A Companion to Chinese Archaeology

A Companion to Chinese Archaeology is an unprecedented, new resource on the current state of archaeological research in one of the world's oldest civilizations. It presents a collection of readings from leading archaeologists in China and elsewhere that provide diverse interpretations about social and economic organization during the Neolithic period and early Bronze Age. An unprecedented collection of original contributions from international scholars and collaborative archaeological teams conducting research on the Chinese mainland and Taiwan makes available for the first time in English the work of leading archaeologists in China. Provides a comprehensive view of research in key geographic regions of China. Offers diverse methodological and theoretical approaches to understanding China's past, beginning with the era of established agricultural villages from c. 7000 B.C. through to the end of the Shang dynastic period in c. 1045 B.C.

The Archaeology of China

"Past, present and future "The archaeological materials recovered from the Anyang excavations ... in the period between 1928 and 1937...have laid a new foundation for the study of ancient China (Li, C. 1977: ix)." When inscribed oracle bones and enormous material remains were found through scientific excavation in Anyang in 1928, the historicity of the Shang dynasty was confirmed beyond dispute for the first time (Li, C. 1977: ix-xi). This excavation thus marked the beginning of a modern Chinese archaeology endowed with great potential to reveal much of China's ancient history.. Half a century later, Chinese archaeology had made many unprecedented discoveries which surprised the world, leading Glyn Daniel to believe that "a new awareness of the importance of China will be a key development in archaeology in the decades ahead (Daniel 1981: 211). This enthusiasm was soon shared by the Chinese archaeologists when Su Bingqi announced that "the Golden Age of Chinese archaeology is arriving (Su, B. 1994: 139--140)". In recent decades, archaeology has continuously prospered, becoming one of the most rapidly developing fields in social science in China"--Provided by publisher.

The Golden Age of Chinese Archaeology

This introduction to more than 200 masterpieces from the period 5000 BC to the 10th century AD uncovered in China that confirms archaeologists' conclusion that Chinese civilization and art flowered throughout ancient China. 200+ color illustrations.

Chinese Society in the Age of Confucius (1000-250 BC)

Winner of the 2009 Society for American Archaeology Book Award Chinese Society in the Age of Confucius is based on the most up-to-date archaeological discoveries. It introduces new data, as well as new ways to think about them - modes of analysis that, while familiar to archaeological practitioners in the West and in Japan, are herein applied to evidence from the Chinese Bronze Age for the first time. The treatment of social stratification, clan and lineage organisation, as well as gender and ethnic differences will be of interest to those involved in the general or comparative analysis of grand themes in the Social Sciences.

Studies in Chinese Archaeology

This volume comprises nine articles that fall into three categories: general survey of Chinese archaeology as well as the author's visit to Tom Harrison's field work in Sarawak in 1966; field reports on archaeological sites in Fujian and Sichuan; and archaeological investigations in Hebei, Henan, Shandong and Fujian.

Jinsha Site

The two minerals nephrite and jadeite, popularly comprised under the name jade, belong to the hardest and most cherished materials of which primitive man availed himself in shaping his chisels, hatchets, ornaments, amulets and many other implements. Such objects, partially of considerable antiquity, have been found in many parts of the world--in Asia, New Zealand, in prehistoric Europe and America. -- Introduction.

Jade

The study of early China has been radically transformed over the past fifty years by archaeological discoveries, including both textual and non-textual artefacts. Excavations of settlements and tombs have demonstrated that most people did not lead their lives in accordance with ritual canons, while previously unknown documents have shown that most received histories were written retrospectively by victors and present a correspondingly anachronistic perspective. This handbook provides an authoritative survey of the major periods of Chinese history from the Neolithic era to the fall of the Latter Han Empire and the end of antiquity (AD 220). It is the first volume to include not only a comprehensive review of political history but also detailed treatments of topics that transcend particular historical periods, such as: Warfare and political thought Cities and agriculture Language and art Medicine and mathematics Providing a detailed analysis of the most up-to-date research by leading scholars in the field of early Chinese history, this book will be useful to students and scholars of Chinese history, Asian archaeology, and Chinese studies in general.

