In this pioneering, practical book for parents, neuroscientist Daniel J. Siegel and parenting expert Tina Payne Bryson explain the new science of how a child's brain is wired and how it matures. Different parts of a child's brain develop at different speeds and understanding these differences can help you turn any outburst, argument, or fear into a chance to integrate your child's brain and raise calmer, happier children. Featuring clear explanations, age-appropriate strategies and illustrations that will help you explain these concepts to your child, *The Whole-Brain Child* will help your children to lead balanced, meaningful, and connected lives using twelve key strategies, including: Name It to Tame It: Corral raging right-brain behavior through left-brain storytelling, appealing to the left brain's affinity for words and reasoning to calm emotional storms and bodily tension. Engage, Don't Enrage: Keep your child thinking and listening, instead of purely reacting. Move It or Lose It: Use physical activities to shift your child's emotional state. Let the Clouds of Emotion Roll By: Guide your children when they are stuck on a negative emotion, and help them understand that feelings come and go. SIFT: Help children pay attention to the Sensations, Images, Feelings, and Thoughts within them so that they can make better decisions and be more flexible. Emotional Intelligence Does IQ define our destiny? Daniel Goleman argues that our view of human intelligence is far too narrow, and that our emotions play a major role in thought, decision making and individual success. Self-awareness, impulse control, persistence, motivation, empathy and social deftness are all qualities that mark people who excel: whose relationships flourish, who are stars in the workplace. With new insights into the brain architecture underlying emotion and rationality, Goleman shows precisely how emotional intelligence can be nurtured and strengthened in all of us. Working with Emotional Intelligence Do you want to be more successful at work? Do you want to improve your chances of promotion? Do you want to get on better with your colleagues? Daniel Goleman draws on unparalleled access to business leaders around the world and the thorough research that is his trademark. He demonstrates that emotional intelligence at work matters twice as much as cognitive abilities such as IQ or technical expertise in this inspiring sequel.

Emotional Intelligence Does IQ define our destiny? Daniel Goleman argues that our view of human intelligence is far too narrow, and that our emotions play a major role in thought, decision making and individual success. Self-awareness, impulse control, persistence, motivation, empathy and social deftness are all qualities that mark people who excel: whose relationships flourish, who are stars in the workplace. With new insights into the brain architecture underlying emotion and rationality, Goleman shows precisely how emotional intelligence can be nurtured and strengthened in all of us. Working with Emotional Intelligence Do you want to be more successful at work? Do you want to improve your chances of promotion? Do you want to get on better with your colleagues? Daniel Goleman draws on unparalleled access to business leaders around the world and the thorough research that is his trademark. He demonstrates that emotional intelligence at work matters twice as much as cognitive abilities such as IQ or technical expertise in this inspiring sequel.

The Inward Empire

A Barnes & Noble Discover Great New Writers Selection In the vein of *The Noonday Demon* and *When Breath Becomes Air*, a father's "remarkable and revelatory" account of navigating his own neurological decline while watching in wonder as his young daughter's brain activity blossoms, a stunning examination of neurology, loss, and the meaning of life. (The Sunday Times) Soon after his daughter Leontine is born, 36-year old Christian Donlan's world shifted an inch to the left. He started to miss door handles and light switches when reaching for them. He was suddenly unable to fasten the tiny buttons on his new daughter's clothes. These experiences were the early symptoms of multiple sclerosis, an incurable and degenerative neurological illness. As Leontine starts to investigate the world around her, Donlan too finds himself in a new environment, a "spook country" he calls the "Inward Empire," where reality starts to break down in bizarre, frightening, sometimes beautiful ways. Rather than turning away from this landscape, Donlan summons courage and curiosity and sets out to explore, a tourist in his own body. The result is this exquisitely observed, heartbreaking, and uplifting investigation into the history of neurology, the joys and anxieties of fatherhood, and what remains after everything we take for granted - including the functions that make us feel like ourselves - has been stripped away. Like Andrew Solomon, Paul Kalathini, and William Styron, Donlan brings meaning, grace, playfulness, and dignity to an experience that terrifies and confounds us all.

