Loulu

Forewords by Paul R. Weissich and William S. Merwin The only native palms in Hawai'i, loulu are among the Islands' most distinctive plants. Several of the 24 recognized species are rare and endangered and all make handsome and appropriate ornamentals to adorn gardens and landscapes with their dramatic foliage, colorful flower clusters, and conspicuous fruits. In this volume, Donald Hodel shares his expertise on loulu, having traveled extensively throughout Hawai'i to research and photograph nearly all the species in their native habitat. In the course of his work, he described and named three loulu that were new to science. Each of the 24 species is treated in detail and this book is handsomely illustrated with more than 200 color photographs that clearly show leaves, flower stalks, fruits, and habitat. Chapters on loulu history, botany, ecology, conservation, uses, and propagation and culture provide essential background information for readers, whatever their level of interest or expertise. In the appendices, they will find a concise summary of loulu, lists of species by island, and an illustrated compendium of exotic, naturalized palms of Hawai'i and relatives of loulu found throughout the South Pacific. As interest in growing and conserving native Hawaiian plants surges while their numbers and habitat continue to decline, Loulu: The Hawaiian Palm will be valued as one of the most comprehensive and thoroughly illustrated treatments of these exceptional plants.

Palms and People in the Amazon

This book explores the degree to which landscapes have been enriched with palms by human activities and the importance of palms for the lives of people in the region today and historically. Palms are a prominent feature of many landscapes in Amazonia, and they are important culturally, economically, and for a variety of ecological roles they play. Humans have been reorganizing the biological furniture in the region since the first hunters and gatherers arrived over 20,000 years ago.

Peach Palm, *Bactris Gasipaes* Kunth

Taxonomy, nomenclature and geographical distribution. Description of the cultivated species. Uses and properties. Origin and domestication. Genetic resources. Genetic improvement strategies. Propagation. Agronomy of fruit and heart-of-palm production. Production areas and commercial potential.

The Book of the Sword

This open access book addresses a wide variety of events and technologies concerning the sago palm, ranging from its botanical characteristics, culture and use to social conditions in the places where it is grown, in order to provide a record of research findings and to benefit society. It discusses various subjects, including the sago palm and related species; differentiation of species of starch-producing palm; habitat, morphological, physiological and growth characteristics; culture and management; productivity of carbon dioxide; starch extraction and manufacture; characteristics and utilization of starch; and cultural anthropological and folkloristic aspects. Problems such as food shortages due to increasing populations, global warming and climate change, and decreasing reserves of oil and other underground resources, have become more pressing in recent years. In the context of these problems, the book examines the role of the sago palm in sustainable food production, in the manufacture of other foodstuffs, as a raw material for ethanol and in the manufacture of biodegradable plastics. In addition to academics, this book will be useful to researchers and government officials working for international agencies, national governments, municipalities, and other research organizations; technicians, researchers, managers, entrepreneurs, and others working in industries such as agriculture, plant production, food production, manufacturing, chemical engineering, energy production, and distribution.

Sago Palm

A detailed history of the coconut palm in America, from its introduction to the New World to its modern uses. This book is a valuable resource for anyone interested in the history of agriculture and horticulture in America. This work has been selected by scholars as being culturally important, and is part of the knowledge base of civilization as we know it. This work is in the "public domain in the United States of America, and possibly other nations. Within the United States, you may freely copy and distribute this work, as no entity (individual or corporate) has a copyright on the body of the work. Scholars believe, and we concur, that this work is important enough to be preserved, reproduced, and made generally available to the public. We appreciate your support of the preservation process, and thank you for being an important part of keeping this knowledge alive and relevant.

Travels in Brazil, in the Years 1817-1820

Political image-making—especially from the Age of Augustus, when the Roman Republic evolved into a system capable of governing a vast, culturally diverse empire—is the focus of this masterful study of Roman culture. Distinguished art historian and classical archaeologist John Pollini explores how various artistic and ideological symbols of religion and power, based on Roman Republican values and traditions, were taken over or refashioned to convey new ideological content in the constantly changing political world of imperial Rome. Religion, civic life, and politics went hand in hand and formed the very fabric of ancient Roman society. Visual rhetoric was a most effective way to communicate and commemorate the ideals, virtues, and political programs of the leaders of the Roman State in an empire where few people could read and many different languages were spoken. Public memorialization could keep Roman leaders and their achievements before the eyes of the populace, in Rome and in cities under Roman sway. A leader's success demonstrated that he had the favor of the gods—a form of legitimation crucial for sustaining the Roman Principate, or government by a "First Citizen." Pollini examines works and traditions ranging from coins to statues and reliefs. He considers the realistic tradition of sculptural portraiture and the ways Roman leaders from the late Republic through the Imperial period were represented in relation to the divine. In comparing visual and verbal expression, he likens sculptural imagery to the structure, syntax, and diction of the Latin language and to ancient rhetorical figures of speech. Throughout the book, Pollini's vast knowledge of ancient history, religion,

literature, and politics extends his analysis far beyond visual culture to every aspect of ancient Roman civilization, including the empire's ultimate conversion to Christianity. Readers will gain a thorough understanding of the relationship between artistic developments and political change in ancient Rome.

History of the Coconut Palm in America

An essential reference work on climate change and the effect of greenhouse gases.