Routledge Handbook of Early Chinese History

This book presents an anthology of English-language archaeological and anthropological writings by Li Chi, the founding father of modern archaeology in China. It is divided into 15 chapters; in the first two, Dr. Li sets the stage by introducing the principal characters involved in the first "act" of this modern archaeological drama; in the third and fourth chapters, he describes the status of Chinese archaeology during the early years of the twentieth century and highlights the contributions of prominent foreigners. Starting with the fifth chapter, Dr. Li begins detailing the excavations and describes the principle finds of the Anyang expedition. In turn, the book's closing chapters present a summary of the findings and descriptions of some of the major publications that this monumental project has yielded. For readers who are interested in Chinese civilization, what will appeal to them most are the details of the excavations of Yin Hsü (the ruins of the Yin Dynasty), including building foundations, bronzes, chariots, pottery, stone and jade, and thousands of oracle bones, which are vividly shown in historical pictures. These findings transformed the Yin Shang culture from legend into history and thus moved China's history forward by hundreds of years, shocking the world. The anthology also includes Li Chi's reflections on central problems in Chinese anthropology, which are both enlightening and thought-provoking.

Anyang

Cloth edition available for \$50.00.

The Archaeology of Ancient China

"The Earliest China" is the first archaeological book in China to translate in the dominant language of the world on the origin of Chinese ancient civilization in the Central Plains and the study of Xia dynastic culture. It shows readers all over the world the outstanding achievements in the study of the formation of early state in China and is the first English translation monograph on the birth history of the first dynasty of Hua-Xia nation from the perspective of archaeology. With the specific archaeological data on the basis of excavations and investigation conducted in recent years, this book focuses on the interpretation of the rise and development of the ancient civilization having initially appeared in the Central Plain of China and even in the Eastern Asia. The book contents include abundant manifestations of the first flourishing civilization especially at the Erlitou site along the Yi and Luo

Rivers, characteristic of ultra-large capital city, palace buildings, elaborate bronze vessels, and stratified social organization. With the combination of previously literature, the original author attempts to further explain how the earliest China, a royal-powered, and large-scaled state, emerged four thousand years ago. In this book, the analysis on a comprehensive landscape of the ancient civilization prior to the Shang Dynasty leads the point of views, distinctively from the traditional historical perspectives. With a global perspective, he further compares with other significant civilizations in the world and also points out cultural communications between the early China and other external cultures in the Bronze Age. Therefore, this book, the Earliest China of English translated version, is so appropriate to be recommended to foreign scholars and sinologists, as well as everyone who has been attracted by China's charm overseas. With book contents, ideas, and thoughts that it contains, one can easily acknowledge the goals, methods, and reconstruction process of China's prehistory, so English readers will acknowledge so well about the Chinese Archaeology in the Bronze Age, which does vary in many aspects from that of European and American.

The Earliest China

This book presents a collection of archaeological and anthropological writings by Li Chi, the founding father of modern archaeology in China. It is divided into two parts, the first of which traces back the rise of Chinese civilization, as well as the origins of the Chinese people; in turn, the second part reviews the rise of archaeology in China as a scientific subject that combines fieldwork methods from the West with traditional antiquarian studies. Readers who are interested in Chinese civilization will find fascinating information on the excavations of Yin Hsü (the ruins of the Yin Dynasty), including building foundations, bronzes, chariots, pottery, stone and jade, and thousands of oracle bones, which are vividly shown in historical pictures. These findings transformed the Yin Shang culture from legend into history and thus moved China's history forward by hundreds of years, shocking the world. In turn, the articles on anthropology include Li Chi's reflections on central problems in Chinese anthropology and are both enlightening and thought-provoking.