Empire's Inward Turn

This ambitious book investigates a major yet underexplored nexus of themes in Roman cultural history: the evolving tropes of enclosure, retreat and compressed space within expanding, potentially borderless empire. In Roman writers' exploration of real and symbolic enclosures - caves, corners, villas, bathhouses, the 'prison' of the human body itself - we see the aesthetic, philosophical and political intersecting in fascinating ways, as the machine of empire is recast in tighter and tighter shapes. Victoria Rimell brings ideas and methods from literary theory, cultural studies and philosophy to bear on an extraordinary range of ancient texts rarely studied in juxtaposition, from Horace's Odes, Virgil's Aeneid and Ovid's Ibis, to Seneca's Letters, Statius' Achilleid and Tacitus' Annals. A series of epilogues puts these texts in conceptual dialogue with our own contemporary art world, and emphasizes the role Rome's imagination has played in the history of Western thinking about space, security and dwelling.

The Closure of Space in Roman Poetics

Where do we look when we look inward? In what sort of space does our inner life take place? Augustine said that to turn inward is to find oneself in a library of memories, while the Indian Buddhist tradition holds that we are self-illuminating beings casting light onto a world of shadows. And a disquieting set of dissenters has claimed that inwardness is merely an illusion—or, worse, a deceit. Jonardon Ganeri explores philosophical reflections from many of the world's intellectual cultures, ancient and modern, on how each of us inhabits an inner world. In brief and lively chapters, he ranges across an unexpected assortment of diverse thinkers: Buddhist, Hindu, Islamic, Chinese, and Western philosophy and literature from the Upanicads, Socrates, and Avicenna to Borges, Simone Weil, and RashMmon. Ganeri examines the various metaphors that have been employed to explain interiority—shadows and mirrors, masks and disguises, rooms and enclosed spaces—as well as the interfaces and boundaries between inner and outer worlds. Written in a cosmopolitan spirit, this book is a thought-provoking consideration of the value—or peril—of turning one's gaze inward for all readers who have sought to map the geography of the mind.

Inwardness

The Company of Scotland and its attempts to establish the colony of Caledonia on the inhospitable isthmus of Panama in the late seventeenth century is one of the most tragic moments of Scottish history. Devised by William Paterson, the stratagem was to create a major trading station between Europe and the East. It could have been a triumph, but inadequate preparation and organization ensured it was a catastrophe - of the 3000 settlers who set sail in 1688 and 1699, only a handful returned, the rest having succumbed to disease, and the enormous financial loss was a key factor in ensuring union with England in 1707. Based on archive research in the UK and Panama, as well as extensive travelling in Darien itself, John McKendrick explores this fascinating and seminal moment in Scottish history and uncovers fascinating new information from New World archives about the role of the English and Spanish, and about the identities of the settlers themselves.

Long remembered chiefly for its modernist exhibitions on the South Bank in London, the 1951 Festival of Britain also showcased British artistic creativity in all its forms. In *Tonic to the Nation*, Nathaniel G. Lew tells the story of the English classical music and opera composed and revived for the Festival, and explores how these long-overlooked components of the Festival helped define English music in the post-war period. Drawing on a wealth of archival material, Lew looks closely at the work of the newly chartered Arts Council of Great Britain, for whom the Festival of Britain provided the first chance to assert its authority over British culture. The Arts Council devised many musical programs for the Festival, including commissions of new concert works, a vast London Season of almost 200 concerts highlighting seven centuries of English musical creativity, and several schemes to commission and perform new operas. These projects were not merely directed at bringing audiences to hear new and old national music, but to share broader goals of framing the national repertory, negotiating between the conflicting demands of conservative and progressive tastes, and using music to forge new national definitions in a changed post-war world.

Contemporary America, with its unparalleled armaments and ambition, seems to many commentators a new empire. Others angrily reject the designation. What stakes would being an empire have for our identity at home and our role abroad? A preeminent American historian addresses these issues in light of the history of empires since antiquity. This elegantly written book examines the structure and impact of these mega-states and asks whether the United States shares their traits and behavior. Eschewing the standard focus on current U.S. foreign policy and the recent spate of pro- and anti-empire polemics, Charles S. Maier uses comparative history to test the relevance of a concept often invoked but not always understood. Marshaling a remarkable array of evidence—from Roman, Ottoman, Moghul, Spanish, Russian, Chinese, and British experience—Maier outlines the essentials of empire throughout history. He then explores the exercise of U.S. power in the nineteenth and twentieth centuries, carefully analyzing its economic and strategic sources and the nation's relationship to predecessors and rivals. To inquire about empire is to ask what the United States has become as a result of its wealth, inventiveness, and ambitions. It is to confront lofty national aspirations with the realities of the violence that often attends imperial politics and thus to question both the costs and the opportunities of the current U.S. global ascendancy. With learning, dispassion, and clarity, *Among Empires* offers bold comparisons and an original account of American power. It confirms that the issue of empire must be a concern of every citizen.

