Who Killed the Great Auk?

"Who Killed the Great Auk? takes us on a tour of some of the wildest and most remote communities on earth. We travel with Audubon to Labrador, sail to the remote Scottish island of St. Kilda, experience the hardship of life in the Newfoundland colonies, and follow the peregrinations of intrepid naturalists as they put to sea in search of the very last of the Great Auks."--Jacket.

The Great Auk

A seabird whose extinction was entirely the work of humankind, the last two recorded great auk's were killed on June 3, 1844. This book pays homage to this incredible species.

The Great Auk

Garefowls, Penguins of the North, Riesenalks, Apponaths, Great Auks - all of these were names for a sea bird whose extinction was entirely the work of humankind. The birds' existence ended on the morning of the third day of June 1844, when the last two recorded great auks were killed by three fishermen on the island of Eldey, a few miles south of Iceland in the North Atlantic Ocean. For thousands of years, until not so long before that fateful day, great auks swam the Atlantic in their millions and flocked to their breeding grounds from Newfoundland in the west, to Iceland and the Outer Hebrides in the east. Whole colonies at a time were hunted to death for their meat, feathers, and fat by sailors and fishermen from Europe and the Americas. Since the total vanishing of the species, the great auk has become an icon of extinction, alongside the dodo, the passenger pigeon, and the moa. More highly prized as a trophy than any other extinct bird, all its attributes - from its eggs to the oral history of its demise - were until fairly recently, voraciously collected. Its protean appearance in almost every artistic and visual form, from cigarette boxes to bronze and marble statues, has immortalised one of the most tragic man-made extinctions. *The Great Auk: The Extinction of the Original Penguin* tells this tale of destruction and of what we, as a species, do to the world around us. Errol Fuller is a world-renowned authority on extinct birds and the author of many books concerned with extinction and conservation,"

The Great Auk

How an iconic bird's final days exposed the reality of human-caused extinction The great auk is one of the most tragic and documented examples of extinction. A flightless bird that bred primarily on the remote islands of the North Atlantic, the last of its kind were killed in Iceland in 1844. Gísli Pálsson draws on firsthand accounts from the Icelanders who hunted the last great auks to bring to life a bygone age of Victorian scientific exploration while offering vital insights into the extinction of species. Pálsson vividly recounts how British ornithologists John Wolley and Alfred Newton set out for Iceland to collect specimens only to discover that the great auks were already gone. At the time, the Victorian world viewed extinction as an impossibility or trivialized it as a natural phenomenon. Pálsson chronicles how Wolley and Newton documented the fate of the last birds through interviews with the men who killed them, and how the naturalists' Icelandic journey opened their eyes to the disappearance of species as a subject of scientific concern—and as something that could be caused by humans. Blending a richly evocative narrative with rare, unpublished material as well as insights from ornithology, anthropology, and Pálsson's own North Atlantic travels, *The Last of Its Kind* reveals how the saga of the great auk opens a window onto the human causes of mass extinction.

The Last of Its Kind

This 1885 work collects together information on the extinct great auk, including its distribution, various names, and physical remains.

The Great Auk, or Garefowl

For hundreds of thousands of years, Great Auks thrived. And then they were gone ... For hundreds of thousands of years Great Auks thrived in the icy seas of the North Atlantic, bobbing on the waves, diving for fish and struggling up onto rocky shores to mate and hatch their fluffy chicks. But by 1844, not a single one of these magnificent birds was alive. In this stunningly illustrated non-fiction picture book, award-winning author and illustrator Jan Thornhill tells the tragic story of these birds that "weighed as much as a sack of potatoes and stood as tall as a preteen's waist." Their demise came about in part because of their anatomy. They could swim swiftly underwater, but their small wings meant they couldn't fly and their feet were so far back on their bodies, they couldn't walk very well. Still the birds managed to escape their predators much of the time ... until humans became seafarers. Great Auks were pursued first by Vikings, then by Inuit, Beothuk and finally European hunters. Their numbers rapidly dwindled. They became collectors' items — their skins were stuffed for museums, to be displayed along with their beautiful eggs. (There are some amazing stories about these stuffed auks — one was stolen from a German museum during WWII by Russian soldiers; another was flown to Iceland and given a red-carpet welcome at the airport.) Although undeniably tragic, the final demise of the Great Auk led to the birth of the conservation movement. Laws were eventually passed to prevent the killing of birds during the nesting season, and similar laws were later extended to other wildlife species. The Tragic Tale of the Great Auk