Ancient China

A collection of articles in which the contributors analyze and reconstruct the roles of women in various regions of China from the late Neolithic to the early Empire period. Topics include mortuary ritual, social status and structures of power, economic influences on cultural practice, textile production, and art in early Chinese societies.

The Beginnings of Chinese Civilization

An up-to-date synthesis of archaeological discoveries in the upper and middle Yangzi River region of China, including the Three Gorges Dam reservoir zone.

Gender and Chinese Archaeology

This is a reproduction of a book published before 1923. This book may have occasional imperfections such as missing or blurred pages, poor pictures, errant marks, etc. that were either part of the original artifact, or were introduced by the scanning process. We believe this work is culturally important, and despite the imperfections, have elected to bring it back into print as part of our continuing commitment to the preservation of printed works worldwide. We appreciate your understanding of the imperfections in the preservation process, and hope you enjoy this valuable book.

Ancient Central China

This volume aims to satisfy a pressing need for an updated account of Chinese archaeology. It covers an extended time period from the earliest peopling of China to the unification of the Chinese Empire some two thousand years ago. The geographical coverage includes the traditional focus on the Yellow River basin but also covers China's many other regions. Among the topics covered are the emergence of agricultural communities; the establishment of a sedentary way of life; the development of sociopolitical complexity; advances in lithic technology, ceramics, and metallurgy; and the appearance of writing, large-scale public works, cities, and states. Particular emphasis is placed on the great cultural variations that existed among the different regions and the development of interregional contacts among those societies.

Studies in Chinese Archaeology

Up-to-date study of the archaeology and prehistory of Manchuria, focusing on its unique contribution to the development of 'Chinese' culture. Written by Chinese archaeologists - a firsthand account that is highly accessible. Fully illustrated.

Jade

In this book, Xiaolong Wu offers a comprehensive and in-depth study of the Zhongshan state during China's Warring States Period (476–221 BCE). Analyzing artefacts, inscriptions, and grandiose funerary structures within a broad archaeological context, he illuminates the connections between power and identity, and the role of material culture in asserting and communicating both. The author brings an interdisciplinary approach to this study. He combines and cross-examines all available categories of evidence, including archaeological, textual, art historical, and epigraphical, enabling innovative interpretations and conclusions that challenge conventional views regarding Zhongshan and ethnicity in ancient China. Wu reveals the complex relationship between material culture, cultural identity, and statecraft intended by the royal patrons. He demonstrates that the Zhongshan king Cuo constructed a hybrid cultural identity, consolidated his power, and aimed to maintain political order at court after his death through the buildings, sculpture, and inscriptions that he commissioned.

The Archaeology of Early China

Beginning in the mid-nineteenth century, large numbers of people from mainland China emigrated to the United States and other countries seeking employment. Termed "overseas Chinese," they made lasting contributions to the development of early communities, an impact which has only begun to be recognized in recent years. "Chinatowns," rural mining claims, work camps for railroad and other construction activities, salmon canneries and shrimp camps, laundries, stores, cook shacks, cemeteries, and temples are only some of the sites where traces of their presence can be found. In recent years, numerous archaeological and historical investigations of the overseas Chinese have taken place, and "Hidden Heritage" presents the results of some of those studies.

The Golden Age of Chinese Archaeology

Spend 24 hours with the ancient Chinese. Travel back to AD 17, during the fourth year of the reign of Wang Mang of the Han dynasty, a vibrant and innovative era full of conflicts and contradictions. But as different as the Han culture might have been to other great ancient civilizations, the inhabitants of ancient China faced the same problems as people have for time immemorial: earning enough money, coping with workplace dramas and keeping your home in order. Although the equivalent in this era was more about bribing inspectors, avoiding bullying from abusive watchmen and trying to keep your house from being looted by Huns. In each chapter we meet one of 24 citizens of this ancient culture, from the midwife to the soldier, the priest to the performer and the bronze worker to the tomb looter, and see what an average day in ancient China was really like.

