Chinese Made Easy adopts a new approach to teaching Chinese as a second or foreign language. It is designed for young students taking GCSE/IGCSE/A-Level Mandarin Chinese Exams (UK), SAT II / AP-Chinese Examinations (USA), IB Chinese Exam, Australian Chinese exams, HSK (Mainland China), or for those students who are starting to learn Chinese on their own. Chinese Made Easy has two levels: level 1-Book 1, 2 and 3; and level 2-Book 4 and 5. After completing this series, learners will acquire a vocabulary of approximately 1,700 Chinese characters and several thousand phrases. This course features task-based learning coupled with a focus on form and function. Textbooks are in full color and it includes both simplified and traditional Chinese characters in its vocabulary lists.

Colloquial Chinese: The Complete Course for Beginners has been carefully developed by an experienced teacher to provide a step-by-step course to Chinese as it is written and spoken today. Combining a clear, practical and accessible style with a methodical and thorough treatment of the language, it equips learners with the essential skills needed to communicate confidently and effectively in Chinese in a broad range of situations. No prior knowledge of the language is required. Colloquial Chinese is exceptional; each unit presents a wealth of grammatical points that are reinforced with a wide range of exercises for regular practice. A full answer key, a grammar summary, bilingual glossaries and English translations of dialogues can be found at the back as well as useful vocabulary lists throughout. Key features include: A clear, user-friendly format designed to help learners progressively build up their speaking, listening, reading and writing skills Jargon-free, succinct and clearly structured explanations of grammar An extensive range of focused and dynamic supportive exercises Realistic and entertaining dialogues covering a broad variety of narrative situations Helpful cultural points explaining the customs and features of life in China An overview of the sounds of Chinese Balanced, comprehensive and rewarding, Colloquial Chinese is an indispensable resource both for independent learners and students taking courses in Chinese. Audio material to accompany the course is available to download free in MP3 format from www.routledge.com/cw/colloquials. Recorded by native speakers, the audio material features the dialogues and texts from the book and will help develop your listening and pronunciation skills.

A superb visual reference to the principles of architecture Now including interactive CD-ROM! For more than thirty years, the beautifully illustrated *Architecture: Form, Space, and Order* has been the classic introduction to the basic vocabulary of architectural design. The updated Third Edition features expanded sections on circulation, light, views, and site context, along with new considerations of environmental factors, building codes, and contemporary examples of form, space, and order. This classic visual reference helps both students and practicing architects understand the basic vocabulary of architectural design by examining how form and space are ordered in the built environment.?

Using his trademark meticulous drawing, Professor Ching shows the relationship between fundamental elements of architecture through the ages and across cultural boundaries. By looking at these seminal ideas, *Architecture: Form, Space, and Order* encourages the reader to look critically at the built environment and promotes a more evocative understanding of architecture. In addition to updates to content and many of the illustrations, this new edition includes a companion CD-ROM that brings the book's architectural concepts to life through three-dimensional models and animations created by Professor Ching.

RAM

This is a thoroughly revised edition of *Integrated Korean: Intermediate 1*, the third volume of the best-selling series developed collaboratively by leading classroom teachers and linguists of Korean. All the series' volumes have been developed in accordance with performance-based principles and methodology—contextualization, learner-centeredness, use of authentic materials, usage-orientedness, balance between skill getting and skill using, and integration of speaking, listening, reading, writing, and culture. Grammar points are systematically introduced in simple but adequate explanations and abundant examples and exercises. Each situation/topic-based lesson of the main texts consists of model dialogues, narration, new words and expressions, vocabulary notes, culture, grammar, usage, and English translation of dialogues. In response to comments from hundreds of students and instructors of the second edition, this new third edition features an attractive color design with new photos and drawings and lesson and vocabulary exercises that have been fully reorganized. Each lesson contains a conversational text (with its own vocabulary list) and a reading passage. The accompanying workbook provides students with extensive skill-using activities based on the skills learned in the main text. *Integrated Korean* is a project of the Korean Language Education and Research Center (KLEAR) with the support of the Korean Foundation. In addition to the five-level *Integrated Korean* textbooks and workbooks, volumes include *Korean Composition*, *Korean Language in Culture and Society*, *Korean Reader for Chinese Characters*, *Readings in Modern Korean Literature*, *A Resource for Korean Grammar Instruction*, and *Selected Readings in Korean*. Audio files for this volume may be downloaded in MP3 format at <https://kleartextbook.com>