WINNER OF THE EDGE HILL SHORT STORY PRIZE 2016 SHORTLISTED FOR THE SUNDAY TIMES/PFD YOUNG WRITER OF THE YEAR AWARD 2016 'Greengrass is undoubtedly that rare thing, a genuinely new and assured voice in prose. Her work is precise, properly moving, quirky and heartfelt' A. L. Kennedy The twelve stories in this startling collection range over centuries and across the world. There are stories about those who are lonely, or estranged, or out of time. There are hauntings, both literal and metaphorical; and acts of cruelty and neglect but also of penance. Some stories concern themselves with the present, and the mundane circumstances in which people find themselves: a woman who feels stuck in her life imagines herself in different jobs - as a lighthouse keeper in Wales, or as a guard against polar bears in a research station in the Arctic. Some stories concern themselves with the past: a sixteenth-century alchemist and doctor, whose arrogance blinds him to people's dissatisfaction with their lives until he experiences it himself. Finally, in the title story, a sailor gives his account - violent, occasionally funny and certainly tragic - of the decline of the Great Auk.

An Account of the Decline of the Great Auk, According to One Who Saw It

"Over the last half billion years, there have been five major mass extinctions, when the diversity of life on Earth suddenly and dramatically contracted. Scientists are currently monitoring the sixth extinction, predicted to be the most devastating since the asteroid impact that wiped out the dinosaurs. This time around the cataclysm is us. In this book the author tells us why and how human beings have altered life on the planet in a way no species has before. She provides a moving account of the disappearances of various species occurring all around us and traces the evolution of extinction as concept, from its first articulation by Georges Cuvier in revolutionary Paris up to Lyell and Darwin, and through the present day. The sixth extinction is likely to be mankind's most lasting legacy, compelling us to rethink the fundamental question of what it means to be human". -- Back cover.

The Sixth Extinction

Excerpt from The Great Auk, or Garefowl (Alca Impennis, Linn;) Mr. Seeböhm³ says, It was once a British bird now it is regarded as an extinct species, like the Solitaire Pigeon of Rodriguez, the Phillip-island Parrot, the Dodo of the Mauritius, and the Moa of New Zealand. The extinction of the Great Auk has taken place during the lifetime of the present generation. It is scarcely more than half a century since the last British example of this curious bird was killed in the Orkneys; and when, ten years later, the survivors of the only colony left were captured, the history of the Great Auk became a legend of the past. The Great Auk, Or Garefowl (Alca Impennis, Linn.)

The rapid growth of the American environmental movement in recent decades obscures the fact that long before the first Earth Day and the passage of the Endangered Species Act, naturalists and concerned citizens recognized—and worried about—the problem of human-caused extinction. As Mark V. Barrow reveals in *Nature's Ghosts*, the threat of species loss has haunted Americans since the early days of the republic. From Thomas Jefferson's day—when the fossil remains of such fantastic lost animals as the mastodon and the woolly mammoth were first reconstructed—through the pioneering conservation efforts of early naturalists like John James Audubon and John Muir, Barrow shows how Americans came to understand that it was not only possible for entire species to die out, but that humans themselves could be responsible for their extinction. With the destruction of the passenger pigeon and the precipitous decline of the bison, professional scientists and wildlife enthusiasts alike began to understand that even very common species were not safe from the juggernaut of modern, industrial society. That realization spawned public education and legislative campaigns that laid the foundation for the modern environmental movement and the preservation of such iconic creatures as the bald eagle, the California condor, and the whooping crane. A sweeping, beautifully illustrated historical narrative that unites the fascinating stories of endangered animals and the dedicated individuals who have studied and struggled to protect them, *Nature's Ghosts* offers an unprecedented view of what we've lost—and a stark reminder of the hard work of preservation still ahead.

The Tragic Tale of the Great Auk

The *Archaeology of Wild Birds in Britain and Ireland* tells the story of human engagement with birds from the end of the last Ice Age to about AD 1650. It is based on archaeological bird remains integrated with ethnography and the history of birds and avian biology. In addition to their food value, the book examines birds in ritual activities and their capture and role in falconry and as companion animals. It is an essential guide for archaeologists and zooarchaeologists and will interest historians and naturalists concerned with the history and former distribution of birds.

Describes how the Great Auk lived before its extinction in the mid 1800s and discusses the physical characteristics, habits, and breeding of other members of the Auk family and laws to protect these rare birds.

Lobsters, blueberries, moose, and rugged coastlines dotted with lighthouses are emblematic of the state of Maine. But underlying these simple icons is the rich natural heritage of Maine that drives the economy and shapes the state's culture. The history of Maine's natural heritage has been co-produced by the both the natural and human worlds. The essays and photographs gathered here paint a vivid portrait of Maine's wild places and wild creatures, as well as of human impacts and the way the state's heritage has changed.