Martyrs create space and time through the actions they take, the fate they suffer, the stories they prompt, the cultural narratives against which they take place and the retelling of their tales in different places and contexts. The title "Desiring Martyrs" is meant in two senses. First, it refers to protagonists and antagonists of the martyrdom narratives who as literary characters seek martyrs and the way they inscribe certain kinds of cultural and social desire. Second, it describes the later celebration of martyrs via narrative, martyrdom acts, monuments, inscriptions, martyria, liturgical commemoration, pilgrimage, etc. Here there is a cultural desire to tell or remember a particular kind of story about the past that serves particular communal interests and goals. By applying the spatial turn to these ancient texts the volume seeks to advance a still nascent social geographical understanding of emergent Christian and Jewish martyrdom. It explores how martyr narratives engage pre-existing time-space configurations to result in new appropriations of earlier traditions.

The Fall of the Roman Empire

A pathbreaking introduction to eighteenth-century metaphors of the mind that recasts the grand narrative of the Enlightenment in terms of its tropes and figures. An encyclopedic dictionary along the lines of Voltaire's classic *Dictionnaire Philosophique*, *Metaphors of Mind* provides an in-depth look at the myriad ways in which Enlightenment writers used figures of speech to characterize the mind. Drawn from Brad Pasanek's massive online archive, <http://metaphorized.net>, this volume constitutes a veritable treasury of mental metaphors. Dividing the book into eleven broad metaphorical categories—Animals, Coinage, Court, Empire, Fetters, Impressions, Inhabitants, Metal, Mirror, Rooms, and Writing—Pasanek maps out constellations of metaphors. He frames his collection of literary excerpts in each section with a more descriptive and theoretical discussion of what he calls "desultory reading," a form of unsystematic perusal of writing frequently employed by Enlightenment thinkers. By surveying the printed past alongside the digital present, the book treats eighteenth-century writing as its topic while essentially exemplifying its rhetorical approach. More than an exercise in quotation, this intellectual history offers illuminating readings of fragmentary literary works and confrontations with neoclassical and contemporary theories of metaphor. The book's entries complicate received ideas about Locke's blank slate, question M. H. Abrams' claims about mirrors and lamps, and chart changing frequencies of metal metaphors in a moment of industrial revolution. The book also responds to current anxieties about reading and the mass digitization of literature, touching on recent discussions of "distant reading," "shallow reading," and "surface reading." Promoting critical and creative anachronism, *Metaphors of Mind* redefines the notion of an archive in the age of Amazon and Google Books.

China's Last Empire

A collection of major articles representing some of the best historical research by some of the world's most distinguished historians.

The Panoplist, and Missionary Herald

'I have not become the King's First Minister in order to preside over the liquidation of the British Empire.' These notorious words, spoken by Churchill in 1942, encapsulate his image as an imperial die-hard, implacably opposed to colonial freedom – a reputation that has prevailed, and which Churchill willingly embraced to further his policies. Yet, as a youthful minister at the Colonial Office before World War I, his political opponents had seen him as a Little Englander and a danger to the Empire. Placing Churchill in the context of his times and his contemporaries, Richard Toye evaluates his position on key Imperial questions and examines what was conventional about Churchill's opinions and what was unique. Combining a lightness of touch and entertaining storytelling with expert and insightful analysis, the result is a vivid and dynamic account of a remarkable man and an extraordinary era. 'Wonderfully informative' *Daily Telegraph* 'Excellent' *Spectator* 'Mature, intelligent, thoughtful, judicious' *Washington Times* 'One of Britain's smartest young historians' *Independent*

The Missionary Herald

"The difference between French and German definitions of citizenship is instructive - and, for millions of immigrants from North Africa, Turkey, and Eastern Europe, decisive. Rogers Brubaker shows how this difference - between the territorial basis of the French citizenry and the German emphasis on blood descent - was shaped and sustained by sharply differing understandings of nationhood, rooted in distinctive French and German paths to nation-statehood". --Publisher.