Chinese Made Easy

Concepts of Biology is designed for the single-semester introduction to biology course for non-science majors, which for many students is their only college-level science course. As such, this course represents an important opportunity for students to develop the necessary knowledge, tools, and skills to make informed decisions as they continue with their lives. Rather than being mired down with facts and vocabulary, the typical non-science major student needs information presented in a way that is easy to read and understand. Even more importantly, the content should be meaningful. Students do much better when they understand why biology is relevant to their everyday lives. For these reasons, *Concepts of Biology* is grounded on an evolutionary basis and includes exciting features that highlight careers in the biological sciences and everyday applications of the concepts at hand. We also strive to show the interconnectedness of topics within this extremely broad discipline. In order to meet the needs of today's instructors and students, we maintain the overall organization and coverage found in most syllabi for this course. A strength of *Concepts of Biology* is that instructors can customize the book, adapting it to the approach that works best in their classroom. *Concepts of Biology* also includes an innovative art program that incorporates critical thinking and clicker questions to help students understand--and apply--key concepts.

Lecturers/instructors - request a free digital inspection copy here In the Second Edition of this textbook designed for new researchers, Uwe Flick takes readers through the process of producing a research project. The book gives readers the fundamental data collection and analysis skills that they need for their first project, as well as a good understanding of the research process as a whole. It covers both quantitative and qualitative methods, and contains plenty of real-life examples from the author's own research. The book will help readers to answer questions such as: why do social research in the first place? how do I develop a researchable question? what is a literature review and how do I conduct one? how could I collect and analyze data? what if I want to do my research online? Available with Perusall—an eBook that makes it easier to prepare for class Perusall is an award-winning eBook platform featuring social annotation tools that allow students and instructors to collaboratively mark up and discuss their SAGE textbook. Colloquial Chinese

Learning Chinese can be frustrating and difficult, partly because it's very different from European languages. Following a teacher, textbook or language course is not enough. They show you the characters, words and grammar you need to become proficient in Chinese, but they don't teach you how to learn them! Regardless of what program you're in (if any), you need to take responsibility for your own learning. If you don't, you will miss many important things that aren't included in the course you're taking. If you study on your own, you need to be even more aware of what you need to do, what you're doing at the moment and the difference between them. Here are some of the questions I have asked and have since been asked many times by students: How do I learn characters efficiently? How do I get the most out of my course or teacher? Which are the best learning tools and resources? How can I become fluent in Mandarin? How can I improve my pronunciation? How do I learn successfully on my own? How can I motivate myself to study more? How can I fit learning Chinese into a busy schedule? The answers I've found to these questions and many others form the core of this book. It took eight years of learning, researching, teaching and writing to figure these things out. Not everybody has the time to do that! I can't go back in time and help myself learn in a better way, but I can help you! This book is meant for normal students and independent language learners alike. While it covers all major areas of learning, you won't learn Chinese just by reading this book. It's like when someone on TV teaches you how to cook: you won't get to eat the delicious dish just by watching the program; you have to do the cooking yourself. That's true for this book as well. When you apply what you learn, it will boost your learning, making every hour you spend count for more, but you still have to do the learning yourself. This is what a few readers have said about the book: "The book had me nodding at a heap of things I'd learnt the hard way, wishing I knew them when I started, as well as highlighting areas that I'm currently missing in my study." - Geoff van der Meer, VP engineering "This publication is like a bible for anyone serious about Chinese proficiency. It's easy for anyone to read and written with scientific precision." - Zachary Danz, foreign teacher, children's theatre artist About me I started learning Chinese when I was 23 (that's more than eight years ago now) and have since studied in many different situations, including serious immersion programs abroad, high-intensity programs in Sweden, online courses, as well as on the side while working or studying other things. I have also successfully used my Chinese in a graduate program for teaching Chinese as a second language, taught entirely in Chinese mostly for native speakers (the Graduate Institute for Teaching Chinese as a Second Language at National Taiwan Normal University). All these parts have contributed to my website, Hacking Chinese, where I write regularly about how to learn Mandarin.