Recent Discoveries in Chinese Archaeology

A Companion to Chinese History presents a collection of essays offering a comprehensive overview of the latest intellectual developments in the study of China's history from the ancient past up until the present day. Covers the major trends in the study of Chinese history from antiquity to the present day. Considers the latest scholarship of historians working in China and around the world. Explores a variety of long-range questions and themes which serves to bridge the conventional divide between China's traditional and modern eras. Addresses China's connections with other nations and regions and enables non-specialists to make comparisons with their own fields. Features discussion of traditional topics and chronological approaches as well as newer themes such as Chinese history in relation to sexuality, national identity, and the environment.

The Archaeology of Northeast China

This work has been selected by scholars as being culturally important, and is part of the knowledge base of civilization as we know it. This work was reproduced from the original artifact, and remains as true to the original work as possible. Therefore, you will see the original copyright references, library stamps (as most of these works have been housed in our most important libraries around the world), and other notations in the work. This work is in the public domain in the United States of America, and

possibly other nations. Within the United States, you may freely copy and distribute this work, as no entity (individual or corporate) has a copyright on the body of the work. As a reproduction of a historical artifact, this work may contain missing or blurred pages, poor pictures, errant marks, etc. Scholars believe, and we concur, that this work is important enough to be preserved, reproduced, and made generally available to the public. We appreciate your support of the preservation process, and thank you for being an important part of keeping this knowledge alive and relevant.

Recent Discoveries in Chinese Archaeology

Summaries in English of Chinese archaeology journals.

Material Culture, Power, and Identity in Ancient China

This book analyzes Han dynasty Chinese archaeology based on a comparison of the forms of vessels found in positively dated tombs.

Hidden Heritage

This volume looks at the effects of interaction and the nature of identity construction in a frontier or contact zone through the analysis of material culture, especially in mortuary settings.

Exploring China's Past

An account of the remarkable decade of Chinese archaeology from 1972 to 1981, as abstracted from Chinese journals. Volume 2, Prehistoric to Western Zhou, contains abstracts of over 110 articles describing excavations at sites ranging from Paleolithic through Western Zhou.

24 Hours in Ancient China

This volume comprises eight articles that fall into three groups: surveys of Chinese art and archaeology and their interrelationships, the exhibition of Chinese archaeological finds, and an account of Dunhuang studies in China up to 1947; animal styles, floral patterns and yinyang wuxing in Chinese art; and Chinese epigraphy.

A Companion to Chinese History

Applies the 'life history' of objects approach to China's prehistoric, early dynastic and more recent material culture.

Chinese Archaeology

Paleolithic sites from one million years ago, Neolithic sites with extraordinary jade and ceramic artifacts, excavated tombs and palaces of the Shang and Zhou dynasties--all these are part of the archaeological riches of China. This magnificent book surveys China's archaeological remains and in the process rewrites the early history of the world's most enduring civilization. Eminent scholars from China and America show how archaeological evidence establishes that Chinese culture did not spread from a single central area, as was long assumed, but emerged out of geographically diverse, interacting Neolithic cultures. Taking us to the great archaeological finds of the past hundred years--tombs, temples, palaces, cities--they shed new light on many aspects of Chinese life. With a wealth of fascinating detail and hundreds of reproductions of archaeological discoveries, including very recent ones, this book is an invaluable resource for anyone interested in Chinese antiquity and Chinese views on the formation of their own civilization.

JADE

The Oxford Handbook on Early China brings 30 scholars together to cover early China from the Neolithic through Warring States periods (ca 5000-500BCE). The study is chronological and incorporates a multidisciplinary approach, covering topics from archaeology, anthropology, art history, architecture, music, and metallurgy, to literature, religion, paleography, cosmology, religion, prehistory, and history.
