The Age of Pisces and the Age of Aquarius: What They Are (Updated Explanation) - The Age of Pisces and the Age of Aquarius: What They Are (Updated Explanation) by Cosmic Cybernetics and Cosmobiology 93,466 views 6 years ago 26 minutes - The Astrological **Ages**, are created by the movement of the Vernal Equinox and the Autumnal Equinox in retrograde motion ...

Intro

Each Age lasts about 2,160 years. The Pisces Age began around the year zero and most astrologers believe roughly around the year 200. This means the Age of Aquarius begins within the next few hundred years.

The astrological ages are created by the relationship of the tropical zodiac and the sidereal zodiac. The beginning of the tropical zodiac, which is the beginning of the sign Aries (0-Aries), moves backwards through the sidereal zodiac at a speed of 30 degrees every 2,160 years (about 1 degree every 72 years, through all 360 degrees in a little over 25,000 years). This is called precession of the equinoxes.

To understand the astrological ages, you need to understand what the tropical zodiac is, what constellations look like, and what the sidereal zodiac is, and that the tropical zodiac, which is based on the equinoxes and solstices move through the constellations and the sidereal zodiac (precession of the equinoxes).
