancy the same sex? Is sexual identity biologically determined or a product of convention? In this brilliant and provocative book, the acclaimed author of *Myths of Gender* argues that even the most fundamental knowledge about sex is shaped by the culture in which scientific knowledge is produced. Drawing on astonishing real-life cases and a probing analysis of centuries of scientific research, Fausto-Sterling demonstrates how scientists have historically politicized the body. In lively and impassioned prose, she breaks down three key dualisms -- sex/gender, nature/nurture, and real/constructed -- and asserts that individuals born as mixtures of male and female exist as one of five natural human variants and, as such, should not be forced to compromise their differences to fit a flawed societal definition of normality.

Sexing the Body

As the extinction of species accelerates and more species become endangered, activists, filmmakers, writers, and artists have responded to bring this global crisis to the attention of the public. Until now, there has been no study of the frameworks that shape these narratives and images, or of the symbolic meanings that the death of species carries in different cultural communities. Ursula Heise makes the case that understanding how and why endangered species come to matter culturally is indispensable for any effective advocacy on their behalf. Heise begins by showing that the tools of conservation science and law need to be viewed as cultural artifacts: biodiversity databases and laws for the protection of threatened species use rhetorical and cultural resources that open up different approaches to the problem of understanding global wildlife. The second half of her book explores ways of envisioning alternative futures for biodiversity. The narrative of nature's decline or even imminent disappearance has been a successful rallying trope for those skeptical of modernization and ideologies of progress. But environmentalists' nostalgia for the past and pessimistic outlook on the future have also alienated parts of the public. Heise tells the story of environmental activists, writers, and scientists who are creating new stories to guide the environmental imagination."

Imagining Extinction

The Civil War, the Restoration, and the Glorious Revolution in England laid the institutional and intellectual foundations of the modern understanding of liberty, of which we are heirs and beneficiaries. The Crisis of the Seventeenth Century uncovers new pathways to understanding this seminal time. Neither Catholic nor Protestant emerges unscathed from the examination to which Trevor-Roper subjects the era in which, from political and religious causes, the identification and extirpation of witches was a central event. Trevor-Roper points out that "In England the most active phase of witch-hunting coincided with times of Puritan pressure -- the reign of Queen Elizabeth and the period of the civil wars -- and some very fanciful theories have been built on this coincidence. But... the persecution of witches in England was trivial compared with the experience of the Continent and of Scotland. Therefore... [one must examine] the craze as a whole, throughout Europe, and [seek] to relate its rise, frequency, and decline to the general intellectual and social movements of the time...".

Decline and Fall of the Freudian Empire

The design of school curriculums involves deep thought about the nature of knowledge and its value to learners and society. It is a serious responsibility that raises a number of questions. What is knowledge for? What knowledge is important for children to learn? How do we decide what knowledge matters in each school subject? And how far should the knowledge we teach in school be related to academic disciplinary knowledge? These and many other questions are taken up in *What Should Schools Teach?* The blurring of distinctions between pedagogy and curriculum, and between experience and knowledge, has served up a confusing message for teachers about the part that each plays in the education of children. Schools teach through subjects, but there is little consensus about what constitutes a subject and what they are for. This book aims to dispel confusion through a robust rationale for what schools should teach that offers key understanding to teachers of the relationship between knowledge (what to teach) and their own pedagogy (how to teach), and how both need to be informed by values of intellectual freedom and autonomy. This second edition includes new chapters on Chemistry, Drama, Music and Religious Education, and an updated chapter on Biology. A revised introduction reflects on emerging discourse around decolonizing the curriculum, and on the relationship between the knowledge that children encounter at school and in their homes.

The Crisis of the Seventeenth Century

The Oxford Handbook of Music and Medievalism provides a snapshot of the diverse ways in which medievalism--the retrospective immersion in the images, sounds, narratives, and ideologies of the European Middle Ages--powerfully transforms many of the varied musical traditions of the last two centuries. Thirty-three chapters from an international group of scholars explore topics ranging from the representation of the Middle Ages in nineteenth-century opera to medievalism in contemporary video game music, thereby connecting disparate musical forms across typical musicological boundaries of chronology and geography. While some chapters focus on key medievalist works such as Orff's *Carmina Burana* or Peter Jackson's *Lord of the Rings* films, others explore medievalism in the oeuvre of a single composer (e.g. Richard Wagner or Arvo Pärt) or musical group (e.g. Led Zeppelin). The topics of the individual chapters include both well-known works such as John Boorman's film *Excalibur* and also less familiar examples such as Eduard Lalo's *Le Roi d'Ys*. The authors of the chapters approach their material from a wide array of disciplinary perspectives, including historical musicology, popular music studies, music theory, and film studies, examining the intersections of medievalism with nationalism, romanticism, ideology, nature, feminism, or spiritualism. Taken together, the contents of the Handbook develop new critical insights that venture outside traditional methodological constraints and provide a capstone and point of departure for future scholarship on music and medievalism.