This version has been fully re-checked for accuracy and re-formatted to make it even more user-friendly, following feedback after a full year of classroom use by thousands of teachers across the world. Spanish Sentence Builders is a workbook aimed at beginner to pre-intermediate students co-authored by two modern languages educators with over 40 years of extensive classroom experience between the two, both in the UK and internationally. This 'no-frills' book contains 19 units of work on very popular themes, jam-packed with graded vocabulary-building, reading, translation, retrieval practice and writing activities. Key vocabulary, lexical patterns and structures are recycled and interleaved throughout. Each unit includes: 1) A sentence builder modelling the target constructions; 2) A set of vocabulary building activities; 3) A set of narrow reading texts exploited through a range of tasks focusing on both the meaning and structural levels of the text; 4) A set of retrieval-practice translation tasks; 5)

A set of writing tasks targeting essential micro-skills such as spelling, lexical retrieval, syntax, editing and communication of meaning. Based on the Extensive Processing Instruction (E.P.I.) principle that learners learn best from comprehensible and highly patterned input flooded with the target linguistic features, the authors have carefully designed each and every text and activity to enable the student to process and produce each item many times over. This occurs throughout each unit of work as well as in smaller grammar, vocabulary and question-skills micro-units located at regular intervals in the book, which aim at reinforcing the understanding and retention of the target grammar, vocabulary and question patterns.

"The approach that has helped thousands of learners memorize Japanese kanji has been adapted to help students with Chinese characters. Remembering Simplified Hanzi covers the writing and meaning of the 1,000 most commonly used characters in the traditional Chinese writing system, plus another 500 that are best learned at an early stage." "Of critical importance to the approach found in these pages is the systematic arranging of characters in an order best suited to memory. In the Chinese writing system, strokes and simple components are nested within relatively simple characters, which can, in turn, serve as parts of more complicated characters and so on. Taking advantage of this allows a logical ordering, making it possible for students to approach most new characters with prior knowledge that can greatly facilitate the learning process."--BOOK JACKET.

Architecture

Children are already learning at birth, and they develop and learn at a rapid pace in their early years. This provides a critical foundation for lifelong progress, and the adults who provide for the care and the education of young children bear a great responsibility for their health, development, and learning. Despite the fact that they share the same objective - to nurture young children and secure their future success - the various practitioners who contribute to the care and the education of children from birth through age 8 are not acknowledged as a workforce unified by the common knowledge and competencies needed to do their jobs well. Transforming the Workforce for Children Birth Through Age 8 explores the science of child development, particularly looking at implications for the professionals who work with children. This report examines the current capacities and practices of the workforce, the settings in which they work, the policies and infrastructure that set qualifications and provide professional learning, and the government agencies and other funders who support and oversee these systems. This book then makes recommendations to improve the quality of professional practice and the practice environment for care and education professionals. These detailed recommendations create a blueprint for action that builds on a unifying foundation of child development and early learning, shared knowledge and competencies for care and education professionals, and principles for effective professional learning. Young children thrive and learn best when they have secure, positive relationships with adults who are knowledgeable about how to support their development and learning and are responsive to their individual progress. Transforming the Workforce for Children Birth Through Age 8 offers guidance on system changes to improve the quality of professional practice, specific actions to improve professional learning systems and workforce development, and research to continue to build the knowledge base in ways that will directly advance and inform future actions. The recommendations of this book provide an opportunity to improve the quality of the care and the education that children receive, and ultimately improve outcomes for children.

Learn how to write 250 of the commonest Chinese characters, with stroke by stroke guidance on every page. With thousands of characters to learn, beginning to read and write Chinese is a daunting task. Aimed at learners, this book takes you through 250 of the commonest characters in a clear and accessible way. The meaning of every character is explained along with information about its radical, the compound words it can form, its history, and more. There is a practice grid on every page, showing how the character is written, with space for you to practise writing the character for yourself. It is generally agreed that learners of Chinese need a working knowledge of about 100 characters in order to make themselves at all understood and to travel in China, so Easy Learning Chinese Characters is a great place to start.