Our Maine

Dynamic naturalist Michael Blencowe has travelled the globe to uncover the fascinating backstories of eleven extinct animals, which he shares with charm and insight in *Gone*. 'Really, really well written' – CHRIS PACKHAM Inspired by his childhood obsession with extinct species, Blencowe takes us around the globe – from the forests of New Zealand to the ferries of Finland, from the urban sprawl of San Francisco to an inflatable crocodile on Brighton's Widewater Lagoon. Spanning five centuries, from the last sighting of New Zealand's Upland Moa to the 2012 death of the Pinta Island Giant Tortoise, Lonesome George, his memoir is peppered with the accounts of the hunters and naturalists of the past as well as revealing conversations with the custodians of these totemic animals today. Featuring striking artworks that resurrect these forgotten creatures, each chapter focuses on a different animal, revealing insights into their unique characteristics and habitats; the history of their discovery and just how and when they came to be lost to us. Blencowe inspects the only known remains of a Huia egg at Te Papa, New Zealand; views hundreds of specimens of deceased Galapagos tortoises and Xerces Blue butterflies in the California Academy of Sciences; and pays his respects to the only soft tissue remains of the Dodo in the world. Warm, wry and thought-provoking, *Gone* shows that while each extinction story is different, all can inform how we live in the future. Discover and learn from the stories of the: Great Auk. A majestic flightless seabird of the North Atlantic and the 'original penguin'. Spectacled Cormorant. The 'ludicrous bird' from the remote islands of the Bering Sea. Steller's Sea Cow. An incredible ten tonne dugong with skin as furrowed as oak bark. Upland Moa. The improbable birds and the one-time rulers of New Zealand. Huia. The unique bird with two beaks and twelve precious tail feathers. South Island KMKako. The 'orange-wattled crow', New Zealand's elusive Grey Ghost. Xerces Blue. The gossamer-winged butterfly of the San Francisco sand dunes. Pinta Island Tortoise. The slow-moving, long-lived giant of the Galápagos Islands. Dodo. The superstar of extinction. Schomburgk's Deer. A mysterious deer from the wide floodplains of central Thailand. Ivell's Sea Anemone. A see-through sea creature known only from southern England. A modern must-read for anyone interested in protecting our earth and its incredible wildlife, *Gone* is an evocative call to conserve what we have before it is lost forever.

Gone

The Earth's biodiversity is at risk, as delicate ecosystems struggle to overcome global climate change, rain forest destruction acid rain overfishing, erosion, and a host of other interconnected environmental problems. Written for upper-level undergraduate and graduate students, *Restoration Ecology* addresses these growing environmental Concerns and offers practical and economical solution. The text opens with a look at fundamental ecological principles critical to understanding restoration, including nutrient cycling and factors that regulate ecosystem function, and continues on to explore restoration in practice,

providing real-life accounts of the restoration of various disturbed ecosystems. The final section delves into the planning implementation monitoring, and appraisal of restoration work.

Thoroughly revised and significantly expanded, the Second Edition of Environmental Ecology provides new case studies and in-depth treatment of the effects of pollution and other disturbances on our oceans, lakes, forests, and air. New chapters on biological resources and ecological applications have been added, including material on environmental economics, impact assessments, ecological monitoring, and environmental ethics. Extensive indexes, a glossary, and a bibliography are included.

Humanity can make short work of the oceans' creatures. In 1741, hungry explorers discovered herds of Steller's sea cow in the Bering Strait, and in less than thirty years, the amiable beast had been harpooned into extinction. It's a classic story, but a key fact is often omitted. Bering Island was the last redoubt of a species that had been decimated by hunting and habitat loss years before the explorers set sail. As Callum M. Roberts reveals in *The Unnatural History of the Sea*, the oceans' bounty didn't disappear overnight. While today's fishing industry is ruthlessly efficient, intense exploitation began not in the modern era, or even with the dawn of industrialization, but in the eleventh century in medieval Europe. Roberts explores this long and colorful history of commercial fishing, taking readers around the world and through the centuries to witness the transformation of the seas. Drawing on firsthand accounts of early explorers, pirates, merchants, fishers, and travelers, the book recreates the oceans of the past: waters teeming with whales, sea lions, sea otters, turtles, and giant fish. The abundance of marine life described by fifteenth century seafarers is almost unimaginable today, but Roberts both brings it alive and artfully traces its depletion. Collapsing fisheries, he shows, are simply the latest chapter in a long history of unfettered commercialization of the seas. The story does not end with an empty ocean. Instead, Roberts describes how we might restore the splendor and prosperity of the seas through smarter management of our resources and some simple restraint. From the coasts of Florida to New Zealand, marine reserves have fostered spectacular recovery of plants and animals to levels not seen in a century. They prove that history need not repeat itself: we can leave the oceans richer than we found them.

