Harvard Law Review: Volume 130, Number 6 - April 2017

The December 2013 issue of the Harvard Law Review is dedicated to the memory of Ronald Dworkin, with In Memoriam essays offered by Richard Fallon, Jr., Charles Fried, John C.P. Goldberg, Frances

Kamm, Frank Michelman, Martha Minow, and Laurence Tribe. The issue features an article by David Pozen entitled "The Leaky Leviathan: Why the Government Condemns and Condone Unlawful Disclosures of Information." The issue also includes essays by Nicola Lacey and Geoffrey Shaw examining a previously lost writing by H.L.A. Hart on discretion, as well as the publication of Hart's essay, "Discretion," itself, which he wrote while visiting at Harvard in 1956-1957. Student Notes explore such subjects as regulation of the shadow banking system, vagueness and delegation in the CFAA, and the good faith exception to the exclusionary rule. In addition, student contributions explore Recent Cases on First Amendment commercial speech doctrine and pharmaceutical marketing, school finance under state law, duty of a school to protect from bullying, warrantless search of cell phone data, and untimely raising of ineffective assistance of counsel in a habeas petition after counsel failure. A Recent Legislation summary explores restrictions on War Powers in the context of Guantanamo detainees, and a summary of Recent Legislative Debate involves the filibuster of a Texas abortion bill. Finally, there are also several summaries of Recent Publications. The Harvard Law Review is offered in a quality digital edition, featuring active Contents, linked notes, active URLs in notes, and proper formatting. The contents of Volume 127, Number 2 (Dec. 2013) include scholarly articles and essays by leading academic figures.

University of Chicago Law Review: Volume 81, Number 3 - Summer 2014

With the rise in the number of mergers and acquisitions taking place in today's business environment, there will undoubtedly be a rise in the number of bankruptcies. Completely updated, Bankruptcy and Insolvency Accounting, Seventh Edition, Volume 2 updates the most recent forms and exhibits as a result of the new Bankruptcy Abuse Prevention and Consumer Protection Act of 2005 (BAPCPA). The process of turning around a troubled business and restructuring its financial aspects is thoroughly described for controllers, CEOs, CFOs and CPAs with small businesses as clients.

Harvard Law Review: Volume 127, Number 2 - December 2013

This is the second and final volume of the business history of one of the UK's oldest and largest insurance offices, based upon probably the best archive in the business. This volume covers the period from 1870 to the absorption of the Phoenix by Sun Alliance (now Royal and Sun Alliance) in 1984. The Phoenix papers are used to analyse the triumphs and trials, not only of a single insurance venture, but of an entire financial sector in a notably turbulent century. Insurance is concerned with the way people drive, the way they retire, or buy their houses, or invest, or educate their children, or go to war. It follows that a major insurance history also throws light on many aspects of modern British social history. As the great composite offices expanded to offer fire, accident, marine, and life insurance across a single 'counter', so they caught within their dealings an increasingly representative slice of British commercial and social life.

M-health can be defined as the 'emerging mobile communications and network technologies for health-care systems.' This book paves the path toward understanding the future of m-health technologies and services and also introducing the impact of mobility on existing e-health and commercial telemedical

systems. M-Health: Emerging Mobile Health Systems presents a new and forward-looking source of information that explores the present and future trends in the applications of current and emerging wireless communication and network technologies for different healthcare scenarios. It also provides a discovery path on the synergies between the 2.5G and 3G systems and other relevant computing and information technologies and how they prescribe the way for the next generation of m-health services. The book contains 47 chapters, arranged in five thematic sections: Introduction to Mobile M-health Systems, Smart Mobile Applications for Health Professionals, Signal, Image, and Video Compression for M-health Applications, Emergency Health Care Systems and Services, Echography Systems and Services, and Remote and Home Monitoring. This book is intended for all those working in the field of information technologies in biomedicine, as well as for people working in future applications of wireless communications and wireless telemedical systems. It provides different levels of material to researchers, computing engineers, and medical practitioners interested in emerging e-health systems. This book will be a useful reference for all the readers in this important and growing field of research, and will contribute to the roadmap of future m-health systems and improve the development of effective healthcare delivery systems.

Financial Services and General Government Appropriations for 2016

During the period of America's swiftest industrialization and urban growth, fire struck fear in the hearts of city dwellers as did no other calamity. Before the Civil War, sweeping blazes destroyed more than \$200 million in property in the nation's largest cities. Between 1871 and 1906, conflagrations left Chicago, Boston, Baltimore, and San Francisco in ruins. Into the twentieth century, this dynamic hazard intensified as cities grew taller and more populous, confounding those who battled it. Firefighters' death-defying feats captured the popular imagination but too often failed to provide more than symbolic protection. Hundreds of fire insurance companies went bankrupt because they could not adequately deal with the effects of even smaller blazes. Firefighters and fire insurers created a physical and cultural infrastructure whose legacy—in the form of heroic firefighters, insurance policies, building standards, and fire hydrants—lives on in the urban built environment. In *Eating Smoke*, Mark Tebeau shows how the changing practices of firefighters and fire insurers shaped the built landscape of American cities, the growth of municipal institutions, and the experience of urban life. Drawing on a wealth of fire department and insurance company archives, he contrasts the invention of a heroic culture of firefighters with the rational organizational strategies by fire underwriters. Recognizing the complexity of shifting urban environments and constantly experimenting with tools and tactics, firefighters fought fire ever more aggressively—"eating smoke" when they ventured deep into burning buildings or when they scaled ladders to perform harrowing rescues. In sharp contrast to the manly valor of firefighters, insurers argued that the risk was quantifiable, measurable, and predictable. Underwriters managed hazard with statistics, maps, and trade associations, and they eventually agitated for building codes and other reforms, which cities throughout the nation implemented in the twentieth century. Although they remained icons of heroism, firefighters' cultural and institutional authority slowly diminished. Americans had begun to imagine fire risk as an economic abstraction. By comparing the simple skills employed by firefighters—climbing ladders and manipulating hoses—with the mundane technologies—maps and accounting charts—of insurers, the author demonstrates that the daily routines of both groups were instrumental in making intense urban and industrial expansion a less precarious endeavor.