Chinese Made Easy 5 - textbook including workbook. Simplified character version

An holistic and integrated approach to Mandarin Chinese.

Concepts of Biology

Modern Mandarin Chinese is a two-year undergraduate course for students with no prior background in Chinese study. Designed to build a strong foundation in both the spoken and written language, it develops all the basic skills such as pronunciation, character writing, word use, and structures, while placing a strong emphasis on the development of communicative skills. Each level of the course consists of a textbook and workbook in simplified Chinese. A free companion website provides all the audio for the course with a broad range of interactive exercises and additional resources for students' self-study, along with a comprehensive instructor's guide with teaching tips, assessment and homework material, and a full answer key. Key changes to this new edition: An increased number of vocabulary and characters introduced. 255 characters are introduced in this second edition for active production. Dialogues and example sentences are also presented in full-character format for passive recognition, and to provide additional challenge for more advanced students. Additional exercises in the workbooks and online to support the expanded number of words and characters incorporated into the textbooks. New cross-references between the textbooks, workbooks and companion website facilitate using all the resources in an integrated manner. Greatly enhanced and re-designed website. Retaining its focus on communicative skills and the long-term retention of characters, the text is now presented in simplified characters and pinyin from the outset with a gradual and phased removal of pinyin as specific characters are introduced and learnt. This unique approach allows students to benefit from the support of pinyin in the initial stages as they begin speaking while ensuring they are guided and supported towards reading only in characters.

Introducing Research Methodology

Now in its second edition, the MHRA Style Guide is an indispensable tool for authors and editors of scholarly books, contributors to academic publications, and students preparing theses. The Style Guide succeeds the best-selling MHRA Style Book, five editions of which were published from 1971 to 1996. Though originally designed for use in connection with the publications of the Modern Humanities Research Association, the Style Book became a standard book of reference, particularly in the humanities, and has been adopted by many other authors, editors, and publishers. This new edition of the Style Guide has been revised and updated by a subcommittee of the MHRA. It provides comprehensive guidance on the preparation of copy for publication and gives clear and concise advice on such matters as spelling (including the spelling of proper names and the transliteration of Slavonic names), abbreviations, punctuation, the use of capitals and italics, dates and numbers, quotations, notes, and references. Chapters on indexing, the preparation of theses and dissertations, and proof correcting are also included.

Hacking Chinese

Much more than a set of flashcards, this unique tool helps students build their vocabulary by understanding how groups of words are related. Using a carefully sequenced order, you will learn 768 headwords and more than 2,000 associated words that share characters and meanings with the headwords. Build mnemonic connections that will help you recall definitions and interpret unfamiliar words from context.

Spanish Sentence Builders - A Lexicogrammar approach

This workbook accompanies the thoroughly revised third edition of Integrated Korean: Beginning 2, the second volume of the best-selling series developed collaboratively by leading classroom teachers and linguists of Korean. All the series' volumes have been developed in accordance with performance-based principles and methodology—contextualization, learner-centeredness, use of authentic materials, usage-orientedness, balance between skill getting and skill using, and integration of speaking, listening, reading, writing, and culture. Grammar points are systematically introduced in simple but adequate explanations and abundant examples and exercises. Each situation/topic-based lesson of the main texts consists of model dialogues, narration, new words and expressions, vocabulary notes, culture, grammar, usage, and English translation of dialogues. In response to comments from hundreds of students and instructors of the second edition, this new third edition features an attractive color design with new photos and drawings and lesson and vocabulary exercises that have been fully reorganized. Each lesson contains a conversational text (with its own vocabulary list) and a reading

passage. The accompanying workbook—available online as well as in paperback—provides students with extensive skill-using activities based on the skills learned in the main text. Integrated Korean is a project of the Korean Language Education and Research Center (KLEAR) with the support of the Korea Foundation. In addition to the five-level Integrated Korean textbooks and workbooks, volumes include Korean Composition, Korean Language in Culture and Society, Korean Reader for Chinese Characters, Readings in Modern Korean Literature, A Resource for Korean Grammar Instruction, and Selected Readings in Korean. Audio files for this volume may be downloaded in MP3 format at <https://kleartextbook.com>

