From illegally entering a closed area in rural China with a pack full of pot to paddling across a crocodile-infested lake in a leaky Zodiac in the Dominican Republic to crash landing in a hot-air balloon in the most-redneck part of Appalachia, Fayhee juxtaposes highly improbable misadventures with tender tales about losing his beloved dog, about the scars that define people in the High Country and about the friendships forged in the most remote parts of the American West.

The campfire for ages has been the place of council and friendship and story-telling. The mystic glow of the fire quickens the mind, warms the heart, awakens memories of happy, glowing tales that fairly leap to the lips. The Boy Scouts of America has incorporated the "campfire" in its program for council and friendship and story-telling. In one volume, the Boy Scouts Book of Campfire Stories makes available to scoutmasters and other leaders a goodly number of stories worthy of their attention, and when well told likely to arrest and hold the interest of boys in their early teens, when "stirs the blood—to bubble in the veins." At this time, when the boy is growing so rapidly in brain and body, he can have no better teacher than some mighty woodsman. Now should be presented to him stirring stories of the adventurous lives of men who live in and love the out-of-doors. Says Professor George Walter Fiske: "Let him emulate savage woodcraft; the woodsman's keen, practiced vision; his steadiness of nerve; his contempt for pain, hardship and the weather; his power of endurance, his observation and heightened senses; his delight in out-of-door sports and joys and unfettered happiness with untroubled sleep under the stars; his calmness, self-control, emotional steadiness; his utter faithfulness in friendships; his honesty, his personal bravery." The Editor likes to think that quite a few of the stories found in the Boy Scouts Book of Campfire[vi] Stories present companions for the mind of this hardy sort, and hopes, whether boys read or are told these stories, they will prove to be such as exalt and inspire while they thrill and entertain.

At a glance, high fashion and feminism seem unlikely partners. Between the First and Second World Wars, however, these forces combined femininity and modernity to create the new, modern French woman. In this engaging study, Mary Lynn Stewart reveals the fashion industry as an integral part of women's transition into modernity. Analyzing what female columnists in fashion magazines and popular women novelists wrote about the "new silhouette," Stewart shows how bourgeois women feminized the more severe, masculine images that elite designers promoted to create a hybrid form of modern that both emancipated women and celebrated their femininity. She delves into the intricacies of marketing the new clothes and the new image to middle-class women and examines the nuts

and bolts of a changing industry—including textile production, relationships between suppliers and department stores, and privacy and intellectual property issues surrounding ready-to-wear couture designs. *Dressing Modern Frenchwomen* draws from thousands of magazine covers, advertisements, fashion columns, and features to uncover and untangle the fascinating relationships among the fashion industry, the development of modern marketing techniques, and the evolution of the modern woman as active, mobile, and liberated.

Technics and Civilization first presented its compelling history of the machine and critical study of its effects on civilization in 1934—before television, the personal computer, and the Internet even appeared on our periphery. Drawing upon art, science, philosophy, and the history of culture, Lewis Mumford explained the origin of the machine age and traced its social results, asserting that the development of modern technology had its roots in the Middle Ages rather than the Industrial Revolution. Mumford sagely argued that it was the moral, economic, and political choices we made, not the machines that we used, that determined our then industrially driven economy. Equal parts powerful history and polemic criticism, *Technics and Civilization* was the first comprehensive attempt in English to portray the development of the machine age over the last thousand years—and to predict the pull the technological still holds over us today. “The questions posed in the first paragraph of *Technics and Civilization* still deserve our attention, nearly three quarters of a century after they were written.”—*Journal of Technology and Culture*

Research on human athletes is changing what we know about stretching. For example, it is now recognized that aggressive stretching should only take place after muscles are warmed up and shortened from exertion. Authors Sasha and Ashley Foster have applied this latest research to dogs many of whom compete in vigorous canine sporting events so that you can learn how to safely and effectively stretch your dog to prevent injuries, maintain joint integrity, and improve your dog's fitness whether he is an elite canine athlete or a lap dog. Over 300 photos and diagrams demonstrate how to safely and effectively stretch each major muscle group in great detail. Special emphasis is given on correct hand placement for joint stabilization and how to maintain straight plane movement. Stretching routines are presented for both large and small dogs, older dogs, and those that are involved in a variety of dog sports.

