The Official Handbook for the National Training School for Cookery

Book & CD-ROM. Training is an investment for the future, the only foundation on which success can be built. Training delivers excellence in product and performance, elevating a good restaurant into a great one. Training will keep the skills of its employees and management sharp. But in no other industry is its absence or presence as obvious as it is in the food service industry. It is hard to find good, qualified employees, and even harder to keep them. In addition, unemployment levels are low, and competition for qualified workers is tough. What's the answer? Training! Constant training and re-enforcement keeps employees and management sharp and focused, and demonstrates the company cares enough to spend time and subsequently money on them. And that's precisely what this encyclopaedic book will do for you -- be your new training manager. The first part of the book will teach you how to develop training programs for food service employees, and how to train the trainer. The book is full of training tips, tactics and how-to's that will show you proper presentation, and how to keep learners motivated both during and after the training. The second part of the book details specific job descriptions and detailed job performance skills for every position in a food service operation, from the general manager to dishwasher. There are study guides and tests for all positions. Some of the positions include General Manager, Kitchen Manager, Server, Dishwasher, Line Cook, Prep Cook, Bus Person, Host/Hostess, Bartender, Wine & Alcohol Service, Kitchen Steward, Food Safety, Employee Safety, Hotel Positions, etc. Specific instructions are provided for using equipment as well.

Excerpt from The Official Handbook for the National Training School for Cookery: Containing the Lessons on Cookery Which Constitute the Course of Instruction in the School I. This work has been written to explain in an easy way the first principles of good Cookery, and in the form of lessons is especially addressed to those who wish to carry them into practice. It has been the aim of the writer to leave no detail, however small, vaguely stated. It is taken for granted that the learner has no knowledge on the subject. The loose expressions, such as "a pinch," "a little," found in all cookery books, are therefore avoided, and precise quantities are given. II. The work is not to be regarded as an exhaustive cookery book with numerous recipes. It aims to be rather a grammar than a dictionary. III. The lessons give a sufficient number of examples of cookery illustrating many degrees of cost: thus the rich may have a dish of curried rabbit for 3s. 8d., and the poor may have a dish of curried tripe for 103D4d.