Remembering Simplified Hanzi 1

Originally published in 1999, A New China has become a standard textbook for intermediate Chinese language learning. This completely revised edition reflects China's dramatic developments in the last decade and consolidates the previous two-volume set into one volume for easy student use. Written from the perspective of a foreign student who has just arrived in China, the textbook provides the most up-to-date lessons and learning materials about the changing face of China. The first half of the book follows the life of an exchange student experiencing Beijing for the first time. Chinese language students are guided step-by-step through the stages of arriving at the airport, going through customs, and adjusting to Chinese university dormitories. The revised edition includes new lessons on daily life, such as doing laundry and getting a haircut, as well as visiting the zoo, night markets, and the Great Wall. Later lessons discuss recent social and political issues in China, including divorce, Beijing traffic, and the college entrance examination. A New China provides detailed grammar explanations, extensive vocabulary lists, and homework exercises. Single-volume, user-friendly format New lessons and vocabulary reflecting daily living in China Includes China's recent social and political issues Detailed grammar explanations, vocabulary lists, and homework exercises Uses both traditional and simplified characters

Integrated Chinese

An intensive, one-volume beginning course for adults that can be used in classrooms or for self-study. The 40 lessons develop an 800-word vocabulary and 301 basic conversational sentence patterns. Students should be able to carry on simple conversation upon completion.

Integrated Chinese

Learning to read and write Chinese requires lots of practice. This unique practice guide can be used with any Chinese textbook or on its own to enhance your proficiency in reading and writing Mandarin Chinese. Intermediate Written Chinese Practice Essentials offers a wealth of carefully-designed exercises and activities to help you develop every aspect of your reading and writing ability. This workbook has been designed so it can be used either in a class with an instructor or by independent learners working on their own. Both simplified and traditional characters are taught and practiced in the same volume. This means students can learn either or both kinds of characters without having to purchase another book, and instructors have the flexibility to teach a combined class where some students read and write one type of characters and other students the other type. This workbook provides character practice sheets for the 336 characters introduced in Intermediate Written Chinese, with complete information on stroke order and direction for both the simplified and traditional forms of the characters. Reading and writing exercises are included, such as those involving dictation and the answering of questions based on the content of each lesson. English-Chinese translation exercises are provided for each unit. The Downloadable content provides: Native-speaker audio recordings for dictation practice. Printable flash cards for all the new characters and words, with Chinese characters on one side and Pinyin and English on the other. Printable pdf files with additional exercises and activities. Together with this book, you can use Intermediate Spoken Chinese if you want to learn fluent spoken Mandarin. About the Series: Respected Chinese language expert Dr. Cornelius Kubler, who has taught diplomats, business people and students, presents a learning system that uses separate but integrated "tracks" to help you efficiently master the basics of spoken and written Chinese. The materials in the Basic Chinese series allow you to move from complete beginner level to basic fluency.

Interchange Fourth Edition is a fully revised edition of Interchange, the world's most successful series for adult and young-adult learners of North American English. The course has been revised to reflect the

most recent approaches to language teaching and learning. It remains the innovative series teachers and students have grown to love, while incorporating suggestions from teachers and students all over the world. This edition offers updated content in every unit, grammar practice, and opportunities to develop speaking and listening skills. Interchange Fourth Edition features contemporary topics and a strong focus on both accuracy and fluency. Its successful multi-skills syllabus integrates themes, grammar, functions, vocabulary, and pronunciation. The underlying philosophy of the course remains that language is best learned when it's used for meaningful communication.