From Republic to Empire

For the first time, a synthesis on the research work done in Europe on all Bark And Wood Boring Insects In Living Trees (BAWBILT) is presented. As final product of a four-year research project gathering together 100 scientists from 24 countries, the book is the fruit of a real collective synthesis in which all European specialists have participated. It reviews and comments on all the European literature, while considering the biological (trees, insects, associated organisms, and their relationships) and forest management aspects. However, although focused on the European forest, it also compares the available information and interpretations to those concerning similar species in other continents. It ends with propositions of research priorities for Europe. The book is directed to all scientists and students concerned with forest entomology and ecology, as well as to forest managers and all scientific public interested in forest biology.

Climate Change 1994

A global assessment of potential and anticipated impacts of efforts to achieve the SDGs on forests and related socio-economic systems. This title is available as Open Access via Cambridge Core.

Bark and Wood Boring Insects in Living Trees in Europe, a Synthesis

A Grammar of Murui (Bue) by Katarzyna Wojtylak is the first complete description of Murui (Witoto, Huitoto) spoken in Colombia and Peru. It is an important contribution to the study of Witotoan languages and linguistic typology of Northwest Amazonia.

I Deserted Rommel

How is it possible to allow multiple data owners to collaboratively train and use a shared prediction model while keeping all the local training data private? Traditional machine learning approaches need to combine all data at one location, typically a data center, which may very well violate the laws on user privacy and data confidentiality. Today, many parts of the world demand that technology companies treat user data carefully according to user-privacy laws. The European Union's General Data Protection Regulation (GDPR) is a prime example. In this book, we describe how federated machine learning addresses this problem with novel solutions combining distributed machine learning, cryptography and security, and incentive mechanism design based on economic principles and game theory. We explain different types of privacy-preserving machine learning solutions and their technological backgrounds, and highlight some representative practical use cases. We show how federated learning can become the foundation of next-generation machine learning that caters to technological and societal needs for responsible AI development and application.

Sustainable Development Goals

This Open Access book, building on research initiated by scholars from the Leiden-Delft-Erasmus Centre for Global Heritage and Development (CHGD) and ICOMOS Netherlands, presents multidisciplinary research that connects water to heritage. Through twenty-one chapters it explores landscapes, cities, engineering structures and buildings from around the world. It describes how people have actively shaped the course, form and function of water for human settlement and the development of civilizations, establishing socio-economic structures, policies and cultures; a rich world of narratives, laws and practices; and an extensive network of infrastructure, buildings and urban form. The book is organized in five thematic sections that link practices of the past to the design of the present and visions of the future: part I discusses drinking water management; part II addresses water use in agriculture; part III explores water management for land reclamation and defense; part IV examines river and coastal planning; and part V focuses on port cities and waterfront regeneration. Today, the many complex systems of the past are necessarily the basis for new systems that both preserve the past and manage water today: policy makers and designers can work together to recognize and build

on the traditional knowledge and skills that old structure embody. This book argues that there is a need for a common agenda and an integrated policy that addresses the preservation, transformation and adaptive reuse of historic water-related structures. Throughout, it imagines how such efforts will help us develop sustainable futures for cities, landscapes and bodies of water.

A Grammar of Murui (Bue)

An essential, up-to-date textbook for postgraduate trainees preparing for the EBCOG Fellowship exam.

Federated Learning

The average kilometer of tropical rainforest is teeming with life; it contains thousands of species of plants and animals. As *The Ornaments of Life* reveals, many of the most colorful and eye-catching rainforest inhabitants—toucans, monkeys, leaf-nosed bats, and hummingbirds to name a few—are an important component of the infrastructure that supports life in the forest. These fruit-and-nectar eating birds and mammals pollinate the flowers and disperse the seeds of hundreds of tropical plants, and unlike temperate communities, much of this greenery relies exclusively on animals for reproduction. Synthesizing recent research by ecologists and evolutionary biologists, Theodore H. Fleming and W. John Kress demonstrate the tremendous functional and evolutionary importance of these tropical pollinators and frugivores. They shed light on how these mutually symbiotic relationships evolved and lay out the current conservation status of these essential species. In order to illustrate the striking beauty of these “ornaments” of the rainforest, the authors have included a series of breathtaking color plates and full-color graphs and diagrams.

World Checklist of Bamboos and Rattans

Horace G. Danner's *A Thesaurus of English Word Roots* is a compendium of the most-used word roots of the English language. As Timothy B. Noone notes in his foreword: “Dr. Danner's book allows you not only to build up your passive English vocabulary, resulting in word recognition knowledge, but also gives you the rudiments for developing your active English vocabulary, making it possible to infer the meaning of words with which you are not yet acquainted. Your knowledge can now expand and will do so exponentially as your awareness of the roots in English words and your corresponding ability to decode unfamiliar words grows apace. This is the beginning of a fine mental linguistic library: so enjoy!” In *A Thesaurus of English Word Roots*, all word roots are listed alphabetically, along with the Greek or Latin words from which they derive, together with the roots' original meanings. If the current meaning of an individual root differs from the original meaning, that is listed in a separate column. In the examples column, the words which contain the root are then listed, starting with their prefixes, for example, dysacousia, hyperacousia. These root-starting terms then are followed by terms where the root falls behind the word, e.g., acouesthesia and acoumeter. These words are followed by words where the root falls in the middle or the end, as in such terms as bradyacusia and odynacusis.. In this manner, *A Thesaurus of English Word Roots* places the word in as many word families as there are elements in the word. This work will interest linguists and philologists and anyone interested in the etymological aspects of English language.

