minutes, 55 seconds - Understanding the basics of building construction helps to construct a building
project successfully. The steps involved in building ...

When there is a plan to develop a new building

Sometimes, an appropriate site is selected after the building layout is prepared.

the finance and total cost is estimated.

Foundation/ Substructure Construction

Building structures are generally constructed on concrete foundations.

The reinforcement works performed by the contractor is periodically checked by the engineer in charge.

The concrete mix of the required proportion is poured to formwork and is cured to form the finished foundation.

2. Installation of heating, ventilation and air conditioning.

Provision of waterproofing to the walls.