Comrades & Capitalists

The United States is outsourcing its border patrol abroad—and essentially expanding its borders in the process. The twenty-first century has witnessed the rapid hardening of international borders. Security, surveillance, and militarization are widening the chasm between those who travel where they please and those whose movements are restricted. But that is only part of the story. As journalist Todd Miller reveals in *Empire of Borders*, the nature of US borders has changed. These boundaries have effectively expanded thousands of miles outside of US territory to encircle not simply American land but Washington's interests. Resources, training, and agents from the United States infiltrate the Caribbean and Central America; they reach across the Canadian border; and they go even farther afield, enforcing the division between Global South and North. The highly publicized focus on a wall between the United States and Mexico misses the bigger picture of strengthening border enforcement around the world. *Empire of Borders* is a tremendous work of narrative investigative journalism that traces the

rise of this border regime. It delves into the practices of “extreme vetting,” which raise the possibility of “ideological” tests and cyber-policing for migrants and visitors, a level of scrutiny that threatens fundamental freedoms and allows, once again, for America’s security concerns to infringe upon the sovereign rights of other nations. In Syria, Guatemala, Kenya, Palestine, Mexico, the Philippines, and elsewhere, Miller finds that borders aren’t making the world safe—they are the frontline in a global war against the poor.

Love and Magic

Throughout much of history, a critical driving force behind global economic development has been the response of society to the scarcity of key natural resources. Increasing scarcity raises the cost of exploiting existing natural resources and creates incentives in all economies to innovate and conserve more of these resources. However, economies have also responded to increasing scarcity by obtaining and developing more of these resources. Since the agricultural transition over 12,000 years ago, this exploitation of new ‘frontiers’ has often proved to be a pivotal human response to natural resource scarcity. This book provides a fascinating account of the contribution that natural resource exploitation has made to economic development in key eras of world history. This not only fills an important gap in the literature on economic history but also shows how we can draw lessons from these past epochs for attaining sustainable economic development in the world today.

Europe after Empire

In this revisionist history of the eighteenth-century Qing Empire from a maritime perspective, Ronald C. Po argues that it is reductive to view China over this period exclusively as a continental power with little interest in the sea. With a coastline of almost 14,500 kilometers, the Qing was not a landlocked state. Although it came to be known as an inward-looking empire, Po suggests that the Qing was integrated into the maritime world through its naval development and customs institutionalization. In contrast to our orthodox perception, the Manchu court, in fact, deliberately engaged with the ocean politically, militarily, and even conceptually. The Blue Frontier offers a much broader picture of the Qing as an Asian giant responding flexibly to challenges and extensive interaction on all frontiers - both land and sea - in the long eighteenth century.

Metaphors of Mind

From the Stone Age to the Internet Age, this book tells the story of human sociocultural evolution. It describes the conditions under which hunter-gatherers, horticulturalists, agricultural states, and industrial capitalist societies formed, flourished, and declined. Drawing evidence from archaeology, ethnography, linguistics, historical documents, statistics, and survey research, the authors trace the growth of human societies and their complexity, and they probe the conflicts in hierarchies both within and among societies. They also explain the macro-micro links that connect cultural evolution and history with the development of the individual self, thinking processes, and perceptions. Key features of the text Designed for undergraduate and graduate social science classes on social change and globalization topics in sociology, world history, cultural geography, anthropology, and international studies. Describes the evolution of the modern capitalist world-system since the fourteenth century BCE, with coverage of the rise and fall of system leaders: the Dutch in the seventeenth century, the British in the nineteenth century, and the United States in the twentieth century. International trade became much less multilateral during the 1930s. Previous studies, looking at aggregate trade flows, have argued that discriminatory trade policies had comparatively little to do with this. Using highly disaggregated information on the UK’s imports and trade policies, we find that policy can explain the majority of Britain’s shift towards Imperial imports in the 1930s. Trade policy mattered, a lot.

Churchill's Empire

The twelve studies of empire-building and empire-builders which make up this volume range widely across the dream world that was the British Empire from the late eighteenth century to the Second World War. The essays re-interpret the work of imperial heroes, eminent historians, and fictional heroines. They illustrate the variety of techniques used by British empire-builders and the variety of explanations they gave to account for their sometimes infamous behaviour.