Adaptive Strategies for Water Heritage

The Mystery and Romance of Alchemy and Pharmacy by Charles John Samuel Thompson, first published in 1897, is a rare manuscript, the original residing in one of the great libraries of the world. This book is a reproduction of that original, which has been scanned and cleaned by state-of-the-art publishing tools for better readability and enhanced appreciation. Restoration Editors' mission is to bring long out of print manuscripts back to life. Some smudges, annotations or unclear text may still exist, due to permanent damage to the original work. We believe the literary significance of the text justifies offering this reproduction, allowing a new generation to appreciate it.

The Philosophy of History

Reproduction of the original: *Character Sketches of Romance, Fiction and the Drama* by E. Cobham Brewer

The Number Concept

This book is a printed edition of the Special Issue "Forest Pathology and Plant Health" that was published in *Forests*

The EBCOG Postgraduate Textbook of Obstetrics & Gynaecology

Fungal diseases have contributed to death and disability in humans, triggered global wildlife extinctions and population declines, devastated agricultural crops, and altered forest ecosystem dynamics. Despite the extensive influence of fungi on health and economic well-being, the threats posed by emerging fungal pathogens to life on Earth are often underappreciated and poorly understood. On December 14 and 15, 2010, the IOM's Forum on Microbial Threats hosted a public workshop to explore the scientific and policy dimensions associated with the causes and consequences of emerging fungal diseases.

The Ornaments of Life

"Program summarizes information on 2900 timbers-yielding species and has been extended with a search facility for wood properties and an interactive wood-anatomy identification system".

A Thesaurus of English Word Roots

Revised thesis (doctoral) - University of Michigan, Ann Arbor, 2004.

The Mystery and Romance of Alchemy and Pharmacy

This is a work on the history of man, written by Latham to update and expand on existing ethnological literature. The Beothuk and Micmac peoples of Newfoundland and Labrador are briefly discussed in section F on pp. 328-330, 372.

Character Sketches of Romance, Fiction and the Drama

Horticultural Reviews presents state-of-the-art reviews on topics in horticultural science and technology covering both basic and applied research. Topics covered include the horticulture of fruits, vegetables, nut crops, and ornamentals. These review articles, written by world authorities, bridge the gap between the specialized researcher and the broader community of horticultural scientists and teachers.

Forest Pathology and Plant Health

The Encyclopedia of Caves and Karst Science contains 350 alphabetically arranged entries. The topics include cave and karst geoscience, cave archaeology and human use of caves, art in caves, hydrology and groundwater, cave and karst history, and conservation and management. The Encyclopedia is extensively illustrated with photographs, maps, diagrams, and tables, and has thematic content lists and a comprehensive index to facilitate searching and browsing.

Fungal Diseases

A land of history, magic and legend.... Sarah Cooley, 14, and her friends want to return to Bear Valley in Olympic National Park before Buckhorn begins mining erbium, a substance rumored to detoxify coal. Carl Larsen, saddled with his difficult niece Laurie, is investigating mysterious elk kills on nearby National Forest lands. Victoria Oldsea, Buckhorn's project manager, hopes to take her son Jared camping as a break from work before the mining begins. A terrible windstorm upends everything. Strange, inexplicable animals appear. Ancient visions of an ancient people, perhaps dreams, possibly memory, are reported. Are the Olympics more mysterious than anyone knows? Does the answer lie in Bear Valley? Totem is the third and concluding tale in the Strong Heart series, starting in Strong Heart, continuing in Adrift, and now following Sarah Cooley and her friends to an astounding conclusion as they face conflict, danger, mythical legend, and ancient truth.

Plant Resources of South-East Asia

A General History of Music is a classic work that provides a comprehensive survey of music history. Written by the renowned English composer Charles Burney, it covers the development of music from ancient times to the late eighteenth century. This edition includes a new introduction by the musicologist Frank Mercer, providing historical context and critical analysis. A must-read for music lovers and historians alike. This work has been selected by scholars as being culturally important, and is part of the knowledge base of civilization as we know it. This work is in the "public domain in the United States

of America, and possibly other nations. Within the United States, you may freely copy and distribute this work, as no entity (individual or corporate) has a copyright on the body of the work. Scholars believe, and we concur, that this work is important enough to be preserved, reproduced, and made generally available to the public. We appreciate your support of the preservation process, and thank you for being an important part of keeping this knowledge alive and relevant.

The Assyrian Sacred Tree

This volume is the outcome of a modern phylogenetic analysis of the grass family based on multiple sources of data, in particular molecular systematic studies resulting from a concerted effort by researchers worldwide, including the author. In the classification given here grasses are subdivided into 12 subfamilies with 29 tribes and over 700 genera. The keys and descriptions for the taxa above the rank of genus are hierarchical, i.e. they concentrate upon characters which are deemed to be synapomorphic for the lineages and may be applicable only to their early-diverging taxa. Beyond the treatment of phylogeny and formal taxonomy, the author presents a wide range of information on topics such as the structural characters of grasses, their related functional aspects and particularly corresponding findings from the field of developmental genetics with inclusion of genes and gene products instrumental in the shaping of morphological traits (in which this volume appears unique within this book series); further topics addressed include the contentious time of origin of the family, the emigration of the originally shade-loving grasses out of the forest to form vast grasslands accompanied by the switch of many members to C4 photosynthesis, the impact of herbivores on the silica cycle housed in the grass phytoliths, the reproductive biology of grasses, the domestication of major cereal crops and the affinities of grasses within the newly circumscribed order Poales. This volume provides a comprehensive overview of existing knowledge on the Poaceae (Gramineae), with major implications in terms of key scientific challenges awaiting future research. It certainly will be of interest both for the grass specialist and also the generalist seeking state-of-the-art information on the diversity of grasses, the most ecologically and economically important of the families of flowering plants.