Transforming the Workforce for Children Birth Through Age 8

Intended as a companion to the popular KLEAR Textbooks in Korean Language series and designed and edited by a leading Korean linguist, this is the first volume of its kind to treat specifically the critical role of language in Korean culture and society. An introductory chapter provides the framework of the volume, defining language, culture, and society and their interrelatedness and presenting an overview of the Korean language vis-à-vis its culture and society from evolutionary and dynamic perspectives. Early on, contributors examine the invention and use of the Korean alphabet, South Korea's "standard language" vs. North Korea's "cultured language," and Korean in contact with Chinese and Japanese. Several topics representative of Korean socio-cultural vocabulary (sound symbolic words, proverbs, calendar-related terms, kinship terms, slang expressions) are discussed, followed by a consideration of Korean honorifics and other related issues. Two chapters on Korean media, one on advertisements and the other a comparative analysis of television ads in Korea, Japan, and the U.S., follow. Finally, contributors look at salient features of the language, narrative structure, and dialectal variation. All chapters are accompanied by a set of student questions and a useful bibliography. A beginning level of proficiency in Korean is sufficient to digest the Korean examples with facility, making this volume accessible to a wide range of students. Contributors: Andrew S. Byon, Sungdai Cho, Young-A Cho, Young-mee Y. Cho, Miho Choo, Shin Ja J. Hwang, Ross King, Haejin Elizabeth Koh, Jeyseon Lee, Douglas Ling, Duk-Soo Park, Yong-Yae Park, S. Robert Ramsey, Carol Schulz, Ho-min Sohn, Susan Strauss, Hye-Sook Wang, Jaehoon Yeon.

With their beautiful, soft sepia color range, contemporary Japanese quilts stand out for their sophisticated reinvention of patchwork and appliqué blocks. These cool, calm quilts are as much at home in modern country style as they are in chic, urban settings. The harmonious fabrics are easily combined, often with accents of brick red, olive green, or yellow ocher, to create a new yet nostalgic style that resonates with quilters all over the world. In Japanese Taupe Quilts, acclaimed textile artist Susan Briscoe offers a wealth of tips, techniques, and ideas for both the beginner and the experienced quilter. The block patterns have been drafted from a variety of traditional block sources, including Japanese fabric, paper and architectural designs, and kamon family crests. For each block there is

a photograph, a clear instructional diagram or template, fabric palette and cutting guide, as well as detailed instructions for making the block. At-a-glance icons indicate skill level and techniques used. Patchwork, appliqué, embellishment, and quilting techniques are clearly explained with step-by-step photographs, from cutting out to finishing off. The blocks can be mixed and matched, tessellated for allover patterns, or combined into sampler quilts. Combination ideas are supplied throughout the block directory, together with six simple projects—a pillow, lap quilt, tote bag, table runner, wall hanging and satchel handbag—to inspire readers to create exquisite quilts in the distinctive Japanese taupe style.

Introduzione

La lettura deve diventare un'abitudine

Scegliete bene il libro

Leggete un libro breve

Non abbandonate un libro alla prima difficoltà

Non ostinatevi sullo stesso libro per mesi

Trovate il posto giusto

Via il telefono!

Trovate il momento giusto

Le prime 50 pagine di un libro sono le più difficili

Leggete ad alta voce

Non serve essere sempre concentrati al 100%

Fatevi stimolare da chi avete intorno

Unitevi a un gruppo di lettura

I'M Going To Have You Write these Ones Out like this so that You Can See the Rules You See the Problem with Distribution with Rationals Is People a Lot of the Time They Love To Do this They Love To Go Oh X to the 360 I'M Done because You Think Multiplication Were Not Multiplying Okay We'Re Adding those Exons because We'Re Multiplying on the Bases so What I'D Like To See from You Sure We'Re Doing X to the $\frac{3}{4}$ Times X to the $\frac{1}{4}$ We'Re Taking the First Outside Factor Times each Inside Term Are You Seeing Where this Is Coming from Okay Then We'Re Going To Have a Minus and We'Re Going to X to the $\frac{3}{4}$

We'Re Taking the First Outside Factor Times each Inside Term Are You Seeing Where this Is Coming from Okay Then We'Re Going To Have a Minus and We'Re Going to X to the $\frac{3}{4}$ Times X to the Third Can You Tell Me if You Ignore this Does that Mean the Mayor Is that Familiar We Just We Started the Section off of this Right Old Today off of that You Can Do that What Are You Going To Do To Combine those Exponents Yeah Exactly You'Re Going To Add those Together You'Re Going To Add Piece Can You Buy that Like Terms Have the Same Variable the Same Exponent if You Do Not Have like Terms You CanNot Combine Them Do You Have like Terms Here Are They the Same Variable Yes to the Same Exponent No You CanNot Combine that unless You Have Exactly the Same Variable the Same Exponent You Can't Add or Subtract Multiply Divide Sure because You Know You Can Multiply X Cubed Times X Squared Right that's Fine that's X to the Fifth Power no Problem