Bruce Lee: The Art of Expressing the Human Body

"Lash is capable of explaining the mind-bending concepts of Gnosticism and pagan mystery cults with bracing clarity and startling insight. . . . [His] arguments are often lively and entertaining."—Los Angeles Times Fully revised and with a new preface by the author, this timely update is perfect for readers of The Immortality Key. Since its initial release to wide acclaim in 2006, Not in His Image has transformed the lives of readers around the world by presenting the living presence of the Wisdom Goddess as never before revealed, illustrating that the truth of an impactful Gnostic message cannot be hidden or destroyed. With clarity, author John Lamb Lash explains how a little-known messianic sect propelled itself into a dominant world power, systematically wiping out the great Gnostic spiritual teachers, the Druid priests, and the shamanistic healers of Europe and North Africa. Early Christians burned libraries and destroyed temples in an attempt to silence the ancient truth-tellers and keep their own secrets. Not in His Image delves deeply into ancient Gnostic writings to reconstruct the story early Christians tried to scrub from the pages of history, exploring the richness of the ancient European Pagan spirituality—the Pagan Mysteries, the Great Goddess, Gnosis, the myths of Sophia and Gaia. In the 15th Anniversary Edition, Lash doubles down on his original argument against redemptive ideology and authoritarian deceit. He shows how the Gnostics clearly foresaw the current program of salvation by syringe, and places the Sophianic vision of life centrally in the battle to expose and oppose the evil agenda of transhumanism, making this well-timed update more relevant than ever. "Sometimes a book changes the world. Not in His Image is such a book. It is clear, stimulating, well-researched, and sure to outrage the experts. . . . Get it. Improve not just your own life, but civilization's chances for survival."—Roger Payne, author of Among Whales

This book condemns slavery, by appealed to whites' rational self-interest, rather than any altruism towards blacks. Helper claimed that slavery hurt the Southern economy by preventing economic development and industrialization, and that it was the main reason why the South had progressed so much less than the North since the late 18th century.

The Deerslayer, or The First War-Path (1841) was the last of James Fenimore Cooper's Leatherstocking Tales to be written. Its 1740-1745 time period makes it the first installment chronologically and in the lifetime of the hero of the Leatherstocking tales, Natty Bumppo. The novel's setting on Otsego Lake in central, upstate New York, is the same as that of The Pioneers, the first of the Leatherstocking Tales to be published (1823). The Deerslayer is considered to be the prequel to the rest of the series. Fenimore Cooper begins his work by relating the astonishing advance of civilization in New York State, which is the setting of four of his five Leatherstocking Tales.

"This book may be just the antidote for an actor who has completely lost faith or given up control over his destiny." – Backstage West, Los Angeles "If this book is any indication of things to come, we are going to be hearing a lot about Monroe Mann." – Bob Fraser, Emmy-recognized actor, producer, writer, and director, and author of You Must Act "A how-to for aspiring stars based on boot-camp persistence." – CNN's Wolf Blitzer "To make it big, you need the Real Deal. Mr. Mann is the Real Deal." – Jay Conrad

Levinson, author of the Guerrilla Marketing series of books This book is unlike any other you will read on the subject of acting. It is not about how to find good headshots, how to perfect a monologue, or how to find an agent, though these subjects are indirectly touched upon. It's about how to succeed in the arts. It's about why 99% of aspiring professional actors fail to even get their foot in the door, and how the other 1% somehow do get their foot in the door... and actually stay there. Once and for all, this book aims to shatter the absurd notion that acting professionally is a privilege for only a select few, and that without a 'break' given by the industry, there is no hope for success. The blame for your failure (and the credit for your success) can only be put on yourself, and not the business. Forget the nay-sayers; wave goodbye to the critics; laugh at the agents who won't respond to you. The Theatrical Juggernaut is going to inspire you like no other 'how-to' book has ever done before.

In 1968, during Albert Lepard's fifth escape from a life sentence at Parchman Penitentiary, he kidnapped Lovejoy Boteler, then eighteen years old, from his family's farm in Grenada, Mississippi. Three decades later, still beset by half-buried memories of that time, Boteler began researching his kidnapper's nefarious, sordid life to discover how and why this terrifying abduction occurred. *Crooked Snake: The Life and Crimes of Albert Lepard* is the true story of Lepard, sentenced to life in Parchman for the murder of seventy-four-year-old Mary Young in 1959. During the course of his sentence, Lepard escaped from prison six times in fourteen years. In *Crooked Snake*, Boteler pieces together the story of this cold-blooded murderer's life using both historical records and personal interviews—over seventy in all—with ex-convicts who gravitated to and ran with Lepard, the family members who fed and sheltered the fugitive during his escapes, the law officers who hunted him, and the regular folks who were victimized in his terrible wake. Throughout *Crooked Snake*, Boteler reveals his kidnapper's hardscrabble childhood and tracks his whereabouts before his incarceration and during his jailbreaks. Lepard's escapes take him to Florida, Michigan, Kansas, California, and Mexico. *Crooked Snake* captures a slice of history and a landscape that is fast disappearing. These vignettes describe Mississippi's countryside and spirit, ranging from sharecropper family gatherings in Attala County's Seneasha Valley to the twenty-thousand-acre Parchman farm and its borderlands teeming with alligator, panther, bear, and wild boar.