The Natural History of the Varieties of Man

This work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it. This work is in the public domain in the United States of America, and possibly other nations. Within the United States, you may freely copy and distribute this work, as no entity (individual or corporate) has a copyright on the body of the work. Scholars believe, and we concur, that this work is important enough to be preserved, reproduced, and made generally available to the public. To ensure a quality reading experience, this work has been proofread and republished using a format that seamlessly blends the original graphical elements with text in an easy-to-read typeface. We appreciate your support of the preservation process, and thank you for being an important part of keeping this knowledge alive and relevant.

Horticultural Reviews, Volume 47

Food insecurity is a fundamental challenge to human welfare and economic growth in Africa. Low agricultural production leads to low incomes, poor nutrition, vulnerability to risk and threat and lack of empowerment. This book offers a comprehensive synthesis of agricultural research and development experiences from sub-Saharan Africa. The text highlights practical lessons from the sub-Saharan Africa region.

Basilius Besler. Florilegium. the Book of Plants

In 367 exquisite plates, this treasure of botanical literature records the flowers of the palatial grounds at Eichstätt, Bavaria, once some of the most beautiful gardens in history. The illustrations are organized by season and, following the classification system used today, show plants belonging to a total of 90 families and covering 340 genera.

Buch Der Palmen

This title collects Martius's work on the varieties of palm trees. In his work, Martius outlined modern classification of palm, produced the first maps of palm biogeography, described all the palms of Brazil, and collated the sum of all known genera of the palm family

En busca del origen

Este sorprendente y hermoso libro es, no solo el descubrimiento de un personaje oculto en la historia de las ciencias, sino la historia de dos pasiones: la que el naturalista Alfred Russel Wallace siente por temas como la biología, la biogeografía, la evolución de la vida en el planeta —que lo llevó a viajes prácticamente imposibles a mediados del siglo XIX—, y la pasión del autor del libro, Felipe Guhl, por Wallace. Los viajes de Guhl empezaron "en los viejos anaqueles de madera y cuadernos de campo, dibujos, mapas, cartas y toda suerte de documentos manuscritos originales" de archivos londinenses en búsqueda de los documentos del científico, para culminar volviendo a realizar el viaje hecho por Wallace —hace cerca de 170 años a lo largo de 2175 kilómetros— por los ríos Vaupés y Negro, desde el mítico Yuruparí hasta Manaus, en compañía de otros cuatro tripulantes. Tanto Wallace como Guhl forman parte de una larga tradición de naturalistas viajeros de selvas americanas con el jesuita Gumilla en el siglo XVIII, Humboldt y Bonpland, von Martius, o La Condamine a inicios del siglo XIX. que el lector participa en el alucinante periplo por las ciencias naturales y la evolución biótica de nuestro planeta, acompañado con fascículos, fotografías, dibujos, acuarelas, tintas, diagramas, mapas de Alfred Russel Wallace como de Felipe Guhl y sus acompañantes.

The Genus Roscoea

Roscoeas, native to the Himalayas, Burma and China, are striking orchid-like hardy gingers and one of the outstanding gems of the plant world. Written with passion and enthusiasm, this is an accessible and comprehensive book, whether you are a gardener, grower or botanist. All twenty known species are described in detail - their structure, form, nomenclature, history, synonyms, habitat and distribution, and many of the various colour forms are illustrated for the first time. Additional chapters cover the history of Roscoea, their morphology, ecology and conservation. The hands-on aspect of cultivation in the garden is dealt with by Richard Wilford, Kew's Alpines and Herbaceous Collection Manager, and Roland Bream, keeper of the national Roscoea collection in the UK, gives an up-to-date account of the species, cultivars and hybrids in cultivation. The author has included a biography of William Roscoe, the man who gave his name to the genus, and has augmented the text with an extensive bibliography. Twenty exquisite full page paintings, 17 by the esteemed artist Christabel King, 29 maps and 94 colour photographs illustrate the text. This is another superb "Kew Botanical Magazine Monograph" for gardeners, nurserymen, botanists and lovers of botanical art.

A Garden Eden. Masterpieces of Botanical Illustration

Art meets science in this far-reaching catalogue of botanical illustration. Drawn from the vaults of the National Library of Vienna, these exquisite color reproductions range from 6th-century manuscripts to 19th-century masterpieces and celebrate both the skill of botanical artists and the abundance of natural flora.

Astrolabes in Medieval Cultures

First published as a special issue of the journal *Medieval Encounters* (vol. 23, 2017), this volume, edited by Josefina Rodríguez-Arribas, Charles Burnett, Silke Ackermann, and Ryan Szpiech, brings together fifteen studies on various aspects of the astrolabe in medieval cultures. The astrolabe, developed in antiquity and elaborated throughout the Middle Ages, was used for calculation, teaching, and observation, and also served astrological and medical purposes. It was the most popular and prestigious of the mathematical instruments, and was found equally among practitioners of various sciences and arts as among princes in royal courts. By considering sources and instruments from Muslim, Christian, and Jewish contexts, this volume provides state-of-the-art research on the history and use of the astrolabe throughout the Middle Ages. Contributors are Silke Ackermann, Emilia Calvo, John Davis, Laura Fernández Fernández, Miquel Forcada, Azucena Hernández, David A. King, Taro Mimura, Günther Oestmann, Josefina Rodríguez-Arribas, Sreeramula Rajeswara Sarma, Petra G. Schmidl, Giorgio Strano, Flora Vafea, and Johannes Thomann.