An acclaimed photographic guide to these marvelous and enigmatic birds—now in a new, updated edition Penguins are perhaps the most beloved birds. On land, their behavior appears so humorous and expressive that we can be excused for attributing to them moods and foibles similar to our own. Few realize how complex and mysterious their private lives truly are, as most of their existence takes place far from our prying eyes, hidden beneath the ocean waves. Now in a new, updated edition, this stunningly illustrated book provides a unique look at these extraordinary creatures and the cutting-edge science that is helping us to better understand them. Featuring more than 400 breathtaking photos, this is the ultimate guide to all 18 species of penguins, including those with retiring personalities or nocturnal habits that tend to be overlooked and rarely photographed. This revised second edition features updated scientific information and some spectacular new photographs. Penguins is the most ambitious book to date by Tui De Roy, Mark Jones, and Julie Cornthwaite. Their travels, spanning more than two decades, have seen them crisscross the southern hemisphere to virtually everywhere that penguins are found, from the sun-baked lava shores of the Galápagos to some of the remotest subantarctic islands, as well as all around the Antarctic continent, where Emperor penguins breed on the deep-frozen sea. A book that no bird enthusiast or armchair naturalist should do without, Penguins includes discussions of penguin conservation, informative species profiles, fascinating penguin facts, and tips on where to see penguins in the wild. The Unnatural History of the Sea

A comprehensive and beautifully illustrated overview to the birds of Maine The first comprehensive overview of Maine's incredibly rich birdlife in more than seven decades, *Birds of Maine* is a detailed account of all 464 species recorded in the Pine Tree State. It is also a thoroughly researched, accessible portrait of a region undergoing rapid changes, with southern birds pushing north, northern birds

expanding south, and once-absent natives like Atlantic Puffins brought back by innovative conservation techniques pioneered in Maine. Written by the late Peter Vickery in cooperation with a team of leading ornithologists, this guide offers a detailed look at the state's dynamic avifauna—from the Wild Turkey to the Arctic Tern—with information on migration patterns and timing, current status and changes in bird abundance and distribution, and how Maine's geography and shifting climate mold its birdlife. It delves into the conservation status for Maine's birds, as well as the state's unusually textured ornithological history, involving such famous names as John James Audubon and Theodore Roosevelt, and home-grown experts like Cordelia Stanwood and Ralph Palmer. Sidebars explore diverse topics, including the Old Sow whirlpool that draws multitudes of seabirds and the famed Monhegan Island, a mecca for migrant birds. Gorgeously illustrated with watercolors by Lars Jonsson and scores of line drawings by Barry Van Dusen, *Birds of Maine* is a remarkable guide that birders will rely on for decades to come. A haunting, beautifully illustrated memorial to this iconic extinct bird At the start of the nineteenth century, Passenger Pigeons were perhaps the most abundant birds on the planet, numbering literally in the billions. The flocks were so large and so dense that they blackened the skies, even blotting out the sun for days at a stretch. Yet by the end of the century, the most common bird in North America had vanished from the wild. In 1914, the last known representative of her species, Martha, died in a cage at the Cincinnati Zoo. This stunningly illustrated book tells the astonishing story of North America's Passenger Pigeon, a bird species that—like the Tyrannosaur, the Mammoth, and the Dodo—has become one of the great icons of extinction. Errol Fuller describes how these fast, agile, and handsomely plumaged birds were immortalized by the ornithologist and painter John James Audubon, and captured the imagination of writers such as James Fenimore Cooper, Henry David Thoreau, and Mark Twain. He shows how widespread deforestation, the demand for cheap and plentiful pigeon meat, and the indiscriminate killing of Passenger Pigeons for sport led to their catastrophic decline. Fuller provides an evocative memorial to a bird species that was once so important to the ecology of North America, and reminds us of just how fragile the natural world can be. Published in the centennial year of Martha's death, *The Passenger Pigeon* features rare archival images as well as haunting photos of live birds.