If You Do Not Have like Terms You CanNot Combine Them Do You Have like Terms Here Are They the Same Variable Yes to the Same Exponent No You CanNot Combine that unless You Have Exactly the Same Variable the Same Exponent You Can't Add or Subtract Multiply Divide Sure because You Know You Can Multiply X Cubed Times X Squared Right that's Fine that's X to the Fifth Power no Problem but As Soon as You Start Subtracting or Adding You CanNot Combine those Like Terms Separately They Understand What I Just Talked about Okay Good Start the Next Time

We Know that When We'Re Multiplying Common Bases We'Re Not Multiplying Exponents That Would Be an Excellent Ratio Next When We'Re Actually Adding those Things So Instead of X to the 16th We'Re Getting What Your Books You Got To Play along You Can Get a Play Along Now You Got To Be Here with It - Now the Last Thing That I Taught You Is that We Really Can't Combine any Like Terms unless We Have I'M Sorry We Can't Combine Terms unless You Have Exactly the Same Variable Raised to Exactly the Same Exponent so Lowercase S Could We Add Together Something like X to the 8th and X to the 4th of those Combined Oh Excellent

So some of You Guys Really Are Not Getting this this yet You'Re Going To See a Crossover in a Second Though and Then You'Re Going To Get It if You Don't Have like Terms Here Which Means You Couldn't Combine Them Right by Combining these Terms It Doesn't Magically Make this Like Term because Then You Would Have Been Able To Do Miami's Right So When You'Re Combine like Terms Don't Change the Power How It Only Changes if You'Re Multiplying Things That's When the Power Changes with Your Combine like Terms and Power Doesn't Change so We Are Going To Get Still X to the Fourth Minus Seven There's no Like Terms You'Re Done that Problems You Can Feel All Right with that Now Let's Draw some Comparisons into that Problem First Thing We Do if We Were To Foil this We'Re Going To Do the Same Thing Here Just Don't Do the Stuff in Your Head Go Ahead and Actually Write Out this Step That's Going To Help You with these Fractional Exponents the First Thing We'Re Going To Multiply Is X to the $\frac{1}{4}$

Tell Me How Much Are We Going To Have if We Do X to the $\frac{1}{4}$ Plus $\frac{1}{4}$ How Much Is that because You'Re Going You $\frac{2}{4}$ Right You Get the Common Gentleman Already $\frac{2}{4}$ Simplifies to $\frac{1}{2}$ We'Ve

Got x to the $1/2$ - How Much Is $7x$ to the $1/4 + x$ to the $1/4$ Now I Know I Can Combine Them because I Have those Like Terms They Have the Same Type Variable Raised to the Same Exact Power How Much Am I Going To Get Here Negative 2 6

- How Much Is $7x$ to the $1/4 + x$ to the $1/4$ Now I Know I Can Combine Them because I Have those Like Terms They Have the Same Type Variable Raised to the Same Exact Power How Much Am I Going To Get Here Negative 2 6 and Then x to the What $1 1/2$ Okay All Right Let's See if that Works Does that Work I Need Them You Need To Really Really Look at Similar Here

That's Why I Show this Example When I Do this Problem because I Really Want To Make Sure that You See They Are the Same They're the Same but People Often Will Do this if You Look at this Would You Be Able To Combine x to the $1/2$ and x to the $1/4$ no Then I Mean Close by Terms It's like Saying Can You Combine x to the 8th and x to the Fourth No Not Even Close after that the Same Variables Same Exponent Yet When People Do this Thing They Will Often Give Me x to the $1/2$ because Something You Had Says You're Adding I Have x to the $1/4$