Flora

Let the experts at the Royal Botanic Gardens in Kew e-guide you around the beautiful and mysterious world that is the plant kingdom. From regulating the air we breathe, to providing food, clothes, fuels, and medicines - plants are fundamental to our lives. Discover an extraordinary diversity of species, which includes a grass that grows a metre a day, roots that breathe air, and "queen of the night" cactuses whose rare blooms vanish before dawn. In a combination of art and science, Flora celebrates plants from majestic trees to microscopic algae, explaining how they germinate, grow, and reproduce. It presents species that have evolved to accommodate pollinating insects such as the foxglove, and plants that have adapted to flourish in even the most hostile of habitats. Pierre-Joseph Redoute in the 18th-century was described as the "Raphael of flowers". Flora showcases his botanical paintings as well as those of Georg Ehret and others in this gorgeous visual celebration of plants through the ages. Whether you are a keen gardener, naturalist, or botany student, this beautiful ebook is a treat that will entice, inform, and amaze.

Venetian Gardens

Professional tour guide Mariagrazia Dammicco unlocks Venice's garden gates, allowing us access to hidden oases usually closed to the general public. This book invites the reader to explore 20 of Venice's secret gardens, ranging from private family havens to convents and sanctuaries.

Leonhart Fuchs - The New Herbal of 1543

With his 1543 herb catalog, botanical pioneer Leonhart Fuchs created a masterpiece of Renaissance botany and publishing. This fresh reprint is based on Fuchs's personal, hand-colored original and features over 500 illustrations, including the first visual record of New World plant types such as maize, cactus, and tobacco.

Medicinal Plants of South Africa

A guide of the most commonly used and best known SA medicinal plants including their botany, traditional uses and active ingredients

The Genus *Epimedium* and Other Herbaceous Berberidaceae

This Kew classic is an augmented edition of William Stearn's classic monograph on *Epimedium* published in 1938. Retaining the unmistakable stamp of scholarship and accessibility that characterised all his work, it is an essential botanical reference and a practical handbook for gardeners. Part I is a detailed taxonomic treatment of *Epimedium* and *Vancouveria* including cultivars, plus chapters on habit, classification, morphology, cultivation and geographical distribution; Part II covers *Caulophyllum*, *Ranzania*, *Jeffersonia*, *Leontice* and other herbaceous Berberidaceae; and Part III is Julian Shaw's revision of *Podophyllum*. With 27 botanical paintings, 31 line drawings and 77 colour photographs.

Joseph Banks' Florilegium

A compact edition of Joseph Banks' extraordinary botanical engravings of flora discovered on Captain Cook's first voyage. Joseph Banks accompanied Captain Cook on his first voyage around the world from 1768 to 1771. A gifted and wealthy young naturalist, Banks collected exotic flora from Madeira, Brazil, Tierra del Fuego, the Society Islands, New Zealand, Australia, and Java, bringing back over 1,300 species that had never been seen or studied by Europeans. On his return, Banks commissioned over 700 engravings. Known collectively as Banks' Florilegium, they are some of the most precise and exquisite examples of botanical illustration ever created. The Florilegium was never published in Banks' lifetime, and it was not until 1990 that a complete set in color was issued under the direction of the British Museum. It is from these prints that the new compact edition of Joseph Banks' Florilegium is selected, as directed by David Mabberley, who has provided expert botanical commentaries. Art historian Mel Gooding sets the works in context while an afterword by Joe Studholme describes the history of modern printing. Joseph Banks' Florilegium is not only a great work of science, but also a major achievement in collaborative Enlightenment art and a volume of outstanding beauty.

Margaret of York, Simon Marmion, and The Visions of Tondal

Presented at a symposium held in 1990 to celebrate the Getty Museum's acquisition of the only known illuminated copy of *The Visions of Tondal*, twenty essays address the celebrated bibliophilic activity of Margaret of York; the career of Simon Marmion, a favorite artist of the Burgundian court; and *The*

Visions of Tondal in relation to illustrated visions of the Middle Ages. Contributors include Maryan Ainsworth, Wim Blockmans, Walter Cahn, Albert Derolez, Peter Dinzelbacher, Rainald Grosshans, Sandra Hindman, Martin Lowry, Nigel Morgan, and Nigel Palmer.

Das Naturalienkabinett

Exotic plants, corals and crocodiles, birds and butterflies. Albertus Seba's extraordinary catalog of natural specimens is not only one of the 18th century's greatest natural history achievements, but also one of the most prized natural history books of all time. It is a beautiful tribute to the breadth and the detail of creatures great and...

Living in Provence

Enter a land of tranquil cobbled squares, rustic earthenware, and lavender fields. In this survey of Provençal homes and interiors, discover all of the rural charm that enraptured such artists as Vincent van Gogh and Picasso. From lavish chateaus to quiet, antique retreats, this updated edition is complete with insightful captions, enthralling...