I felt the worlds of ocean and ice were meeting in a frontier of rage, as if the Earth had torn in two along this line. This was a place if there ever was a place, where you could disappear. The year is 1845 and young researcher Eliot Saxby is paid to go on an expedition to the Arctic in the hope of finding remains of the by now extinct Great Auk. He joins a regular hunting ship, but the crew and the passengers are not what they seem. Caught in the web of relationships on board, Eliot struggles to understand the motivations of the sociopathic, embroidery-loving Captain Sykes, the silent First Mate French, the flamboyant laudanum-addicted Bletchley and, most importantly of all, Bletchley's beautiful but strange 'cousin' Clara. As the ship moves further and further into the wilds of the Arctic sea, Eliot clings to what he believes in, desperate to save Clara but drawn irrevocably back into the past that haunts him. The first historical novel from an author who has been critically acclaimed for his two contemporary novels (*Salt* and *The Wake*), *The Collector of Lost Things* is a compulsive, beautifully written read.

Birds of Maine

"John James Audubon's paintings of birds are as familiar as they are beautiful. But even among his admirers, many may be surprised to learn that Audubon was a gifted writer. In this one-of-a-kind anthology, Christoph Irmscher and Richard J. King have curated a collection of Audubon's coastal and sea writing, which represent Audubon's most compelling and evocative depictions of the natural world and early nineteenth-century American life. The collection is geographically diverse, bringing to light the variety of people and wildlife Audubon met or observed, pulling from the massive Ornithological Biography (1831-1839) as well as the "Autobiography" and journals. The editors supplement the selections with an instructive introduction and powerful coda, section headnotes, explanatory notes, and an appendix linking Audubon's species to current taxonomy and geographic ranges. The book is lavishly illustrated as well. There is much more in Audubon at Sea than descriptions of birds: we have stories of life aboard ship, of travel in early America and Audubon's work habits, the origins of iconic paintings, and, in the end, the carefully drawn commentary on a flawed and, at best, ambiguous hero"--

For many, their first experience of the natural world is in the pages of books and in library collections--a Paper Zoo. This stunning book gathers together a wide range of beautiful nature illustrations from the British Library's collections, including manuscripts, prints and drawings, and rare printed books, and featuring items from all around the world. With striking images of butterflies, beetles, spiders, animals, shells, fish and birds, the pages bring readers into contact with some of the world's most renowned natural history illustrators, such as Audubon and Catesby, and on expeditions to discover the lesser known rare finds as well. The text traces the story of the art of natural history from the Renaissance through the great age of exploration to the 19th century, to demonstrate how the collaboration between the fields of art and science has rendered such exquisite forms. The plates, all taken from books, are organized into several themed sections, though not on strict taxonomic grounds, but rather on broader themes of exotic, native, domestic, and paradoxical (with reference to what the species were at that time--for what is native now may well once have been exotic).

"Mrs. Oscar Hammerstein, so the story goes, once overheard someone praise "Ol' Man River" as a "great Kern song." "I beg your pardon," she said, "But Jerome Kern did not write 'Ol' Man River.' Mr. Kern wrote dum dum dum da; my husband wrote ol' man river." It's easy to understand her frustration. While the years between World Wars I and II have long been hailed as the "golden age" of American popular song, it is the composers, not the lyricists, who always usually get top billing. "I love a Gershwin tune" too often means just that-the tune-even though George Gershwin wrote many unlovable tunes before he began working with his brother Ira in 1924. Few people realize that their favorite "Arlen" songs each had a different lyricist-Ted Koehler for "Stormy Weather," Yip Harburg for "Over the Rainbow," Johnny Mercer for "That Old Black Magic." Only Broadway or Hollywood buffs know which "Kern" songs get their wry touch from Dorothy Fields, who would flippantly rhyme "fellow" with "Jello," and which of Kern's sonorous melodies got even lusher from Otto Harbach, who preferred solemn rhymes like "truth" and "forsooth." Jazz critics sometimes pride themselves on ignoring the lyrics to Waller and Ellington "instrumentals," blithely consigning Andy Razaf or Don George to oblivion"--

The True Story Of The 3 Little Pigs

Based on the award-winning apps, this series of Nosy Crow Fairy Tales is the perfect introduction for pre-schoolers to these classic stories. With simple child-friendly text and bright, modern artwork with lots of fun details, these make perfect read-alouds. The three little pigs leave home to make their way in the world. The first little pig builds a house made of straw. The second little pig builds a house made of sticks. And the third little pig builds a house made of bricks. But it's not long before the Big Bad Wolf turns up. He huffs and he puffs and he blows down the houses, one by one. But what will happen to the three little pigs?

The Three Little Pigs

"Little pig, little pig, let me in!" A beautifully illustrated retelling of this favourite traditional story. Join in the refrains and watch as the clever little pig outwits the big, bad wolf. Must Know Stories includes favourite tales, celebrating the diversity of our literary heritage. Level 1 stories are told in under 500 words, for children to read independently.