What Should Schools Teach?

Gathers quotations about agriculture, anthropology, astronomy, the atom, energy, engineering, genetics, medicine, physics, science and society, and research

New York Herald Tribune Book Review

For all the discussion in the media about creationism and 'Intelligent Design', virtually nothing has been said about the evidence in question - the evidence for evolution by natural selection. Yet, as this succinct and important book shows, that evidence is vast, varied, and magnificent, and drawn from many disparate fields of science. The very latest research is uncovering a stream of evidence revealing evolution in action - from the actual observation of a species splitting into two, to new fossil discoveries, to the deciphering of the evidence stored in our genome. *Why Evolution is True* weaves together the many threads of modern work in genetics, palaeontology, geology, molecular biology, anatomy, and development to demonstrate the 'indelible stamp' of the processes first proposed by Darwin. It is a crisp, lucid, and accessible statement that will leave no one with an open mind in any doubt about the truth of evolution.

This book is the first to describe the history of geoconservation. It draws on experience from the UK, Europe and further afield, to explore topics including: what is geoconservation; where, when and how did it start; who was responsible; and how has it differed across the world? Geological and geomorphological features, processes, sites and specimens, provide a resource of immense scientific and educational importance. They also form the foundation for the varied and spectacular landscapes that help define national and local identity as well as many of the great tourism destinations. Mankind's activities, including contributing to enhanced climate change, pose many threats to this resource: the importance of safeguarding and managing it for future generations is now widely accepted as part of sustainable development. Geoconservation is an established and growing activity across the world, with more participants and a greater profile than ever before. This volume highlights a history of challenges, set-backs, successes and visionary individuals and provides a sound basis for taking geoconservation into the future.

A Book of the West

This book provides an overview of the astronomical practices that continued through the so-called "Dark Ages." Like the astronomies of traditional societies, early medieval astronomies established a religious framework of sacred time and ritual calendar; here Christian feasts tied to a pre-Christian ritual solar calendar, the date of Easter tied to the Hebrew lunar calendar; and the timing of monastic prayers in terms of the course of the stars. Coupled with the remnants of ancient geometrical astronomy, these provided the framework for the rebirth of astronomy with the rise of the medieval universities.

IN UNKNOWN TUSCANY

""It's a big thing,"" said Loveday Brooke, addressing Ebenezer Dyer, chief of the well-known detective agency in Lynch Court, Fleet Street; ""Lady Cathrow has lost £30,000 worth of jewellery, if the newspaper accounts are to be trusted."" ""They are fairly accurate this time. The robbery differs in few respects from the usual run of country-house robberies. The time chosen, of course, was the dinner-hour, when the family and guests were at table and the servants not on duty were amusing themselves in their own quarters. The fact of its being Christmas Eve would also of necessity add to the business and consequent distraction of the household. The entry to the house, however, in this case was not effected in the usual manner by a ladder to the dressing-room window, but through the window of a room on the ground floor - a small room with one window and two doors, one of which opens into the hall, and the other into a passage that leads by the back stairs to the bedroom floor....""

Original blurb: "The volume of writing on educational topics has increased so prodigiously in recent years that the student is likely to lose himself in a sea of print. This may lead him to opt for the first book that comes to hand, or waste time rifling through half a dozen when a thorough grasp of one key text is all that is needed. Reading lists commonly look impressive, not to say daunting. In fact, the multifarious titles conceal an enormous amount of duplication, an endless raking over of other people's research findings. 'It is a safe bet', writes W. Kenneth Richmond, 'that less than 5 percent of the contents of any new book on education will be in any way original'." This critical bibliography, originally published in 1972, is concerned with the noteworthy books and major official reports that had appeared in the English language during the twenty-five years prior to publication. In his introduction and in the commentaries prefacing each section the author explains the background to the genuinely new departures of the period and describes successive changes in the climate of educational opinion.