Paul Klee 1939

The year before he died, in what was one of the most difficult yet prolific periods of his life, Paul Klee created some of his most surprising and innovative works. In 1939, the year before his death from a long illness and against a backdrop of sociopolitical turmoil and the outbreak of World War II, Klee worked with a vigor and inventiveness that rivaled even the most productive periods of his youth. This book illuminates the artist's response to his personal difficulties and the era's broader realities through imagery that is tirelessly inventive—by turns political, solemn, playful, humorous, and poetic. The works featured testify to Klee's restless drive to experiment with form and material. His use of adhesive, grease, oil, chalk, and watercolor, among other media, resulted in surfaces that are not only visually striking, but also highly tactile and original. Not unlike a diary, the drawings are often meditative reflections on the pains and pleasures of life—their titles, among them *Monsters in readiness* and *Struggles with himself*, signal Klee's frame of mind. Renowned art historian Dawn Ades looks at this group of paintings and drawings in the context of their time and as indicative of a pivotal moment in art history. Moved by this late period of Klee's oeuvre, American artist Richard Tuttle responds to specific works in the form of dialogical poems. This stunning publication highlights the novelty and ingenuity of Klee's late works, which deeply affected the generation of artists—including Anni Albers, Jean Dubuffet, Mark Tobey, and Zao Wou-Ki—that emerged after World War II and continues to captivate artists and viewers alike today

Ernst Haeckel - 40 Years

Discover Ernst Haeckel, the 19th-century artist-biologist who found beauty in even the most unlikely of creatures. This collection features 300 prints from his most important publications, including the majestic *Kunstformen der Natur* and his extensive catalogues of marine life. As biodiversity is ever-more threatened, these exquisite images are...

Bacon in Moscow

'A rollicking cultural adventure... fascinating and true' Grayson Perry This funny and personal memoir is the account of an audacious attempt by James Birch, a young British curator, to mount the ground-breaking retrospective of Francis Bacon's work at the newly refurbished Central House of Artists, Moscow in 1988. Side-lined by the British establishment, Birch found himself at the heart of a honey-trap and the focus for a picaresque cast of Soviet officials, attachés and politicians under the forbidding eye of the KGB as he attempted to bring an unseen western cultural icon to Russia during the time of 'Glasnost', just before the fall of the Berlin Wall. *Bacon in Moscow* is the story of the evolution of an exhibition that was at the artistic and political heart of a sea of change that culminated with the fall of the USSR. 'A rollicking cultural adventure before the fall of the Berlin Wall and the meteoric rise of contemporary art in the nineties' Grayson Perry

Ernst Haeckel

Discover Ernst Haeckel, the 19th-century artist-biologist who found beauty in even the most unlikely of creatures. This collection features 450 prints from his most important publications, including the

majestic Kunstformen der Natur and his extensive catalogues of marine life. As biodiversity is ever-more threatened, these exquisite images are...

Solitudo

This book examines the ways in which spaces and places of solitude were conceived of, imagined, and represented in the late medieval and early modern periods. It explores the spatial, material, and affective dimensions of solitude, which have so far received only scant scholarly attention.

Pedro and Ricky Come Again

This landmark publication collects three decades of writing from one of the most original, provocative and consistently entertaining voices of our time. Anyone who cares about language and culture should have this book in their life. Thirty years ago, Jonathan Meades published a volume of reportorial journalism, essays, criticism, squibs and fictions called *Peter Knows What Dick Likes*. The critic James Wood was moved to write: 'When journalism is like this, journalism and literature become one.' *Pedro and Ricky Come Again* is every bit as rich and catholic as its predecessor. It is bigger, darker, funnier, and just as impervious to taste and manners. It bristles with wit and pin-sharp eloquence, whether Meades is contemplating northernness in a German forest or hymning the virtues of slang. From the indefensibility of nationalism and the ubiquitous abuse of the word 'iconic', to John Lennon's shopping lists and the wine they call Black Tower, the work assembled here demonstrates Meades's unparalleled range and erudition, with pieces on cities, artists, sex, England, concrete, politics and much, much more.

Drawn to Nature

The natural world as seen through the eyes of British artists including Eric Ravilious, Clare Leighton, and John Piper. Since its publication in 1789, Gilbert White's *Natural History and Antiquities of Selborne* has inspired generations of artists, writers and naturalists. From Thomas Bewick to Eric Ravilious and Clare Leighton, many artists' depictions of animals, birds and wildlife have illustrated White's celebrated book, together providing a microcosm of natural history illustration from the eighteenth century until today. In *Drawn to Nature*, Simon Martin has gathered joyful and beautiful images of the extraordinary array of wildlife described by White, providing an insight into the continuing appeal and relevance of the *Natural History*. This fascinating account takes us from some of the earliest published depictions of birds and animals, to pioneering nature photography, the revival of wood-engraving in the 1920s and 30s, and responses to White's message about the natural world by contemporary illustrators such as Angie Lewin and Emily Sutton. The book also includes an introduction to the life of Gilbert White by Sir David Attenborough, an essay by Virginia Woolf, poems by modern and contemporary poets, and a jacket design by Mark Hearld.

HIST OF ROMANISM

European Paganism provides a comprehensive and accessible overview of ancient pagan religions throughout the European continent. Before there were Christians, the peoples of Europe were pagans. Were they bloodthirsty savages hanging human offerings from trees? Were they happy ecologists, valuing the unpolluted rivers and mountains? In *European Paganism* Ken Dowden outlines and analyses the diverse aspects of pagan ritual and culture from human sacrifice to pilgrimage, lunar festivals and tree worship. It includes: * a 'timelines' chart to aid with chronology * many quotations from ancient and modern sources translated from the original language where necessary, to make them accessible * a comprehensive bibliography and guide to further reading.