Teacher's Manual

The annual bible of pop is back with the most comprehensive edition yet combining British hit singles and British hit albums in one volume. The UK's oldest and biggest-selling music annual contains all 39,000 hit singles and albums from more than 50 years of the charts. All this plus act biographies, a song title index and more than 50 illustrated features make it the perfect book for pop quizzers, record collectors, DJs, downloaders and music fans of all ages.

The Three Little Pigs: A Literature Unit

It was time for the three little wolves to go out into the world, so they set off and built themselves a splendid brick house. But they hadn't reckoned on the big bad pig coming along with a sledgehammer...

The Three Little Pigs

Repetitive text and adorable illustrations help tell the classic tale of "The Three Little Pigs." When three little pigs leave home to build houses of their own, their mother warns them of a wicked wolf. The pigs learn a valuable lesson as the hungry wolf is determined to eat the pigs for supper. Find out which pig builds the strongest house and how they outsmart the wicked wolf. A new, positive twist to the ending of this fairy tale will make it a family favorite and encourage a lifelong love for reading.

Barefoot in the Snow

To be a competent, confident follower of Jesus, you need more than a few Bible basics. You need Scripture to lead you to growth and new life, consistently, for a lifetime. Lectio divina, the ancient Christian practice of moving through the Bible into the presence of God, will give you exactly that. This book brings you a faithful modern version of the practice as taught by the 12th century monk Guigo II--so you can finally Love Your Bible.

Love Your Bible

Veteran youth workers Helen Musick and Duffy Robbins dip into their bag of tried-and-true teaching tricks to present this collection of 52 of their most effective object lessons. Easy and fast to prepare, these lessons are perfect for use in devotionals, Sunday School lessons, talks at camps and retreats, and even sermons for both junior and senior high groups.

Everyday Object Lessons for Youth Groups

There is nothing like an object lesson to bring learning to life! When it comes to explaining the Bible to children and pre-teens, many parents and even Sunday school teachers are at a loss as to ways that really connect their children or students to God's Word, bringing it to life in interesting and creative ways. Thankfully, *50 Great Object Lessons* makes it incredibly easy! Certainly, there are any number of excellent books that contain object lessons. However, many of those object lessons require supplies that the average person or teacher does not have. Moreover, those object lessons often require a couple hours or more prepare. That is not the case with this book! Nearly every object lesson in this book uses supplies that are readily found in any home or classroom. Additionally, these object lessons all require fifteen minutes or less. Most require only five to ten minutes of prep time. This book is great for parents, Sunday school teachers, and Children's Church workers. Hands-on, visual learning is proven to be the most effective way to increase subject retention, so grab a copy today and start bringing the Bible to life in a way that will be remembered!

What good is a broken fingernail? What can you do with a frying pan, a hammer, and an egg? How is a balloon different from a brick? The world around us is full of items useful for interesting and meaningful object lessons. Dr. Ryrie uses pencils, light bulbs, sunglasses, and even the air around us to illustrate truths about salvation and the Christian life. All 100 objects are simple and easy to find, and the lessons can be used for any group of any age. Children and adults alike will enjoy learning more when you present these fascinating illustrations.

Raising Prayerful Kids

This fascinating book is the first volume in a projected cultural history of the United States, from the earliest English settlements to our own time. It is a history of American folkways as they have changed through time, and it argues a thesis about the importance for the United States of having been British in its cultural origins. While most people in the United States today have no British ancestors, they have assimilated regional cultures which were created by British colonists, even while preserving ethnic identities at the same time. In this sense, nearly all Americans are "Albion's Seed," no matter what their ethnicity may be. The concluding section of this remarkable book explores the ways that regional cultures have continued to dominate national politics from 1789 to 1988, and still help to shape attitudes toward education, government, gender, and violence, on which differences between American regions are greater than between European nations.

Object Lessons

Nothing captures the attention of young people (and adults) like a creative object lesson. This hands-on book gives pastors, teachers, speakers, and homeschoolers 77 exciting science activities that reveal the order and grandeur of creation and encourage an appreciation of all God has made. These easy experiments illustrate the laws of nature, teach Bible principles, and affirm God's power as Creator. With catchy or unexpected results, the demonstrations make Bible truth unforgettable. The clearly explained experiments use common household objects, require little setup, and are illustrated with pictures and diagrams.

Albion's Seed

A scrambled mess . . . Humpty Dumpty had a great fall. Or--as his brother Detective Joe Dumpty thinks--was he pushed? This case isn't all it's cracked up to be. Suspects are plenty (as are the puns) in this scrambled story of nursery rhyme noir. Was it Little Miss Muffet? There's something not right about her tuffet. Or could it have been Chicken Little, who's always been a little cagey? Or was it the Big Bad Wolf, who's got a rap sheet as long as a moonless night? Joe's on the beat and determined to find the truth. Readers of all ages will delight in the word play and hilarious illustrations in this mystery of what really happened to Humpty Dumpty on that fateful day.

