Use 2 simple processes to help clear your lungs
The 1st stage is called the Mucus Loosening and Mobilization process
assisting in loosening and mobilisation of mucus and blockages in your airways, which may reduce the airflow of your lungs
and assists in helping you to remove the mucus and materials from your airway by combining the device with induced coughing

Gather a glass of water and tissues. Relax and assume either an upright stance or an upright sitting position

Take a slow deep breath into your lungs, to the point beyond a normal breath, but do not fill lungs completely

Place the device mouthpiece into your mouth, breathe into the device for 3 seconds, while adjusting the device by tilting it

Exhale beyond a normal breath, but do not empty lungs completely

Attempt to suppress any coughing

Repeat these steps for 5 to 10 breaths.

Breathe in slowly, filling lungs completely

Hold breath for 2 to 3 seconds.

Place the device mouthpiece into your mouth, breathe forcefully into the device

Repeat these steps for 1 to 2 breaths, and Initiate a cough