European Paganism

'A glorious green adventure story.' Ann Treneman, *The Times* 'Books of the Year' 'The most enthralling historical book I've read this year.' Claire Tomalin, *New Statesman* 'Books of the year' Daringly innovative when it opened in 1848, the Palm House in Kew Gardens remains one of the most beautiful glass buildings in the world today. Seemingly weightless, vast and yet light, the Palm House floats free from architectural convention, at once monumental and ethereal. From a distance, the crowns of the palms within are silhouetted in the central dome; close to, banana leaves thrust themselves against the glass. To enter it is to enter a tropical fantasy. The body is assaulted by heat, light and the smell of damp vegetation. In *Palace of Palms*, Kate Teltscher tells the extraordinary story of its creation

and of the Victorians' obsession with the palms that filled it. It is a story of breathtaking ambition, of scientific discovery and, crucially, of the remarkable men whose vision it was. The Palm House was commissioned by the charismatic first Director of Kew, Sir William Hooker, designed by the audacious Irish engineer, Richard Turner, and managed by Kew's forthright curator, John Smith, who battled with boilers and floods to ensure the survival of the rare and wondrous plants it housed.

Palace of Palms

Monasticism, in all of its variations, was a feature of almost every landscape in the medieval West. So ubiquitous were religious women and men throughout the Middle Ages that all medievalists encounter monasticism in their intellectual worlds. While there is enormous interest in medieval monasticism among Anglophone scholars, language is often a barrier to accessing some of the most important and groundbreaking research emerging from Europe. The Cambridge History of Medieval Monasticism in the Latin West offers a comprehensive treatment of medieval monasticism, from Late Antiquity to the end of the Middle Ages. The essays, specially commissioned for this volume and written by an international team of scholars, with contributors from Australia, Belgium, Canada, England, France, Germany, Italy, the Netherlands, Spain, Switzerland, and the United States, cover a range of topics and themes and represent the most up-to-date discoveries on this topic.

The Cambridge History of Medieval Monasticism in the Latin West

Renowned for his distinctive, elongated female nudes, Amedeo Modigliani is a legend of early modernism. His unique figuration corresponded to his own personal idea of beauty, but drew upon a rich variety of visual influences, including contemporary Cubism, African carvings, Cambodian sculptures, and 13th-century painting from his native Italy.

Modigliani

Details the contributions to the science of decipherment made by theorists and practitioners, exploring the intellectual developments that led to their extraordinary achievements, and presents the analysis of such scripts as the Palmyra script, Sassanid Persian, Egyptian hieroglyphs, and many others. Original.

The Story of Decipherment

'In recent years I have found myself working increasingly in sequences of drawings which explore subjects and techniques which interest me. These sequences vary in approach and tone, and between reality and fantasy. But I hope that in each of them in its own way will appeal to anyone who like looking at drawings.' Quentin Blake 2019 Quentin Blake, like many illustrators, works essentially in isolation. In normal times he would make two daily trips to his office across the square from where he lives to see what business there was for him to deal with. But during the lockdowns he had no such distractions and demands made of his time. There was still some commissioned works; he finished two books and he did some work for charities raising funds to deal with the lockdowns. But Quentin had a lot more time to explore his visual interests and go wherever his imagination took him. Some of these series were drawn at 6.00 am while he was still in bed. The medium he used for each series was partly decided by whatever was to hand; pencil, biro or Sennelier oil pastels. Similarly, the size, colour and quality of the paper would be decided by what was available. This book is an edited selection of over 3,000 drawings Quentin produced from March 2020 to February 2021; a portfolio of new personal work, not commissioned and not meant for publication. They provide a unique insight into what happens when a great artist is left to his own devices.

The Night of the Gods

From the twice Man Booker longlisted author of *From a Low and Quiet Sea* 'Poetic, powerful and heart-rending' The Times 'An exquisite account of womanhood, friendship, prejudice and tradition that is both intimate in scale and awesome in achievement' Irish Independent Melody Shee is alone and in trouble. Her husband doesn't take her news too well. She can't tell her father yet because he's a good man and this could break him. She's trying to stay in the moment, but the future is looming – larger by the day – while the past won't let her go. What she did to Breddie Flynn all those years ago still haunts her. It's a good thing that she meets Mary Crothery when she does. Mary is a young Traveller woman, and she knows more about Melody than she lets on. She might just save Melody's life. 'A joy to read, for all that it breaks your heart' Independent 'One of the finest writers working in Ireland today ... worthy

of Greek Drama' Guardian 'A stunning piece of work, utterly truthful and emotionally powerful' Joseph O'Connor 'Work of genius ... I was entranced by it. Buckled by it' Sebastian Barry

Quentin Blake - a Year of Drawings

In this age of genetic engineering and global warming, it is more important than ever to understand the history and current trends of science and technology. With so much information out there, though, it's hard to know where to start. That's where *The History of Science and Technology* -- the most comprehensive and up-to-date chronology of its kind -- comes in. From the first stone tools to the first robot surgery, this easy-to-read, handy reference book offers more than seven thousand concise entries organized within ten major historical periods and categorized by subject, such as archaeology, biology, computers, food and agriculture, medicine and health, materials, and transportation. You can follow the world's scientific and technological feats forward or backward, year by year, and subject by subject. Under 8400 BCE Construction, you will discover that the oldest known wall was built in Jericho. Jump to 1454 Communication and you will learn about Johann Gutenberg's invention of movable type. Take an even larger leap to 2002 Computers and find out about the invention of the Earth Simulator, a Japanese supercomputer. *The History of Science and Technology* answers all the what, when, why, and how questions about our world's greatest discoveries and inventions: How are bridges built? When were bifocal eyeglasses invented and by whom? What medical discovery led to the introduction of sterilization, vaccines, and antibiotics? What is the PCR (polymerase chain reaction) process, and why is it one of the pillars of the biotechnology revolution? Not only can you discover how our world came to be and how it works, but with cross-referenced entries you can also trace many intricate and exciting connections across time. Highly browsable yet richly detailed, expertly researched and indexed, *The History of Science and Technology* is the perfect desktop reference for both the science novice and the technologically advanced reader alike.