El-Hi Textbooks & Serials in Print, 2000

Reflecting on the confusion, shame and grief brought on by her mother's schizophrenia, Amy Simpson provides a bracing look at the social and physical realities of mental illness. Reminding us that people with mental illness are our neighbors and our brothers and sisters in Christ, she explores new possibilities for the church to minister to this stigmatized group.

Cumulative Book Index

Contemporary life is leaving us frazzled, overwhelmed, and out of sorts. Our life's rhythm is often borrowed from the pace of life around us. Humans have created such a loud, fast tempo of perfection and production that we often forget--if we ever knew it at all--the rhythms designed for our well-being.

In *The Sacred Pulse*, pastor and author April Fiet invites us to examine the frantic patterns of our lives to reclaim the deeper, sacred pulses that pattern our days. Through stories, scripture, and practical guidance for daily living, she lays out twelve rhythms—including gardening, handcrafts, friendship, and holidays—that are both sustainable and sustaining. Everyday acts like mealtime and shopping, and sporadic rhythms like the occasional snow day: reclaiming these patterns can remind us of the holy movement of God in the world. In a world of hustle and bravado, silencing the noise takes practice. *The Sacred Pulse* shows us how to strip away all of the competing beats we have settled for so we can tap into the joyful, holy rhythms of life.

Devotional time is usually “quiet time”—a moment to sit and reflect on Scripture and connect with God. *Hands-On Bible: 365 Devotions for Kids* will reignite and energize your family devotions. Your kids will be giggling, singing, dancing, creating, and getting excited about the Bible all while praising God and growing closer to Him. Each of the 365 action-filled devotions comes to life with fun activities and games using regular household items. No need to run out and buy extra supplies! With *Hands-On Bible: 365 Devotions for Kids*, your children will get into the Bible, and the Bible will get into their hearts, giving them a priceless foundation of faith in God.

77 Fairly Safe Science Activities for Illustrating Bible Lessons

Engage and energize young readers with a fresh take on the Gospel story of Jesus. Charmingly illustrated and very accessible, *The Simple Little Salvation Story* takes readers on a journey to help them easily understand God's loving plan of salvation. And it helps parents answer lots of difficult questions along the way -- like why did Jesus have to die for our sins? And what are sins, anyway? *The Simple Little Salvation Story* isn't just a retelling of Bible stories with colorful pictures and short sentences. In fact it doesn't even start with Adam and Eve. It starts with robots. Yes, robots. Then it moves into skateboarding and helping senior citizens across the street. And then it introduces what sin is and God's amazing plan to wash us clean of it so we can live with Him forever. So add some of Jesus' dramatic story to your story time. Or give it to a child or grandchild on a special religious occasion or holiday. It will help explain – in an engaging way with beautiful illustrations from noted artist Shirley Chiang – what all this Christian salvation stuff is about, anyway. Praise for *The Simple Little Salvation Story*: “The analogy of the robots had me hooked immediately. I've taught Religion for over 40 years and I would read this to my students in a heartbeat!” — Pam Ferguson, Holy Family Catholic School, St. Petersburg, FL “*The Simple Little Salvation Story* captures the essence of the most profound theological truths and communicates them in a way that is simple and understandable to our children. Get this book. Read it, but most of all read it aloud and make sure someone else is listening!” —Dr. Willy Rice, Senior Pastor, Calvary Baptist Church, Clearwater, FL (60 pages; ages 5+)

What Really Happened to Humpty?

Troubled Minds

Presents a collection of devotional readings comprised of Bible verses, thoughts to grow on, and facts about the world, designed to promote spiritual growth.

The Sacred Pulse

Acts is the sequel to Luke's gospel and tells the story of Jesus's followers during the 30 years after his death. It describes how the 12 apostles, formerly Jesus's disciples, spread the message of Christianity throughout the Mediterranean against a background of persecution. With an introduction by P.D. James