By the Way if You Ever Get Abused on What To Do Sometimes It Helps To Write Out a Similar Example without Fractions for Instance if I Wanted To Kind Of I Forgot What To Do on this Problem I Imagine There Was no Fraction Here and Say How Would I Get Rid of x to the Third Times this Quantity Oh I Would I Distribute You're Doing the Same Process Just Now You Have those Fractions Just Carry It as an Onlooker So in Our First Problem We Are Going To Distribute When We Distribute We're Taking Our Outside Term Outside Factor Times each of the Terms Etc Parentheses So in Our Case We're Going To Multiply x to the $3/5$ Times x to the One-Third and Then We're Going To Do Actually $3/5$ Times x Squared to Jail Get the Process Down Base Ok We're Just Going To Make that Out Just Don't Do in Your Head because Again What People Like To Do on this Is They Go Oh and Multiplying that Means I Multiply Fractions and They Get 315

I Guarantee that this Happens every Year I Give the Same Exact Problem on the Test People Will Always Give Me $x^{1/4}$ Guaranteed So if You Go Directly from Here to Here I Know You Don't Know What You're Doing L I'M GonNa Give You Zero Credit but if You Go from Here and Here to Here I Know At Least Your New Distribution Will Give You like Two or Three Points That Make Sense so I Need To See That Okay so We're Back to this Thing We Have x to the One-Half Times $x^{1/2}$ Do We Add Subtract Multiply Divide those Things

Let's Leave the Other Stuff for Just a Second x to the $1/2$ Plus $1/2$ How Much Is $1/2$ this One We're Going To Get One Yeah Not One-Fourth Just x Interesting Enough x Mine You Combine these Things We Have Negative 2 x to the 1 Pathway of 6 x to the $1/2$ those Are the Same Variable to the Same Power those We Can Combine You're Going To Get Looks like Positive 4 but It's x to What Power 1

So What You Do When You Factor Here's How this Works You're Going To Understand this because You've Done Wrong before What You Would Factor Would Be the x Squared and You'd Say x Squared Goes Out Here and I Create Parenthesis Modular So Okay that's How You Factor Right Put Whatever Your Battery out Front Whatever You're Backing up Front We're Factoring Out I Even Tell You Back throughout x^{44} that Front Now How You Get the Stuff in Here Is You Take the Turn and You Divide by What Your Factor Going To Say You'll Order the B'nai this Class You're Okay What I'M Supposed To Do Is Take $3x$ Squared Divided by x Squared I'M Dividing Out x Squared Can You Tell Me What's Going To Go Right Here

I Want You To Think of the Rule Here Let's Listen to My Voice Watch on the Board You Little Quick When You Have an x Common Base over a Common Base What Do You Do with those Exponents You Add Subtract Multiply or Divide You Subtract Them Children You Go On Again this Would Be x to the Negative $1/3$ minus Negative $1/3$ Where All those Neighbors Come in Front That's Negative $1/3$ You're Subtracting Exponents on Top of One another Minus $1/3$ What's this Minus Negative to Negative $1/3$ Plus $1/3$ this Is x to the Zero Negative $1/3$ Plus $1/3$ Is 0 Vg We Got Just a Sentiment or if You Want To Appear Listening To Go You Just

And I Told You that Most of the Time What You're Factoring Out Will Be this this Expression Right There Will Be One of Them At Least So When We Factor Out that Means We're Dividing Term by Term so We're Factoring Out x to the Negative $1/5$ Whatever You're Factoring Out What if They Tell You That's Going To Go in Front of Your Parentheses because that's What Your Divide Announced You're Vector on the Inside We Get those Two Pieces of Information these Two Terms by Taking Our First Term and Our Second Term and Dividing by What We're Factoring

Something Special Happens Here the Reason Why We're Going To Cross these Out Is because When You Think about It We Are Actually Subtracting Exponents but When You Subtract Exponents You Have x to the Negative $1/5$ minus Negative 1 Fit Negative 150 Minus Negative 150 to 0 x to the 0 Is 1 so this Is Basically Set the 2 Times 1 so this Is Well Let's Gone Just like It Works any

Other Exponent You Cross those Out because You Know those Ex-Cons Match Up and We Subtract Something That Matches Up Exactly You Get 0 so those There's no More X's
 Take a Root and Write that as a Fraction