All We Shall Know

ÓIf you want to successfully add more bold fronds and a tropical style to your landscape,ÊDesigning With PalmsÊis the comprehensive book for you.Ó ÑGardenistaÊ Palms are a landscape staple in warm, temperate climates worldwide. But these stunning and statement-making plants are large, expensive, and difficult to install, resulting in unique design challenges.ÊIn *Designing with Palms*, palm expert Jason Dewees details every major aspect of designing and caring for palms. This definitive guide shares essential information on planting, irrigation, nutrition, pruning, and transplanting. A gallery of the most important species showcases the range of options available, and stunning photographs by Caitlin Atkinson spotlight examples of home and public landscapes that make excellent use of palms.

The History of Science and Technology

A highly readable biography of uniquely talented artist Lee Miller, now in compact paperback. Collected in this compelling volume are the many lives of Lee Miller, intimately recorded by her son, Antony Penrose, whose years of work on her photographic archives have unearthed a rich selection of her finest work, including portraits of her friends Pablo Picasso, Georges Braque, Max Ernst, Paul Eluard, and Joan Miró. Starting in 1927 in New York, this volume chronicles Lee Miller as she is discovered as a model by Condé Nast, hits the cover of *Vogue*, and is immortalized by Edward Steichen, George Hoyningen-Huene, Horst P. Horst, and other acclaimed photographers. From there, readers follow Miller to Paris where she, along with Man Ray, invented the solarization technique of photography, and where she developed into a brilliant Surrealist photographer. Finally, this account covers the later chapters of her life, when she became a war correspondent during World WarII, traveling with the Allied armies to cover the siege of Saint-Malo and the liberation of Paris, which lead to her photographs of the Dachau concentration camp that shocked the world. A highly readable biography of a uniquely talented artist, *The Lives of Lee Miller* is now published in compact paperback.

Designing with Palms

This is the leading, full-scale comprehensive dictionary of philosophical terms and thinkers to appear in English in more than half a century. Written by a team of more than 550 experts and now widely translated, it contains approximately 5,000 entries ranging from short definitions to longer articles. It is designed to facilitate the understanding of philosophy at all levels and in all fields. Key features of this third edition: • 500 new entries covering Eastern as well as Western philosophy, and covering individual countries such as China, France, Germany, Italy, and Spain • Increased coverage of such growing fields

as ethics and philosophy of mind • More than 100 new intellectual portraits of leading contemporary thinkers • Wider coverage of Continental philosophy • Dozens of new technical concepts in cognitive science and other areas • Enhanced cross-referencing to add context and increase understanding • Expansions in both text and index to facilitate research and browsing

The Lives of Lee Miller

Many of the earliest books, particularly those dating back to the 1900s and before, are now extremely scarce and increasingly expensive. We are republishing these classic works in affordable, high quality, modern editions, using the original text and artwork.

The Cambridge Dictionary of Philosophy

In 1791, Francis I of Austria commissioned Matthias Schmutzer to paint portraits of every flower in his imperial gardens. This collection features 120 of the most outstanding of Schmutzer's watercolours. Painted life-size and with extraordinary precision, the flowers range from the exotic to the common.

The Magic of Jewels and Charms.

When the New World was really new, Theodore de Bry drew inspiration from some of history's greatest explorers to record its wonders. From Virginia and Florida to Brazil, his work captivated the European imagination with visions of freshly discovered landscapes, customs, and peoples. This reproduction brings together his finest engravings of...

Florilegium Imperiale

This is the first scholarly treatise that tells the remarkable story behind the making of the *Flora Graeca*, the monumental collection of illustrations and descriptions of plants in Greece, Cyprus and Turkey. First described by Dioskorides in the sixth century, the flora and fauna of the Levant was neglected until the gentlemen botanists-naturalists John Sibthorp and John Hawkins, accompanied by illustrator Ferdinand Bauer, travelled there. Bauer produced a class of paintings superior to anything of their kind in existence then, and his work was to become one of the most valuable treasures of the University of Oxford. Based on the original diaries, letters, and specimens, this fine work is illustrated with the original illustrations which are still housed at the Department of Plant Sciences there.

Theodore de Bry. America

Showcasing cutting-edge underwater photography from the world's leading marine and nature photographers, *The Life & Love of the Sea* is a breathtaking visual tour of the ocean's great diversity. Readers will experience land meeting sea with images of dramatic coastlines, barrier reefs, and island chains, as well as the spectacular power of the ocean through a stunning collection of wave photographs. Offering an extensive survey of the ocean's many fascinating inhabitants, Blackwell presents incredible images of everything from whales to manta rays to seals to endless schools of fish to the creatures that reside in the deepest recesses of the ocean floor. The book also makes available bonus footage via a scannable QR code from multi-award-winning underwater cameraman Steven Hathaway.

The Flora Graeca Story

The Life and Love of the Sea