Hands-On Bible 365 Devotions for Kids

As *The Giving Tree* turns fifty, this timeless classic is available for the first time ever in ebook format. This digital edition allows young readers and lifelong fans to continue the legacy and love of a classic that will now reach an even wider audience. "Once there was a tree...and she loved a little boy." So

begins a story of unforgettable perception, beautifully written and illustrated by the gifted and versatile Shel Silverstein. This moving parable for all ages offers a touching interpretation of the gift of giving and a serene acceptance of another's capacity to love in return. Every day the boy would come to the tree to eat her apples, swing from her branches, or slide down her trunk...and the tree was happy. But as the boy grew older he began to want more from the tree, and the tree gave and gave and gave. This is a tender story, touched with sadness, aglow with consolation. Shel Silverstein's incomparable career as a bestselling children's book author and illustrator began with *Lafcadio, the Lion Who Shot Back*. He is also the creator of picture books including *A Giraffe and a Half*, *Who Wants a Cheap Rhinoceros?*, *The Missing Piece*, *The Missing Piece Meets the Big O*, and the perennial favorite *The Giving Tree*, and of classic poetry collections such as *Where the Sidewalk Ends*, *A Light in the Attic*, *Falling Up*, *Every Thing On It*, *Don't Bump the Glump!*, and *Runny Babbit*. And don't miss the other Shel Silverstein ebooks, *Where the Sidewalk Ends* and *A Light in the Attic*!

Growing with Jesus

Help Your Child Grab Hold of God's Promises Quinn, the thoughtful little owl, has a lot of worries and questions for her father. "What if I get lost?" "What if you dive and I don't notice?" "What if you get too far ahead of me and I can't find you?" Written for children experiencing moments of separation anxiety or other common fears, Quinn's Promise Rock reminds kids that God will always be there for them, whatever happens or wherever they go. Share this comforting truth with your child today.

The Acts of the Apostles

Women desire to live well. However, living well in this modern world is a challenge. The pace of life, along with the new front porch of social media, has changed the landscape of our lives. Women have been told for far too long that being on the go and accumulating more things will make their lives full. As a result, we grasp for the wrong things in life and come up empty. God created us to walk with him; to know him and to be loved by him. He is our living well and when we drink from the water he continually provides, it will change us. Our marriages, our parenting, and our homemaking will be transformed. Mommy-blogger Courtney Joseph is a cheerful realist. She tackles the challenge of holding onto vintage values in a modern world, starting with the keys to protecting our walk with God. No subject is off-limits as she moves on to marriage, parenting, and household management. Rooted in the Bible, her practical approach includes tons of tips that are perfect for busy moms, including: *Simple Solutions for Studying God's Word* *How to Handle Marriage, Parenting, and Homemaking in a Digital Age* *10 Steps to Completing Your Husband* *Dealing With Disappointed Expectations in Motherhood* *Creating Routines that Bring Rest* *Pursuing the Discipline and Diligence of the Proverbs 31 Woman* There is nothing more important than fostering your faith, building your marriage, training your children,

and creating a haven for your family. Women Living Well is a clear and personal guide to making the most of these precious responsibilities.

The Giving Tree

God, who said, "Let light shine out of darkness," has shone in our hearts to give the light of the knowledge of the glory of God in the face of Jesus Christ. 2 Corinthians 4:6 This book is a cry from the heart of John Piper. He is pleading that God himself, as revealed in Christ's death and resurrection, is the ultimate and greatest gift of the gospel. None of Christ's gospel deeds and none of our gospel blessings are good news except as means of seeing and savoring the glory of Christ. Forgiveness is good news because it opens the way to the enjoyment of God himself. Justification is good news because it wins access to the presence and pleasures of God himself. Eternal life is good news because it becomes the everlasting enjoyment of Christ. All God's gifts are loving only to the degree that they lead us to God himself. That is what God's love is: his commitment to do everything necessary (most painfully the death of his only Son) to enthrall us with what is most deeply and durably satisfying—namely, himself. Saturated with Scripture, centered on the cross, and seriously joyful, this book leads us to satisfaction for the deep hungers of the soul. It touches us at the root of life where practical transformation gets its daily power. It awakens our longing for Christ and opens our eyes to his beauty. Piper writes for the soul-thirsty who have turned away empty and in desperation from the mirage of methodology. He invites us to slow down and drink from a deeper spring. "This is eternal life," Jesus said, "that they know you the only true God, and Jesus Christ whom you have sent." This is what makes the gospel—and this book—good news.

What God Is Doing

Explore What Jesus Shared in the Sermon on the Mount! Jesus left no doubt that being a Christian can be hard; but because of God's promises, each of us can experience his blessings. These 13 Sunday school lessons help kids discover a wealth of wisdom about how to live a life full of blessing—even when things get tough. And they'll learn firsthand about all the wonderful ways God shows his love in their lives, no matter the circumstances. All of the hands-on sessions include loads of Scripture, activities, and mementos to help kids learn for a lifetime. Plus, you get heaps of easy teacher tips and extra creative options to make the most of your sessions. Pack your bags and buckle up for an adventure full of surprises with Jesus!
